BNY MELLON GLOBAL FUNDS, PLC

BACKGROUND TO THE COMPANY

The following information is derived from and should be read in conjunction with the full text and definitions section in the prospectus.

STRUCTURE

BNY Mellon Global Funds, plc (the "Company") was incorporated in the Republic of Ireland as a public limited company on 27 November 2000 with registration number 335837 under the Companies Act 2014, as amended. The Company changed its name from Mellon Global Funds, plc to BNY Mellon Global Funds, plc, effective 3 June 2008.

The Company is an open-ended umbrella type investment

company with variable capital organised under the laws of Ireland, with segregated liability between sub-funds, individually referred to as the "Fund" and collectively the "Funds". The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the "Central Bank") as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"). The Company currently comprises of 48 active Funds as at 30 June 2021 (31 December 2020: 48).

The history of the Funds within the Company as at the date of approval of this report and accounts is as follows:

INVESTMENT MANAGERS' REPORTS^

ECONOMIC & MARKET OVERVIEW

Introduction

The six months to 30 June 2021 produced notably strong gains for equity investors but disappointing ones for bond investors. Recovering economic growth was the main factor behind the divergent *returns* of *equity* and bond markets. *Equity* markets were boosted by the gradual recovery in economic activity following the severe impact of the Covid-19 pandemic. Bond markets were rocked by rising long-term *inflation* expectations resulting from the economic recovery, and consequently, the rise in bond *yields*.

The November announcement of three Covid-19 vaccines caused equities to rally strongly at the turn of the year and in early 2021, while bonds fell. *Gross Domestic Product (GDP)* continued to recover in 2021. Data from the final quarter of 2020 and the first quarter of 2021 showed economic recovery in many countries, although the *eurozone* was a prominent exception as it experienced a further mild recession. The UK economy also fell, albeit by less than was expected. Employment and retail data improved in most regions of the world.

Equity markets continued to move higher throughout 2021 as vaccines were rolled out. Further waves of the virus were felt in Europe and other countries, and worrying mutant strains materialised across many regions, which delayed the unlocking of restrictions. This was the case in the UK, where the delta variant delayed a full unlocking of restrictions towards the end of the period. In Japan, a renewed surge in cases in major urban areas such as Tokyo and Osaka provoked a great deal of local opposition concerning the upcoming Olympic Games.

Worries about rising *inflation* caused *volatility* in *equity* markets but ultimately did not derail them, as central banks continued to provide strong *monetary policy* support to markets and suggested that the rise in *inflation* was driven largely by temporary factors. *Inflation* rates rose markedly in many countries, in some cases reaching decade-high levels. Consequently, government bond *yields* rose dramatically through 2021, touching levels not seen for several years. However, in the second quarter of 2021 *yields* fell as the market began to soften its *inflation* estimates and the US Federal Reserve's (Fed) meeting in June removed concern that the Fed would be strategically patient and let the economy overheat, which also helped to lower *inflation* expectations.

North America

The US market performed strongly. The S&P 500, the Dow Jones Industrial Average and the Nasdaq indices all established new highs during the period, buoyed by growing optimism towards the economy and recovery from Covid-19. Joe Biden's successful election to the US presidency in late 2020 and an effective majority for the Democrats led to huge stimulus package announcements by Biden's administration and boosted the market. These featured a US\$1,400 cheque to many US households and a huge amount of money reserved for infrastructure and climate change projects.

The successful development and launch of two Covid-19 vaccines, from Pfizer and Moderna in the US, turbo-charged *equities* in the final few weeks of 2020 and through the early months of 2021. Optimism continued to grow that the rising vaccine coverage across the country would allow a *return* to normality.

US *monetary policy* remained accommodative throughout the period. Markets were reassured by US Fed chairman Jerome Powell's oft-reiterated guidance that the central bank would tolerate *inflation* rising above its target rate of 2% for an extended period, effectively signalling to markets that ultralow interest rates would remain in place for the foreseeable future. *Inflation* rates duly picked up in 2021, hitting 5.0% year-on-year growth in May, the highest reading in nearly 13 years. The Fed argued that *inflation* was driven more by temporary factors, such as base effects and bottlenecks, although it conceded that interest rates might increase in 2023 rather than the previously estimated 2024.

The period saw the US economy continuing to recover. Following the record growth rate recorded in the third quarter of 2020, *GDP* grew at a more modest rate in the next two quarters, rising by 4.3% in the final quarter of 2020, and by 6.4% in the first quarter of 2021, on an annualised basis. Employment data also continued to recover, with the unemployment rate dropping consistently through the period, from 6.7% in December 2020 to 5.8% in May 2021, as economic conditions and business activity gradually *returned* to normal.

By the end of the period, there was growing optimism about the economic outlook through the remainder of 2021 and into 2022.

ECONOMIC & MARKET OVERVIEW cont'd.

Europe

European *stock* markets followed a similar pattern to other global markets, enjoying a substantial rally following the announcement of Covid vaccines late in 2020, which continued into the early months of 2021. Despite further lockdowns necessitated by a third wave of the virus in the spring, markets continued to make headway, driven by investors' optimistic assessment of the economic outlook.

European markets marginally underperformed other world markets. Within Europe, the UK market, which had been a marked underperformer through 2020, modestly outperformed. Austria was the top-performing market, while Scandinavian markets and the Netherlands were notable outperformers. Only the Portuguese market fell in absolute terms.

Both the UK government and the *eurozone* continued to provide support to their ailing economies through the period. The EU maintained support to countries in the *eurozone* through its Pandemic Emergency Purchase Programme. Indeed, the ECB agreed to increase the rate of purchasing in June following accusations that it had allowed the rate to drop off during the spring. The UK government extended its furlough scheme until at least September, which helped keep the unemployment level relatively low while the Bank of England (BoE) maintained its bond purchasing scheme.

The European ex-UK economy was relatively weak and badly impacted by the virus, suffering a double-dip recession. Having recovered from a recession in 2020 with very strong growth in the third quarter of 2020, a further mild recession was confirmed when GDP fell again in the final quarter of 2020 and the first quarter of 2021, by 0.6% and 0.3%, respectively.

In the UK, *GDP* grew in the final quarter of 2020, by just 1.3% over the quarter, but then fell in the first quarter of 2021, by 1.6%, as the UK government implemented a further shutdown in early January when a second wave of the pandemic spread dramatically across the UK, causing death rates and hospitalisations to reach new peaks.

Inflation picked up across the region, although the ECB and BoE tried to reassure investors that monetary support would remain in force and that the rise in *inflation* was mainly a result of temporary factors.

Despite a worrying third wave of infections in the spring combined with mutant strains of the virus appearing across much of Europe (which caused restrictions to either remain in place or ease only gradually), investors remained optimistic about the economic outlook.

Asia

Asian markets rallied through the period, encouraged by the news of vaccines and recovering regional and global economic growth. Taiwan was the strongest performing major Asian market, benefiting from strong demand for technology parts and products. India also recovered well after a difficult period in which coronavirus cases escalated in the spring. India suffered from a new variant wave of the virus, which saw daily case numbers reach record highs. ASEAN markets such as Indonesia and the Philippines were generally weak, as their economies continued to be badly hit the pandemic.

The Chinese economy quickly recovered from Covid-19. *GDP* recuperated well through 2020 before enjoying substantial growth of 18.3% year-on-year in the first quarter of 2021, the strongest growth rate recorded since records began in 1992. China managed to report growth of 2.3% for 2020, singling it out as one of the very few countries to achieve economic growth in the year that brought the pandemic. Taiwan also managed to experience some growth in its economy in 2020, boosted, in particular, by the strong technology cycle. India experienced limited growth in the first quarter of 2021, growing by 1.6% year-on-year.

In Japan, economic data remained lacklustre through most of the period. *GDP* expanded by 11.7% in the final quarter of the calendar year. Weakness *returned* in the first quarter of 2021, as the country experienced renewed lockdowns, and *GDP* fell by 3.9%. *Inflation* remained subdued, however, and a long way below the mid to long-term official target of the Bank of Japan (2.0%). By the end of the period, consumer *inflation* was in negative territory, falling by 0.4% year-on-year in April, the seventh consecutive negative figure.

Inflation was a growing concern in other countries, not least China, where producer prices grew by 9% in June, the steepest rise for over 12 years, reflecting rising commodity and raw material prices.

In India, the *consumer price index* rose by over 6% in May, the highest rate this year as food prices continued to rise.

ECONOMIC & MARKET OVERVIEW cont'd.

Fixed income

Bond markets experienced a sharp selloff in the first six months of 2021. *Yields* had picked up in late 2020 and early 2021, as vaccines were announced and investors began to discount a full recovery from Covid-19 in 2021, before they rose dramatically during the spring on global *inflation* fears. Fixed income *returns* for the whole period were decidedly negative, particularly in the government bond sector.

Bond *yields* jumped dramatically in February, especially government bond *yields*, as expectations grew that *inflation* would gradually rise. The US 10-year *Treasury yield* almost doubled, rising from approximately 0.9% at the turn of the year to over 1.7% in late March, the highest level since early January 2020, and ended the period just below 1.5%. Similarly, the 10-year UK *Gilt yield* rose from approximately 0.2% to over 0.8% in March, before closing at around 0.75% at the end of the period. German government bond *yields* also rose materially, though remained negative. These moves in 10-year *yields* caused *yield curves* to steepen to levels not seen in many years.

The rise in inflation expectations reflected the reality of recovering economic growth as well as the likely impact of the large fiscal packages emanating from the US in particular. Inflation picked up markedly across many countries. In the US, consumer price inflation touched 5% in May, the highest growth rate in nearly 13 years. Producer price inflation hit decade-high levels in countries such as China and Germany. Statements from major central banks such as the Fed, the ECB and the BoE tried to assuage fears of rising inflation, suggesting that the rise was based on largely temporary factors. The Fed had previously stated that it was prepared to allow *inflation* to rise above its long-term target of 2.0% for an extended period of time, so investors were not too unsettled by inflation rising well above that level. However, late in the period, the Fed changed its forecast of interest rates remaining unchanged until at least 2024 to say interest rate increases may occur in 2023.

Currency and commodities

The US dollar began to recover some of its lost ground in 2021, after having weakened materially over much of the preceding two years. One of the most notable trends in currency markets in 2020 was the marked weakness in the US dollar throughout much of the year. However, the currency recovered as growth in the economy recovered, and as rising *inflation* led to speculation that the Fed would have to tighten its *monetary policy* imminently, a course of action denied by the central bank.

Despite the struggle with Covid-19, the renewed lockdown in January and a still-fragile economy, sterling was higher over the period. The strong relative growth outlook for the UK in 2021, as well as the successful and swift rollout of vaccines,

also benefited sterling. Sterling touched its highest level against the dollar in over three years.

The euro, which had rallied against other currencies through 2020, weakened marginally in 2021. This largely reflected concerns about economic recovery following new waves of the virus in the spring, which caused a tightening of restrictions in countries such as Germany and France.

The yen weakened against the US dollar over the period, partly reflecting the dollar's recovery but also the fragility of the rebound in Japan, as the country faced rising coronavirus cases in major urban areas such as Tokyo and Osaka.

Commodities recovered from the dramatic selloff in early 2020. Oil prices were strong, with West Texas Intermediate climbing to over US\$70 per barrel during the period. The improving demand/supply dynamics in the industry and growing economic optimism drove oil prices to their highest levels in over three years. Most major industrial metals, such as iron ore and zinc, experienced similar dramatic recoveries as a result of better demand and the gradual lifting of lockdown restrictions. Many commodities, such as iron ore and copper, touched new all-time highs in 2021.

Precious metals, such as gold and silver, weakened. The gold price fell in 2021, though recovered late in the period as investors and traders looked beyond *'safe havens'* as the global economy recovered.

All performance data is from 1 January 2021 to 30 June 2021, total return in local currency terms unless otherwise indicated, sourced from Lipper Hindsight and Bloomberg.

BNY MELLON ABSOLUTE RETURN BOND FUND

Over the six months under review, the Fund's Euro S share class *returned* 0.39%, net of fees, compared with -0.27% for 3 Month EURIBOR (the Cash Benchmark used as a target against which to measure the Fund's performance on a rolling 12 month basis after fees), and 1.23% for the Cash Benchmark +3% per annum (used as a target against which to measure the Fund's performance on a rolling annualised 3 year basis before fees), all in euro terms.

The Fund generated a positive *return* and outperformed the Cash *benchmark*. The global economy continued to recover while *inflation* increased. Overall, global government bond *yields* rose notably before declining slightly in June as more *hawkish* US Federal Reserve (Fed) comments, plus concerns about Covid-19's delta variant, prompted some investors to lower their longer-term growth forecasts. *Investment grade* and *high yield credit* fared well, with *spreads* tightening further.

The Fund's positive *return* was helped by its *credit* and, to a lesser degree, interest rate strategies.

On the *credit* side, *investment grade* and *high yield* bonds fared particularly well as *spreads* tightened. The Fund's positions in *asset-backed securities* (and, less significantly, loans) also registered gains.

In terms of interest rates, the Fund benefited most from its country-allocation positions: for example, its <code>long_position</code> in 20 and 30-year Japanese government bonds versus 30-year German government bonds was particularly positive in February. The <code>long</code> position in 10 and 30-year Australian government bonds (versus 10-year US <code>Treasuries</code>) added value in March. The Fund's <code>yield curve</code> positions had a neutral effect, but its <code>duration</code> exposure proved unhelpful, as <code>yields</code> fell over the second quarter. <code>Emerging markets</code> exposure was also negative, owing to losses from <code>long duration</code> positions and <code>long</code> foreign currency bias early in the review period.

Foreign currency positioning detracted, too; a *short* position in the US dollar was detrimental in June, as it appreciated against most currencies.

The *portfolio*'s positioning was adjusted across its various strategies. In terms of interest rates, changes were made to the Fund's *duration*, country selection and *yield curve* positioning. The Fund remains neutral *credit* overall, but with a continuing preference for *high yield*.

The large *fiscal policy* stimulus planned by US President Joe Biden has boosted the near-term growth outlook; further stimulus plans, if enacted, could mean growth remaining above trend for some time. However, supply chain

bottlenecks have already fostered higher *inflation*, which could prove persistent. Alternatively, the current higher *yields* may ultimately counter the desire for stronger growth and *inflation*, leading to disappointment and renewed fears of low or no economic growth. Uncertainty levels, given the degree of stimulus, seem high.

Insight Investment Management (Global) Limited July 2021

BNY MELLON ABSOLUTE RETURN EQUITY FUND

Over the six-month period under review, the Fund's Sterling R (Acc.) share class *returned* 4.52%, net of fees, compared with 0.02% for 1 Month GBP LIBOR (the Cash Benchmark used as a target against which to measure the Fund's performance on a rolling 12 month basis after fees).

Global *equity* markets generally enjoyed a positive period, owing to Covid-19 vaccination programmes, supportive central banks and sizeable *fiscal stimuli*.

The Fund generated a positive *return*, net of fees, and outperformed the Cash *benchmark* helped by a market backdrop that was more supportive to *fundamentally* driven, *stock*-picking strategies, with increased opportunities for *long-short* managers to profit from *relative value* trades.

Gross exposure remained high but fell slightly (after passing 200% in April) over the second quarter, reflecting capital recycling rather than a particular market view. Market-adjusted net exposure was close to zero, with tight hedges in place to target returns uncorrelated to moves in equity and bond markets.

Strong performers included listed investment firm Electra. In April, it announced the disposal of its holding in Sentinel, which provides water-treatment products and related services. This refocused market attention on its remaining holdings – the largest being restaurant business TGI Fridays, where management recently exited onerous leases and refined its strategy. The position in Electra was partially hedged with Restaurant Group, another casual dining operator. In June, investment vehicle Sherborne Investors (Guernsey) B, whose sole asset is its stake in Electra, announced the stake's distribution to shareholders. The manager began to take profits on the Electra position but continued to see upside in its shares, based on forecast profitability at the group's main asset, TGI Fridays.

Another strong contribution came from the long-held position in Sherborne Investors (Guernsey) C – managed by activist investor Edward Bramson, who ended his pursuit of Barclays and sold his shareholding. Proceeds from the sale will be redeployed into a new target investment.

BNY MELLON ABSOLUTE RETURN EQUITY FUND cont'd.

The manager retained the position while awaiting news of the fresh target but has now closed the relevant *hedge*.

Conversely, Knorr-Bremse, a leading braking systems supplier to rail and truck businesses, detracted after its founder and majority shareholder died – creating uncertainty over future strategic direction and a potential share overhang. The position was *hedged* with the industrials sector and a leading rolling *stock* and signalling manufacturer. The Knorr-Bremse position and its *hedge* were then exited

Dutch banking group ABN Amro also detracted. Its first-quarter results matched expectations but highlighted ongoing pressure to net interest income. Nevertheless, its revenue outlook is improving, and the benefits of share buybacks (as a means of capital *return*) remain compelling. This position was *hedged* with another European bank.

Overall, the corporate *earnings* outlook appears robust, while the *monetary* and *fiscal policy* backdrop remains supportive. However, in the manager's view peak growth seems near, with some valuations looking stretched and central banks starting to signal possible policy changes.

Insight Investment Management (Global) Limited July 2021

BNY MELLON ABSOLUTE RETURN GLOBAL CONVERTIBLE FUND

Over the six-month period under review, the Fund's Euro U (Acc.) share class returned -0.28%, net of fees, compared with a return of -0.28% for EURIBOR 1 Month, both in euro terms.

The Fund generated a negative *return* and performed in line with its *benchmark*. *Risk assets* performed strongly, supported by the rollout of Covid-19 vaccination programmes and continued sizeable *monetary* and *fiscal stimulus* from central banks and governments. Over the first quarter, expectations of economies reopening and increasing *inflation* moved global rates sharply higher and steepened *yield curves*. However, in the second quarter, bond *yields* fell and *yield curves* flattened on the view that higher growth and *inflation* would be transitory.

As the Covid-19 vaccine rollout proceeded and long dated bond *yields* trended higher, the manager focused on investments in sectors that could benefit from economies reopening, particularly in the US but also in Europe and Asia. During the first quarter, technology exposures were reduced to counteract the effects of *stock* rotation as rates rose. However, the manager added to technology and momentum positions as bond *yields* retreated in June.

Attribution was spread across numerous positions in the six months to 30 June, with no single name impacting performance by more than 20 *basis points (bps)* in either direction. *Portfolio duration* decreased over the period as the manager increased *hedges* to protect against higher interest rates as *inflation* gained momentum. Geographical allocation remained relatively static (with a small move to the US at the expense of Europe and Asia).

The Fund's overall *gross exposure* increased moderately. The manager reduced both net *equity* exposure and *leverage* over the first quarter but started reintroducing exposure once some stability *returned* to the *convertible bond* marketplace. *Leverage* was then marginally increased as new opportunities were introduced to the *portfolio*. Net *equity* exposure remained close to zero, with exposure to single names muted. *Leverage* is expected to continue moving slightly higher as markets improve.

The Fund remains positioned to benefit from the reopening of economies, as well as corporates' and consumers' willingness to spend some of the cash and savings accumulated over the last year. However, increased *volatility* is to be expected as the economic recovery builds further momentum and analysts adjust *earnings* expectations. In addition, some companies may benefit from the pricing power brought by various supply shortages. The manager has also begun to rotate out of positions that don't appear to lead to more promising opportunities. Overall *portfolio* composition remains well *diversified*, with no single sector dominating.

The Fund continues to maintain balanced *convertible bond* positioning with the largest exposures tilted toward strong *credit* and shorter-*maturity* bonds. The Fund's largest positional *credit* exposure is concentrated in holdings with implied *credit spreads* at or below 50 *bps*. The *portfolio* is positioned to trend sideways and protect capital while the current period of decreased *volatility* persists. With a lack of short-term *equity* market trends and indigestion from recent record levels of issuance, an effort is being made to scale position sizes, tighten *hedges*, and protect capital. The manager believes the steady level of *convertible bond* issuance is a positive for the long-term health of the Fund.

Insight Investment Management (Global) Limited July 2021

BNY MELLON DYNAMIC TOTAL RETURN FUND

The Fund was closed on 26 February 2021.

Over the review period, to the Fund's closure the USD A (Acc.) share class *returned* -0.08%, net of fees.

Defensive assets detracted due to a *long* position in US bonds. The US *yield curve* steepened considerably during the first quarter as the proposal for a US\$2.3 trillion infrastructure plan, *fiscal stimulus* and expectations for a strong rebound in economic activity raised *inflation* expectations. The *yield* on the 10-year US *Treasury* note rose during the first half of the year. *Short* positions in German and UK government bonds recouped *return*.

Robust risk appetite benefited growth assets, with a *long* position in US *stocks* the largest contributor. US *equities* continued to rally, reaching all-time highs during the review period. All sectors were higher, with energy outperforming after oil prices approached three-year highs. *Eurozone* and UK *equities* also added value, as both markets benefited from a strong corporate *earnings* season and an acceleration in the pace of vaccine rollouts.

Among diversifying assets, the decline in volatility over the period helped. Currency allocations also contributed; a short in the euro and a long in sterling added the most return. Among real assets, long positions in corn and soybean oil drove returns. Fewer than expected planted acres lent support to corn prices, while increased demand for vegetable oils drove soybean oil prices.

Mellon Investments Corporation July 2021

BNY MELLON GLOBAL MULTI - ASSET INCOME FUND

The Fund was closed on 26 March 2021.

Over the review period, to the Fund's closure the Euro A (Inc) share class *returned* 5.78%, net of fees, against a *return* of 3.05% for the *benchmark*, comprising 60% MSCI AC World NR 40% ICE BofA Global Broad Market EUR Hedged (60:40) Index.

Newton Investments Management Limited July 2021

BNY MELLON GLOBAL REAL RETURN FUND (EUR)

Over the six-month period under review, the Fund's Euro A share class *returned* 4.06%, net of fees, compared with a *return* of 1.72% for 1 Month EURIBOR + 4% per annum, both in euro terms.

The Fund generated a positive *return* and was ahead of the *benchmark*. The *return*-seeking core was the key driver of *returns* over the period, benefiting considerably from the robust performance of global *equities*. ConocoPhillips was the top-performing *stock*, driven by a rising oil price. Goldman Sachs rose on recovering financial activity leading

to renewed fee growth, as well as expectations of higher interest rates in the future. Shares in semiconductor equipment manufacturer ASML rose due to strong order growth.

Chinese technology businesses Tencent Music and New Oriental Education were affected by negative sentiment, specifically regarding regulatory concerns, while Asian life insurer Ping An also weighed on performance. Emerging market debt produced a negative *return*, suffering from a combination of emerging market currency weakness and rising bond *yields*.

The Fund's stabilising assets & hedging positions contributed negatively to returns largely due to protection on equity market indices which was ultimately a cost as equity indices climbed higher over the period. The position in gold also detracted from returns due to gold falling out of favour as the US Federal Reserve's comments heralded the prospect of higher real rates and a stronger US dollar, a backdrop which has typically proved challenging for the commodity.

Regarding portfolio activity, the manager's relatively constructive stance on the *macroeconomic* backdrop remained unchanged and was reflected in an increase in the Fund's equity exposure, maintaining a bias towards more economically sensitive businesses although this was somewhat moderated towards the end of the period. Activity included topping up positions in favoured cyclical names such as TE Connectivity, Bureau Veritas, Continental and Texas Instruments, while reducing exposure to a number of secular growth names, such as Accenture, Alphabet and Microsoft, which had delivered impressive performances as the Covid-19 crisis unfolded. New positions included pharmaceutical giant AstraZeneca, which seems primed to exhibit sector-leading earnings growth in the next five years; biotechnology company Novozymes, which is in a strong position to monetise its enzyme technologies; and Thermo Fisher, a producer of instruments and consumables to the global scientific community. The holding in New Oriental Education was sold due to the persistent threat of increased regulatory scrutiny in China. Other sales included Vivendi and CMS Energy.

The decision was made to initially reduce, and eventually sell, the *long* 10-year US *Treasury futures* position. This left the Fund without exposure to developed market government bonds for the first time since the global financial crisis and reflects the manager's anticipation of renewed upward pressure on *yields* as the economic recovery continues to unfold in the months ahead. The Fund's position in gold was trimmed as a result of increasing headwinds facing the precious metal.

BNY MELLON GLOBAL REAL RETURN FUND (EUR) cont'd

While the manager still sees upside across the Fund's selective holdings of *return*-seeking assets, this is likely to mean investors have already seen the lion's share of *returns* from *risk assets* this year. Given that, markets are likely to be on a more *volatile* trajectory in the second half of 2021; the manager will likely maintain relatively elevated levels of notional protection and cash, as well as looking for alternative ways of *diversifying* the stabilising layer of the *portfolio*.

Newton Investment Management Limited July 2021

BNY MELLON GLOBAL REAL RETURN FUND (GBP)

Over the six-month period under review, the Fund's Sterling C (Inc.) share class *returned* 3.19%, net of fees, compared with a *return* of 2.02% for 1 Month GBP LIBOR + 4% per annum, both in sterling terms.

The Fund generated a positive *return* and was ahead of the *benchmark*. The *return*-seeking core was the key driver of *returns* over the period, benefiting considerably from the robust performance of global *equities*. ConocoPhillips was the top-performing *stock*, driven by a rising oil price. Goldman Sachs rose on recovering financial activity leading to renewed fee growth, as well as expectations of higher interest rates in the future. Shares in semiconductor equipment manufacturer ASML rose due to strong order growth.

Chinese technology businesses Tencent Music and New Oriental Education were affected by negative sentiment, specifically regarding regulatory concerns, while Asian life insurer Ping An weighed on performance. Newton Investment Management Limited July 2021

BNY MELLON GLOBAL REAL RETURN FUND (USD)

Over the six-month period under review, the Fund's USD A share class returned 3.18%, net of fees, compared with a return of 2.05% for 1 Month USD LIBOR + 4% per annum, both in US dollar terms.

The Fund generated a positive *return* and was ahead of the *benchmark*. The *return*-seeking core was the key driver of *returns* over the period, benefiting considerably from the robust performance of global *equities*. ConocoPhillips was the top-performing *stock*, driven by a rising oil price. Goldman Sachs rose on recovering financial activity leading to renewed fee growth, as well as expectations of higher interest rates in the future. Shares in semiconductor equipment manufacturer ASML rose due to strong order growth.

Chinese technology businesses Tencent Music and New Oriental Education were affected by negative sentiment, specifically regarding regulatory concerns, while Asian life insurer Ping An also weighed on performance. Emerging market debt produced a negative *return*, suffering from a combination of emerging market currency weakness and rising bond *yields*.

The Fund's stabilising assets & hedging positions contributed negatively to returns largely due to protection on equity market indices which was ultimately a cost as equity indices climbed higher over the period. The position in gold also detracted from returns due to gold falling out of favour as the US Federal Reserve's comments heralded the prospect of higher real rates and a stronger US dollar, a backdrop which has typically proved challenging for the commodity.

Regarding portfolio activity, the manager's relatively constructive stance on the *macroeconomic* backdrop remained unchanged and was reflected in an increase in the Fund's equity exposure, maintaining a bias towards more economically sensitive businesses although this was somewhat moderated towards the end of the period. Activity included topping up positions in favoured cyclical names such as TE Connectivity, Bureau Veritas, Continental and Texas Instruments, while reducing exposure to a number of secular growth names, such as Accenture, Alphabet and Microsoft, which had delivered impressive performances as the Covid-19 crisis unfolded. New positions included pharmaceutical giant AstraZeneca, which seems primed to exhibit sector-leading earnings growth in the next five years; biotechnology company Novozymes, which is in a strong position to monetise its enzyme technologies; and Thermo Fisher, a producer of instruments and consumables to the global scientific community. The holding in New Oriental Education was sold due to the persistent threat of increased

regulatory scrutiny in China. Other sales included Vivendi and CMS Energy.

The decision was made to initially reduce, and eventually sell, the *long* 10-year US *Treasury futures* position. This left the Fund without exposure to developed market government bonds for the first time since the global financial crisis and reflects the manager's anticipation of renewed upward pressure on *yields* as the economic recovery continues to unfold in the months ahead. The Fund's position in gold was trimmed as a result of increasing headwinds facing the precious metal.

While the manager still sees upside across the Fund's selective holdings of *return*-seeking assets, this is likely to mean investors have already seen the lion's share of *returns* from *risk assets* this year. Given that, markets are likely to be on a more *volatile* trajectory in the second half of 2021; the manager will likely maintain relatively elevated levels of notional protection and cash, as well as looking for alternative ways of *diversifying* the stabilising layer of the *portfolio*.

Newton Investment Management Limited July 2021

BNY MELLON GLOBAL UNCONSTRAINED FUND

Over the six-month review period, the Fund's W Acc share class *returned* 5.48%, net of fees, compared with a *return* of 5.37% for the MSCI AC World/JP Morgan GBI (60:40) *benchmark*, in US dollar terms. The Fund produced a positive absolute *return* ahead of its comparative *benchmark*.

Equity allocation was a positive factor in the Fund's return for the period. The overweight equity positions in the UK and Europe worked particularly well, as did the overweights in the financials and industrials sectors. These more than offset the negative effects of underweights in North America, Japan and the energy and real estate sectors.

The largest positive contributor was material engineering solutions provider Applied Materials. Its shares rose on news of Taiwan Semiconductor's plans to increase capital expenditure this year, which could have positive implications for Applied Materials' sales. The company also announced strong results and increased its *earnings* guidance. Japanese industrial *stock* Ebara outperformed too, with the company announcing expectations-beating rises in net income and sales, and an increase in its *dividend*. Google owner Alphabet was another positive contributor. It released exceptionally strong first-quarter results.

BNY MELLON GLOBAL UNCONSTRAINED FUND cont'd.

The largest detractor was consumer internet company Prosus. It suffered from its significant *equity* exposure to Tencent as the Chinese government continued to investigate various e-commerce companies. As a result, shares in Prosus declined steadily over the period. In a resurgent period for the energy sector, not holding Exxon Mobil was detrimental to the Fund's *returns*. As the oil price rose on constrained supply and hopes of an economic recovery, shares in the US oil & gas company gained more than 50%. In a weak period for government bonds, a holding in Mexican government bonds detracted. Fears of higher interest rates, which entail higher bond *yields* and thus lower bond prices, were the main factor in this.

The manager established a new position in HDFC Bank, India's largest private bank. The business now has a leading market share in almost all banking products across consumer and retail banking in India and appears well positioned to benefit from rising consumption and a growing middle class. Another new holding was Danish biotechnology company Novozymes. The manager sees the company's expertise in enzymes as increasingly valuable as sustainable production methods spread. The holding in Korean lithium battery manufacturer Samsung SDI was reduced after very strong performance.

The manager added to the existing holding in eye care specialist Alcon on weakness and the belief that eye care has strong growth prospects, given ageing populations and the impact on vision from extensive screen use. The holding in Fresenius Medical Care was also increased; it provides kidney dialysis services and is another likely beneficiary of ageing populations.

The holding in Applied Materials was reduced after its strong performance, with the proceeds used to increase the position in software company SAP. The manager sold the holding in US housebuilder Lennar and reduced that in Citigroup, in both cases after sustained good performance.

Newton Investment Management Limited July 2021

BNY MELLON SUSTAINABLE GLOBAL REAL RETURN FUND (EUR)

The Fund's Euro W (Acc.) share class generated a return of 3.29%, net of fees, over the six-month review period compared with a return of 1.72% for 1 Month EURIBOR +4% per annum, both in euro terms.

The Fund produced a positive *return* and outperformed its *benchmark*. The *return*-seeking core was the key driver of *returns* over the period, benefitting considerably from the

robust performance of global *equities*. Shares in semiconductor equipment manufacturer ASML rose due to strong order growth, while Alphabet benefited from working-from-home-related demand for its services. *Defensive* holding AstraZeneca also contributed strongly. Chinese technology business Tencent Music was affected by negative sentiment, specifically regarding regulatory concerns, while Asian life insurer Ping An also weighed. The *portfolio's alternatives* and corporate debt positions produced positive *returns*. Emerging market debt was the one area in the *return*-seeking core to produce a negative *return*, as it suffered from a combination of emerging market currency weakness and rising bond *yields*.

The Fund's stabilising assets and *hedging* positions produced a negative *return* largely due to the cost of *hedging* using *equity derivatives*. The position in gold also detracted from *returns* due to gold falling out of favour as the US Federal Reserve's comments heralded the prospect of higher real rates and a stronger US dollar, a backdrop which has typically proved challenging for the commodity. Currency *hedging* into the euro also detracted from performance.

In terms of activity, a position was established in pharmaceutical giant AstraZeneca, which appears likely to exhibit sector-leading *earnings* growth in the next five years. A stake was taken in biotechnology company Novozymes, which the manager feels is in a strong position to monetise its enzyme technologies. A further addition was US banking giant JP Morgan Chase, which exhibits sector-leading returns and scale advantage and also looks well placed to extract the maximum benefit from a rising interest rate environment. A new holding was established in Thermo Fisher. The company's core business is the sale of instruments and consumables to the global scientific community, although it is increasingly moving into the lucrative and fast-growing services area. Further additions included Volkswagen and OTP Bank. Key sales included Vivendi and New Oriental Education.

The Fund's *long* 10-year US *Treasury futures* position was sold, given the challenging quarter experienced by sovereign bonds as growth and *inflation* forecasts were revised upwards. Exposure to gold was trimmed as recovering economic growth and a US dollar produced headwinds against the precious metal. A position was taken in the BNP *Volatility* Protection strategy.

The potent combination of pent-up consumer demand being unleashed, inventory restocking, and a pickup in capital expenditure by companies — allied with continuing fiscal support — looks set to lead to a relatively elevated pace of economic activity over the next few quarters. While the manager still sees upside across the Fund's selective holdings of return-seeking assets, it is likely that

BNY MELLON SUSTAINABLE GLOBAL REAL RETURN FUND (EUR)

the lion's share of *returns* from *risk assets* this year have already occurred.

Newton Investment Management Limited July 2021

BNY MELLON TARGETED RETURN BOND FUND

Over the six months under review, the Fund's USD A (Acc.) share class *returned* -0.22%, net of fees, compared with -0.50% for the Lipper Global - Bond Global USD sector average, both in USD terms.

Developed market government bond *yields* moved higher in the opening months of the year as the rollout of Covid-19 vaccination programmes raised the prospect of an acceleration in economic growth. However, accompanying this optimism were market concerns about *inflation* and the need for central banks to reverse low interest rate policies. Key benchmark rates rose month-on-month through March 2021, with US 10-year *Treasury yields* moving from 0.92% at the start of the year to a high of 1.74% on 31 March.

Those fixed income asset classes more sensitive to interest rates struggled to generate positive *total returns* during the first quarter. Reassurance from central banks that any normalisation in *monetary policy* would be both slow and measured helped stabilise fixed income markets, though *yields* did not fall back sufficiently to offset the first quarter's losses.

The Fund maintained allocations to *spread* products across corporate *credit* and *emerging markets* and held 26.8% in *investment grade* corporate bonds and a further 11.7% in *high yield* corporate bonds at the end of June. Emerging market debt exposure of 12% was split between local currency sovereign debt (Mexico and South Africa, at circa 2.5%) with the balance in *hard currency* emerging market corporate, government and *quasi-government* issuance. Securitised exposure comprising *asset-backed securities*, and *collateralised mortgage obligations* stood at circa 13.6% of Fund assets at the end of the review period.

As at 30 June, the Fund held a meaningful allocation to developed market government bonds. Fund *duration* was reduced to close to zero through *derivatives* usage in order to mitigate the risk of rising interest rates. The Fund maintained *diversification* across approximately 190 issuers and had an average *credit rating* of A.

Mellon Investments Corporation July 2021

GLOBAL EQUITY

BNY MELLON FUTURE EARTH FUND

The Fund was launched on 12 January 2021.

The Fund's W USD Acc share class *returned* 4.87%, net of fees, over the review period, (launch date 12 January 2021 to 30 June 2021) while its *benchmark*, the MSCI AC World NR Index, *returned* 9.99%, both in US dollar terms.

The Fund's *return* was driven by positive contributions from positions in machinery, chemicals, industrial conglomerates, and software industries. However, exposure to electric utilities acted as a sizeable drag on *returns*. The *portfolio* underperformed wider global *equity* markets, primarily on account of its position in utilities.

With the characteristics of the utilities sector proving less attractive over the review period, on the back of improving Covid-19-related trends, Danish multinational power company Orsted was a drag on *returns*. Hampered by some protection issues at a number of offshore wind farms, the company issued a disappointing set of results for the first quarter. Still, the manager believes that despite some market concerns around rising competition, the sizeable nature of the offshore wind development pipeline should provide Orsted with plenty of opportunities.

Elsewhere, Japanese multinational air conditioning manufacturing company Daikin Industries disappointed while despite having performed strongly over 2020 given its focus on electric vehicle-related technologies, Nidec was similarly subdued over the review period.

More positively, Japanese manufacturer Ebara performed strongly as it reported first-quarter results that surpassed expectations, having showcased improving profitability in its fluid machinery and systems division as well as *earnings* growth in precision machinery.

Holding a sizeable position in Microsoft aided the *portfolio*'s *return*. The company delivered a strong set of results for the quarter as growth in its *revenues* beat expectations. This was driven by positive trends across most of its products and geographies. The company, which has made market share gains, has benefited from the acceleration of the global digital transformation witnessed over the past year as a result of lock downs.

BNY MELLON FUTURE EARTH FUND cont'd.

With the outlook for non-residential construction improving, and thus lighting demand, the North American based provider of lighting and building management solutions, Acuity Brands performed well. Hopes US President Joe Biden's planned spending on US infrastructure may boost demand for efficient building solutions provided further support for the company's share price.

Newton Investment Management Limited July 2021

BNY MELLON FUTURE FOOD FUND

The Fund was launched on 12 January 2021.

The Fund's W USD Acc share class *returned* 8.37%, net of fees, over the review period (launch date, 12 January 2021 to 30 June 2021), while its *benchmark*, the MSCI AC World NR Index, *returned* 9.99%, both in US dollar terms.

The Fund's *return* was driven by positive contributions from machinery, chemicals, and food products. However, exposure to food delivery companies did act as a drag on this occasion. The *portfolio* underperformed wider global *equity* markets, primarily on account of its much larger *weighting* in the *consumer staples* sector.

Delivery Hero pulled back over the start of the year following a strong run. However, fourth-quarter results saw strong momentum from the food delivery company, as growth in orders, gross merchandise volume and revenue all exceeded expectations. A subsequent set of results displayed similar traits, yet weakness in the *stock* persisted. *Inflation* concerns became a significant factor in the risk appetite of investors, dampening enthusiasm for growth areas.

Chile's *equity* markets fell sharply during the review period as leftist and independent political groups saw victory in an election to determine who would draft a new constitution in the country. Rising political and regulatory risk weighed on shares in agricultural fertiliser and lithium producer SQM. Elsewhere, shares in A2 Milk moved lower following a further downgrade to its full-year *earnings* outlook.

More positively, and aided by improving farming sentiment, John Deere performed particularly well over the start of the year; it issued a strong set of results for the first quarter which showed *earnings* surpass expectations by a substantial margin. Full-year guidance also surprised to the upside as equipment demand continued to strengthen.

Novozymes also performed well as investors acknowledged the positive *earnings* momentum being enjoyed by the business. The Danish enzyme and industrial biotechnology leader reported a strong set of results for the first quarter as organic sales growth exceeded expectations.

As an owner of strip malls in less fashionable areas of the US, Brixmor was severely impacted by the Covid-19 pandemic and accompanying reduced retail activity. The business was somewhat insulated by a high exposure to food retailers, but this failed to protect its share price. However, following positive vaccine news and an improvement in the prospects for retail, its share price recovered to prepandemic levels over the start of the year.

Newton Investment Management Limited July 2021

BNY MELLON FUTURE LIFE FUND

The Fund was launched on 12 January 2021.

The Fund's W USD Acc share class *returned* 8.88% over the review period (from launch, 12 January 2021 to 30 June 2021) net of fees, while its *benchmark*, the MSCI AC World NR Index, *returned* 9.99%, both in US dollar terms.

The Fund's *return* was driven by positive contributions from companies in healthcare equipment & supplies and pharmaceutical sectors. However, being *overweight*, relative to the *index* in the general healthcare sector was a drag on performance. *Stock* selection within the insurance sector also detracted from *returns* over the review period.

AIA Group and Ping An Insurance both dragged on *returns*, although it was the latter that weighed most heavily, and by some margin. The Fund established holdings in these companies based upon what the manager viewed as a unique growth opportunity represented by China, and by extension its consumers, over the next few years. As *gross domestic product* (and consumer prosperity) grows in *emerging markets*, demand for products such as health insurance, life insurance and savings products is expected to accelerate.

In the view of Fund's manager, AIA, listed and headquartered in Hong Kong but with leading market positions in several key Chinese provinces, appears to have a highly competent management team. However, the <code>stock</code> has been impacted by concerns that lockdown measures in Hong Kong may hamper a rebound in sales to mainland Chinese visitors.

Ping An, a mainland China-based insurer with quite a different investment case, has been a disappointing performer in recent months. A combination of an underperforming salesforce (much of it part-time), which is currently being re-trained by the company, together with some revisions to the accounting treatment of regulatory capital, have caused weakness in the share price.

BNY MELLON FUTURE LIFE FUND cont'd.

However, in the view of the manager, the company is still very well capitalised and has the potential to grow. More positively, Principal Financial Group performed well on the back of its announcement of a strategic review in which how and where it spends its money is anticipated to be a key area of focus.

Danish pharmaceutical Novo Nordisk shares performed strongly following a positive news regarding its late-stage Alzheimer's drugs in development. Furthermore, quarterly results showcased a strong start to the year and its sales growth guidance for 2021 was upgraded. The company looks attractive, in the manager's view, given its steady growth profile and the long-term thematic outlook for growth in the diabetes market.

Elsewhere, abating Covid-19 headwinds proved encouraging for HCA Healthcare's outlook (given the positive implications for hospital volumes), and as such, shares performed well.

Newton Investment Management Limited July 2021

BNY MELLON GLOBAL EQUITY FUND

Over the six-month review period, the USD A share class of the sub-fund *returned* 10.58%, net of fees, compared with a *return* of 12.30% for the MSCI All-Country World Index NR (also in USD). The Fund produced a positive absolute *return* but was behind the comparative *benchmark*.

An *underweight* position in North America was detrimental to *returns* given the strong performance of the US market over the six-month period. An *underweight* position in the energy sector also dragged on performance. This offset the positive effects of the *overweight* positioning in Europe ex UK and an *underweight* in utilities.

The largest detractor during the review period was Ping An Insurance Group. The shares were weak after Ping An announced plans to acquire a stake in Founder Group, a state-backed Chinese conglomerate. Another prominent detractor was Sony, which missed guidance expectations. The manager retains a positive view of the company, as he believes the launch of its PlayStation 5 product is likely to boost its *earnings*. Shares in Suzuki Motor were also weak during this time, as auto demand in India, a key market for the company, was affected by the Covid crisis.

The largest positive contributor was materials engineering provider, Applied Materials. Its shares rose as semiconductor demand continued to rise. The company announced strong results and increased its *earnings* guidance. Goldman Sachs performed well on expectations of higher *inflation* and the potential for higher interest rates,

which are perceived as boosting banks' profitability. Goldman Sachs' shares were also helped by news that the US Federal Reserve was set to relax pandemic-induced dividend restrictions. Google owner Alphabet was another positive contributor, releasing exceptionally strong firstquarter results. During the period, the Fund established a new position in Novozymes, a Danish enzyme and industrial biotechnology leader. Its expertise in enzymes should become increasingly valuable as sustainable production methods spread across a broad range of industries, including for cleaning purposes and food manufacturing. The manager also added TE Connectivity, a leader in the connector industry, which he believes looks well positioned to benefit from the switch to electric vehicles. Other significant purchases included Volkswagen and CME Group, which operates one of the world's most important security and commodity markets.

The manager sold the Fund's position in Kasikornbank on concerns that Covid-19 could disrupt the Thai economy further, notably through its impact on tourism. The holding in Verizon Communications was sold on the belief that 5G-related growth opportunities could take time to materialise. The manager reduced the holdings in Wolters Kluwer, Meituan, Goldman Sachs and Citigroup after strong performance.

Although the market has favoured *stock*s in traditional *cyclical* sectors for much of the year, holdings that the manager sees as long-term success stories began to perform more strongly towards the end of the period as US Treasury *yields* dipped. The manager remains positive on the scope for these businesses to reassert themselves in due course.

Newton Investment Management Limited July 2021

BNY MELLON GLOBAL EQUITY INCOME FUND

Over the six months under review, the Fund's USD A (Inc.) share class *returned* 8.18%, net of fees, compared with 13.12% for the FTSE World Index TR, and 10.35% for the Lipper Global – Equity Global Income sector average, all in US dollar terms.

The Fund produced a positive *return* but underperformed its *benchmark* and the sector average. *Stock* selection was the key factor behind the Fund's weaker relative *returns*. While demand for 5G smartphones helped the Fund's holding in Qualcomm to outperform in January, its shares then struggled – mirroring the weakness of many *large-cap* technology *stocks*. Chinese insurer Ping An also detracted as the company announced plans to acquire a stake in Founder Group and owing to continued softness in new business premiums. Events business Informa declined, too, with investors becoming more pessimistic about the prospects of a rapid recovery in long-haul business travel.

BNY MELLON GLOBAL EQUITY INCOME FUND cont'd. More positively, Richemont was a top contributor. The luxury goods company enjoyed considerable Far Eastern demand

for jewellery and watches, aided by its joint investment (with Alibaba) in online fashion retailer Farfetch. Infosys was another strong performer, owing to improving demand from the US in particular, as customers upgraded their information technology infrastructure and continued moving to the cloud. The company continues to win new business and has a strong pipeline of new products. Another luxury goods producer, Tapestry, performed strongly following the release of robust *earnings* that materially exceeded expectations.

In terms of activity, a position in Home Depot, the world's largest home improvement retailer, was initiated. Its outlook appears attractive given systemic housing shortages combined with growing demand, rebounding house prices and ageing housing stock. A position was also added in business software and solutions specialist Sage, which is a beneficiary of trends highlighted by the Fund's 'smart revolution' investment theme. In addition, an investment was made in automaker Volkswagen; the Fund's manager saw an opportunity for profitability transformation as the company transitions towards electric vehicles and management focuses on cash flow from its combustion engine division, rather than trying to gain market share.

Following a period of relative outperformance, Spark New Zealand was sold. Money transfer business Western Union was also sold, owing to concerns about structural headwinds that it is facing from increasing sectoral digitalisation.

Economic recovery has already allowed the reinstatement of many *dividends*. Indeed, the Fund's manager believes that 2020 was very much a hiatus from income generation rather than a broad structural change, and that *dividends* could grow from here. However, not all companies will be able to restore *dividends* to previous levels, as the pandemic has accelerated some key pre-existing structural themes. Indeed, the Fund's manager believes income investors need to be mindful of the specific structural challenges posed to income generation as a result of rapid thematic change. In order to navigate such a challenging backdrop, the Fund's manager will seek to follow an active, disciplined approach that emphasises structural change, quality and income.

Newton Investment Management Limited July 2021

BNY MELLON GLOBAL LEADERS FUND

The Fund's USD A (Acc.) share class rose 10.97% over the six months to 30 June 2021, compared with 13.05% for the MSCI World NR Index and 10.46% for the Lipper Global — Equity Global sector average, all in US dollar terms.

Despite the continuation of the Covid-19 pandemic, *equity* markets performed strongly over the period under review, as economic data improved in response to a gradual easing of restrictions in many countries and the massive *monetary* and *fiscal stimuli* injected into the system by central banks and governments.

The Fund's limited exposure to financials proved a prominent detractor at the sector level, as was the lack of exposure to energy *stock*s. Healthcare and *consumer staples* performed strongly, however.

From an individual *stock* perspective, Keyence was a significant underperformer despite reporting results to the end of December that showed the company *return* to year-on-year growth after a six-quarter spell of declining sales. Weakness in the share price was likely driven in part by the market rotation into more *cyclical stock*s during the period.

More positive was the contribution from ASML. As the world's leading provider of lithography equipment for the semiconductor industry, not only is ASML a major player in the race between Taiwan Semiconductor, Intel and Samsung Electronics, but it is also supporting China's semiconductor ambitions. In this context, the news of Intel's continued commitment to manufacturing and Taiwan Semiconductor's bold US\$100bn capital expenditure plan (which were taken positively by the market) could benefit ASML. The company's fourth-quarter 2020 results were excellent, beating guidance on revenue and margins in what was a very strong year for the business.

Illumina was also very strong, having reported fourth-quarter 2020 results that were slightly better than those it had preannounced a month or so earlier. The results showed that momentum in the business was improving quickly, with both growth in the company's instruments and sequencing consumables trending favourably. The gene-sequencing company then followed this up with first-quarter results that showed *revenues* far exceeding guidance, while also raising forecasts for 2021 overall.

The manager sold Reckitt and Colgate-Palmolive during the six-month period. Tencent Holdings, one of the world's largest internet platform businesses, was purchased. Tencent has become an indispensable part of daily life for over a billion internet users in China through its app WeChat.

A broadening global recovery and a brighter *earnings* outlook may continue to provide a solid backdrop for *equities*. However, given the magnitude of the rally over the last year, markets have partly discounted the near-term resurgence in corporate profits. As the recovery takes a firmer hold, and should *inflationary* pressures persist, the prospect of a lessbenign monetary environment will garner increasing investor attention, although a mild adjustment might be seen as being appropriate given the improving economic outlook, and may not prove profoundly damaging to the *equity* environment. Whatever the twists and turns, the manager

BNY MELLON GLOBAL LEADERS FUND cont'd.

will seek to invest in financially strong, market-leading businesses that have previously demonstrated the ability to adapt to the ups and downs of economic cycles and generate strong *earnings* growth over the long term.

Walter Scott & Partners Limited July 2021

BNY MELLON GLOBAL OPPORTUNITIES FUND

Over the six-month period under review, the Fund's USD A share class *returned* 11.32% net of fees against a *return* of 12.30% from the MSCI AC World NR Index, both in US dollar terms.

The Fund produced a positive *return* but was behind the *benchmark*. On a regional view, the *underweight* positioning versus the *benchmark* in emerging markets and *overweight* Europe ex UK companies detracted from relative performance. From a sector perspective, the *overweight* position in information technology was a boost to relative *returns* as was the Fund's position in industrials. *Stock* selection in *consumer discretionary* detracted but contributed positively in North America.

Over the six months to 30 June 2021, the largest <code>stock</code> specific detractor was Ping An Insurance Group. This was despite strong first-quarter results, which indicated a faster-than-expected improvement in the value of its new business. The shares were weak as Ping An announced plans to acquire a stake in Founder Group, a state-backed Chinese conglomerate. Another prominent detractor was Sony, which missed guidance expectations. Still, the manager retains a positive view of the company, as the launch of PlayStation 5 could boost its <code>earnings</code>. Shares in Suzuki Motor were also weak, as a microchip shortage forced it to halt production at three plants.

The largest positive contributor over the review period was Applied Materials. Its shares rose on the back of news of Taiwan Semiconductor's plans to increase capital expenditure this year, which has positive implications for the former's sales. The company also announced strong results and increased its *earnings* guidance. Goldman Sachs performed well on expectations of higher *inflation* and the potential for higher interest rates, which are perceived as boosting banks' profitability. Goldman Sachs' shares were also helped by news that the US Federal Reserves was set to relax pandemic-induced *dividend* restrictions. Google owner Alphabet was another positive contributor. The company released exceptionally strong first-quarter results.

During the period, the Fund bought a new position in Novozymes, a Danish enzyme and industrial biotechnology leader. The company's expertise in enzymes could become increasingly valuable as sustainable production methods spread across a broad range of industries. The manager also added TE Connectivity, a leader in the connector industry,

which looks well positioned to benefit from the switch to electric vehicles. Another new holding was Amazon, which is emerging from the pandemic in an even stronger position.

The manager sold the Fund's position in Royal Dutch Shell. Its shares bounced back as the oil price rallied, but there is concern about the oil industry's long-term outlook. After some strong performance, the holding in Kasikornbank was sold on concerns that Covid-19 could disrupt the Thai economy further. The holding in Novartis was sold, and the proceeds were reinvested in the existing holding in Swiss pharmaceutical peer Roche, where the manager sees higher growth potential.

Although the market has favoured *stock*s in traditional *cyclical* sectors for much of the year, the Fund's holdings, which the manager sees as long-term success stories, began to perform more strongly towards the end of the period as US *Treasury yields* dipped. The manager remains positive on the scope for these areas to reassert themselves in due course.

Newton Investment Management Limited July 2021

BNY MELLON LONG-TERM GLOBAL EQUITY FUND

Over the six months under review, the Fund's Euro A shares class rose 11.13%, net of fees, versus 16.64% for the MSCI World NR Index, and 13.97% for the Lipper Global – Equity Global sector average, all in euro terms.

Investor optimism about recovering economic growth and vaccination programmes allowed *equity* markets to make strong gains over the period. The scale of government and central bank *monetary stimulus* programmes cushioned the impact of the Covid-19 pandemic and its associated lockdowns, enabling economic activity to rebound much faster than might have been expected in early to mid-2020.

The Fund's very limited exposure to financials was a major detractor from relative *returns* at the sector level. Industrials were also weak.

The market reacted poorly to the first-quarter results of Fund constituent Cognizant Technology Solutions despite several positives. On the negative side, there was tangible evidence that the intensely competitive market for digital skills is impacting revenue growth and costs, while the spring's healthcare crisis in India will hit *earnings*. More positively, however, *revenues* came in ahead of guidance; constant currency *revenue* growth was positive for the first time in a year; digital *revenue* growth accelerated to more than 15%; and growth improved sequentially in the company's three largest vertical markets.

Keyence reported results to the end of December that showed the company return to year-on-year growth after a

BNY MELLON LONG-TERM GLOBAL EQUITY FUND

cont'd.

six-quarter spell of declining sales. This was followed by a set of January-March results that showed sequential growth, with *revenues* up 15% year-on-year, a sizeable improvement on the 3% increase of the previous quarter. However, the *stock* declined; weakness in the share price was likely driven in part by the market rotation into more *cyclical stock*s during the period.

Waters proved significantly positive for the *portfolio*. In the first three months of 2021, sales grew strongly across markets and geographies, with the Americas, Europe and Asia up 14%, 25% and 44%, respectively. Most eye-catching was an increase of 118% in China, which marked a robust rebound from the Covid-related difficulties of the first quarter of 2020. LVMH also performed very well, with sales of luxury goods continuing to rebound strongly across most geographic regions. The April release of first-quarter sales figures saw organic *revenues* increase 30% year on year, led by fashion and leather goods.

From an activity perspective, Hong Kong & China Gas and Cerner were sold, while cybersecurity market leader Fortinet was purchased.

The recovery in economies and *earnings* may continue to provide a positive backdrop for *equities*, but the extent of share price gains suggests that some of the near-term good news may be discounted. While still supportive, the eventual prospect of a less benign monetary environment may weigh more heavily on investors' minds, with the world looking over its shoulder at the actions of the US Federal Reserve. Such a tempering of policy may not be viewed as being wholly negative if accompanied by a more vibrant growth outlook, however. Whatever the twists and turns, the manager will seek to invest in financially strong, market-leading businesses that have previously demonstrated the ability to adapt to the ups and downs of economic cycles and generate strong *earnings* growth over the long term.

Walter Scott & Partners Limited July 2021

REGIONAL EQUITY

BNY MELLON ASIAN EQUITY FUND

Over the six months under review, the Fund's USD A share class *returned* -1.14%, net of fees, compared with a *return* of 6.95% for the MSCI All-Country Asia Pacific ex Japan Index TR, and 6.58% for the Lipper Global – Equity Asia Pacific ex-Japan sector average, all in US dollar terms.

The Fund generated a negative *return*, net of fees, and underperformed its *benchmark*. The market rotation from growth to value *stock*s, coupled with idiosyncratic individual *stock* events, were detrimental to the Fund's performance: indeed, *stock* selection was the key negative factor behind relative *returns*.

New Oriental was a large detractor, with Covid-19's impact leading to the announcement of mixed results. The *stock* weakened further on fears about increased regulation, as well as speculation that Chinese authorities would try to dampen demand for after-school tuition. Autohome, a leading Chinese automobile sales platform, continued to be out of favour, with investors concerned about chip shortages' short-term impact on car sales and more aggressive behaviour from smaller competitors. Chinese insurer Ping An also detracted as the company announced plans to acquire a stake in Founder Group, while new business premiums remained soft given agent operations are yet to fully recover.

Conversely, Chinese online entertainment brand Bilibili was a large <code>stock</code> contributor, based on its strong <code>earnings</code> announcement and growth outlook. Lithium producer Orocobre also outperformed, on expectations that prices for the alkali metal will continue to climb on the back of tight supply and strong demand for electric vehicles (EV). Iljin Materials performed well, too, owing to its integral position in the EV supply chain as a quality producer of copper foils used in battery manufacturing. ASML rose on news that Taiwan Semiconductor plans to increase its capital expenditure this year.

In terms of activity, a position in Tata Consultancy Services was taken. The Indian IT company is a highly profitable business, delivering strong *returns* on invested capital relative to the broader technology sector. Another purchase was NARI Technology, which is a leading supplier of electricity hardware and software to the Chinese state grid; the company looks structurally well positioned to benefit from growing investment in ultra-high voltage transmission, EV charging and grid digitisation. Yum China was also bought; with more than 10,500 restaurants, a presence in 1,100-plus cities and over 2 billion annual customer visits, the manager believes it offers an attractive and targeted play on Chinese consumption.

However, luxury car dealership China Harmony was sold in an effort to concentrate the Fund's exposure in its peer China Yongda Automobiles, which appears to have better prospects. Nippon Life Asset Management was also sold; the

BNY MELLON ASIAN EQUITY FUND cont'd.

proceeds were added to the holding in HDFC Asset Management, which is regarded more positively by the Fund's manager. The position in Australia's IDP Education was exited.

It is the manager's opinion that Asia offers investors strong long-term opportunities, based upon relatively higher levels of income growth, rapid increases in product penetration and scope for industry consolidation. Its markets are, in the Fund manager's view, good places to hunt for companies that are positioned to benefit from this innovation, change and growth.

Newton Investment Management Limited July 2021

BNY MELLON ASIAN INCOME FUND

Over the six-month period, the Fund's USD W (Inc.) share class *returned* 5.14%, net of fees, compared with a *return* of 7.42% from the FTSE Asia Pacific ex Japan Index TR and 6.58% for the Lipper Global – Equity Asia Pacific ex-Japan sector average, all in US dollar terms.

The Fund produced a positive *return* but was behind its *benchmark* and sector average. *Stock* selection was the main factor behind the Fund's weaker relative *returns*. Ping An Insurance shares struggled despite strong *earnings* results, as the company announced plans to acquire a stake in Founder Group, a state-backed Chinese conglomerate.

New Zealand utility Meridian Energy was out of favour in a higher bond *yield* environment, but also because of a technical issue, as proposed changes to the S&P Global Clean Energy Index led to many large clean energy *exchange-traded funds* selling their positions in the *stock*.

Samsung Electronics underperformed as its succumbed to some profit-taking, and on the news that Lee Jae-Yong, the de facto head of Samsung, was re-imprisoned for bribery following many years of legal battles.

The Fund's top-preforming position was copper-clad laminate supplier Elite Material. The company continued to operate efficiently and was rewarded with a share price appreciation. The holdings in Singaporean banks DBS and United Overseas Bank contributed strongly to performance, on the prospect of an improving economy and higher interest rates.

Another top contributor was the mining company BHP, which rallied on recovering commodity prices and strong *earnings* momentum. Shares in Taiwan Semiconductor performed well after the company released healthy *earnings* results that exceeded expectations and raised capital expenditure guidance.

In terms of activity, AIA, a leading insurer in the Asia Pacific region, was bought. AIA is well placed for a significant opportunity in China as rules are relaxed allowing foreign companies to operate more extensively in the country. BYHealth, China's leading vitamin and dietary supplement manufacturer, was a further addition. The company operates a *portfolio* of strong brands in a structurally growing market, with 'healthy demand' and 'consumer power' thematic support. A position was also added in Bank Central Asia (BCA), the second-largest bank in Indonesia in terms of asset size and profits. The group's strength lies in its transaction banking business.

Singaporean ground-handling and in-flight catering services company SATS was sold. While Covid-19 vaccine news was a very welcome development for travel-related *stocks*, a *return* to pre-pandemic volumes remains uncertain, and with the *stock* no longer paying a *dividend*, it breached the Fund's *yield* discipline. The position in Singapore Telecommunications was also exited, given its limited opportunities to grow and competitive threats.

With the eventual unwinding of *fiscal* and *monetary stimulus* measures from central banks, elevated *equity* market valuation levels and the uncertain outlook for *earnings* in a fragile global economy, the arguments for income investing remain stronger than ever, the manager believes.

Newton Investment Management Limited July 2021

BNY MELLON BRAZIL EQUITY FUND

Over the six months under review, the Fund's USD A share class *returned* 13.19%, net of fees, compared with a *return* of 8.40% for the MSCI Brazil 10/40 NR Index and 8.97% for the Lipper Global-Equity Brazil sector average, all in US dollar terms.

At the industry level, *stock* selection in *consumer discretionary*, logistics and global capital goods were the main positive contributors to the Fund's performance. Detractors from performance came from *stock* selection in utilities and banks.

At the *stock* level, the Fund benefited from exposures to Pao de Acucar, Santos Brasil and Embraer. Pao de Acucar, a food retail giant, launched and listed the shares of its cash-and-carry business, Assai, in the first half of the year. Both *stocks* outperformed, as the market expects the new structure to help unlock value in both companies. Santos Brasil, an operator of terminal containers in ports, benefited from a recovery in trading activity, with record numbers in volumes across Brazil. Additionally, the company reached an agreement with its main client, which included a positive tariff review for the next two years. Embraer shares

BNY MELLON BRAZIL EQUITY FUND

outperformed on the prospect of the reopening of the economy and an increase in new orders. There was also talk of a potential merger of its urban mobility subsidiary.

Negative contributors at the *stock* level were B2W, Copel and Light. Online retailer B2W underperformed, especially in the first quarter of the year, as investors moved from growth *stocks* to value. Copel and Light, both in the utilities sector, were severely impacted by the risk of restrictions on energy consumption due to lack of rain in recent months. Additionally, governance questions on Copel arose as its controlling shareholder imposed conditions in order to migrate the company *stock* to a stronger level of corporate governance.

Activity in the first half of the year included the introduction of a new position to the *portfolio*, C&A, a clothing retailer. The manager also increased exposure to the logistics, *consumer discretionary* and global capital goods sectors and reduced exposure to utilities and banks.

Due to a rise in *inflation*, Brazil's central bank has started to raise rates; this could quite possibly continue for a few quarters. While that should not necessarily impact economic expectations, it is worth noting that the lack of rain has added an element of uncertainty to the economic recovery.

Despite the potential for further short-term *volatility*, the manager remains optimistic about the long-term prospects for Brazilian *equities* based on a supportive global economy.

ARX Investimentos Ltda July 2021

BNY MELLON DYNAMIC U.S. EQUITY FUND

Over the six-month period under review the Fund's USD A (Inc.) share class generated a positive *return* of 14.93%, net of fees, compared with a *return* of 15.00% for the S&P 500 NR Index.

The positive total return was largely due to a leveraged equity position after US equities rallied during the period. The Fund began the year with a target allocation of 100% equity, and quickly increased exposure to 110% during the first week of January. Strong growth, tight credit spreads and an improving macroeconomic environment moved the equity premium higher. Through the use of equity options, the average allocation over the period drew closer to 112%.

The 10% bond allocation hindered *returns* after prices fell sharply early in the period. The US *yield curve* steepened considerably during the first quarter as the proposal of a US\$2.3 trillion infrastructure plan, easy financial conditions and expectations for a strong rebound in economic activity raised *inflation* expectations. The *yield* on the 30-year US

Treasury bond rose 77 basis points to 2.41% during the first quarter. Treasuries recovered later in the period due to some mixed *macroeconomic* data, the likelihood of a smaller infrastructure deal and expectations that growth and *inflation* will moderate.

Given the sustained improvement in the economic backdrop the Fund's manager remained constructive on *stock*s and maintained a target allocation of 110%. The *equity risk premium* of 3.5% is slightly below the Fund's long-term average (looking at the past 15 years) but suggests that *equities* are likely to go higher from here. The target bond allocation was maintained at 10%.

The manager will continue to closely monitor *inflation* expectations as well as the possibility of US *Treasury yields* rising into the third quarter. Another statistic that will be monitored closely is the *stock*/bond *correlation*. The *correlation* was negative as at the end of the second quarter, though it moved closer to zero during the first. In addition, Mellon's risk models also show elevated risk of rising US *Treasury yields*, which in turn has led to a 'shrinkage' of the *stock*/bond *correlation* in the Fund. In short, should the *correlation* turn positive, it could prompt a reduction in the Fund's bond allocation.

BNY MELLON GLOBAL EMERGING MARKETS FUND

Over the six-month review period, the Fund's USD A share class *returned* -0.44%, net of fees, compared with a *return* of 7.45% for the MSCI Emerging Markets NR Index and 7.42% for the Lipper Global – Equity Emerging Markets Global sector average, all in US dollar terms.

The Fund produced a negative *return*, which was behind that of its *benchmark* and the sector average. *Stock* selection was a negative factor in the Fund's *returns* for the period. It was particularly weak in India and China, and in the financials, *consumer discretionary* and communication services sectors. This weakness offset strength in South Korea, information technology and *consumer staples*.

The largest detractor from the Fund's returns was Chinese after-school-tutoring company New Oriental Education. Its shares fell heavily on increased speculation that Chinese authorities would try to dampen demand for after-school tuition to reduce the pressure on children and their parents. Autohome, the leading Chinese automobile online sales platform, was also out of favour. Investors were concerned about increased competition and the short-term impact of microchip shortages on car sales. Chinese insurer Ping An detracted from returns despite strong first-quarter results. The shares remained weak as the company announced plans to acquire a stake in Founder Group, a state-backed Chinese conglomerate.

The biggest positive contribution came from solar-energy company LONGi Green Energy Technology. Its shares performed strongly on optimism about Chinese government pledges to become carbon neutral and a positive announcement from the Chinese National Energy Administration regarding the installation of rooftop solar projects. Iljin Materials performed well as investors acknowledged its integral position in the electric vehicle supply chain. The company is a producer of high-quality copper foils that are used in battery manufacturing. EPAM Systems performed well on continued impressive growth derived from strong demand for its custom software and digital technology solutions.

The manager added a position in Tata Consultancy Services, a well-managed and highly profitable Indian IT services company. Another new holding was Yum China, which has over 10,500 restaurants, a presence in over 1,100 cities and over two billion annual customer visits. The manager sees the company as an attractive and targeted play on Chinese consumption. Hungary's OTP Bank was a further addition.

The position in luxury car dealership China Harmony was sold to concentrate the Fund's exposure in its peer China Yongda Automobiles, as the manager prefers the latter's governance and *liquidity* profile. Nippon Life Asset Management was also sold, with the proceeds invested in the holding in HDFC Asset

Management, which the manager sees as having better distribution, brand quality and profitability. After a period of strong performance, Australia's IDP Education was sold.

There are challenges ahead. It is unlikely that tensions between the US and China will go away. The world is ageing, and global debt levels are rising. Nevertheless, the manager continues to see exciting innovation and pockets of sustainably fast economic growth.

Newton Investment Management Limited July 2021

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND

Over the six-month period under review, the Fund's JPY W share class *returned* 8.81%, net of fees, compared with 9.39% for the Russell/Nomura Small Cap Index TR and 9.63% for the Lipper Global Equity Japan Small & Mid Cap sector average, all in Japanese yen terms.

The Fund made a positive *return*, net of fees, but underperformed the *benchmark* during the period.

At the industry level, main positive contributors to performance were other financing business and electric appliances, in which the Fund was *overweight* relative to the *benchmark*, and banks, where the Fund had no holdings. The main detractors were insurance and information & communication, where the Fund was *overweight*, and rubber products, where the Fund had no holdings.

At the individual *stock* level, the main contributors to performance included Premium Group, which provides automotive loans and consumer microlending; m-up holdings, which operates fan club sites and electronic ticket businesses; and Insource, which provides corporate training and business-related open courses. Main detractors from performance were Fibergate, which offers wireless telecom services; Anicom Holdings, which provides health insurance policies for pets; and Sakata Inx, which manufactures printing inks.

There were two new positions introduced over the period: OPTORUN, which produces optical thin film deposition tools, and Direct Marketing MiX, which provides marketing services through its outbound call center. The fund managers sold out of Osaki Electric, which supplies smart meters to utility companies, and BayCurrent Consulting, which provides comprehensive consulting services.

In general, the managers increased the *weighting* of *stock*s that they believed to be at attractive levels on a mediumterm basis, funding them from *stock*s which have held up relatively well.

At the end of June 2021, the *portfolio* held 30 *stock*s, unchanged from the end of December 2020. The Fund was

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND cont'd.

overweight services, electric appliances, and other financing business at the end of the reporting period. The largest overweight positions in the portfolio included m-up holdings; RS Technologies, a major provider of silicon wafer reclaim services for the semiconductor industry; and Direct Marketing MiX.

A vaccination programme has launched in Japan, and the managers continue to believe that the economy will reach a much-improved level on a medium-term basis, even if there are future waves of the Covid-19. Governments around the world have pledged to provide strong *monetary* and *fiscal policy* support.

The managers also expect the Japanese *stock* market to show improvement in the near-term. Prime Minister Yoshihide Suga has pressed on with the effort to fight Covid-19 and pledged to support the economy as necessary. Longer-term, he is expected to continue with Abenomics, a programme of *monetary easing*, *fiscal* spending and structural reforms.

In terms of strategy, the *portfolio* will continue to hold *stock*s that appear to have attractive growth prospects at reasonable valuations.

BNY Mellon Asset Management Japan Limited July 2021

BNY MELLON S&P 500® INDEX TRACKER

The Fund was closed on 15 January 2021.

The one-year tracking error between 15 January 2020 and 15 January 2021 was 0.60%.

The annualised tracking error provided was calculated using net monthly *returns* for the period in question, the tracking error being the *standard deviation* of the relative *returns* that has been annualised (multiplied by the square root of 12).

The Fund was positioned to match the performance and overall characteristics of the S&P 500 Index in a risk-controlled, cost-effective manner utilising a full replication approach.

Mellon Investments Corporation July 2021

BNY MELLON SMALL CAP EUROLAND FUND

Over the six-month period under review, the Fund's Euro A share class *returned* 17.61%, net of fees, against a 14.23% *return* for the S&P EuroZone Small Cap TR Index and 15.64% for the Lipper Global – Equity EuroZone Small & Mid Cap sector average, all in euro terms.

The Fund outperformed its *benchmark* and sector average. By country, the Netherlands and France were the primary positive contributors, mainly due to effective *stock* selection. Signify, a Dutch electrical equipment company, was the leading contributor. Italy and Ireland were the main detractors. By sector, industrials and *consumer discretionary* were the top positive contributors, while weak *stock* selection in the communication services and financials sectors hindered performance most. Bechtle, a German information services company, was the leading detractor.

The Fund's manager increased exposure to real estate and materials and decreased exposure to communication services and information technology. Holdings in Covestro, Outokumpu Oyj, Publicis Groupe, Rexel and Unibail-Rodamco-Westfield were initiated. The Fund exited positions in AMG Advanced Metallurgical Group, ASTM, Bankinter, Euskaltel, Leroy Seafood Group and Stroer.

Economic conditions and investor sentiment in the *eurozone* improved significantly over the period. However, the UK was hampered by renewed lockdowns and falling first-quarter *gross domestic product*.

BNY MELLON U.S. DYNAMIC VALUE FUND

The Fund was closed on 5 March 2021.

Over the review period, to the Fund's closure, the USD A share class *returned* 9.07%, net of fees, against a 7.85% *return* for the Russell 1000 Value TR Index.

The Fund outperformed its *benchmark*. On a sector basis, positioning in materials was the largest contributor, helped by *stock* selection in the chemicals space. In communication services, lack of exposure to the entertainment subsector contributed; in the media and services subsector, the Fund's holding in Alphabet proved beneficial.

Detracting from *returns* was *stock* selection in the *consumer discretionary* sector. Hotels, restaurants and leisure detracted, particularly the holding in Las Vegas Sands. In the real estate sector, an *underweight* to *equity* real estate investment trusts detracted.

During the period, communication services holdings were increased with the additions of Comcast and Vodafone. In energy, Devon Energy, EQT, Exxon Mobil and Valero Energy were added. Purchases were funded by a decrease in the healthcare and materials sectors. In healthcare, Anthem, Bristol-Myers Squibb and Humana were sold. In materials, positions in Louisiana-Pacific, Mosaic and Vulcan Materials were exited.

Mellon Investments Corporation July 2021

BNY MELLON U.S. EQUITY INCOME FUND

Over the six months under review, the Fund's USD C (Inc.) share class *returned* 18.89%, net of fees, against a 15.00% *return* for the S&P 500 NR and 16.73% for the Lipper Global – Equity US Income sector average, all in US dollar terms.

Equity markets performed positively in the first quarter as the US Congress passed a US\$1.9 trillion Covid-19 relief package and the Federal Reserve maintained its dovish monetary policy stance. In the second quarter, equity markets again recorded positive gains as optimism surrounding vaccine rollouts and loosening social restrictions boosted economic growth.

In this environment, the Fund outperformed its *benchmark*, and the sector average. The largest contributor was the materials sector, where effective positioning was the main driver of performance for the period. *Security* selection was beneficial in the chemicals subsector, as well as in the metals and mining subsector, where a position in Freeport-McMoRan contributed. *Underweight* exposure to and *stock* selection within the communication services sector also contributed, particularly the Fund's lack of exposure to the entertainment subsector.

Detracting from *returns* was *stock* selection in the *consumer discretionary* sector—particularly in hotels, restaurants and leisure, where the Fund's position in Las Vegas Sands proved a hindrance. The Fund's *underweight* in real estate also detracted.

Exposure to the energy sector was increased via purchases of Devon Energy, Exxon Mobil and Valero Energy. Healthcare holdings were increased, leaving the Fund *overweight* the sector versus the *benchmark*. Exposure to the Materials sector was trimmed via reductions in International Paper Company, Louisiana-Pacific, Rio Tinto and Vulcan Materials. Real estate holding Weyerhaeuser was sold on strength.

Financials remains the Fund's largest *overweight*, though positions have been trimmed on strength. *Earnings* could continue to improve as the sector benefits from consumer credit conditions and the resumption of sizable capital *returns*. The manager added to the Fund's energy *overweight*. Demand recovery coupled with building supply constraints could drive capital *return* prospects in the sector.

SPECIALIST EQUITY

BNY MELLON BLOCKCHAIN INNOVATION FUND

Over the six months under review, the Fund's USD W (Acc.) share class *returned* 13.48%, net of fees, compared with a *return* of 12.30% for the MSCI AC World NR Index, both in US dollar terms.

Interactive media & services and banks were the leading contributing industries during the first half of the year. From a *stock*-specific perspective, Kakao, a Korean communication services company, and Silvergate Capital were the most significant contributors. The primary detracting industries were software and capital markets, particularly OneConnect Financial and Grayscale Ethereum Trust

Exposure to capital markets and IT services was increased, while exposure to investment trusts and software was decreased. The Fund's manager initiated positions in Coinbase Global, FinTech Acquisition, Funko, Grayscale Ethereum Trust, Kakao, Okta, Signature Bank, Visa, Voyager Digital, Wisdom Tree Investments, and XPO Logistics, among others.

The Fund exited positions in Alibaba, Alphabet, Change Healthcare, Humana, Merck, Microsoft, Nestle, Splunk, Tencent Holdings, Triterras, and Walmart.

June saw continued *volatility* in cryptocurrencies, but unlike in May. This movement came despite recent high-profile ransomware attacks in which hackers demanded cryptocurrency and the Chinese government's crackdown on both cryptocurrency exchanges and Bitcoin mining. The limited impact of these events on the market provided support to *equities* in the cryptocurrency ecosystem as well as to broader blockchain-focused growth names.

Regulation and adoption continuing to advance around the globe which could lead to a wide range of opportunities for disruption and growth from blockchain innovation.

Mellon Investment Corporation July 2021

BNY MELLON GLOBAL INFRASTRUCTURE INCOME FUND

Over the six months under review, the Fund's USD W (Acc.) share class *returned* 7.24%, net of fees, against 4.99% for the S&P Global Infrastructure NR, both in US dollar terms.

Equity markets performed positively in the first quarter as the US Congress passed a US\$1.9 trillion Covid-19 relief package and the Federal Reserve (Fed) maintained its dovish monetary policy stance. In the second quarter, equity markets again recorded positive gains as optimism surrounding vaccine rollouts and loosening social restrictions boosted economic growth. Inflation, remained a concern, however, the Fed reiterated its stance that inflation

was transitory and insisted rate hikes would not begin until the end of 2022.

Positioning within energy infrastructure and transportation infrastructure contributed to performance, while the Fund's off-benchmark exposure to telecom infrastructure detracted.

The energy infrastructure space moved higher in sympathy with rising oil prices and positive news regarding the distribution of Covid-19 vaccines. US midstream pipeline operator Oneok contributed significantly, benefiting from the ongoing recovery in energy demand both domestically and overseas. Canadian midstream oil and gas company Enbridge also moved higher on improved global demand prospects.

In communication services, Fund positioning in European telecom infrastructure detracted, as shares in Orange and Proximus lagged the broader asset class.

During the period, the Fund's exposures to energy, communication services and, more modestly, real estate were increased. The manager added Antero Midstream, which owns, operates and develops midstream energy assets and is involved with gathering and compression, water distribution, and pipeline safety services. Exposures to industrials and utilities were decreased. Positions in Spanish airport operator Aena and Dominion Energy were sold.

While the infrastructure asset class has trailed the rebound in global *equities*, the space has been experiencing its own recovery. Although that recovery is likely to be gradual and somewhat uneven, the manager believes it is likely to accelerate into the second half of the year as vaccination rates rise and regional re-openings continue. Transportation infrastructure, in particular, could have significant *cyclical* recovery ahead of it as drivers return to toll roads, airport volumes grow with the pickup in leisure travel, and air and freight delivery increases.

The manager believes the key catalyst for the asset class is the increased infrastructure spending on the horizon, particularly in the form of the proposed infrastructure bill in the US; bipartisan support has already been received for a sizable US\$600 billion in infrastructure spending. While much of this spend will target traditional areas, such as roads, bridges and water networks, a healthy dose will be allocated to broadband access and 5G deployment The European Green Deal, a massive initiative to facilitate climate-neutral sustainability, is scheduled to take effect later this summer. These factors inform the manager's positive outlook for infrastructure sectors over the next 12 months.

SPECIALIST EQUITY cont'd.

BNY MELLON MOBILITY INNOVATION FUND

Over the six-month period under review, the USD A (Acc.) share class of the Fund *returned* 12.68%, net of fees, against a 12.56% *return* for the MSCI AC World Mid Cap NR USD Index, and 10.87% for the Lipper Global — Equity Sector Consumer Discretionary sector average.

The electrical equipment and semiconductors & semiconductor equipment industries were the leading contributors to the Fund's performance. Gains primarily came from Nvidia, Alphabet and General Motors. The software industry and oil, gas & consumable fuels were the leading detractors during the period. More specifically, Splunk, Lumentum Holdings and Alstom hindered returns.

The Fund's exposure to the machinery, auto components, road & rail and electrical equipment industries were increased. Exposure to the electronic equipment instruments, internet direct marketing retail and interactive media & services industries was decreased. The Fund initiated positions in Alfen, Alstom, Lyft, NIO, Uber Technologies, Wuxi Lead Intelligent Equipment and Zuora. The Fund exited positions in FLIR Systems, Littelfuse, Meituan, NextEra Energy, Virgin Galactic Holdings and Workhorse Group.

Prospects for software and internet-related *stock*s appear positive. It is likely that as the global economy continues to recover, budget prospects for software and internet *stock*s will improve to support rising levels of automation and security across the mobility landscape, in the manager's view. The *fundamentals* of the Fund's auto manufacturers and auto component holdings continue to look positive. As global economies reopen and vaccinations continue, the impact from Covid-19 could fade. The manager believes semiconductor shortages to have reached a peak in the second quarter and thereafter envisages improvement in the second half of the year as the chip industry increases supplies.

Mellon Investments Corporation July 2021

BNY MELLON SMALL CURES INNOVATION FUND

Over the six months under review, the Fund's USD W (Acc.) share class *returned* 8.95%, net of fees, against a *return* of 12.30% for the MSCI All-Country World NR Index, in US dollar terms.

IQVIA Holdings was a key contributor to the Fund's positive *return* owing to its investments and growth in the gene and cell therapy field, which is one of the fastest growing in healthcare. The clinical research and health information technology company reported notable *earnings* over the period and better-than-expected revenue growth. *Fiscal year* 2021 guidance called for large increases versus initial guidance. Demand related to Covid-19 vaccines and record biotech funding was a notable factor. Intellia Therapeutics

was also a top-line contributor during the period. Shares rose following reports of landmark gene editing data that marks the first successful human clinical trial where the technique was used successfully 'in-vivo', meaning in the human body.

On the downside, biotechnology holding Sarepta Therapeutics detracted. The biopharmaceutical company's current focus is Duchenne muscular dystrophy, for which it has a robust pipeline of gene therapy drugs in development. Disappointing trial results triggered a selloff. A position in Passage Bio also weighed on relative results. Shares of the genetic medicines company declined over the period due to a clinical hold on its GM1 programme (which was eventually lifted). Passage Bio also announced a slowing in its clinical trial recruitment for frontotemporal dementia, which will delay the trial results from-mid 2021 until the end of 2021 or early 2022.

There are currently 1,100 ongoing clinical programmes in gene technology, including several with the US Food and Drug Administration. There is also evidence of significant investment in the space. A considerable amount of *merger and acquisition* activity suggests that larger players are gaining interest in the field of gene technologies as therapeutics. The Fund remains committed to investing in new and innovative opportunities born from this attractive paradigm shift in bio-pharma research and development.

GLOBAL FIXED INCOME

BNY MELLON GLOBAL BOND FUND

Over the six-month review period, the Fund's A share class returned -5.40%, net of fees, compared with a return of -4.64% for the JP Morgan Global Government Bond Index (Unhedged) TR, in US dollar terms. The Fund produced a negative return and was behind its comparative benchmark.

The largest negative contributions to the Fund's performance came from *longer-dated* government bonds (with *maturities* of 20 to 30 years) issued by developed countries, including the US, the UK, Ireland, France and Italy.

In *emerging markets*, Peruvian local currency sovereign bonds detracted from *returns* as both the bonds and currency sold off in the wake of what was perceived to be an adverse presidential election result for markets. The Fund's *short* US dollar positioning also proved unhelpful, although the manager reduced this over the period. The US dollar rallied against most major currencies, supported by accelerating US growth and expectations that the Federal Reserve would raise interest rates.

Meanwhile, the Fund's China government bond holdings provided some *diversification*, as Chinese government bond *yields* remained relatively stable in comparison to the *volatility* witnessed in traditional *'safe haven'* government bonds.

Early in the period, the manager reduced the Fund's sensitivity to interest rates (*duration*) by selling *longer-dated* US, Australian and Italian government bonds. Meanwhile, some of the Fund's US *Treasury Inflation Protection Securities (TIPS)* exposure was switched from 2028 TIPS into 2046 TIPS to take advantage of the prospect that higher *inflation* could last longer than the market expects.

The Fund's US dollar *underweight* position was tactically reduced as the currency continued to advance. This was predominately achieved by *diversifying* the Fund's funding currencies: a sterling *short* position was reintroduced, the euro *short* was increased to -5%, and some tactical *short* positions were taken in various *emerging markets*.

Although *duration* increased over the latter part of the period, the Fund remained *underweight* relative to its *benchmark index*. The manager also sold the Fund's holdings of 2030 and 2050 US *Treasuries* and purchased *call options* on US *Treasuries*. In *emerging markets*, the manager took profits on some *hard currency* holdings, including Abu Dhabi and the Philippines, and subsequently sold Peruvian local currency bonds. Meanwhile, the exposure to Chinese government bonds was increased given attractive *yield* differentials, low *inflation* and low *correlations* with other markets.

Towards the end of the period, the composition of the currency *underweights* was changed slightly. The US dollar *short* was reduced, the euro *short* increased and sterling neutralised. An *underweight* in the Japanese yen was also introduced to fund a *long* position in the New Zealand dollar. Finally, the Korean won was purchased, and profits were taken on the Czech koruna and Canadian dollar.

The manager continues to prefer *credit* risk to *duration* risk, believing economic growth is likely to remain strong as vaccine rollouts accelerate. The manager expects this to be slightly offset by the end of government support packages, but remains positive on *risk* assets.

Newton Investment Management Limited July 2021

BNY MELLON GLOBAL CREDIT FUND

Over the six months under review, the Fund's USD W (Acc.) share class *returned* -0.75%, net of fees, compared with -1.04% for the Bloomberg Barclays Global Aggregate Credit Index TR USD-Hedged and -0.79% for the Lipper Global – Bond Global Corporates USD sector average, all in US dollar terms.

The Fund generated a negative *return*, net of fees, but outperformed both its *benchmark* and the sector average. Interest rate positioning detracted, mainly owing to *duration* exposure and country selection (particularly in January and February). *Yield curve* strategies were slightly detrimental. The Fund's *credit* positioning positively contributed to performance. Both *security* selection and *credit* positions more sensitive to changes in the level of the market added value, with the latter benefiting from the *portfolio*'s *long credit* risk position as *spreads* tightened. The Fund's allocation to *mortgage-backed securities* was also modestly beneficial.

After reducing exposure to Covid-impacted sectors (e.g. hotels and pubs) in early 2021, the Fund's manager added to them as transparency about the economic outlook improved. The manager also added back *long* positions in Italy and Greece relative to Germany, added a *long* position in Mexican local rates and reduced the *duration* of the Fund.

Economies and markets are improving, but accommodative *fiscal* and *monetary policy* remains necessary for ongoing recovery.

Looking forward, *inflation* is expected to rise. Increases will probably be transitory, but there are many different potential outcomes given the scale of economic stimulus programmes. Indeed, a Democrat-controlled US Congress is intent on additional *fiscal* support, but the party's slim majority could temper its scale.

GLOBAL FIXED INCOME cont'd.

BNY MELLON GLOBAL CREDIT FUND cont'd.

The manager's strategic bond forecasts are largely in line with current market pricing, but cross-market opportunities will inevitably appear, owing to differentiated economic recoveries and policy changes.

Within *credit*, valuations have retraced to levels where *spreads* are at pre-pandemic lows. Given investors' income requirements and a generally positive global growth outlook, *yields* may keep squeezing lower.

In the manager's view, developed market *investment grade* securities, enjoying direct central bank support, now look relatively expensive; however, there remain opportunities, globally, in apparent laggard segments such as developed market high yield and asset-backed securities.

Insight Investment Management (Global) Limited July 2021

BNY MELLON GLOBAL DYNAMIC BOND FUND

Over the six-month review period, the Fund's USD A share class *returned* -0.80% net of fees, compared with a *return* of 1.05% for LIBOR 1 Month + 200bps. The Fund produced a negative absolute *return* and was behind the comparative *benchmark*.

The main factors in the Fund's underperformance of its benchmark were negative returns from emerging markets and developed market government bonds. As the latter sold off in the early part of the year, US government bonds were among the main detractors here. The Fund's hedged duration position proved beneficial in this environment of rising yields, however.

The Fund's *short* US dollar positioning also proved unhelpful. The US dollar rallied against most major currencies, supported by widening US growth and interest rate expectations. The manager reduced the impact of this, however, by tactically reducing the size of the *short* position over the period.

High yield bond holdings generated the Fund's strongest returns, with good performances from the American Airlines 2025 bond and the UniCredit contingent convertible bond. Meanwhile, the Fund's Chinese government bond holdings provided a welcome source of diversification, as Chinese government bond yields remained relatively stable compared with the volatility witnessed in traditional 'safe haven' government bonds.

Over the period, the manager reduced the *duration* of the Fund's government bond holdings. Holdings with higher *durations*, including *long-dated* US *Treasuries* and Australian and Italian government bonds, were sold. The Fund's exposure to *high yield credit* was further increased with purchases of National Express, Heimstaden, Nexi,

Nobel and Nomad Foods, among others. The manager also added *short-dated* bonds from several *high yield* issuers, including automaker Ford and packaging company Bway. These purchases were partly funded through a number of bonds being called or sold, including Laureate Education, Center Parcs, T-Mobile and Wagamama.

Investment grade corporate bond exposure was raised largely through the addition of NatWest, Pacific Life and Tritax EuroBox. In emerging markets, the manager added holdings in Oman and Bahrain bonds and sold holdings in Ethiopia, Costa Rica, Peru and Paraguay. The Fund's underweight US dollar position was tactically reduced. The manager increased the euro short position, unwound the sterling short position, and introduced an underweight in the Japanese yen to finance a long position in the New Zealand dollar.

The manager continues to prefer *credit* risk to *duration* risk, as economic growth is expected to remain strong as vaccine rollouts continue to gain momentum. The economic recovery is likely to be offset slightly by government support packages coming to an end, but the manager remains positive on *risk assets*, particularly *high yield credit* and local currency *emerging markets*.

Newton Investment Management Limited July 2021

BNY MELLON GLOBAL HIGH YIELD BOND FUND

Over the six-month period under review, the Fund's USD C share class *returned* 2.95%, net of fees, compared with 3.65% for the ICE BofA Developed Markets High Yield Constrained TR Index (USD Hedged) and 2.67% for the Lipper Global – Bond Global High Yield USD sector average, all in US dollar terms.

Global high yield spreads tightened in the first half of 2021, notably hitting post-credit crunch lows in June. Cyclical and more Covid-19-exposed sectors outperformed given the risk-on sentiment and reopening optimism, in contrast to what was witnessed a year earlier. European high yield underperformed US high yield in the first half of the year, largely due to the relative success of the American vaccine rollout and US high yield's more cyclical tilt and higher exposure to lower-rated credits.

New issue volume was robust in the first half of the year, as issuers continued to tap the *high yield* market. US *high yield* primary activity came in at US\$299.1bn, ahead of the US\$218.4bn issued during the same period last year. Most of the year-to-date issuance has been related to refinancing. European *high yield* issuance was also robust, with year-to-date issuance in the European *high yield* market coming in at €93.1bn, on pace for a record total.

GLOBAL FIXED INCOME cont'd.

BNY MELLON GLOBAL HIGH YIELD BOND FUND cont'd.

The Fund underperformed the broader developed *high yield* market during the period. While it benefited within the aerospace and healthcare sectors, this was offset by positioning in the energy sector. Within the energy sector, the Fund's lack of exposure to some of the more stressed *credits* detracted, as bonds with greater exposure to market growth rallied sharply alongside the rise in oil prices. While the Fund's *overweight* to the CCC segment was a contributor, selection within the segment was a relative detractor, as the most stressed *credits* outperformed the broader market. The Fund's *underweight* to BBs contributed positively to relative performance.

The manager remained constructive on single-B rated bonds and select CCC opportunities in light of improving fundamentals, strong liquidity and expectations for lower defaults. Additionally, opportunities in Covid-sensitive sectors were reassessed. These sectors included transportation, energy and gaming, with a focus on those businesses with stronger balance sheets and liquidity resources.

Alcentra NY, LLC July 2021

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND

Over the six-month period under review, the Fund's USD A (Acc.) share class *returned* 2.71%, net of fees, compared with a *return* of 0.09% for 3 Month USD LIBOR and 2.67% for the Lipper Global Bond Global High Yield USD sector average, all in US dollar terms.

The Fund generated a positive return and outperformed both its benchmark and the sector average. With economic growth recovering on the back of sizeable fiscal and monetary stimulus and the rollout of Covid-19 vaccination programmes, credit defaults continued to decline despite being relatively elevated in the US energy sector. The high yield sector fared well given the prevailing 'risk on' environment and a continued 'hunt for yield'. Technical conditions remained supportive despite high new issuance levels as companies opportunistically refinanced and raised liquidity given the low interest rate environment. With the global economy rebounding and higher inflation figures being reported, government bond yields rose markedly over the period. However, *yields* fell back slightly in June as a more hawkish Federal Reserve and the spread of the delta variant of Covid-19 led to investors scaling back their longer-term growth forecasts.

The manager invests the majority (over 50%) of assets in a *portfolio* of *high yielding* bonds that are *short-dated* (that is, bonds that mature, or are expected to be called, within approximately one to two years) with no persistent

geographical, industry or sector focus. The manager invests in debt and debt-related *securities* that may be *investment grade* or *sub-investment grade* quality.

There are now 85 names in the *portfolio* (up from 77 at the end of 2020). The Fund has an average *credit rating* of B and average expected *maturity* of 1.4 years.

The manager reinvested call proceeds throughout the period and then, over April and May, sold assets that were trading tight (a trading environment in which the price difference between the best bid and offer is very small) in anticipation of an internal fund redemption. In June, the manager added risk due to inflows.

The market is being driven by very strong technicals, especially the hunt for yield and income. With rates expected to remain low for many years, non-traditional high yield investors are particularly favouring the BB space; this segment looks attractive in terms of spread levels — which are, for the most part, wide enough to accommodate interest rate movements — as default risk here remains close to zero. In a recovery scenario, the manager expects euro BBrated bonds to compress versus euro BBBs but to remain relatively neutral versus euro Bs; increased demand for BBrated bonds from non-high yield investors in the hunt for yield is likely to balance stronger demand for bonds with a higher exposure to market growth as economic growth improves. The manager will continue to avoid CCC-rated companies and sectors that have been heavily affected by Covid-19 and which have stretched credit profiles (with elevated *defaults*) but will look closely at opportunities in names that they believe have sufficient 'liquidity runway' to outstay the pandemic.

Insight Investment Management (Global) Limited July 2021

BNY MELLON SUSTAINABLE GLOBAL DYNAMIC BOND FUND

Over the six-month period under review, the W Acc share class of the Fund *returned* -0.91%, net of fees, compared with a *return* of 0.72% for the EURIBOR 1 month + 2% index, in euro terms. The Fund produced a negative absolute *return* and was behind the comparative *benchmark*.

The main factor in the Fund's underperformance of its benchmark was the negative return from emerging markets. In recognition of this, the manager established a short position in 10-year US Treasuries to hedge the duration risk from holdings in emerging markets. This helped to limit losses.

GLOBAL FIXED INCOME cont'd.

BNY MELLON SUSTAINABLE GLOBAL DYNAMIC BOND FUND cont'd.

Positions in developed market government bonds also detracted, as government bonds sold off in the early part of the year. US government bonds were among the main negatives here. However, the manager's strategy of *hedging duration* risk by using *derivatives* partially offset the impact of the sell-off. The Fund's *underweight* position in the US dollar also detracted from *returns*.

High yield bond holdings generated the Fund's strongest returns, with the most noteworthy performance coming from a UniCredit contingent convertible bond. The contribution from investment grade bonds was marginally negative, although holdings in Additional Tier 1 bonds issued by various financial institutions boosted returns.

The manager reduced the Fund's duration over the period. Higher-duration holdings, including long-dated US Treasuries and Australian and Italian government bonds, were sold. Call options_on US Treasuries were purchased later in the period. Exposure to high yield credit was also increased. Purchases included bonds issued by Bway, which benefits from patented technology enabling it to produce containers that are 100% recyclable, and Kloeckner, a producer of rigid plastic films used in packaging for the medical devices and pharmaceutical, food industries. Kloeckner has a sustainability-linked loan which has three environmental, social and corporate governance key performance indicators based on emissions reduction, packaging, and women in management.

Other additions included Ardagh Metal Packaging's *green bond*, Cedacri, Cerba, Nobel, Nobian, Nomad Foods, and Dana. These purchases were partly funded through a number of bonds being called or sold, including Laureate Education, Center Parcs and T-Mobile. In *investment grade* bonds, the *cyclicality* of holdings was raised through the purchases of fashion retailer H&M and European logistics *real assets* specialist Tritax EuroBox's *green bond*.

In *emerging markets*, the manager added to existing positions in Colombia, Indonesia and Mexico and sold holdings in Ethiopia, Costa Rica, Peru and Paraguay. The Fund's *underweight* US dollar position was tactically reduced. The manager increased the euro *short*, unwound the sterling *short* position and introduced an *underweight* in the Japanese yen to finance a *long* position in the New Zealand dollar.

The manager continues to prefer *credit* risk to *duration* risk, as economic growth is expected to remain strong as vaccine rollouts continue. The economic recovery is likely to be slightly offset by the end of government support packages; still, the manager remains positive on *risk assets*, particularly *high yield credit* and local currency *emerging markets*.

Newton Investment Management Limited July 2021

REGIONAL & SPECIALIST FIXED INCOME

BNY MELLON EFFICIENT GLOBAL HIGH YIELD BETA FUND

Over the six months under review, the Fund's USD W (Acc.) share class generated a *return* of 3.22%, net of fees, compared with a *return* of 3.36% for the Bloomberg Barclays Global High Yield Corporate TR Index (USD Hedged), both in US dollar terms.

The Fund produced a positive *return* but underperformed the *benchmark*. Global *high yield* bonds rose, boosted by ongoing Covid-19 vaccine rollouts, strong *macroeconomic* data, *fiscal stimulus* measures and robust first-quarter *earnings*. Bonds with a lower *credit rating* outperformed on a *total return* basis, with the CCC bucket rising more than B and BB-rated *credits*. Most sectors made gains, with higher oil prices driving the energy sector to the best *return*, followed by transportation. Utilities and communications underperformed. Government bond *yields* were mostly higher in 2021.

The Fund is positioned to provide *diversified* exposure to global *high yield* corporate bond *securities* with similar *credit rating*, *duration*, and *maturity* characteristics as those found in the Bloomberg Barclays Global High Yield Corporate Index, while seeking to mitigate and minimise *default* risk and transaction costs associated with traditional sample and replication approaches.

Mellon Investments Corporation July 2021

BNY MELLON EFFICIENT GLOBAL IG CORPORATE BETA FUND

Over the six-month period under review, the Fund's USD W (Acc.) share class *returned* -0.87%, net of fees, compared with a *return* of -0.89% for the Bloomberg Barclays Global Aggregate Corporate TR Index (USD Hedged), both in US dollar terms.

The Fund slightly outperformed its benchmark. Global investment grade credit finished lower for the period, mainly due to the sharp rise in rates during the first quarter. Yields on 10-year US Treasury notes rose, as did those of German government bonds and UK Gilts. Rates stabilised in the second quarter, though the sector still finished with a modest loss. Excess returns were positive. Energy and brokerage/asset managers/exchanges were the best performing sectors on both a total return and excess return basis. Technology and consumer cyclicals underperformed. Lower-rated credits less sensitive to interest rates outperformed higher-rated bonds. Among countries, US credit was the best performer.

The Fund is positioned to provide *diversified* exposure to global *investment grade* corporate bonds with similar *credit*, *duration* and *maturity* characteristics as those found in the

Bloomberg Barclays Global Aggregate Corporate Index, while seeking to mitigate and minimise *credit rating* downgrade risk and transaction costs associated with traditional sample and replication approaches.

Mellon Investments Corporation July 2021

BNY MELLON EFFICIENT U.S. FALLEN ANGELS BETA FUND

Over the six-month period under review, the Fund's USD W (Acc.) share class generated a *return* of 4.09%, compared with a *return* of 4.28% for the Bloomberg Barclays US HY Fallen Angel 3% Cap Total *Return* Index Value Unhedged, both in US dollar terms.

The Fund closely tracked the *benchmark* during the period. Energy, the largest sector of the *benchmark index* at approximately 25%, produced meaningful *returns* for the asset class. The second largest sector, *consumer cyclicals* (at a c.19% weight), also performed well, but slightly lagged the *index*. Insurance, with a *return* of 11.8%, was the best performer but had minimal impact due to its low *index* weight.

Fairly low *volatility* and virtually no *credit rating* downgrade activity led to reduced opportunities over the review period. An *overweight* to new *fallen angels* was modestly positive. There were very few new downgrades in 2021, though bonds downgraded over the past 12 months outperformed. Mellon's *credit* model proved modestly negative. Both value and quality factors were less effective as investors gravitated towards riskier segments. From a *return* perspective, the older-vintage *fallen angels* (whose downgrades occurred more than 24 months ago) largely performed in line with newer vintages.

The Fund is positioned to provide *diversified* exposure to US *fallen angel* bonds that have been downgraded from *investment grade* to *high yield*.

Mellon Investments Corporation July 2021

BNY MELLON EFFICIENT U.S. HIGH YIELD BETA FUND

Over the six-month review period, the Fund's USD A (Inc.) share class *returned* 3.90%, net of fees, against a *return* of 3.62% for the Bloomberg Barclays U.S. Corporate High Yield TR Index.

The Fund produced a positive *total return* and outperformed its *benchmark*. US *high yield* bonds rose in the period, boosted by ongoing vaccine rollouts, strong *macroeconomic* data, *fiscal stimulus* measures and robust *earnings* that helped offset concerns about rising *inflation*. Bonds with a

BNY MELLON EFFICIENT U.S. HIGH YIELD BETA FUND

lower *credit rating* outperformed. On a *total return* basis, CCC-rated bonds rose. BBs and B-rated bonds were higher. Most sectors made gains, with elevated oil prices driving the energy sector higher. Transportation and other industrials also made solid gains. Utilities was the only sector to decline, but communications underperformed. US *Treasury yields* were sharply higher. The five-year US *Treasury yield* rose 53 *basis points (bps)* to 0.89% while the 10-year *yield* was higher by 55*bps*. US *high yield* outperformed US Treasuries in the first half of the year.

The Fund is positioned to provide *diversified* exposure to US *high yield* corporate bond *securities* with similar *credit*, *duration* and *maturity* characteristics as those found in the Bloomberg Barclays US Corporate High Yield Index, while seeking to mitigate and minimise *default* risk and transaction costs associated with traditional sample and replication approaches.

Mellon Investments Corporation July 2021

BNY MELLON EMERGING MARKETS CORPORATE DEBT FUND

Over the six-month period under review, the Fund's USD A share class *returned* 0.59%, net of fees, compared with a *return* of 1.28% for the JP Morgan Corporate EMBI Broad Diversified USD Index TR and 0.17% for the Lipper Global Bond Emerging Markets Global Corporates sector average, all in US dollar terms.

The Fund generated a positive *return* and outperformed the sector average but underperformed its *benchmark*. Emerging market assets sold off over the first quarter against a backdrop of rising US *Treasury yields*. However, they rallied during the second quarter as *Treasury yields* fell back, with investors accepting central banks' view that higher *inflation* would prove transitory (despite the Federal Reserve taking a more *hawkish* stance). A robust global economic recovery is now underway, supported by the rollout of Covid-19 vaccination programmes and continued *fiscal* and *monetary policy* support from governments and central banks. With *yields* still at historically attractive levels for issuers, and investors seeking income, issuance stayed high despite various risks, including an elevated number of Covid cases and fraught US-China relations.

By region, Central & Eastern Europe and Latin America were the largest positive contributors to performance, while the Middle East & Africa also helped slightly. However, Asia detracted.

The most positive countries were Brazil, Turkey, Mexico, Argentina, and the Republic of Moldova. In contrast, the largest detractors were China, the Philippines, India, and Jamaica; *portfolio hedges* also had a detrimental effect, as the *benchmark* rose over the period.

By sector, the main positive contributors were financials; transport; industrials; and metals and mining. Oil and gas; Over the six-month period under review, the Fund's USD A share class *returned* 0.59%, net of fees, compared with a *return* of 1.28% for the JP Morgan Corporate EMBI Broad Diversified USD Index TR and 0.32% for the Lipper Global -Bond Emerging Markets Global Corporates sector average, all in US dollar terms.

High yield bonds, particularly CCC and B-rated, positively contributed to performance; C-rated bonds were also a minor positive. However, both BB and CC-rated bonds were small negatives. *Investment grade* bonds detracted. Both A and AAA-rated instruments were negatives, although AA and BBB-rated bonds were small positives.

We made various adjustments to Fund positioning. During the first quarter, the manager added to the Fund's *duration* exposure but cut its *overweight* position in *high yield*. In the second quarter, the manager moved to an *underweight duration* position given increased concerns about rising *inflation* leading to higher interest rates and added to the Fund's *high yield* position based on an improving growth outlook. The manager also added exposure to new issues and secondary names. The Fund's preferred *overweight* country positions were Peru, Brazil, China, and Colombia.

In the manager's view, the recent underperformance of emerging market assets has more to do with technical factors than *fundamentals*. In emerging market corporate bonds in particular, the consensus positioning has been wrongfooted by recent growth scares in developed markets and the rally in core rates, leading to investors selling emerging market *high yield* corporates in particular. Heavy issuance in the primary market, again mostly focused on *high yield*, has exacerbated the moves.

Insight Investment Management (Global) Limited July 2021

BNY MELLON EMERGING MARKETS DEBT FUND

Over the six-month period under review, the USD A share class of the Fund *returned* -0.73%, net of fees, against -1.00% for the JP Morgan EMBI Global Index and -0.96% for the Lipper Global – Bond Emerging Markets Global HC sector average, all in US dollar terms.

The Fund outperformed the *benchmark* in the first half of the year as the pressure for higher US *Treasury* rates eased and triggered a solid market recovery in fixed income markets. In terms of *hard currency* relative performance, gains came from both *overweight* allocations to *frontier markets* and corporate bonds, especially those with a BB *credit rating*. The largest contributor to Fund performance was the allocation to corporate bonds (including Sasol, Metinvest and several Brazilian corporates) followed by security selection in *quasi-government* bonds (including DP World). Within the *frontier markets* sovereign space, *overweight* allocations to Ukraine warrants and Ecuador, Oman and Senegal outperformed.

Throughout the first half of the year, the Fund maintained its top-down positioning characterised by net *long* risk, with trades mainly focused on new issuance and rotating *credits* on a relative value basis – focused on shifting between regions and across the *credit* rating spectrum. In the primary market, the manager participated in several corporate and *investment grade* sovereign issuances.

The ongoing rebound in global economic activity has become more vigorous and broad-based. In the US, fiscal stimulus and a revival in consumer spending has seen growth and inflation forecasts revised upwards and elicited the first signs that the US Federal Reserve may be planning for the tapering of policy. The European vaccination effort has finally found traction, pulling the economy up in tandem. Chinese growth is waning, albeit with indicators of economic activity stabilising at slightly above trend, in response to the tightening of administrative policies toward lending. The second half of 2021 could see emerging market vaccination rates pick up substantially. The outlook for emerging markets, of course, varies by region. Eastern European and Northern Asian economies are generally better positioned than their African and Latin American counterparts, in the manager's view.

Mellon Investments Corporation July 2021

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND

Over the six-month period under review, the USD A share class of the Fund *returned* -3.67%, net of fees, against -3.38% for the JP Morgan GBI-EM Global Diversified TR Index and -3.22% for the Lipper Global — Bond Emerging Markets Global LC sector average, all in US dollar terms.

The Fund produced a negative *return* and underperformed its *benchmark* and the sector average. From a regional perspective, the main source of weakness was Latin America. Local-rates markets repriced higher on the back of a combination of an unsupportive global environment and domestic pressures in cases such as Chile, Peru and Colombia. In terms of relative performance, both currency and *duration* components were flat. On the currency side, the main detractor was a *long* position in the Colombian peso. *Short* positions in the Peruvian sol and Romanian leu, and a *long* in the Russian rouble, contributed. On the *duration* side, the main contributors were *short* positions in Poland and Turkey and a *long* position in Mexico; *long* positions in Colombia and Chile detracted.

Throughout the first half of the year, the manager reduced the Fund's risk but maintained long emerging market positions in selected currencies, funded against a combination of mainly the euro and US dollar. The Fund had a *long duration* position of approximately 0.85 years in countries with healthy *fundamentals* and robust support from local investors. Notable positioning changes included rotating the Fund's funding currency from the US dollar to a mix of the US dollar and euro; shortening *duration* in several local markets from the *long-dated* end to the middle of the *yield curve*; the initiation and closing of an *underweight* in the Peruvian sol; and introducing *long* Singaporean dollar and *short*Thai baht positions.

In the manager's view, the outlook for economic activity and monetary policy in emerging markets vary widely. Robust Chinese, US, and now European growth could provide a supportive demand environment. As a rule, the markets of Northern Asia seem to be on sound macroeconomic footing, with well-anchored inflation expectations, and look positioned to benefit from robust US and European demand. Eastern Europe shares this outlook. Other emerging markets, primarily those of Southern Asia and Latin America, felt it necessary to hike interest rates as currency depreciation drove realised and expected inflation higher.

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND cont'd.

Looking forward, the manager expects further policy differentiation between *emerging markets* as countries with established *inflation*-targeting frameworks outperform those without. *Credit* quality and elevated government debt levels are potential medium-term issues, as the appetite for 'post-crisis' *fiscal* consolidation is low.

Mellon Investments Corporation July 2021

BNY MELLON EMERGING MARKETS DEBT OPPORTUNISTIC FUND

Over the six-month period under review, the USD C share class of the Fund *returned* -1.71%, net of fees, against -1.65% for the *benchmark*, a composite *index* comprising 50% JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 25% JP Morgan Emerging Markets Bond Index Global TR Index, 25% JP Morgan Corporate Emerging Markets Bond Index Diversified TR Index, and -3.22% for the Lipper Global – Bond Emerging Markets Global HC sector average, all in US dollar terms.

The Fund produced a negative *return* and was behind its *benchmark*, but ahead of the sector average.

In terms of local currency relative performance, the currency component was flat while the *duration* component was positive. On the currency side, the main detractor was a *long* position in the Colombian peso. *Short* positions in the Peruvian sol and Turkish lira contributed. On the *duration* side, the Fund's *long* position in Chile detracted. However, this was offset by contributions from a *short* position in Turkey and a *long* in Mexico (via Pemex, state-owned petroleum company).

In terms of *hard currency* performance, gains came from both *overweight* allocations to *frontier markets* and corporate bonds, especially those with a BB *credit rating*. The largest contributor to Fund performance was the allocation to corporates (including Sasol, Metinvest and several Brazilian corporates) followed by *security* selection in *quasi-government* bonds (including DP World). *Overweight* positions in Ecuador, Ukraine warrants, Oman and Senegal outperformed.

The Fund maintained its positioning characterised by *long hard currency* risk and *long* emerging market positions in selected currencies, funded against a combination of mainly the euro and US dollar, and *long duration* in countries with healthy *fundamentals* and solid support from local investors.

Notable local currency positioning changes included rotating funding currency from the US dollar to a mix of the US dollar and the euro; shortening several local markets from *long duration* end to the middle; the initiation and closing of an *underweight* position in the Peruvian sol; and introducing a *long* position in the Singaporean dollar and a *short* in the Thai baht. In the primary market, the Fund participated in several corporate and *frontier market* government bond issuances.

The outlook for economic activity and *monetary policy* varies widely. The markets of northern Asia seem to be on sound *macroeconomic* footing and look positioned to benefit from robust US and European demand. Eastern Europe shares this outlook. Other *emerging markets*, primarily those of southern Asia and Latin America, felt it necessary to hike rates as currency depreciation drove realised and expected *inflation* higher.

The manager expects further policy differentiation between *emerging markets* as countries with established *inflation*-targeting frameworks outperform those without.

Mellon Investments Corporation July 2021

BNY MELLON EMERGING MARKETS DEBT TOTAL RETURN FUND

Over the six-month period under review, the Fund's USD W (Acc.) share class *returned* -1.78%, net of fees, compared with -0.92% for the *benchmark** and -3.22% for the Lipper Global - Bond Emerging Markets Global LC sector average.

The Fund generated a negative *return* and underperformed its *benchmark* but outperformed the sector average. By region, Latin America, in particular, and Asia detracted from performance. Developed markets, the Middle East & Africa, and Central & Eastern Europe were small positives.

Foreign exchange allocations detracted from performance. The largest negatives were Colombia, Brazil, and Romania but the US, *eurozone*, and South Korea helped. Local currency rates positions also weighed on *returns*, particularly those in Brazil, Colombia, Malaysia, and Indonesia but Egypt, South Africa, Argentina, and Romania were positives. In addition, US dollar-denominated sovereign bonds slightly detracted: Egypt and Mexico were minor negatives, while Ukraine and Colombia were small positives. Meanwhile, local currency corporate bonds slightly supported *returns* due to small positives in Kazakhstan and Argentina.

Various adjustments were made to the Fund's positions: during the first quarter, the manager added to the Fund's *overweight duration* exposure but cut its *overweight* position in *high yield*. In the second quarter, the manager moved to an *underweight duration* position given increased concerns

BNY MELLON EMERGING MARKETS DEBT TOTAL RETURN FUND cont'd.

about rising *inflation* leading to higher interest rates, and added to the Fund's *high yield* position given an improving growth outlook. The manager also added exposure to attractively priced new issues and good-value secondary names throughout the period. At the end of the six months under review, the Fund's preferred overweight positions were Brazil, Colombia, Egypt, Mexico and Turkey.

*Comprised 1/3 JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 1/3 JP Morgan Emerging Markets Bond Index Global Diversified TR Index, 1/3 JP Morgan Corporate Emerging Markets Bond Index Broad Diversified TR Index.

Insight Investment Management (Global) Limited July 2021

BNY MELLON EUROLAND BOND FUND

Over the six months under review, the Fund's Euro A share class *returned* -2.60%, net of fees, compared with a cumulative *return* of -2.28% for the benchmark Bloomberg Barclays Euro Aggregate Bond Index.

The Fund produced a negative *return* and underperformed its *benchmark*. Developed market government bond *yields* moved higher in the opening months of the year as the rollout of Covid-19 vaccination programmes raised the prospect of an acceleration in economic growth. However, accompanying this optimism were market concerns about *inflation* and the need for central banks to reverse low interest rate policies. Key indicators rose, with the US 10-year *Treasury yield* moving from 0.92% at the start of the year to a high of 1.74% on 31 March. The German 10-year government bond *yield* lagged the move in US rates by a few weeks, reaching a high of -0.10% in mid-May (having begun the year at -0.57%). Fixed income asset classes more sensitive to interest rates have struggled to generate positive *total returns* year to date.

The Fund's manager began reducing exposure to *investment grade* corporates last September (as *spreads* had moved closer to what the investment team considered to be fair value) and continued to do so into 2021. The Fund's exposure was circa 18.5% at the end of June 2021, slightly *underweight* the *index*'s 19.1%.

More value was seen in *high yield* corporates, where the Fund maintained out of *benchmark* exposure of circa 5.3%, predominately focused on industrial sector issuers. Emerging market exposure stood at approximately 9.4%, representing a significant *overweight* versus the *index*. The Fund also owned a circa 0.7% holding in the BNY Mellon Emerging Market Debt Fund, which equated to aggregate exposure of approximately 10.1% to *emerging markets*.

Euro-denominated treasury instruments (e.g. German, French and Italian government bonds) are the single largest asset class within the Bloomberg Barclays Euro Aggregate Index, representing circa 57.1% of the *benchmark*. The Fund was *underweight* compared to the *benchmark* with holdings of 52.2%, including approximately 2.4% split between Japanese and Australian government debt.

The Fund maintained *diversification* across approximately 165 separate issuers, and had an average *credit rating* of A+.

Mellon Investments Corporation July 2021

BNY MELLON EUROPEAN CREDIT FUND

Over the six months under review, the Fund's Euro A share class *returned* 0.16%, net of fees, compared with a *return* of -0.48% for the Markit iBoxx Euro Corporates Index TR and -0.17% for the Lipper Global – Bond EUR Corporates sector average, all in euro terms.

The Fund generated a positive *return* and outperformed both its *benchmark* and the sector average. *Security* selection and sector allocation added value: *asset-backed securities* and the automobiles sector were positives, although energy and the iTraxx Main protection position detracted. Positive contributions also came from positions in the BNY Mellon Global Short-Dated High Yield Bond Fund and BNY Mellon Emerging Markets Corporate Debt Fund. *Credit* positions more sensitive to changes in the level of the market contributed modestly, given the Fund's *overweight credit* risk position as *spreads* tightened, but *duration* and *yield curve* positions slightly detracted.

Activity included participation in some new issues, such as Sabadell, Fidelidade, Hammerson, Mahle, and Euronext, to name a few.

After completing its strategic review, the US Federal Reserve amended its 'Statement on Longer-Run Goals and Monetary Policy Strategy'. Following periods when inflation trends below 2%, *monetary policy* will aim to achieve *inflation* moderately above 2% for some time; the Fed will also assess employment's shortfall from its maximum level. Until its *inflation* and employment criteria have been met, short-term interest rates will not be raised.

With strong growth likely in the next few years, markets expect *inflation* to be high enough for the *tapering* of asset purchases to start later this year and, possibly, for rates to rise in 2022. However, the Fund's manager expects *tapering* from early 2022 and no rate rises until late 2023.

In June, the European Central Bank decided to maintain a 'significantly higher' pace of purchases relative to the first months of 2021; financing conditions and *inflation* prospects

REGIONAL & SPECIALIST FIXED INCOME cont'd

BNY MELLON EUROPEAN CREDIT FUND cont'd.

Product growth forecasts were increased by more than expected, from 4.0% to 4.6% this year and 4.1% to 4.7% in 2022. However, only small upward revisions were made to its *inflation* forecasts (other than for 2021, as anticipated).

Insight Investment Management (Global) Limited July 2021

BNY MELLON U.S. MUNICIPAL INFRASTRUCTURE DEBT FUND

Over the six-month review period to 30 June 2021, the Fund's USD C (Acc.) share class *returned* 1.30%, compared with a *return* of 0.69% for the *benchmark* (50% Bloomberg Barclays US Municipal Bond TR Index, 50% Bloomberg Barclays Taxable US Municipal Bond TR Index), both in US dollar terms.

Overall Fund *duration* (to worst) was 0.20 years *long* versus the *benchmark* at 7.00 years compared with 6.80 years, and had a *yield to worst* of 1.91% compared with the *benchmark*'s 1.57%. Average *portfolio credit* quality was similar to the benchmark's weighted average *credit rating* of AA-.

The Fund invests in issuers across a large number of US states, although the economically more significant and populous states do feature as domicile for a significant proportion of the *securities* held in the *portfolio*. Grouped by state, the top five exposures represent around 58% of the *portfolio*, comprising bond issuers within California, New York, Illinois, Pennsylvania and Florida.

The Fund continues to favour *revenue bonds* and held circa 78.7% compared with the benchmark's approximately 63.8%. *Overweight* positions by sector included hospitals and airports. The manager believes these sectors will be well positioned to benefit from an increase in elective procedures and leisure travel, respectively, as the US economy re-opens through 2021 and Covid-19 restrictions ease. The Fund is heavily *underweight* state level *general obligation instruments*, with just 2.8% held in the states of California and New York compared with circa 14.8% across all states within the benchmark.

Mellon Investments Corporation July 2021

RESPONSIBLE HORIZONS EURO CORPORATE BOND FUND

The Fund was launched on 27 March 2021.

On 26 March 2021, the Insight Sustainable Euro Corporate Bond Fund merged into the Responsible Horizons Euro Corporate Bond Fund. Performance data covering periods prior to this date correspond to the Insight Sustainable Euro Corporate Bond A Acc. EUR.

Over the six-month period under review, the Fund's Euro W (Acc.) share class *returned* -0.44%, net of fees, compared with -0.39% for the Bloomberg Barclays Euro Aggregate Corporates TR Index and -0.17% for the Lipper Global – Bond EUR Corporates sector average.

The Fund's sector allocation detracted from performance. An overweight position in telecommunications and an underweight position in automobiles were detrimental. However, overweight positions in property and other financials, as well as an underweight position in tobacco, contributed positively. The Fund's duration and yield curve positioning also slightly detracted. In contrast, security selection positively contributed to performance. Some of the best performing names were the long positions in telecom Verizon and insurer Fidelidade, but the long position in shopping centre owner Scentre Group detracted. Also, the Fund's long position in credit was marginally beneficial, as spreads tightened over the period.

The manager participated in a number of new issues, including Virgin Money, Euronext, Barclays, SBB, Eni and Coca-Cola, to name a few examples. The manager also bought *green bonds* from utility Enexis and Sabadell, Bank of Ireland and UniCredit in the financials sector, and *sustainability bonds* from FedEx (with targets in vehicle electrification, sustainable fuels and natural carbon sequestration).

At the end of the reporting period in June, 23.2% of the Fund was invested in positive *impact bonds* (compared with 18.0% for the *benchmark*). The Fund's weighted average *environmental, social and corporate governance (ESG)* score is 2.1 compared with 2.4 for the *benchmark* (according to Insight Investment's proprietary Prime corporate *ESG* ratings range of 1 to 5 with the lower the score, the better). The Fund's carbon intensity is 57% of the *index*'s score – the Fund targets a carbon intensity below the level of the *benchmark*.

GLOSSARY OF FINANCE TERMS

Term	Definition	Term	Definition
Alternatives	An alternative is a financial asset that does not fall into one of the conventional investment categories. Conventional	Correlation(s)/Correlated	Correlation is a measure of the degree to which two variables move in relation to one another.
	categories include equities, bonds and cash. Alternative investments include private equity or venture capital, hedge funds, managed funds, art and antiques,	Credit(s)	In this context it is synonymous with corporate bonds, debt issued by companies.
Accest Declard Constitution	commodities and derivative contracts. Real estate is also often classified as an alternative.	Credit rating(s)	An evaluation of the credit worthiness of a borrower, such as particular company or government. A company with a debt
Asset-Backed Securities (ABS)	Pools of loans packaged and sold as securities — a process known as "securitisation". Typically the assets backing these are home mortgages or		rated AAA is considered to be more credit worthy than one with a debt which is rated BBB.
Basis points (BPS)	credit card receivables. Basis point (BPS) refers to a common unit of measure for interest rates and other percentages in finance. One basis point is equal to 1/100th of 1%, or 0.01%, or 0.0001.	Credit spreads	The difference in yield between two bonds of similar maturity but different credit quality; for example if the 10-year Treasury (US government debt) is trading at a yield of 6% and a 10-year corporate bond is trading at a yield of 8%, the corporate bond is said to
Benchmark	A baseline for comparison against which the performance, holdings or duration of a fund, can be measured. This is usually an index.	-	offer a 200-basis-point spread over the Treasury. Widening credit spreads indicate growing concern about the ability of borrowers to service their debt. Narrowing credit spreads indicate improving private creditworthiness. See
Call option(s)	An option contract giving the owner the right, but not the obligation, to buy a specified amount of an underlying security at a specified price within a	Cyclical(s)/Cyclicality	also the definitions of yield and basis points. A cyclical stock or industry is one
Collateralised Mortgage Obligations (CMOs)	A type of security secured or backed by a pool of mortgages on real estate.	-	deemed sensitive to the wider economy. As such its revenues are generally higher in periods of economic prosperity and expansion and lower in periods of economic downturn and contraction.
Consumer cyclicals	A category of stocks that rely heavily on the business cycle and economic conditions. Consumer cyclicals include industries such as automotive, housing,	Default(s)	Default is the failure to pay interest or principal on a loan or security when due.
Consumer discretionary	entertainment and retail. Goods and services considered non essential by consumers but desirable	Defensive -	A defensive stock or industry is less sensitive to the wider economy, such that earnings and dividends are generally stable.
Consumer Price Index (CPI)	if their income is sufficient to purchase them. An index used to measure inflation, based on the prices in a basket of goods and services, meant to be representative of those we typically spend our money on.	Derivative(s)	A financial security with a value that is reliant upon or derived from an underlying asset or group of assets. The derivative itself is a contract between two or more parties based upon the asset or assets. Its price is determined by fluctuations in the underlying asset.
Consumer staples	Goods and services that people are unable or unwilling to cut out of their budgets regardless of their financial situation.		The most common underlying assets include stocks, bonds, commodities, currencies, interest rates and market indexes.
Contingent convertible bond(s)	A type of fixed income instrument that is convertible into equity (company shares) if a pre-specified trigger event occurs.	Diversified/ Diversification/ Diversifying	Investing in a variety of companies or financial instruments, which typically perform differently from one another. For example, investing in different regions or sectors, with the aim of
Convertible bond(s)	A convertible bond is a fixed debt security that yields interest payments, but can be converted into a		offsetting poor performance in one, with positive performance in another.
	predetermined number of equity shares. The conversion from the bond to stock can be done at certain times during the bond's life and is usually at the	Dividend(s)	A sum paid regularly by a company to its investors as a reward for holdings their shares.

Term	Definition	Term	Definition
Dove(s)/Dovish	A dove is an economic policy advisor who promotes monetary policies that involve low interest rates, based on the belief that low interest rates increase employment. Statements that suggest that inflation has few negative effects are called dovish.	Frontier market(s)	Frontier markets are less advanced economies in the developing world and are less established than an emerging market. Many frontier markets do not have developed stock markets, and while they are smaller, less accessible and riskier than emerging markets, they are considered viable investments.
Duration(s)	A measure of the sensitivity of the fixed income security or bond fund to a change in interest rates. The longer a bond's duration, the more sensitive it is to interest rate movements.	Fundamentals (company)	A basic principle, rule, law, or the like, that serves as the groundwork of a system. A company's fundamentals are factors such as its business model, earnings, balance sheet and debt.
Earnings	Money obtained for labour or services.	- Fundamentals	A basic principle, rule, law, or the like,
Environmental, social and corporate governance (ESG)	A type of responsible investment consisting of a set of standards through which a company's operations are screened prior to investing.	(economic)	that serves as the groundwork of a system. Economic fundamentals are factors such as inflation, employment and economic growth.
Equity/Equities	Countries in the process of becoming industrialized economies; the economy of a developing nation or emerging market becomes more engaged with global markets as it grows. Countries such as India and Brazil are considered to be "emerging". Shares issued by a company,	Futures	Futures are financial contracts obligating the buyer to purchase an asset or the seller to sell an asset, such as a physical commodity or a financial instrument, at a predetermined future date and price. Futures contracts detail the quality and quantity of the underlying asset; they are standardised to facilitate trading on futures
	representing an ownership interest.		exchanges.
Equity risk premium	Refers to the difference from investing in a holding or stock market that may be expected over a notional 'risk-free' rate (often longer-term government bonds, assuming zero default risk by the government). This return compensates	General obligation bonds/instruments/ securities	Municipal securities that are secured by the tax receipts of the issuing government body. Often in the event of default, general obligation bonds have a superior claim on a municipal's assets or tax receipts over other debt securities.
	investors for taking on the relatively higher risk of equity investing. The size of the premium varies and depends on the level of risk in a particular holding,	Gilt(s)	Fixed income security issued by the United Kingdom government.
	index or portfolio. It also changes over time as market risk fluctuates.	Green bonds	Fixed income financial instruments that can generate positive climate or environmental benefits.
Eurozone	The economic region that contains all members of the European Union that use the euro as currency.	Gross Domestic Product (GDP)	Gross domestic product is a monetary measure of the market value of all goods and services produced in a given period
Exchange-Traded Fund	A type of investment fund that is traded		of time.
(ETF)	on a stock exchange, typically tracks a stock index, a commodity, bonds, or a basket of assets.	Gross exposure	A measure that indicates total exposure to financial markets; refers to the absolute level of a Fund's investments.
Fallen angel(s)	A bond or bonds that have had credit ratings downgraded from investment grade to high yield.	Hard currency	Hard currencies are issued by developed countries that have a strong industrial
Fiscal/Fiscal policy	Government policy on taxation, spending and borrowing.		economy accompanied by a stable government. Generally used to refer to the UK pound sterling, the euro and the US dollar.
Fiscal stimulus	Government policy on taxation, spending and borrowing designed to stimulate the economy.	Hawk(s)/hawkish	A hawk, also known as an inflation hawk, is a policymaker or advisor who is predominantly concerned with interest
Fiscal year	The 12-month period that a company used for accounting purposes and preparing financial statements.	-	rates as they relate to fiscal policy. A hawk generally favours relatively high interest rates in order to keep inflation in check. In other words, hawks are less concerned with economic growth than they are with recessionary pressure brought to bear by high inflation rates.

Term	Definition	Term	Definition
Hedge(s)/hedged/ hedging	A method of reducing unnecessary or unintended risk.	Merger and Acquisitions (M&A)	The buying, selling, dividing and combining of different companies.
High yield	Fixed income securities with a low credit rating that is considered to be at higher risk of default than better quality securities but have the potential for higher rewards.	Mid-cap	This refers to a company with a medium- sized market capitalisation value. This is based on the market value of a publicly traded company's outstanding shares.
Impact bonds	A type of fixed income security in which the proceeds raised are dedicated solely	Monetary easing	Monetary policy in which a central bank lowers interest rates and deposit ratios to make credit more easily available.
	to projects that will meet environmental or social criteria and aim to achieve specific results.	Monetary policy	A central bank's regulation of money in circulation and interest rates.
Index/Indices	A portfolio of investments representing a particular market or portion of it. For example, the FTSE 100 is an index of the shares of the 100 largest companies on the London Stock Exchange.	Monetary stimulus	An attempt by a government to make the economy grow faster by increasing the money supply (the amount of money in the economy) or lowering interest rates.
nflation/Inflationary	The rate of increase in the cost of living. Inflation is usually quoted as an annual	Mortgage-backed securities	A type of security secured or backed by mortgages.
	percentage, comparing the average price this month with the same month a year earlier.	Option(s)	Financial contracts that offer the right, but not the obligation, to buy or sell an asset at a given price on or before a given date in the future.
nvestment grade	Fixed income securities with a medium or high credit rating that are considered to be at lower risk from default than those issued with lower credit ratings.	Overweight(s)	Having more invested in a company, region or sector, than the benchmark or comparative product.
_arge-cap	This refers to a company with a very large market capitalisation value. This is	company with a very Portfolio	A collection of investments.
Leverage(d)	based on the market value of a publicly traded company's outstanding shares. When referring to a company, leverage is the level of a company's debt in	Quantitative easing	A monetary policy whereby a central bank buys predetermined amounts of government bonds or other financial assets in order to stimulate the economy and increase liquidity.
	relation to its assets. A company with significantly more debt than capital is considered to be leveraged. It can also refer to a fund that borrows money or uses derivatives to magnify an investment position.	Quasi-government	A type of corporation in the private sector that is backed by a branch of government. Most quasi-public corporations begin as government agencies and then become separate entities.
Liquidity	Liquidity describes the degree to which an asset or security can be quickly bought or sold in the market without affecting its price. Market liquidity refers to the extent to which a market, such as a country's stock market, allows	Real assets	Real assets are tangible physical assets (e.g. a property or land). Real assets include precious metals, commodities, infrastructure, real estate, agricultural land, machinery and oil.
	assets to be bought and sold at stable prices.	Relative value	The attractiveness of one financial instrument relative to another,
Long(s)	Refers to ownership of a security held in the expectation that the security will rise in value.		measured in terms of risk, liquidity and return.
Long-dated	A description added to certain income- producing assets to highlight the fact the maturity date is well in the future.	Return(s)/Returned	The gain or loss from an investment ove a stated period of time — expressed in either percentage or cash terms.
Macroeconomic	The performance and behaviour of an economy, including factors such as economic output, unemployment, inflation and investment.	Revenue bonds	Municipal bonds that finance income- producing projects and are secured by a specified revenue source. Typically, revenue bonds can be issued by any government agency or fund that is
Maturity/Maturities	The length of time until the initial investment amount of a fixed income security is due to be repaid to the holder		managed in the manner of a business, such as entities having both operating revenues and expenses.

Term	Definition	Term	Definition
Revenues	Often referred to as sales, is the income received from a company's normal business operations and other business activities.	Treasury Inflation- Protected Securities (TIPS)	U.S. government debt securities where the value of the loan and the interest payments are adjusted in line with inflation, as reflected in the Consumer Price Index, over the life of the security.
Risk asset(s)	A risk asset is any asset that carries a degree of risk. Risk asset generally refers to assets that have a significant degree of price volatility, such as		Having less invested in a company, region or sector, than the benchmark or comparative product.
	equities, commodities, high yield bonds and currencies.	Unhedged	A position not balanced by a compensating contract or transaction.
'Safe haven'	Refers to assets that investors perceive to be relatively safe from suffering a loss in times of market turmoil.	Volatile/volatility	Large and/or frequent moves up or down in the price or value of an investment or market.
Security/Securities	A tradable financial asset such as a share in a company or a fixed income security also known as a bond.	Weighting	The exposure to a company, sector or market in a fund, usually expressed as a percentage – i.e. the Fund had a 20%
Short(s)	A way for a fund manager to express his or her view that the market or a security might fall in value.	Yield(s)	weighting to US companies. The interest received from a bond or
Short-dated	A description added to certain income- producing assets to highlight the fact the maturity date is very near or soon.		the dividends received from a share. It is usually expressed as a percentage based on the investment's costs, its current market value or its face value.
Small-cap	This refers to a company with a small market capitalisation value. This is based on the market value of a publicly traded company's outstanding shares.	Yield curve(s)	A yield curve is a line that plots the interest rates, at a set point in time, of bonds having equal credit quality but differing maturity dates.
Spread(s)	The difference between the yield of a corporate bond, and a government bond with the same maturity. Yield refers to the income received from an investment and is expressed as a percentage of the investment's current market value.	Yield-to-worst	The lowest potential yield that can be received on a bond without the issuer defaulting. This metric is used to evaluate the worst-case scenario for yield to help investors manage risks and ensure that specific income
Standard deviation	A statistical measure of dispersion of a set of data from its mean.		requirements will still be met even in the worst scenarios.
Stock(s)	Also known as equity, is a security representing the ownership of a fraction of a company listed on the stock market.		
Sub-investment grade	Fixed income securities issued with a low rating. They are considered to be at higher risk of default.		
Sustainability bonds	Fixed income financial instruments whose proceeds are applied to finance or refinance a combination of both green and social projects.		
Tapering	The reduction of the bank's quantitative easing or bond buying programmes.		
Total return(s)	The term for the gain or loss derived from an investment over a particular period. Total return includes income (in the form of interest or dividend payments) and capital gains.		
Treasury/Treasuries	U.S. government debt security with a maturity of more than 10 years. Treasury bonds make interest payments semiannually.		

BNY MELLON GLOBAL FUNDS, PLC

HALF YEARLY MANAGEMENT REPORT

BUSINESS REVIEW

The results of operations are set out in the Statement of Comprehensive Income. Further information on risk management objectives and policies are detailed below.

Assets under management at the end of the financial period are set out on the Statement of Financial Position.

There is a detailed review in the Investment Managers' Reports of factors contributing to the Funds' performance. At this time, the Board of Directors does not anticipate any changes in the structure or investment objective of the Company.

DISTRIBUTIONS

Distributions paid to redeemable participating shareholders are recognised in the Statement of Comprehensive Income as finance costs when they are declared to Euronext Dublin*, as detailed in the prospectus.

* Please refer to Note 18 of the financial statements.

SIGNIFICANT EVENTS COVID 19

In March 2020, the World Health Organisation declared COVID 19 a pandemic. While the full impact is not yet known, COVID 19 may result in continued market volatility and a period of economic decline globally. It may also have a significant adverse impact on the value of a Sub-Fund's investments and the ability to access markets or implement the Sub-Fund's investment policy in the manner originally contemplated. Government interventions or other limitations or bans introduced by regulatory authorities or exchanges and trading venues as temporary measures in light of significant market volatility may also negatively impact on the ability to implement a Sub-Fund's investment policy. Sub-Funds' access to liquidity could also be impaired in circumstances where the need for liquidity to meet redemption requests may rise significantly. Services required for the operation of the Company may in certain circumstances be interrupted as a result of the pandemic.

The developments are being monitored closely. Given the nature of the outbreak and the on-going developments, there is a high degree of uncertainty and it is not possible at this time to predict the extent and nature of the overall future impact on the Company.

There have been no other significant events affecting the Company during the financial period other than those disclosed in Note 18 to the financial statements.

SUBSEQUENT EVENTS

There have been no significant events affecting the Company since the financial period end other than as disclosed in Note 19 to the financial statements.

COMPANY RISK

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests: market risk (including market price risk, interest rate risk and currency

risk), credit risk and liquidity risk. The Company has in place risk management programmes that seek to limit the potential adverse effects of these risks on the Funds' financial performances.

RISK MANAGEMENT OBJECTIVES AND POLICIES

Details of the risks inherent in investing in the Company, its risk management objectives and policies are disclosed in Note 15 to the financial statements.

RELATED PARTY TRANSACTIONS AND BALANCES

Other than as disclosed in Note 10 to the financial statements, the Directors are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any beneficial interest as defined in the Companies Act 2014, as amended, at any time during the financial period ended 30 June 2021 and financial year ended 31 December 2020.

CONNECTED PERSON TRANSACTIONS

In accordance with the requirements of Section 43(1) of the Central Bank UCITS Regulations, any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any nongroup company sub-custodian appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis.

Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section of this Directors' Report and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Directors. Further, shareholders should refer to the prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions. Shareholders should also refer to the provisions of the prospectus dealing with conflicts of interest.

Therefore, having regard to confirmations from BNY Mellon Fund Management (Luxembourg) S.A. and its relevant delegates, the Board of Directors of the Company is satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by the Investment Managers) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during

BNY MELLON GLOBAL FUNDS, PLC

HALF YEARLY MANAGEMENT REPORT cont'd.

the financial year complied with these obligations, as attested by the Investment Managers through regular updates to the Directors.

Note 10 details related party transactions during the financial period as required by Section 33 "Related Party Disclosures" of FRS 102. However, shareholders should understand that not all "connected persons" are related parties as defined by Section 33 of FRS 102. Details of fees paid to related parties and certain connected persons are set out in Notes 3 to 7 and 10.

BNY MELLON GLOBAL FUNDS, PLC

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these financial statements are set out below:

STATEMENT OF COMPLIANCE

The condensed financial statements for the financial period ended 30 June 2021 have been prepared in accordance with Financial Reporting Standard ("FRS") FRS 104: "Interim Financial Reporting" and Irish statute comprising the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). The condensed financial statements should be read in conjunction with the annual report and audited financial statement for the financial year ended 31 December 2020 which have been prepared in accordance with FRS 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102") and Irish statute.

BASIS OF PREPARATION

The financial statements have been prepared on a going concern basis for the Company under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through the profit or loss.

The format and certain wordings of the financial statements has been adapted from those contained in the Companies Act 2014, as amended, so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

The Company has availed of the exemption available to open-ended investment funds under Section 7 "Statement of Cash Flows" of FRS 102 not to prepare a cash flow statement on the basis that substantially all of the Company's investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to redeemable participating shareholders.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires the Directors to exercise its judgement in the process of applying the Company's accounting policies. Management makes estimates and assumptions concerning the future. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are discussed below within "Financial assets and liabilities at fair value through profit or loss – Fair value estimation". The Company based its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Funds. Such changes are reflected in the assumptions when they occur and are recognised prospectively.

FOREIGN CURRENCY TRANSLATION - FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which each Fund operates (the "functional currency"). The functional currency of each Fund has been evaluated by the Board of Directors based on the currency that most faithfully represents the economic effects of the underlying transactions, events, investors' base and conditions. The financial statements are presented in US dollar, which is the Company's presentational currency.

The functional and presentation currency of the Funds are US dollar, Euro, Sterling or Japanese yen as noted in the Statement of Financial Position.

Foreign currency assets and liabilities, including net assets attributable to redeemable participating shareholders are translated into the functional currency using the closing rate applicable at the financial period end date. Foreign currency income and expenses in the Statement of Comprehensive Income are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Proceeds from redeemable participating shares issued and the cost of redeemable participating shares redeemed are also translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses arising from transactions and translations are presented in the Statement of Comprehensive Income within "net gains/losses on financial assets/ liabilities at fair value through profit or loss".

FOREIGN CURRENCY TRANSLATION - FUNCTIONAL AND PRESENTATION CURRENCY cont'd.

For Company aggregation purposes, all assets and liabilities together with income and expenses for all classes of shares are translated into US dollar using the closing rate for assets and liabilities and the average rate for income and expenses including subscriptions and redemptions, as this is the currency of the primary economic environment in which the Company operates. A currency adjustment arises from the re-translation of the opening net assets at the financial period end exchange rates, as disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This method of allocation has no effect on the value of net assets allocated to the individual Funds.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - CLASSIFICATION

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception.

A financial asset or liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorised as held for trading.

Financial assets and liabilities designated at fair value through profit or loss at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated on a fair value basis in accordance with the investment strategy of the Funds as documented in the prospectus.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – RECOGNITION, DERECOGNITION AND MEASUREMENT

Regular purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Financial assets and liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Financial assets and liabilities are derecognised when the rights to receive cash flows from or pay cash flows for the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the "financial assets or financial liabilities at fair value through profit or loss" category are presented in the Statement of Comprehensive Income within "net gains/ (losses) on financial assets/liabilities at fair value through profit or loss" in the financial period in which they arise using the average cost method.

For hedge share class level forward foreign currency contracts, the realised and unrealised gains or losses are allocated solely to the relevant share classes. The unrealised gains or losses on hedging activities are reflected in the "financial assets or financial liabilities at fair value through profit or loss" category in the Statement of Financial Position.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - FAIR VALUE ESTIMATION

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the financial period end date. In accordance with FRS 102, the Company has applied the recognition and measurement provisions of International Accounting Standards No. 39 "Financial Instruments: Recognition and Measurement" as adopted for use in the European Union. Accordingly, the quoted market price used for financial assets held is the mid-market price. When the Company holds derivatives with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions and applies this mid-market price to the net open position, as appropriate.

If a significant movement in fair value occurs subsequent to the valuation point of the Funds on the financial period end date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the last market price for a security, close of market or close of the foreign exchange, but before the Funds' valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered readily available market quotations.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - FAIR VALUE ESTIMATION contid

The fair value of financial assets and liabilities that are not traded in an active market (for example over-the-counter derivatives) is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

The carrying value less impairment provision of other receivables and payables are assumed to approximate their fair values.

The main valuation techniques of the Company are as follows:

- (a) Financial assets and liabilities listed and regularly traded on a recognised exchange and for which market quotations are readily available or traded on over-the-counter markets shall be valued at the mid-market price accordingly on the principal exchange in the market for such investment.
- (b) If the financial assets and liabilities are listed on several recognised exchanges, the mid-market price on the recognised exchange, which, in the opinion of the Directors in consultation with the relevant Investment Manager, constitutes the principal market for such assets, will be used.
- (c) If for specific financial assets or liabilities the mid-market price referred to in (a) or (b) above is not available or does not, in the opinion of the Directors in consultation with the relevant Investment Manager, reflect a fair or appropriate value, the value shall be calculated by alternative methods with care and in good faith by the Directors, as appropriate, approved for such purpose by The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary"), in consultation with the relevant Investment Manager with a view to establishing the probable realisation value for such assets
- (d) In the event that any financial assets or liabilities are not listed or dealt on any recognised exchange, such assets shall be valued by the Directors with care and in good faith and in consultation with the relevant Investment Manager at the probable realisation value. Such probable realisation value may be determined by using a quotation from a broker.
- (e) Cash and other liquid assets are valued at their face value with interest accrued, where applicable.
- (f) Units or shares in collective investment schemes (other than those valued pursuant to (a) or (b) above), are valued at the latest available net asset value of the relevant collective investment scheme.
- (g) Derivative instruments dealt on a market are fair valued at the settlement price for such instruments on such market. Where such derivative instruments are not dealt on a market, their value shall be the daily quotation from independent pricing service or market makers.
- (h) Forward foreign currency contracts are fair valued by an independent price source by reference to the price at which a new forward contract of the same size and maturity could be undertaken.
- (i) Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. Futures contracts are fair valued based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time the realised gains and losses are recognised. Unrealised gains or losses on futures contracts are shown in the Schedule of Investments. The variation margin receivable or payable at the reporting date is reported as an asset or liability, as applicable, in the Statement of Financial Position.
- (j) The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currencies purchased. Premiums paid from the purchase of options, which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised are treated as realised gains.
- (k) Interest rate, credit default and total return swap contracts are fair valued daily based upon quotations from independent pricing service or market makers and the change in the value if any is recorded as unrealised gains or losses. Payments received or made as a result of the contract termination are recognised net of any upfront payment as realised gains or losses. Income on over-the-counter derivatives accrues to the Funds and is not subject to any returns sharing arrangements with BNY Mellon Fund Management (Luxembourg) S.A (the "Manager") or any other parties.
- (l) Commercial paper and time deposits are valued at amortised cost, as a best estimate of fair value. The Company may invest in financial instruments that are not traded in an active market, whereby fair value may be determined by applying valuation techniques, such as discounted cash flow analysis and other valuation techniques used by market participants.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS - FAIR VALUE ESTIMATION contid

- (m) Exchange traded funds are fair valued based upon quotations of the net asset value per share from independent pricing sources.
- (n) Certain Funds may enter into "TBA" (To Be Announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Funds hold and maintain until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, which is in addition to the risk of decline in the value of the Funds' other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities. Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their portfolios or for delivery pursuant to option contracts that they have entered into, the Funds may dispose of a commitment prior to settlement if the Investment Manager deems it the appropriate action.
- (o) Equity swaps are priced in accordance with the pricing basis for the underlying equity positions. Finance charges on equity swaps are accrued daily, reset on a monthly basis and subject to settlement on disposal of equity swaps. Income on equity swaps accrues to the Funds and is not subject to any returns sharing arrangements with the Manager or any other parties.
- (p) Loans are fair valued based on valuations provided by the pricing vendor Markit. Fees earned or paid and the receipt of payments of principal are recorded as a component of "net gains/(losses) on financial assets/liabilities at fair value through profit or loss" in the Statement of Comprehensive Income. Where Markit is unable to provide a value for a loan, the loan is fair valued based on a quotation obtained from a loan house. Unsettled loans are fair valued based on the agreed purchase price until a valuation from pricing vendor becomes available.
- (q) Certain Funds may use Participatory Notes ("P-Notes") that are either listed or traded on eligible markets. P-Notes provide the Funds with the opportunity for economic exposure to specific equities in restricted or emerging markets, i.e. India, Sri Lanka, Vietnam, Bangladesh, China and Brazil, where owning local equity or equity related securities might be less efficient that the use of P-Notes, leading to a reduction in costs. P-Notes are valued by reference to the mid-market price of the underlying security.

LOANS

Certain Funds of the Company may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. A Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the "lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. A Fund may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. A Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement.

When a Fund purchases assignments from lenders, it acquires direct rights against the borrower of the loan. When investing in a loan, a Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt of payments by the lender from the borrower.

RECEIVABLES

Receivables include cash and cash equivalents, income receivable, receivable for investments sold, expense cap receivable from the manager, margins on derivatives contracts, subscriptions receivable and other receivables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

FINANCIAL LIABILITIES AT AMORTISED COST

Financial liabilities at amortised cost include bank overdraft, payable for investments purchased, redemptions payable, expenses payable, performance fees payable, margins on derivatives contracts, cash collateral payable to broker, income payable on swaps, finance charges payable on swaps, tax payable and other payables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

OFFSETTING FINANCIAL INSTRUMENTS

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

CROSS INVESTMENT

As at 30 June 2021, BNY Mellon Absolute Return Bond Fund, BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund invest in other Funds of the Company (31 December 2020 and 30 June 2020: BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund). These cross investments have been eliminated in the financial statements of the Company. Where a Fund invests in another Fund or Funds of the Company, these cross investments have been deducted from the total net asset value when calculating the management fees payable. The realised gains and losses, including movements in unrealised gains and losses, on the cross investments have been eliminated in the Total Company amounts disclosed in the Statement of Comprehensive Income.

CASH AND CASH EQUIVALENTS AND BANK OVERDRAFTS

Cash and cash equivalents are valued at face value, with interest accrued where applicable at relevant valuation point on the relevant business day. Cash equivalents include deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Bank overdrafts are shown separately in the Statement of Financial Position.

COLLATERAL

Cash collateral provided by the Funds is identified in the Statement of Financial Position as "margins on derivatives contracts" and is not included as a component of cash and cash equivalents. Cash collateral received by the Funds is identified in the Statement of Financial Position as "cash collateral received from broker". The obligation to return the cash collateral is identified in the Statement of Financial Position as "cash collateral payable to broker". Cash collateral received is restricted and does not form part of the Funds' cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Funds classify that asset in its Statement of Financial Position separately from other assets and identify the asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the Schedule of Investments, as indicated by a "~" tick mark.

TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. In respect of equities and financial derivative instruments, the transaction costs, when incurred, are immediately recognised in the Statement of Comprehensive Income as an expense and are included in the "net gains/(losses) on financial assets/liabilities at fair value through profit or loss". In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

DIVIDEND INCOME

Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within "dividend income" when the right of the Funds to receive payments is established. Dividend income is shown gross of any non-recoverable withholding taxes.

DIVIDEND EXPENSE

Interest on short equity swaps is recognised in the Statement of Comprehensive Income as "dividend expense", which may be subject to change, dependant on periodic resetting and/or final disposal of underlying swap instruments.

INTEREST INCOME

Interest income on interest bearing financial instruments is shown as a component of "net gains/(losses) on financial assets/liabilities at fair value through profit or loss". Bank interest income is accounted for on a cash receipts basis.

TAXATION

Under current law and practice, there is no income, gains or other taxes payable by the Funds. The Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Withholding taxes are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Certain Funds accrue for capital gains tax on net realised and unrealised gains on investments. The capital gains tax is recorded in accordance with the tax regulation of each relevant country and rates on Irish investors. The capital gains tax expense and the amounts payable at the financial period end are reflected in the "withholding taxes on dividends and other investment income" and "tax payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

EXPENSES

Expenses are accounted for on an accruals basis. Any costs associated with the termination of a Fund are paid for by the Manager.

SECURITIES LENDING

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch and the Depositary. The Company can lend securities with a value of up to 100% of any one line of stock, to borrowers approved by The Bank of New York Mellon. The Company receives securities, financial instruments or other assets as collateral against the loaned securities. The Company does accept cash as collateral but does not engage in cash collateral reinvestment. Collateral held (and pending) will not be less than 102% of the value of the securities on loan. Securities lending income is accounted for on a cash receipts basis. Details of the securities lending position at the financial period end are contained in Note 13 to the financial statements.

DISTRIBUTIONS TO REDEEMABLE PARTICIPATING SHAREHOLDERS

Distributions to redeemable participating shareholders are recognised as "finance costs" in the Statement of Comprehensive Income when they are declared to Euronext Dublin*, as detailed in the prospectus.

For non-distributing share classes, all income earned and realised net capital gains after the deduction of expenses will be accumulated and reflected in the net asset value per share.

REDEEMABLE PARTICIPATING SHARES

The Company issues multiple classes of redeemable participating shares within each Fund which are redeemable at the holder's option and do not have identical rights. Such shares are classified as financial liabilities.

Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's net asset value attributable to the share class. The redeemable participating shares are carried at the redemption amount that is payable at the financial period end date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Fund's net asset value per share at the time of issue or redemption. The Fund's net asset value per share is calculated by dividing the net assets attributable to the holders of each class of redeemable participating shares with the total number of outstanding redeemable participating shares for each respective class in accordance with the provisions of the prospectus in determining the net asset value per share for subscriptions and redemptions.

DILUTION ADJUSTMENT

To mitigate the effects of dilution, the Directors may, at their discretion, make a dilution adjustment to the net asset value per share. The Directors will retain the discretion in relation to the circumstances in which to make such a dilution adjustment.

The decision to make a dilution adjustment will depend on the volume of subscriptions or redemptions of shares in the Fund. The Directors may in their discretion make a dilution adjustment if, in their opinion, the existing shareholders, in the case of subscriptions, or remaining shareholders, in the case of redemptions, might otherwise be adversely affected. In particular, the dilution adjustment may be made in the following circumstances:

- where a Fund is in continual decline (i.e. is experiencing a net outflow of redemptions);
- if the Fund is experiencing large levels of net subscriptions or net redemptions relevant to its size; and
- in any other circumstances where the Directors believe it will be in the interests of shareholders to make a dilution adjustment.

The dilution adjustment will involve adding to the net asset value per share when the Fund is in a net subscription position, and deducting from the net asset value per share when the Fund is in a net redemption position, such figure as the Directors consider represents an appropriate figure to meet transaction costs, including but not restricted to market spreads, brokerage fees and taxes, to preserve the value of the underlying assets of the relevant Fund and in any other circumstances where the Directors believe it will be in the interests of the shareholders. The resultant amount will be the price rounded to such number of decimal places, as the Directors deem appropriate.

^{*} Please refer to Note 18 of the financial statements.

DILUTION ADJUSTMENT cont'd.

Where a dilution adjustment is made, it will increase the price at which shares shall be issued when there are net subscriptions and decrease the price at which shares shall be redeemed when there are net redemptions. The price at which each class of share shall be issued or redeemed (as appropriate) will be calculated separately but any dilution adjustment will in percentage terms affect the price of each class in an identical manner. Such dilution adjustment will not exceed 2% of the Fund's net asset value. As dilution is directly related to the inflows and outflows from a Fund, it is not possible to accurately predict whether dilution will occur at any future point in time. Consequently, it is also not possible to accurately predict how frequently the dilution adjustment will be applied.

2. SHARE CAPITAL

AUTHORISED SHARES

The initial authorised share capital of the Company is EUR 38,092 divided into 38,092 subscriber shares of EUR 1.00 each and 25,000,000,000 at no par value initially designated as unclassified shares. The unclassified shares are available for issue as participating shares.

SUBSCRIBER SHARES

The 38,902 subscriber shares at EUR 1.00 each were all issued as fully paid and are held by the Manager. The subscriber shares do not entitle the holders to any dividend and on a winding up, entitle the holders to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's investment business.

REDEEMABLE PARTICIPATING SHARES

Redeemable participating shares carry the right to a proportionate share in the assets of the Funds and the holder of the share is entitled to one vote each on a poll. Shares are redeemed by shareholders at prices based on the value of net assets of the relevant class.

The activity on redeemable participating shares for the financial period ended 30 June 2021 is as follows:

^{*}This Fund launched during the financial period.

SNY Mellon Digital Assets Fund was renamed to BNY Mellon Blockchain Innovation Fund, effective 8 December 2020. The 30 June 2020 comparative disclosure now reflects same.

3. MANAGEMENT AND PERFORMANCE FEES

MANAGEMENT FEES

The Manager is entitled to receive out of the assets of a Fund an annual management fee in respect of each class, accruing daily and payable monthly in arrears at an agreed annual rate as set out in the relevant supplement of the prospectus. The table below outlines the range of annual management fee rates for each share class:

Share Class	Rate	Share Class	Rate
Class A	0.40% - 2.00%	Class L	0.16%
Class B	0.75% - 1.50%	Class P	1.10%
Class C	0.30% - 1.00%	Class R	0.60% - 2.75%
Class D	0.50% - 1.00%	Class S	0.20% - 2.00%
Class E	0.10% - 1.50%	ClassT	0.20% - 2.00%
Class F	0.10% - 0.45%	Class U	0.20% - 1.75%
Class G	0.30% - 1.00%	Class W	0.20% - 1.00%
Class H	0.40% - 2.00%	Class X	None
Class I	0.30% - 1.00%	ClassY	None
ClassJ	1.25% - 1.50%	Class Z	0.35% - 0.65%
Class K	0.30% - 1.40%		

Management fees accrued to the Manager and the amounts due at the financial period end are included in the "Management Fee" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

PERFORMANCE FEES

In addition to the annual management fee, the Manager is entitled to an annual performance fee (the "Performance Fee") in respect of certain classes of the following Funds, as detailed in the relevant supplement of the prospectus. The table below outlines the performance fee rates and benchmarks of the respective share class:

Fund	Benchmark	Rate

4. ADMINISTRATION FEES

The Manager pays to BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Administrator is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Administrator and the amounts due at the financial period end are included in the "Operating Expenses" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

5. DEPOSITARY FEES

The Company pays to the Depositary out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Depositary is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Depositary and the amounts due at the financial period end are included in the "Depositary Fee" and "Expenses Payable" figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

6. EXPENSE CAP

BNY Mellon Global Unconstrained Fund

BNY Mellon Mobility Innovation Fund

8. CASH AND CASH EQUIVALENTS cont'd.

These cash accounts, held with the Global Sub-Custodian for collection of subscriptions and payment of redemptions and distributions for the Funds, are deemed assets of the Funds. The balances on these cash accounts as at 30 June 2021 and 31 December 2020 are deemed immaterial in respect of the relevant Fund to which they are due, with exception for USD 2,291,853 on BNY Mellon Efficient U.S. High Yield Beta Fund, EUR 21,093 (31 December 2020: EUR 20,492) on BNY Mellon Pan European Fund (closed on 9 March 2017), USD 37,579 on BNY Mellon S&P 500 ® Index Tracker (closed on 15 January 2021) and USD 45,227 on BNY Mellon U.S. Dynamic Value Fund (closed on 9 March 2021).

9. TAXATION

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Tax Consolidation Acts, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of the shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations.

Distributions, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

Certain Funds accrue for Brazilian and Indian capital gains tax on net realised and unrealised gains on investments. As at 30 June 2021, a capital gains tax payable of USD 474,999 for BNY Mellon Asian Equity Fund (31 December 2020: 461,455), USD 2,816,490 for BNY Mellon Brazil Equity Fund (31 December 2020: USD 2,540,087) and USD 227,413 for BNY Mellon Global Emerging Markets Fund (31 December 2020: USD USD 73,652) have been recorded in the Statement of Financial Position. For the financial period ended, a capital gains tax expense of USD 13,544 for BNY Mellon Asian Equity Fund (30 June 2020: N/A), USD 670,184 for BNY Mellon Brazil Equity Fund (30 June 2020: USD 2,044,561) and USD 153,760 for BNY Mellon Global Emerging Markets Fund (30 June 2020: capital gains tax recoverable of USD 44,734) have been recorded in the Statement of Comprehensive Income under "Withholding taxes on dividends and other investment income".

During the financial period, companies related to the Depositary and the Investment Managers were selected by the Investment Managers to execute investment transactions and foreign exchange transactions and to accept deposits on behalf of the Investment Managers. The Bank of New York Mellon, New York and The Bank of New York Mellon, London Branch were counterparties to forward foreign currency contracts open at the financial period end as disclosed in appendices to the Schedule of Investments. The counterparties were selected by the Investment Managers and the terms of such transactions were negotiated by the Investment Managers with such companies.

The Manager owns 38,092 of the Company's subscriber shares as disclosed in Note 2 of the financial statements. There was no ultimate controlling party of the Company during the financial period ended 30 June 2021 or financial year ended 31 December 2020.

11. SOFT COMMISSION AND DIRECTED BROKERAGE ARRANGEMENTS

During the financial period, Mellon Investments Corporation and ARX Investimentos Ltda (the "Investment Managers") have entered into soft commission arrangements (also referred to as soft dollar arrangements) with brokers in respect of which certain goods and services used to support the investment process were received. The Investment Managers do not make direct payment for these services but either remunerate brokers through commissions paid on transactions or arrange for executing counterparties to pay some or all of their allocated research commission away to other brokers or non-brokering research providers. The goods and services utilised for the Company include economic and political analysis, industry, sector or company specific, investment related research and broker provide active order management. The Investment Managers consider these arrangements to be of benefit to its clients and the brokerage rates are not in excess of customary institutional full service brokerage rates.

Sterling	0.7229	0.8853	0.7204	0.7941

13. EFFICIENT PORTFOLIO MANAGEMENT

The Company and each Fund may invest in Financial Derivative Instruments ("FDIs") for investment purposes where specified in the relevant supplement to the prospectus. In addition, each Fund may utilise techniques and instruments for efficient portfolio management purposes or to protect against foreign exchange rate risks, subject to the conditions and within the limits laid down by the Central Bank.

Such techniques and instruments include, but are not limited to, futures, options, swaps, warrants, P-Notes, stock lending arrangements, repurchase/reverse repurchase agreements, forward foreign currency contracts and when issued and/or delayed delivery securities.

Efficient portfolio management transactions relating to the assets of a Fund may be entered into with one of the following aims: a reduction of risk, a reduction of cost with no increase or a minimal increase in risk or generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The Company currently invests in futures, options, swaps, forward foreign currency contracts and P-Notes, as evidenced in the relevant Schedule of Investments. Details of all open transactions at the financial period end are disclosed in the Schedule of Investments.

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch and the Depositary. The securities lending income is currently split between the Company and The Bank of New York Mellon, London Branch in the proportion 80%:20%.

Securities lending transactions and the related collateral are settled and cleared in accordance with the tri-party and bilateral agreements.

The Company earned revenue from securities lending during the financial period ended 30 June 2021, as detailed in the table below:

Fund	Base Currency	Gross Earnings	Direct Costs (Paid to The Bank of New York Mellon SA/NV) (20%)	Net Earnings to Company (80%)^

14. NET ASSET VALUE

The net asset value of each class of redeemable participating share is determined by dividing the value of the net assets of the share class by the total number of redeemable participating shares in issue at the financial period end.

The published net asset value of each class of redeemable participating share is as follows:

Fund Share Class		Currency	30 June 2021	31 December 2020	30 June 2020
	BNY Mellon Absolute Return Bond Fund				
	Total net assets Net asset value per:	EUR	443,972,354	420,597,176	316,520,163

15. RISK MANAGEMENT OBJECTIVES AND POLICIES

STRATEGY IN USING FINANCIAL INSTRUMENTS

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk. The Company has in place risk management programmes that seek to limit the potential adverse effects of these risks on the Funds' financial performances.

^{**} This Fund launched or closed during the second half of 2020, hence one period of comparative data.

SBNY Mellon Digital Assets Fund was renamed to BNY Mellon Blockchain Innovation Fund, effective 8 December 2020. The 30 June 2020 comparative disclosure now reflects same.

[^] This share class was launched or closed during the financial period.

STRATEGY IN USING FINANCIAL INSTRUMENTS cont'd.

The assets of each Fund will be invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus. Where a Fund maintains in its name reference to a particular currency, country, region, economic sector or type of security, at least three quarters of the assets of that Fund will comprise investments corresponding to the relevant currency, country, region, economic sector or type of security (as appropriate).

The Funds may use FDI for efficient portfolio management purposes or to protect against foreign exchange risks. Some Funds have the facility to use FDI for investment purposes according to the Central Bank UCITS Regulations. In their Risk Management Process ("RMP") it explains whether each Fund uses the commitment approach or Value at Risk ("VaR") to calculate its global exposure. The commitment approach measures the leverage effect produced by the use of derivatives and is calculated by converting all derivative positions, whether used as part of the Fund's general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management, based on the market values of the underlying assets or contracts. VaR for a pre-defined time horizon measures the threshold loss in value of a portfolio of financial instruments that may be exceeded for a given probability (either Absolute^[1] or Relative^[2]). The quality of the VaR model forecasts is demonstrated by back-testing. As a complement to VaR, stress testing is used to evaluate the potential impact on portfolio values of extreme, although plausible, events or movements in a set of financial variables.

For a more detailed discussion, the RMP for each of the Funds is available on request.

- [1] This is defined as the VaR of the Fund capped as a percentage of NAV.
- [2] This is defined as the VaR of the Fund divided by the VaR of a benchmark or reference portfolio.

FINANCIAL RISK MANAGEMENT PROCESS

In order to achieve its investment objectives, the Company buys, sells and holds financial assets and liabilities. As a consequence, the Company is exposed to market price risk, interest rate risk, currency risk, credit risk and liquidity risk arising from the financial instruments it holds. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. The Company uses FDI to moderate certain risk exposures.

The risk management policies employed by the Company to manage these risks are discussed below.

INVESTMENT RISK

Activities of each Fund expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

MARKET RISK

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, interest rate risk and currency risk.

MARKET PRICE RISK

Market price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

Many of the Funds trade in financial instruments, taking positions in traded securities in the equity and equity derivative markets. The investments of the Funds are subject to market fluctuations and there can be no assurances that investments will appreciate in value, therefore presenting a risk of loss of capital.

The Investment Managers manage market price risk through building diversified investment portfolios across a range of industry and/or geographic sectors as is appropriate for the Funds and in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. An analysis of exposures to market price risk is provided in the Schedule of Investments for each Fund. The market positions of the Funds are monitored on a daily basis by the Investment Managers, reviewed on a monthly basis by the Investment Management Oversight Committee and on a quarterly basis by the Board of Directors.

MARKET PRICE RISK cont'd.

The Company's market risk strategy is driven by the Company's investment risk and return objectives. The Board of Directors has instructed the Investment Managers to manage each of the risks in accordance with an established risk management system.

VaR is the risk measurement methodology used to assess the Funds' leverage and market risk volatility. When the VaR is calculated as a percentage of the net asset value of the Funds (absolute or relative VaR), it may not be greater than the Regulatory limits, as detailed in the prospectus. VaR is calculated on a daily basis using a one-tailed 99% confidence level and pre-determined holding period on either an absolute (where the figure is compared to the net asset value of the Fund) or relative basis (where VaR is compared to the benchmark or reference portfolio). The historical observation period will not be less than one year unless a shorter period is justified.

Some limitations of VaR analysis are:

- the models' methodologies are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number; and
- the market price information represents a hypothetical outcome and is not intended to be predictive.

Leverage is calculated as the sum of the notionals of the derivatives used. (This may be supplemented with leverage calculated on the basis of a commitment approach. The creation of leveraged exposure to an index via FDI, or the inclusion of a leverage feature in an index, must also be taken into account in meeting the prospectus disclosure requirements).

INTEREST RATE RISK

Interest rate risk is defined as the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rates. This risk arises on financial instruments whose fair value is affected by changes in interest rates.

The majority of the Company's financial assets and liabilities i.e. those Funds holding substantially equity or equity derivative instruments are non-interest bearing, as a result, these assets are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short-term market interest rates.

For those Funds holding primarily interest bearing securities and as such exposed to the risk of fluctuations in the prevailing levels of market interest rates, the Investment Managers monitor the Funds' exposure to interest fluctuations on a daily basis. Whilst primarily an investment decision, the Investment Managers employ proprietary systems and processes to best position the Funds to benefit from or limit the risk of any fluctuations in the prevailing market levels of market interest rates.

The Investment Managers will endeavour to acquire interest bearing securities in liquid markets. However, not all securities invested by the Funds will be listed or rated and consequently liquidity may be low. Moreover the accumulation and disposal of holdings in some securities may be time consuming and need to be conducted at unfavourable prices. The Funds may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity. The financial markets of emerging market countries in general, are less liquid than those of the more developed nations. Purchases and sales of investments may take longer than would otherwise be expected on developed stock markets and transactions may need to be conducted at unfavourable prices.

CURRENCY RISK

Currency risk is the risk that a fair value of a financial instrument will fluctuate because of changes in foreign exchange rates. The risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The Investment Managers monitor the Company's currency position on a daily basis and may act to manage the Company's currency exposure through the use of FDI such as forward foreign currency contracts or options. The Investment Managers of hedged non-base share classes may also use derivative instruments such as forward foreign currency contracts or options as a key component of their operating strategy. Currency risk does not arise from financial instruments denominated in the functional currency.

CREDIT RISK

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk. Financial assets, which potentially expose the Company to credit risk, consist principally of interest bearing securities such as bonds, financial derivative instruments and investments in cash balances and deposits with and receivable from brokers.

The extent of the Company's exposure to credit risk in respect of these financial assets approximates their carrying values as recorded in the Statement of Financial Position.

The Investment Managers manage issuer risk through building diversified portfolios with a limited concentration of exposure (10%) to any one issuer in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. Additionally, if required the Investment Managers will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the individual investment objectives of the Funds.

Substantially all of the assets of the Company are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the Company's rights with respect to securities and other positions held by the Depositary to be delayed or limited.

The Company only transacts with depositaries that are regulated entities subject to prudential supervision, or with high credit ratings assigned by international credit-rating agencies. The Directors monitor the credit quality of the Depositary, The Bank of New York Mellon SA/NV, Dublin Branch, on a quarterly basis in order to mitigate risk. Its long-term senior debt and long-term deposit rating by Standard & Poor's is AA- (31 December 2020: AA) as at the end of the financial period.

The Company's securities and other positions are segregated from the assets of either the Depositary or its agents. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's securities and other positions are segregated from those of the Depositary or its agents. The Company will, however, be exposed to the credit risk of the Depositary, or any custodian used by the Depositary, in relation to the Company's cash held by the Depositary and the subscription and redemption cash collection accounts held by the Global Sub-Custodian. In the event of insolvency or bankruptcy of the Depositary, the Company will be treated as a general creditor of the Depositary in relation to cash holdings of the Company.

Counterparty/issuer risk is monitored in the following manner:

- Each Investment Manager maintains an Approved Broker list which is subject to ongoing monitoring. The trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness and financial strength.
- Measurement and monitoring of counterparty or issuer trade exposure is conducted daily and consists of reviewing all outstanding positions held.

 $The permanent \ risk \ function \ of \ the \ Company \ oversees \ this \ process \ as \ well \ as \ performing \ independent \ checks.$

For Funds using the cash sweep management, cash balances are automatically swept into the short-term investment vehicle daily. The cash investment auto-sweep is part of the daily cash management procedure. All money market funds available through the cash sweep management are triple-A rated by Standard & Poor's and Moody's and maintain a stable net asset value. US dollar, Euro and Sterling prime and treasury funds are available for investments, in addition to a number of funds in additional currencies, depending on the domicile of the investor and the tax implications.

All transactions in listed securities are settled or paid upon delivery using approved brokers. The risk of broker default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit default swaps provide a measure of protection against defaults of debt issuers. The use of credit default swaps does not assure their use will be effective or will have the desired result. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. As a seller of protection on credit default swaps, the Funds will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Funds would effectively add leverage to their portfolios because, in addition to their total net assets, the Funds would be subject to investment exposure on the notional amounts of the swaps.

CREDIT RISK cont'd.

The maximum potential amount of future payments (undiscounted) that a Fund as a seller of protection could be required to make under a credit default swap equals the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap entered into by the Funds for the same referenced entity or entities.

Where possible the Company restricts its exposure to credit losses on the trading derivative instruments it holds by entering into master netting arrangements which is a bilateral agreement between the Funds and the counterparties (approved brokers) with whom the Funds undertake a significant volume of over-the-counter derivative transactions (including total return swaps). Derivatives are held with counterparties on an unsegregated basis. Master netting arrangements do not result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Company's overall exposure to credit risk on derivative instruments subject to a master netting arrangement can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

Certain over-the-counter derivatives are cleared through central clearing houses. Under this arrangement, over-the-counter trades entered with counterparties are given up to clearing houses, which after acceptance effectively replace the counterparty for the risk aspects of the trade.

The Company employs a risk management process which will enable it to measure, monitor and manage the risks attached to financial derivative positions and details of this process have been provided to the Central Bank.

For the purpose of providing margin or collateral in respect of transactions in financial derivative instruments, the Funds of the Company may transfer, mortgage, charge or encumber any assets or cash forming part of the Funds. The Funds may also be exposed to a credit risk in relation to the counterparties with whom they transact or place margin or collateral in respect of transactions in financial derivative instruments and may bear the risk of counterparty default.

The Funds may receive cash and eligible non-cash collateral in relation to derivative trading to reduce counterparty exposure. Cash collateral received by each Fund is shown as an asset in the Statement of Financial Position, which is offset by a corresponding liability.

Those Funds entering into securities lending arrangements are also exposed to counterparty risk. To minimise such risk, collateral is held, exceeding in value the amount of securities on loan. Details of these are provided in Note 13 of the financial statements.

A number of Funds have investments in leveraged loans which are held on an unsegregated basis with the agent banks. These loans are not held with the Depositary and accordingly the Funds are subject to the credit risk of the borrower. The Funds are also subject to the credit risk of the agent banks.

LIQUIDITY RISK

Liquidity risk is the risk that the Company may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Company is exposed to the daily settlement of margin calls on derivatives and to daily cash redemptions of redeemable participating shares. Each Fund therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a listed exchange. Listed securities of each Fund are considered readily realisable, as they are listed on a regulated stock exchange.

The Investment Managers utilise derivative instruments and debt securities, if appropriate, such as exchange traded index future contracts to allow exposure to markets whilst maintaining sufficient liquidity.

Where any Fund acquires securities on the over-the-counter markets, there is no guarantee that the Fund will be able to realise the fair value of such securities due to their tendency to have limited liquidity and comparatively high price volatility.

LIQUIDITY RISK cont'd.

The Company has the ability to borrow in the short term to ensure settlement. An overdraft facility is in place and has been utilised for settlement liquidity purposes. The Depositary shall be entitled to use available cash in the Fund's account and to liquidate securities in the account as is necessary to meet the Fund's obligations in connection with the provision of an overdraft facility to the Fund and/or unpaid amounts.

The Company's financial assets and liabilities are held for trading and are acquired principally for the purpose of selling in the short term. As these securities are not expected to be held to maturity or termination, the current market value represents the estimated cash flow that may be required to dispose of the securities. Future cash flows of the Funds and realised liabilities may differ from current liabilities based on changes in market conditions.

Redeemable shares are redeemed on demand at the holders' option. However, the Directors do not envisage that the contractual maturity will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

In order to manage the Company's overall liquidity and to facilitate an orderly disposition of securities, the Directors are able to refuse to repurchase any shares in excess of one tenth of the shares in issue in a Fund on any one valuation day by way of the provisions in the prospectus.

NUMBER OF SHAREHOLDERS

The Company did not have less than 10 redeemable participating shareholders at the end of the current financial period and prior financial year.

CAPITAL RISK MANAGEMENT

The capital of the Funds is represented by the net assets at the end of the financial period. The amount of net assets can change significantly on a daily basis as the Funds are subject to daily subscriptions and redemptions at the discretion of shareholders. The Funds' objective when managing capital is to safeguard the Funds' ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Funds.

In order to maintain or adjust the capital structure, it is part of the Company's policy to perform the following:

- The level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate is monitored and the amount of distributions payable to redeemable participating shareholders is adjusted accordingly.
- Redeemable participating shares are issued and redeemed in accordance with the prospectus and supplements of the Funds, which include the ability to restrict redemptions and requirement for certain minimum holdings and subscriptions.

FAIR VALUE ESTIMATION

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Instruments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded funds and derivatives, highly liquid government bonds (G7 countries), certificate of deposit and other quoted securities. The Company does not adjust the quoted price for these instruments.

FAIR VALUE ESTIMATION cont'd.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade government (non-G7 countries) and corporate bonds, over-the-counter derivatives, collective investment schemes, money market instruments, P-Notes and certain listed equities. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include leveraged loans and corporate debt securities which are priced at costs or fair valued using single broken quote. Unobservable inputs shall be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, i.e. an exit price from the perspective of a market participant that holds the asset or owes the liability. Therefore, unobservable inputs shall reflect the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk. The sensitivity of unobservable inputs used in the fair valuation of these level 3 securities is not readily determinable.

The following table provides an analysis of financial instruments that are measured at fair value as at 30 June 2021:

Transfers are deemed to occur at the beginning of the financial period.

The transfer from Level 2 to Level 3 relates to equities and leveraged loans positions whose issuers experienced reductions in trading activity and was inactive (i.e. stale) as at the financial period end. These securities are priced at cost or fair valued using single broker quote and resulted in the reclassification to Level 3.

The transfers out of Level 3 are related to securities that were priced at cost and subsequently were subject to active trading and normal vendor pricing.

16. COMMITMENTS AND CONTINGENCIES

There are no commitments or contingencies as at 30 June 2021 or 31 December 2020.

17. SEGREGATED LIABILITY

The Company avails of the segregated liability provisions of Section 1405 (1) of the Companies Act 2014. As such, under Irish Law the Company generally will not be liable as a whole to third parties and there generally will not be the potential for cross liability between the Funds.

18. SIGNIFICANT EVENTS

On 17 May 2021, wording was added to the Prospectus to allow the following funds to invest in China B shares: BNY Mellon Blockchain Innovation Fund, BNY Mellon Mobility Innovation Fund and BNY Mellon Smart Cures Innovation Fund.

On 17 May 2021, wording was added to the Prospectus to allow the following funds to gain exposure to India directly: BNY Mellon Asian Income Fund, BNY Mellon Blockchain Innovation Fund, BNY Mellon Mobility Innovation Fund and BNY Mellon Smart Cures Innovation.

NOTE ON COVID-19

The global outbreak of COVID-19 in the first quarter of 2020 has had a significant negative impact on the global financial markets. Market volatility has increased significantly and may continue for some time. The extent of the impact to the financial performance of the Sub-Funds' investments and the Sub-Funds will depend on future developments, including (i) the duration and spread of the outbreak, (ii) Government interventions or other limitations or bans introduced by regulatory authorities or exchanges and trading venues, (iii) the effects on the global financial markets, and (iv) the effects on the economy overall.

Other than as disclosed above, there were no other significant events affecting the Company during the financial period.

19. SUBSEQUENT EVENTS

On 29 July 2021, investors in the sub-funds managed by Mellon Investments Corporation ("Mellon") were notified of the change in investment manager, effective from 1 September 2021. The investment manager of the Mellon-managed sub-funds will be:

Name of Sub-Fund	New Investment Manager
BNY Mellon Efficient EM Debt Local Currency Beta Fund^

BNY Mellon U.S. Equity Income Fund	USD	12,352,082	5.13	4.86

The collaterals are held in the name of the Agent Lender to the order of its clients; the actual segregation to underlying client level is done with the Agent Lender's books and records. The collaterals are held on account at the tri-party agent, who acts as a settlement and collection service for securities and collateral between the lender and the borrower. The tri-party agents used are Euroclear, Global Collateral Management – The Bank of New York Mellon Institutional Bank and JPMorgan Chase Bank, N.A. (where JPMorgan are the borrower). For bilateral transactions, the collaterals are held on account at the Agent Lender.

The following tables provide an analysis of the amounts held at each collateral agent as non-cash collateral received in respect of securities lending transactions as at 30 June 2021:
