Directors' report

For the financial year ended 31 December 2024

The Directors of Guinness Asset Management Fund Plc (the "Company") present herewith their annual report and audited financial statements for the financial year ended 31 December 2024. The Company was incorporated on 12 December 2007 and is authorised as an Undertaking for Collective Investment in Transferable Securities ("UCITS") by the Central Bank of Ireland. The Company is an open-ended umbrella investment company with variable capital and with segregated liability between sub-funds. As of the date of this report the Company is comprised of fifteen active sub-funds.

Basis of preparation

The audited financial statements of the Company have been prepared in accordance with the Companies Act 2014 (as amended) and IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and as adopted by the European Union ("IFRS").

Principal activities

The Company is an open-ended investment company with variable capital and limited liability which has been authorised by the Central Bank of Ireland as a UCITS pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"), and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (the "Central Bank Regulations").

Accounting records

The measures which the Directors have taken to ensure that compliance with the requirements of Sections 281 to 285 of the Companies Act 2014 with regard to the keeping of accounting records are the adoption of suitable policies for recording transactions, assets and liabilities and the appointment of a suitable service organisation, Waystone Fund Administrators (IE) Limited (the "Administrator"). The accounting records of the Company are located at 35 Shelbourne Road, Ballsbridge, Dublin 4, D04 A4E0, Ireland.

Activities and business review

A comprehensive overview of the Company's trading activities is detailed in the Investment Manager's report for each sub-fund on pages 7 to 44.

Future Developments

The Directors do not propose to change the current strategy or investment objective of the Company for the foreseeable future.

Risks and uncertainties

The principal risks and uncertainties faced by the Company are outlined in the prospectus. These risks include market risk comprising of, currency risk, interest rate risk and other price risk, liquidity risk and credit risk as per IFRS 7 Financial Instruments: Disclosures ("IFRS 7"). The Investment Manager reviews and agrees policies for managing each of these risks and these are detailed in note 12 to the financial statements.

Going concern

Having considered the Company's future cash flows and its business plans, the Directors believe that the Company has sufficient liquidity to meet its obligations as they fall due and that it continues to be appropriate to prepare the financial statements on a going concern basis.

Directors

The names of the Directors during the financial year ended 31 December 2024 are set out below:

Johnny McClintock
David McGeough
Noel Lamb
Edward Guinness
Andrew E. Martin Smith
Timothy W.N. Guinness (Alternate Director to Edward Guinness)

Transactions involving Directors

Other than as disclosed in note 18 to the financial statements, there were no contracts, debentures or arrangements of any significance in relation to the business of the Company in which the Directors had any interest at any time during the financial year.

Results of operations and financial position

The results of operations for the financial year and the state of affairs of the Company as at the financial year end are set out in the statement of comprehensive income and statement of financial position on pages 49 to 50 and pages 53 to 54, respectively.

Distributions

Details of distributions declared during the financial year ended 31 December 2024 are outlined in note 16 to the financial statements.

Independent Auditor

The Auditor, Deloitte Ireland LLP, have indicated their willingness to continue in office in accordance with Section 383(2) of the Companies Act 2014.

Significant events and material changes

The significant events and material changes are set out in note 24 to these financial statements.

Events after the reporting date

There have been no events after the reporting date which impact on these financial statements other than those disclosed in note 25 to these financial statements.

Corporate governance statement

The Board of Directors of the Company has assessed and adopted the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies as published by Irish Funds in December 2011. The Company was in compliance with the code for the financial year ended 31 December 2024.

Directors' report (continued)

For the financial year ended 31 December 2024

Directors' responsibilities statement

The Directors are responsible for preparing the directors' report and the financial statements in accordance with applicable Irish law and regulations. Irish company law requires the Directors to prepare financial statements for each financial year. Under the law, the Directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards ("IFRS"). Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company as at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies for the financial statements and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for ensuring that the Company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy, enable them to ensure that the financial statements and directors' report comply with the Companies Act 2014, the UCITS Regulations and the Central Bank Regulations and enable the financial statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. The Company has appointed Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") to carry out the custodial functions of the Company including the safe keeping of assets, depositary services and the operation and maintenance of bank accounts.

Directors' compliance statement

The Directors acknowledge that they are responsible for ensuring compliance with the Company's Relevant Obligations as defined in Section 225 of the Companies Act 2014 (hereinafter called the "Relevant Obligations").

The Directors confirm that they have drawn up and adopted a compliance policy statement setting out the Company's policies that, in the Directors' opinion, are appropriate to the Company in respect of its compliance with its Relevant Obligations.

The Directors further confirm the Company has put in place appropriate arrangements or structures that are, in the Directors' opinion, designed to secure material compliance with its Relevant Obligations including reliance on the advice of persons employed by the Company and external legal and tax advisers as considered appropriate from time to time and that they have reviewed the effectiveness of these arrangements or structures during the financial year to which this Report relates.

Statement on relevant audit information

In accordance with Section 330 of the Companies Act 2014 each of the persons who are Directors at the time the report is approved confirm the following:

- 1) so far as the Director is aware, there is no relevant audit information of which the Company's statutory auditors are unaware, and
- 2) the Director has taken all the steps that he or she ought to have taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Audit committee

The Company has not established an audit committee within the meaning of Section 167 of the Companies Act 2014. Given the internal organisation of the Company, the nature, scope and complexity of the Company's activities and the existing processes and procedures adopted by the Company the Board does not consider that an audit committee within the meaning of Section 167 of the Companies Act 2014 is required.

However, the Company has established a committee of directors in accordance with the provisions of the Company's Memorandum & Articles of Association to support the Board in relation to the Board's review of the financial statements and the Board's communications with the external auditors.

On behalf of the Board

David McGeough

Johnny McClintock

Date: 24 April 2025

Investment Manager's report

Guinness Global Energy Fund (the "Fund")

Performance

Performance summary in US Dollars: Class Y compared with MSCI World Energy Net Return Index

	1 year	Annualised		Calendar years				
		3 years	5 years	2020	2021	2022	2023	2024
Fund	-1.3%	10.3%	4.8%	-34.7%	44.5%	32.4%	2.6%	-1.3%
Index	2.7%	15.4%	8.1%	-31.5%	40.1%	46.0%	2.5%	2.7%

The Fund (Class Y) in 2024 produced a total return of -1.3%. This compares to a total return of 2.7% for the Fund's benchmark, the MSCI World Energy Index (net), and the MSCI World Index's total return (net) of 18.7%.

Review

The year of 2024 saw weaker global oil demand growth, particularly from China, requiring OPEC+ to continue its careful oil market micromanagement to maintain reasonable prices. Oil prices were fairly stable, trading in a \$75-85/bl range and averaging \$80/bl, a level which coincides with the long-term incentive price and the 'floor' which Saudi are seeking. Strong Asian gas demand and LNG supply disruptions kept the gas market tighter than expected while the loss of further Russian gas meant Europe competed for global LNG in the second half, strengthening prices further. Oil and gas equities underperformed the broader market in 2024, despite attractive yields.

The Brent oil price started 2024 at \$77/bl and rose to over \$90/bl by the end of the first quarter, before settling to average \$83/bl in the first half. The strength reflected the evolution of a tightening oil market, driven by a mix of higher demand forecasts (oil demand growth expectations increased by 0.2m b/day), lower supply and heightened geopolitical tensions in the Middle East and Russia.

The second half of the year was weaker with the announcement by OPEC+ that the group planned to add 2.5m b/day of withheld production back into the market during late 2024 and 2025. This brought prices lower and remained a factor in weaker oil prices for the second half of the year. The stronger demand narrative of 1H24 weakened amidst weaker Chinese demand while geopolitical tensions in the Middle East and Russia brought shorter term price spikes. Brent traded heavy, troughing at just below \$70/bl in early September, before ending the year just under \$75/bl. Brent averaged just over \$80/bl for the year, in line with our expectations at the start of the year.

Source: Bloomberg; Guinness Global Investors. Data to 31 December 2024

Global oil demand in 2024 was forecasted last January by the IEA to be 102.8m b/day, up 1.1m b/day (with the non-OECD up by 1.3m b/day and the OECD down by 0.2m b/day) versus 2023, putting demand around 2.1m b/day ahead of its previous peak in 2019. Today, the forecast for 2024 demand remains the same (102.8m b/day) although the growth in 2024 has been reduced to 0.8m b/day as a result of historic 2023 data being revised upwards by 0.3m b/day.

The key area of demand growth weakness has been China. Initial forecasts were for Chinese growth of 0.8m b/day but actual demand growth is now likely closer to 0.2m b/day due to weakness mid-year in gasoil, distillate and fuel oil (used in industrial activities and property construction and reflective of the weakness in China's economy, as well as a growing utilisation of LNG trucks) offset by strength in petrochemicals. At the time of writing, momentum may be turning as Chinese fuel oil imports rallied hard in November 2024 to double the level seen in November 2023. Weakness was also spread across other parts of the non-OECD with Nigeria, Pakistan, Indonesia, South Africa and Argentina all seeing lower oil demand in 2024 vs 2023. Globally, within the demand mix, petrochemical feedstocks, including ethane and naphtha, are proving to be key growth drivers.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Energy Fund (the "Fund") (continued)

Review (continued)

Source: IEA; Guinness Global Investors

In light of the weaker demand growth, 2024 ended up being another year of careful oil market micromanagement by OPEC+. In June 2024, the OPEC+ group announced their plan to reverse existing production quota cuts, starting in September 2024, as their own internal forecasts of strong world demand growth implied a growing supply deficit. The plan to grow production was delayed twice, first in September, then in November as a result of oil price weakness and weaker demand. On December 5, OPEC+ met formally and announced a revised plan that delayed the start of the unwinding of 'voluntary' quota cuts (2.2m b/day), for a third time, to the end of Q1 2025 while also extending the time period for the unwind, from 12 months to 18 months. The approach of OPEC+ towards "supporting the stability and balance of the oil markets" remained unchanged and the group noted that the monthly production increases "can be paused or reversed subject to market conditions".

The decision reflected the fact that core 'OPEC-9' production (26.5m b/day in 2024) looks to be about in line with the average 'call on OPEC' for 2024 (26.4m b/day), implying a balanced market. However, the actual level of production is towards the lower end of their range (ex-COVID) over the past 10 years. Within the OPEC+ group, we saw Iranian production grow around 0.4m b/day, Venezuela grow by 0.1m b/day while Russia and Kuwait cut by 0.4m b/day and 0.1m b/day respectively. Towards the end of the year, Iraqi production started to fall back in line with its quota as Saudi pushed members for greater quota compliance. Angola left OPEC at the start of the year and Brazil joined mid 2024 as an observer; neither affected OPEC+ behaviour.

As expected, supply growth from US shale oil slowed in 2024, averaging around 0.4m b/day more than 2023. The bulk of the US E&P industry persisted in its focus on free cashflow yields, deleveraging, increasing returns to shareholders and delivering synergies from the recent round of consolidation. Growth in 2024 was lower than 2023 (c.0.8m b/day) and significantly less than the annual average from 2017-19.

We saw around 1.0m b/day of supply growth in 2024 from the remainder of non-OPEC+, broadly in line with expectations at the start of the year. The main contributors to growth were Canada (+0.2m b/day), Guyana (+0.2m b/day) and non-shale operations in the United States (+0.3m b/day). Brazil disappointed with flat annual output in 2024, much lower than the forecast 0.3m b/day of growth.

International and US natural gas markets had a weak start to 2024, thanks largely to an exceptionally mild 23/24 winter that kept inventories in the US and Europe above seasonal averages, causing US spot prices to stay below \$2/mcf for most of the first quarter. US natural gas prices recovered to close the year at \$3.63/mcf and average \$2.41 for the year. European prices started 2024 at around \$10/mcf (down 50% versus the start of 2023) and weakened further as record pipeline gas supply from Norway, elevated LNG imports (early winter 2023/24) and depressed demand kept fundamentals in balance, despite the loss of some Russian gas.

Source: Bloomberg; Guinness Global Investors

In contrast to the global oil market, international gas prices strengthened significantly in the second half of the year as the market tightened and Europe again competed to acquire global LNG volumes, just as it did in 2022. Global LNG demand (ex-Europe) rose around 10% (more than the prior 3 years combined, driven by China +9%, India +24% and SE Asia up more than 17%) due to lower prices and warmer Asian weather. On the supply side, unplanned LNG maintenance in Australia and Malaysia, Russian sanctions and slower ramp up in new project supply (Golden Pass LNG and the North Field East/South project in Qatar) helped to keep the market tighter than initially envisaged with only 4mtpa of new LNG coming on line, a 1% increase in supply.

The European market also struggled with low wind speeds and colder early winter weather (both causing greater natural gas demand) as well as the threat of lower Russian gas supplies coming into Europe. Inventories started to turn sharply lower at the start of the winter season while prices rose to around \$15/mcf (up 50% y-o-y).

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Energy Fund (the "Fund") (continued)

Review (continued)

Portfolio Positioning

Given the generally muted oil and gas price environment, plus strength in other equity sectors, 2024 resulted in underperformance for energy equities. The sector (MSCI World Energy Index net return in USD) returned +2.7%, behind the broad market (MSCI World +18.7%). The Fund produced a total return of -1.3% (in USD). Within the portfolio over the period, the strongest performers included:

- Midstream: Pipeline companies Enbridge and Kinder Morgan performed strongly in the second half of the year as the interest rate easing cycle commenced
- Galp: exploration success offshore Namibia boosted expectations of a material uplift in Galp's proven oil and gas reserves in the coming years
- Canadian integrated: Holdings such as Suncor and Imperial Oil benefitted from their operational leverage and a narrowing of the differential between Canadian and US oil benchmarks
- North American large caps: Eight of the top ten contributors were North American listed, dominated by larger cap companies, as domestic equity markets strengthened and the prospect of a Trump victory brought the potential for lower regulation. Both Exxon, and its acquisition target Pioneer Natural Resources, were in the top 5 contributors.

Sectors and companies in the portfolio that were relatively weaker over the period included:

- Exploration and production: There was a spread within the group but lower quality E&Ps were weaker (Devon) while the oil-biased E&Ps (EOG/Diamondback) delivered well. Conoco shares were weaker after the proposed acquisition of Marathon Oil.
- Services: Large cap diversified service companies Schlumberger and Halliburton underperformed, driven by a pullback in longer-term oil spending in Saudi and a flat US oil/gas rig count. Baker Hughes delivered well due to growing expectations for natural gas turbines required in power generation to satisfy the surge in electricity demand coming from data centres and AI querying
- European integrated: The group suffered from weakening European refining margins, bottom of the cycle chemicals margins and investor concerns over energy transition risk. Political upheaval in France caused weakness for TotalEnergies in 4Q24 (leaving the shares at a 10% discount to European peers) while Equinor (which supplies around one third of Northwest Europe's gas needs) weakened further from its 2022 peak caused by European gas price strength.

Outlook

Another year of OPEC+ micromanagement of the oil market is expected in 2025. Global oil demand of around 1.1m b/day growth will be exceeded by a combination of US, Guyana, Brazil, Canada and other OPEC+ production growth, requiring OPEC+ to focus on quota compliance in order to achieve a balanced market. The arrival of President Trump and the threat of further Middle East tensions could easily reduce global oil supply and yield space for OPEC to return withheld oil to the market, although likely later than 1Q 2025. We believe the oil price desired by OPEC is at around \$80/bl and, just as in 2024, that they continue to be committed to providing a balanced market. By contrast, we see energy equities currently reflecting a long-term oil price of around \$65/bl, implying good valuation upside.

- Oil demand growth is likely to be around 1.1m b/day (reaching 103.9m b/day) with the non-OECD +1.2m b/day and the OECD -0.1m b/day. Unlike previous years, China (at +0.2m b/day) will not be the key driver of demand growth. At \$80/bl Brent, oil remains highly affordable, with it representing 2.7% of 2025 world GDP (well below the 3.8% seen in 2010 when oil last averaged \$80/bl). Hence, we continue to see global oil demand growing until around 2030, reaching a peak around 105-110m b/day.
- OPEC+ will focus on quota compliance and micro-management to maintain a balanced market, allowing them room to start adding withheld oil back into the market if other supply disruptions occur. OPEC+ will keep a close eye on President Trump's policy proposals, from the impact on oil supply (caused by his approach to Iranian sanctions) through to the impact of proposed tariffs on China, Canada and Mexico. Overall, we believe that Saudi's long-term objective remains to maintain a 'good' oil price, as close to their fiscal breakeven of around \$96/bl as possible. Defending an \$80 oil price in 2025 would be broadly the same in real terms as the group's actions in 2006-2008 when they defended a nominal price of around \$60/bl.
- Non-OPEC+ growth to continue although US shale production growth will slow to 0.3m b/day as capital discipline trumps any efforts from the new US President to increase supply growth. Brazil, Guyana, Canada and other non-US shale activities will be the key areas of other non-OPEC+ growth.
- Global natural gas markets remain in fine balance in 2025 US gas demand will grow around 4 Bcf/day in 2025 due to power generation demand and rising LNG exports but new supply is available and economic. Longer-term, more US gas will be needed to satisfy growing AI and data centre demand. Asian gas demand, the role of Russia and the delivery of new LNG projects will define the international gas market in 2025.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Energy Fund (the "Fund") (continued)

Outlook (continued)

- Energy equity valuations remain attractive with the MSCI World Energy Index on a price to book ratio of 1.7x, versus the S&P500 at 5.1x. The relative P/B of energy vs the S&P500 remains more than two standard deviations below the long-term relationship.
- Most oil and gas companies continue to promote capital discipline over organic growth, manifested in lower levels of debt and a return of free cash to shareholders. Assuming a \$80/bl Brent oil price, we forecast an average free cashflow yield for our portfolio in 2025 of around 10.2%.

Energy equities offer good upside if our oil price, profitability and free cashflow scenarios play out. We believe energy equities currently discount an oil price of around \$65/bl. Adopting \$80/bl Brent as a long-term oil price, we see around 40% upside across the energy complex, on a one year forward basis.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Sustainable Energy Fund (the "Fund")

In 2024 the Fund produced a total return (USD) of -11.8% vs the MSCI World Index (net return) of +18.7%. The Fund therefore underperformed the index by 30.4% over the period.

Performance summary in US Dollars: Class Y compared with MSCI World Net Return Index

	1 year	Annualised		Calendar years				
		3 years	5 years	2020	2021	2022	2023	2024
Fund	-11.8%	-8.4%	9.3%	84.1%	10.4%	-12.5%	-0.4%	-11.8%
Index	18.7%	6.33%	11.1%	15.9%	21.8%	-18.1%	23.8%	18.7%

Review

The election of Donald Trump, slower-than-expected interest rate reductions and low-cost Chinese competition drove sentiment and earnings for sustainable energy lower in 2024. The solar, wind, battery and EV industries all reached record deployment levels, as did global clean energy investment, while a rapid uptake in AI querying and data centre demand promises more pressure on global power grids and power generation. Renewables remain at the bottom of the cost curve and we expect investment to grow, helping sentiment to recover, and for 2024 to be seen as a cyclical low. A high level of M&A in 2024 shows that there is value in the long-term growth opportunity. Our portfolio, which offers broad exposure to companies that are well placed to benefit from the energy transition, now trades at a 26% one-year forward discount to the MSCI World Index despite offering greater earnings growth potential.

Sentiment towards sustainable energy globally, especially in the United States, was dominated by the US election cycle in 2024. The outcome was a backward step for the energy transition, and uncertainty persists in early 2025 around President-elect Trump's plans to unwind components of the Inflation Reduction Act. As a result, IRA-led investment was less than expected, but Republican desire to retain the manufacturing jobs and investment associated with it appears strong.

In contrast, China reaped benefits in 2024 from decades of investment in sustainable energy technologies, building nearly twice as much wind and solar capacity as the rest of the world combined, delivering the lowest clean energy costs globally and manufacturing over 60% of the world's electric vehicles. Despite rapid renewables growth, Chinese added around 80 GW of new coal-fired power capacity in 2024. In contrast, there seemed to be little real progress from Europe around commitment and investment as part of the Net Zero Industrial Act while COP29 passed with less progress than hoped.

Global investment in clean technologies grew and is likely to have hit nearly \$2trn in 2024 (up from \$1.7trn in 2023, almost twice the spend on coal, oil and gas in the year) reflecting that fact that renewable electricity is the cheapest form of new electricity supply in most situations. This came despite the broader macro-economic backdrop being less supportive than initially expected, with only three US interest rate cuts in the year. Despite this, there was a clear trend of M&A activity in the sustainable energy space which suggests that acquirers, especially privately owned and private equity companies, see the weakness in the sector as merely a cyclical slowdown, meaning that public market business valuations are attractive.

Around 690 GW of new renewable generation capacity was installed in 2024, 170 GW higher than the record installations seen in 2023 and more than triple the 194 GW installed pre-COVID in 2019. Solar was dominant (at around 460 GW) with wind in second place (around 110 GW) followed by hydropower, then bioenergy. A rebound in hydro meant that renewable electricity generation in 2024 increased around 13%, outpacing global electricity demand (estimated 3% growth in 2024). Lower energy prices reduced the desire for efficiency, with investment in energy efficiency falling by around 3%.

Electric vehicles (EVs) saw continued adoption in 2024. After growing at over 50% and 35% in 2022 and 2023, sales of plug-in vehicles grew by around 20% to around 17 million units, reaching a 20% penetration rate in 2024, one year earlier than our long-held forecast. Global lithium-ion battery demand grew by 29% and prices (across all applications) fell a further 20% to \$115/kWh in 2024 due to rapid growth of lower-cost Chinese manufacturing based on lithium iron phosphate chemistry. EV penetration surpassed 50% in China in the second half of the year and 60% of all Chinese EVs were cheaper than their internal combustion engine (ICE) equivalents in 2024. Tariff tensions rose as President Biden more than tripled tariffs on Chinese imports of batteries and EVs.

Solar deployments grew rapidly in 2024, with installations of around 600 GW, up around four times (40% per annum) since 2020. Module costs fell to just 9 cents per watt, below the cash cost of manufacturing, pressuring margins for manufacturers. The wind industry delivered record installations of around 124 GW as manufacturers continued to recover from supply chain bottlenecks as well as raw material and labour cost inflation.

Rapid uptake of AI querying and growth in data centres brought strong renewable power demand and put pressure on developed world power grids, causing shortages for key products like transformers. Renewable power prices increased, and we saw a renaissance for nuclear power in the United States.

Against this backdrop, the Fund delivered a total return (USD) of -11.8% in 2024 vs its benchmark the MSCI World Index (net return) of 18.7%. For comparison, the MSCI Alternative Energy Index delivered -32.3% and the iShares Clean Energy ETF delivered -25.7% reflecting the poor sentiment. Recent weakness has led some to view the clean energy equity sector as already discounting the IRA completely; the ICLN index is down 50% since August 2022 (when the Act was passed) with the number of shares outstanding having halved and the price/earnings (P/E) multiple down more than 50%.

At the end of 2024, the Fund traded on a one year forward P/E ratio of 14.1x (a 26% discount to the MSCI World Index at 19.1x) despite three-year forward consensus-derived earnings growth expectations for the Fund being greater than the MSCI World Index. Since repositioning six years ago, the Fund has delivered a return in excess of its investment universe, based on an equal weighted average calculation.

Activity

During the period, we exited positions in Sunnova and Nibe and initiated positions in NXP, Siemens, and Owens Corning.

The portfolio was actively rebalanced during the period, and over the year, the weighting to consumption (i.e. the demand side of the energy transition) decreased from 43.9% at the end of 2023 to 41.6% at the end of December 2024 while the weighting to renewables (i.e supply side) grew from 51.9% to 57.7%.

Portfolio Positioning

At 31 December 2024, the Fund traded on a one year forward P/E ratio of 14.1x, around 15% lower than the 16.6x one year forward metric at December 2023. In contrast, the 12-month forward P/E of the MSCI World Index has inflated from 17.6x to 19.1x (+9%), leaving the Fund at forward P/E discount of 26%, below the trough levels seen in early 2020 and down from 6% at the start of the year. The 'round trip' of absolute and relative valuation multiples is reflective of the cycle that the sector has seen and is reflective of currently very poor sentiment.

We believe that a continuation of earnings growth (and confidence in earnings growth in excess of the MSCI World Index) should allow the Fund's relative P/E to re-rate. Since early 2020, three-year forward consensus-derived earnings growth expectations for the Fund have always been greater than those for the MSCI World index. The difference between the current three-year forward EPS growth for the Fund (16.4%pa) and the MSCI World (10.5%pa) is close to historic lows, reflecting the 'wash out' in earnings expectations for various parts of the portfolio.

Investment Manager's report (continued)

Guinness Sustainable Energy Fund (the "Fund") (continued)

Portfolio Positioning (continued)

Our current portfolio is summarised below by investment theme:

Key themes in the Fund		
Theme	Example holdings	Weighting (%)
1 Electrification of the energy mix	 	36.9%
2 Rise of the electric vehicle and auto efficiency	 	9.8%
3 Power semiconductors	 	9.8%
4 Battery manufacturing		4.0%
5 Expansion of the wind industry		9.2%
6 Expansion of the solar industry		8.1%
7 Heating, lighting and power efficiency		17.9%
8 Geothermal		3.5%
9 Other (inc cash)		0.7%

Source: Guinness Global Investors (31 December 2024)

Outlook

President Trump will struggle to make substantial reforms to the IRA and will enjoy more success using his executive powers to promote fossil fuels. Republican support for the jobs and investment coming from the Act may restrain Trump's ability to repeal it and the final outcome may be that Trump's election is more positive for fossil fuels, via lower regulation and environmental protection, than it is negative for clean energy directly. Expect his focus to be on domestic content requirements for tax credits, Foreign Entity of Concern (FEOC) definitions and subsidies for offshore wind. Greater tariffs on clean energy imports, lower environmental restrictions, greater liquefied natural gas (LNG) exports and the departure of the United States from the Paris Agreement are possible in the short term.

Politics aside, US electricity demand will continue to surge due to AI querying, data centres, re-shoring and the broader trend of electrification. Significant grid upgrades, a record interconnection backlog and skilled worker and product shortages will keep this market – which has seen little growth in the last 20 years – very tight, benefiting equipment manufacturers and contractors. New nuclear is unlikely to impact before the mid-2030s, meaning that renewables and gas-fired power generation will be in demand. Globally, renewable power generation is expected to grow 7-8% in 2025.

Clarity from Trump and electricity supply/demand realities will allow the US industry to address its substantial backlog of IRA-related investments while Europe likely recoups some investment from the US as a result of the election-related hiatus. In stark contrast, we see further rapid growth in China as renewable energy was again listed among the "strategic industries" whose development is expected to receive long-term support from policymakers. Broadly speaking, investments requiring subsidy or consumer incentivisation will continue to be less well placed as a result of pressured government finances, meaning that economic competitiveness will likely be more important than decarbonisation.

Electric Vehicle sales will grow and likely reach around 20 million in 2025. If current adoption S-curves are followed, Evs will make up over 80% of new vehicle sales in China and Europe by 2030, with the US reaching that level by 2035, as they become cheaper to buy, cheaper to run and cheaper to maintain. Lithium-ion battery prices likely deflate further (down around 5% in 2025) and will reach \$70/kWh in 2030 if historic learning rates hold. Demand growth and increased industry concentration should allow battery manufacturers to increase utilisation and benefit from positive operating leverage.

Solar will remain at the bottom end of the renewable cost curve and installations will grow across all major geographies in 2025, reaching around 670 GW. China will be around half of the market with North America and Europe seeing demand increases due to the desire of hyperscalers for quick-to-market, zero-carbon electricity with long-term price visibility.

Wind installations will reach a record level of around 145 GW, with China being less than half of the market. Faster permitting and raw material cost deflation will support the outlook for growth and margins. Installations will continue to grow to around 200 GW by the end of the decade.

The energy transition is generally progressing well and the multi-decade positive outlook remains. However, within this secular trend, there are cycles at play, some of which are in an 'up' phase (e.g. electrical equipment, building material, grid investment) and some in a 'down' phase (e.g. battery/EV supply chain; solar upstream). We are confident in the structural growth offered by the transition and believe that the challenged industries are at or close to a cyclical trough.

With the US election behind us, we look to a reduction of financing costs (i.e. interest rate reductions feeding into consumer and project financing) to drive investments into the clean energy sector. Together with growing AI and data centre demand bringing higher renewable power prices, stricter energy efficiency requirements, massive grid upgrade programmes and the implicit operating leverage within our manufacturer investments, we believe that confidence in portfolio earnings will start to improve from a low level.

The consensus-derived earnings per share growth outlook for the Fund (16.4% per annum for 2024-2027E) sits at a premium of nearly 6% pa vs the MSCI World index. We do not think that the 26% one year forward P/E discount of the Fund reflects this earnings scenario but, instead, something that is worse than that implied by current interest rates and inflationary conditions. If valuations do not improve, we would expect to see continued high levels of M&A activity in the sector.

As such, investor interest in sustainable energy equities should start to improve from very poor levels as energy security grows in salience and individual, social and government pressure for consumers to become more energy efficient increases. We believe that the Fund's portfolio of 30 broadly equally weighted positions, chosen from our universe of around 250 companies, provides concentrated exposure to the theme at attractive valuation levels that are especially attractive relative to consensus earnings growth expectations.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Money Managers Fund (the "Fund")

Performance

Performance summary in US Dollars: Class Y compared with MSCI World Net Return Index

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	23.6%	2.9%	11.0%	8.9%	42.0%	-24.1%	16.3%	23.6%
Index	18.7%	6.3%	11.2%	15.9%	21.8%	-18.1%	23.8%	18.7%

The Fund (class Y, in USD) in 2024 produced a total return of +23.6%. This compares to the return of the MSCI World Index (net return) of +18.7% and the MSCI World Financials Index of +26.7%.

In 2024, risk assets continued to perform strongly, with the US economy playing a central role in driving gains. Developed market stocks produced a total return of over 19%, fuelled again by the impressive performance of US mega-cap tech companies. Emerging market stocks saw more modest gains of just over 8%, benefiting from a late rally in China and strong results from India and Taiwan. The prospect of deregulation after the US election helped financial stocks, contributing to a 12% increase in global value stocks.

On the commodity front, while weaker demand from China limited broader commodity performance, gold stood out with a significant gain of over 27%, driven by growing concerns over US fiscal policy. As central banks in developed markets moved toward normalizing their interest rate policies, expectations for rapid rate cuts softened due to persistent inflation and steady economic growth, especially in the US. Meanwhile, rising interest rates and a stronger dollar led global investment-grade bonds to post a small negative return.

After underperforming in 2023, last year saw a return of US Dollar strength, which posted modest gains against both the Euro and Sterling.

Against this backdrop, the money management sector performed well, outperforming the broad equity market but slightly underperforming the broader financials sector.

Money Management subsector performance in 2024 % (USD)

Money management subsector performance (median). Guinness selected subsectors.

Source: Bloomberg; Guinness Global Investors. Total return (USD) 31.12.2023 – 31.12.2024

Similar to the previous year, the best performing subsector within the Fund in 2024 was large cap alternative managers. Conditions have been good for those such as Ares (+53% in USD) that are geared to the private credit growth opportunity. KKR (+80%) has also been a strong performer, with deployable capital reaching a record high, and a new partnership this year with Capital Group to target mass retail markets being well received. Blackstone (+35%), which is the world's largest real estate investor, is an outsized beneficiary of the interest rate cutting cycle that has now commenced in the US.

Strength in the S&P500 in 2024 was especially beneficial to our most US equity-levered traditional asset managers, including Blackrock (+29%) and Janus Henderson (+48%). Janus Henderson has around 70% of its total assets under management in equities, making it one of the highest beta plays in our portfolio to stock market returns.

Within the exchange sector, it has been pleasing to see Nasdaq return to outperformance (+35%) after a weaker 2023. Nasdaq has grown its 'fin tech' sales to more than a third of overall company revenues, and this portion of the business is expected to continue to grow most rapidly. De-leveraging of the company's balance sheet is ahead of schedule, which should give the opportunity to accelerate share repurchases.

In late November, it was announced that one of the Fund's wealth management holdings, CI Financial, was subject to takeover by Mubadala Capital, a division of Abu Dhabi's state investment fund. The agreed acquisition price of C\$32/share represented a 33% premium to its previous close. CI Financial, which has been owned in the Fund for several years, has over C\$500bn in assets, managing money for a client base of predominantly US and Canadian investors.

Interestingly, Mubadala has also agreed to keep the CI Financial's data in Canada as a condition of the deal. Mubadala made a similar concession as part of its takeover of Fortress, agreeing to keep its technology and data domiciled in the US to appease local regulators.

The acquisition of CI Financial is the culmination of a strategy that has seen the company grow aggressively via acquisition. Much of the expansion has come in the US via takeover of small advisory firms, with the company's US assets growing by over 50% since 2022.

The deal ascribes CI Financial with an equity value of C\$4.7bn, which implies the company trading on 8.3x 2024 earnings. We see this as an attractive deal for Mubadala, but takes the overall return in CI Financial's shares in 2024 to nearly +100%, which we see as a satisfactory outcome.

Weaker stocks included Hong Kong based manager Value Partners (-28%) and US asset manager Franklin Resources (-27%). Value Partners has seen its position as a specialist in Asian investing remaining out of favour relative to developed markets, leading to persistent fund outflows. Franklin Resources, meanwhile, has suffered from a period of outflows, both in fixed income and equities, whilst the company's alternatives division has only achieved flat assets under management in an environment where peers have been raising assets.

Performance (continued)

Net flows from the active mutual fund sector in the US turned negative in 2022 (having been small positive in 2021), a trend that has continued in 2023 and 2024. Over the last twelve months, active equity and hybrid funds have seen sharp outflows, partially offset by fixed income inflows:

Data from the US ETF industry shows inflows across equity ETFs, bond & income ETFs and hybrid ETFs in every quarter since the start of 2017. The trend has continued into 2024, with net inflows accelerating to a new high in Q4 2024:

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Money Managers Fund (the "Fund") (continued)

Outlook

The assets under management of several companies in our investment universe reached new highs in 2024, helped by the strength in global equities and also the secular forces of wealth creation, expansion in the breadth of investible assets, and demographic shifts. It was an environment where many firms achieved strong profits. And yet, 2024 was also another year when the pressures of active to passive rotation in equities, and associated fee pressures, were as visible as any point in the last decade.

Global assets under management vs MSCI World Index (total return) 1990-2024E

Global AuM (\$trn)

Source: BCG; Guinness Global Investors

As we look ahead, we continue to believe that the money management sector will have clear winners and losers. The winners will be firms of high quality, with quality manifesting itself in various ways. For a smaller traditional asset manager, it likely means the provision of high active share, alpha-generating portfolios. For a passive provider, quality increasingly looks like the delivery of easily accessible, very low tracking-error, low cost ETF products. For an alternatives provider it is the consistent delivery of differentiated absolute returns. If quality is sustained, in whatever form, it will drive the growth of a successful asset management business. The most obvious losers in the industry today are the weaker traditional asset managers who continue to overcharge for undifferentiated products. Some companies in this category have reached interesting 'value' territory, but many will remain value traps: leaking assets and lacking the vision to redesign investment products or client distribution models. Evidently, these are companies to avoid.

Exploring some of the key subsectors within the money management industry, and for starters, the outlook for alternative asset managers remains positive, with secular growth likely to continue in 2025. Policy changes with the incoming US administration should be supportive in various ways, including:

- supportive capital markets, with policies that are bullish for equity markets and therefore bullish for IPOs and capital markets activity broadly;
- less obstruction to M&A, which expanding monetization avenues for existing deployed capital;
- a lighter and more pro-investment regulatory backdrop. Amongst other things, this could enable faster retail adoption of alternative products, including in the 401k channel; and
- the potential for lower corporate taxation.

The backdrop as described should foster strong fundraising, with double-digit organic growth in fundraising expected. We also expect to see an acceleration in product innovation, with fee-related earnings likely to grow in excess of asset base growth. For example, retail allocations remain a small fraction of alternative manager AuM, a segment which is high margin and likely to enjoy outsized expansion versus other asset types.

What is also apparent is the stickiness of higher fee rates in the alternatives sector. The last ten years have seen a steady increase in the proportion of private capital that attracts a management fee of 2% or better, which has clear positive implications for company profitability:

Annual management fee rates for private capital funds (2008-24E)

Source: Morningstar

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Money Managers Fund (the "Fund") (continued)

Outlook (continued)

Within the alternative management group, we view Blackstone as particularly well positioned to benefit from the structural growth of private markets. Within the retail market, the company is the most advanced in its retail build-out, with the Private Credit and Private Equity funds likely to appeal to retail investors given the strong investment track record in both areas. And within private credit, we see Blackstone benefitting from the regulatory challenges banks currently face for lending.

For traditional asset managers, the continued mix shift towards passive vehicles requires active managers to innovate in various ways, including greater use of active ETFs and separately managed accounts. Some traditional managers are also increasingly focusing on alternatives as a means to return to growth, via either internally developed products or acquisition of existing alternative managers. One challenge with this model is to integrate alternatives into the culture and operating model of a traditional manager. But for those who can achieve it, the rewards (and valuation multiple re-rating) are high.

Active US equity funds have continued to lag their respective benchmarks, with only 34% outperforming in 2024 (versus 38% in 2023). The picture for fixed income funds has been far brighter, with around 79% of funds outperforming their respective benchmarks, up from 58% in 2023 and marks the highest percentage of funds outperforming in the last ten years. Unsurprisingly, therefore, the prospect of asset growth in the active fixed income sector remains one of the brightest spots for traditional managers in 2025.

Traditional asset managers continue to trade at a substantial discount to the broad equity market. At the start of January 2025, the forward P/E ratio for the sector in the US, according to Jefferies, was around 12.5x versus the S&P500 trading on 25x. The spread of P/E's is close to being as wide as its been over the past twenty years:

Valuation of traditional asset managers versus S&P 500 (2002-25)

We continue to look for opportunities in the 'ancillary' services to the industry. An expanding pool of investible assets globally provides an attractive environment for sectors such as stock exchanges and custody banks. Growth in the stock exchange industry, for example, is being driven not only by transactional volume, but also by rising demand for data and the commercialization of new technology. We see our holding in Nasdaq as a major beneficiary of this trend.

Revisiting the concepts touched on at the start of this outlook, we expect the best earnings growth to come from companies that fall broadly into four categories:

- alpha generators with a consistent record of investment outperformance and a differentiated investment system well understood by clients;
- large, at-scale manufacturers of well structured, low cost passive investment strategies;
- distribution powerhouses with privileged access to clients—for example, through ownership of wealth or retirement channels; and
- investment solution and ancillary service innovators that can design and rapidly launch differentiated solutions to address client needs

Outlook (continued)

Combining these themes with our stock selection process, which allows us to identify the equities of managers whose products are succeeding, leads us to a portfolio biased to these themes:

Guinness Global Money Managers portfolio by theme, 31 December 2024

Theme	Example holdings		Weighting (%)
1 Alternatives	KKR	Blackstone	22.0%
2 High active share	ARTISAN PARTNERS	POLAR CAPITAL	13.9%
3 Wealth management	Rathbones Look forward	Ameriprise Financial	13.3%
4 Secular shift in Europe to equities	WYNDHAM	AZIMUT DRIVING INVESTMENT GROWTH	12.1%
5 Traditional value	T.Rowe Price	FRANKLIN TEMPLETON	12.0%
6 Support services	Nasdaq	STATE STREET	10.5%
7 Growth of ETFs/passive distribution	BLACKROCK	Invesco	8.0%
8 Asset management consolidators	AMG		4.1%
9 Other (incl cash)			4.1%

Source: Guinness Global Investors

At 31 December 2024, the P/E ratio of the Fund was 16.1x 2024 earnings. This sits at a significant discount to the broad market, with the MSCI World trading on a 2024 P/E ratio of 20.9x. Earnings growth for the portfolio is forecast (consensus) to be around 8% in 2025, which compares to expected earnings growth for MSCI World of around 9%.

	'24	'25
Fund P/E	16.1	14.9
MSCI World P/E	20.9	19.1
Premium (+)/		
Discount (-)	-23%	-22%

Source: Bloomberg; Guinness Global Investors

In the longer term we expect asset managers as a sector (and therefore the Fund) to outperform the broad market, due primarily to the ability of successful asset management companies to grow their earnings more rapidly than the broad market.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Equity Income Fund (the "Fund")

Performance summary in US Dollars: Class Y compared with MSCI World Net Return Index

	1 year	Annualised		Calendar years				
		3 years	5 years	2020	2021	2022	2023	2024
Fund	12.6%	5.7%	10.0%	+11.5%	+22.2%	-9.3%	15.8%	12.6%
Index	18.7%	6.4%	11.2%	+15.9%	+21.8%	-18.1%	23.8%	18.7%

In 2024 the Fund produced a total return of 12.6% (in USD), compared to the MSCI World Index return of 18.7% (in USD). The Fund therefore underperformed the Index by 6.1%.

The IA Global Equity Income Sector returned 9.1% (in USD), therefore the Fund outperformed its peer average by 3.5% (in USD).

Since launch, 14 years ago, the Fund ranks 2nd out of 13 Funds in the IA Global Equity Income sector. It has produced a cumulative total return of 256.6% (TR in USD) compared to the sector average of 150.2% – an outperformance of 106.4%. The Fund has outperformed its sector peers in 12 of the 14 years the Fund has been in existence.

Dividend Update

Based on year-end prices, the Fund had a 12-month trailing dividend yield of 2.1% (net of withholding taxes) vs the benchmark MSCI World Index dividend yield of 1.7% (gross of withholding taxes). In the Fund, the average dividend growth across all 35 companies was 8.2%.

In 2024, out of our 35 holdings:

- 34 companies grew their dividend. The average dividend growth of these companies was 8.2%.
- 1 company kept their dividend flat
- 0 companies cut their dividend
- 0 companies cancelled their dividend

The dividend distributed by the Fund grew 17.9%, and the compound annual growth rate since launch is now 4.5%.

Review

2024 was marked by significant market turbulence amid a complex economic and geopolitical environment. Despite these challenges, global equities posted impressive gains. The macroeconomic landscape was defined by persistent inflationary pressures, escalating trade tensions, and a series of rate cuts after the aggressive rate-hiking cycle of previous years. In parallel, geopolitical developments, such as ongoing conflict in Ukraine and the Middle East added layers of complexity. That said, resilience emerged as the prevailing theme. The transformative potential of Artificial Intelligence continued to captivate investor sentiment, fuelling gains in technology stocks and associated areas including the so called 'AI-enablers' and other 'AI-integrators'. However, over the final parts of the year, sentiment turned cautious as a result of a hawkish tone set by Fed Chair Jerome Powell during the last FOMC meeting which signalled a slower pace of rate cuts in 2025. This led to a more reserved investor outlook, as market participants weighed the implications of slower monetary easing as well as the potential impacts of the incoming US administration.

2024 in Review

Guinness Global Equity Income Fund (the "Fund") (continued)

Review (continued)

(1) Goldilocks Rally (Jan - March):

- **What Happened:** Equity markets saw broad-based gains, defying a challenging macroeconomic and geopolitical backdrop. Despite global conflicts, recessions in the UK and Germany, and unexpected U.S. inflation data, investors remained optimistic. Markets rallied on expectations of accommodative monetary policy, driven by signs of a softening global economy and easing inflation pressures, which prompted hopes of central bank support.
- **Fund Performance:** The rally was largely driven by speculative growth as well as some lower quality areas of the market. The Fund underperformed due to its underweight allocation to IT and zero allocation to Energy & Communication Services, three of the index's top-performing sectors.

(2) Slowdown Concerns (1 April – 19 April):

- **What Happened:** Sentiment turned as weaker economic data and sticky inflation undermined the 'Goldilocks' narrative. Disappointing Q1 US GDP and manufacturing PMI data eroded confidence, shifting focus to 'stagflation' concerns. Hawkish remarks from Fed Chair Jerome Powell heightened fears of further rate hikes.
- **Fund Performance:** The Fund outperformed, as we would have hoped. The high-quality nature of the portfolio resulted in a less severe sell-off compared to other more growth-oriented and speculative areas of the market.

(3) Soft-Landing Reemerges (20 April – 15 July):

- **What Happened:** Negative sentiment quickly reversed as strong corporate earnings and positive economic data restored confidence. May US CPI of 3.4% signalled price normalisation, boosting hopes for a soft landing. Market-implied rate cuts rose from 1.1 in April to 1.8 in June, driving a notable divergence between Growth and Value stocks, with the Mag7 leading the gains.
- **Fund Performance:** The Fund underperformed during this period, with longer duration names benefiting from lower interest rate expectations. The more speculative part of the market, namely unprofitable technology companies, also rallied.

(4) Volatility Resurfaces (16 July – 6 September)

- **What Happened:** July's US economic data and signs of a struggling consumer reignited volatility. Additionally, the Bank of Japan's surprise rate hike which unwound the 'Yen Carry Trade' triggered a sharp sell-off. Markets subsequently rebounded on positive inflation and retail sales data, coupled with dovish remarks from Fed Chair Powell.
- **Fund Performance:** Encouragingly, the Fund outperformed during the volatile period, which was led by the high-quality parts of the portfolio, particularly Consumer Staples, which held up well in the sharp August drawdown.

(5) Fed Delivers Rate-Cut (7 September – 4 November)

- **What Happened:** On the 18 September, the Fed finally decided to cut rates (by a bumper 50bps) after the fastest rate hiking cycle on record. Markets rallied on news of the cut, with the S&P 500 reaching record highs and large-cap technology stocks leading the move.
- **Fund Performance:** The 50bp rate cut benefited long duration assets, leading to a market rally in which the more speculative part of the market significantly outperformed. As such, growth outperformed value, and the Fund underperformed.

(6) Trump Trade (5 November – 31 December)

- **What Happened:** Donald Trump's 2024 presidential victory sparked an initial market rally, driven by expectations of tax cuts and deregulation favouring Financials, Industrials, and Energy. However, hawkish remarks from Jerome Powell towards year end caused investor outlooks for 2025 to shift.
- **Fund Performance:** The Trump Trade rally was driven by lower quality sectors as well as small cap stocks. US equities also performed particularly well. The Fund underperformance given its overweight allocation to non-US Equities (UK and EU) as well as its focus on high-quality parts of the market. The Fund's lack of exposure to Consumer Discretionary, the top-performing sector, acted as a drag to performance.

In sum, 2024 was another bumper year for equities as the MSCI World notched +19.2% in USD. Whilst all major regions saw positive gains, the US was for the second year running the top regional performer rising +25.1% (in USD). European and Asian markets performed well until September however the final quarter of the year saw a divergence in performance, with these indices falling over Q4 and ended the year substantially behind the index (as shown by the chart below).

**World Stock Index Total Return in 2024
(in USD)**

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Equity Income Fund (the "Fund") (continued)

Review (continued)

When we look at the breakdown of this return, it is clear that over the past two years multiple expansion has contributed substantially to the index gains. In 2023, the multiple accounted for 67% of the MSCI World index return and in 2024 this figure stood at over 50%. This shows that improved investor sentiment and a more positive equity outlook has helped to drive the market higher. That said, in 2024 there was encouragingly a solid contribution from earnings revisions (~40%) with the dividend making up the remaining amount (~10%). Even though 2024 earnings revisions fed through, it is still noteworthy that an elevated multiple has driven much of the performance over the past 24 months, as bullish sentiment has caused ongoing equity re-ratings.

Strong stock selection in Industrials and IT was a tailwind over 2024, with notably good performance from names like Eaton, Emerson, TSMC, and Broadcom. From an allocation perspective, the Fund's zero weighting to Materials, Real Estate, Utilities and Energy was a positive. However, the Fund's underweight allocation to Communication Services (~3% vs ~8% index) and IT (~15% vs ~26% Index) acted as a headwind as these were the top 2 top performing sectors over the year. Additionally, the overweight to Consumer Staples (~24% vs ~6% index) was a drag as the sector returned just 4.2% (in USD) over the year, well behind the MSCI World.

When we look at how individual companies within the portfolio performed in 2024, we see that out of the top ten, we have three Industrials, three IT, three Financials and one Consumer Staple. This highlights the benefit of our moderate dividend yield and sector-agnostic approach, which can identify opportunities outside of the traditional high-yield or 'defensive' areas typically associated with income funds.

Activity

In 2024, we sold one position (Henkel) and replaced it with Publicis, leaving the portfolio with 35 positions at the end of the year.

In terms of sector allocation, we sold one Consumer Staples stock and replaced it with a Communication Services stock. Both stocks are European listed therefore the broader geographical positioning of the Fund remains unchanged.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Equity Income Fund (the "Fund") (continued)

Portfolio Positioning

We continue to maintain a fairly even balance between quality defensive and quality cyclical/growth companies. We have approximately 45% in quality defensive companies (e.g. Consumer Staples and Healthcare companies) and around 55% in quality cyclical or growth-oriented companies (e.g. Industrials, Financials, Consumer Discretionary, Information Technology).

The Fund also has zero weighting to Energy, Utilities, Materials, Real Estate, and Consumer Discretionary. The largest overweight is to Consumer Staples.

Sector breakdown of the Fund versus MSCI World Index.
Source: Guinness Global Investors, Bloomberg. Data as of 31 December 2024

In terms of geographic exposure (chart below), the largest overweight remains Europe ex-UK, though we are diversified around the world with 58% in the US, 35% in Europe & UK and 6% in Asia-Pacific. Within the Asia-Pacific region we have one company listed in Taiwan (Taiwan Semiconductor) and one company listed in Australia (Sonic Healthcare).

Regional breakdown of the Fund versus MSCI World Index.
Source: Guinness Global Investors, Bloomberg. Data as of 31 December 2024

Outlook

At present, the Fund is currently trading in line with the broader market from a price/earnings perspective (19.2x 2025 expected earnings). However, the Fund does trade at a valuation discount when looking at FCF yield with the Fund on a FCF yield of 4.2%, which is ahead of the MSCI World Index figure of 3.5%. We are encouraged to see that, despite the in-line valuation, the Fund still shows superior characteristics from both a Quality and a Dividend perspective. The Fund continues to invest in high quality companies and this is exhibited by a median return on capital of 23.7%, far ahead of the 8.6% for the index and these companies have strong balance sheets albeit with marginally higher leverage than the index (44.1% vs 39.1%). As discussed above, the Fund also offers a superior dividend yield to the index, which is encouraging.

As we look ahead to 2025, we are confident that the companies we own in the Fund will continue to navigate the changing macroeconomic environment, as has been the case in previous years as well. In last year's annual outlook we noted that "it is reasonable to expect a number of rate cuts over 2024. However, there is of course the risk that the market is overly optimistic with regards to both timing and magnitude." Whilst this has seemingly played out over the latter half of 2024, there still remains many risks on the horizon, from stubborn inflation reads, rising cost of government debt, a consumer that is showing signs of weakness, elevated geopolitical tensions, a return of volatility to financial markets and a whole host of uncertainties from a new US administration. Clearly these issues will play out in unexpected ways that few can foresee therefore we do not try to predict what will happen from a macro perspective, instead we try to create a portfolio that can weather different economic environments and provide the return outcomes we seek to provide on a consistent basis.

As such, we believe that focusing on the high-quality businesses that have shown the ability to perform over numerous economic cycles provides the Fund with a good balance and helps to mitigate against some of these downside risks. We also note that the defensive nature of the portfolio – which has outperformed in all market corrections since launch in 2010 – gives us confidence heading into 2025. Additionally, we believe the holdings we have selected in the Fund remain robust and our perpetual approach of focusing on quality compounders and dividend-growers should continue to stand us in good stead in our search for rising income streams and long-term capital growth.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Investment Manager's report (continued)

Guinness Asian Equity Income Fund (the "Fund")

Performance

Performance summary in US Dollars: Class Y compared with MSCI AC Pacific ex Japan Net Return Index

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	12.8%	1.9%	4.9%	8.1%	11.1%	-16.8%	12.7%	12.8%
Index	10.1%	-2.0%	1.7%	23.0%	-5.9%	-18.8%	5.2%	10.1%

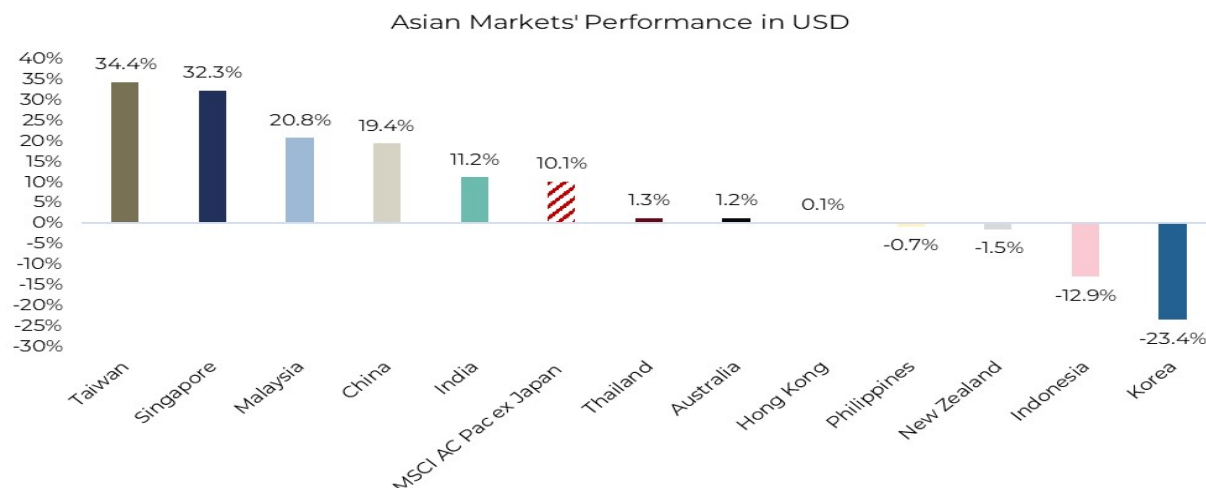

The Fund rose 12.8% in 2024 compared to the MSCI AC Pacific ex Japan Net Total Return Index which rose 10.1%. The Fund paid dividends of US\$0.4518 for 2024, up 6.6% versus 2023. All thirty-six companies in the portfolio are dividend payers. Overall, twenty-seven companies grew the dividend, one was flat and eight fell.

Review

US interest rates, Chinese domestic economic policy and capital spending in technology, associated with Artificial Intelligence (AI) have had the greatest impact on Asian markets in 2024. The wars in Ukraine and the Middle East have had a lesser effect on companies and markets but have necessitated changes to air and shipping routes, with an associated pick up in costs. The re-election of Donald Trump in November brought with a renewed focus on trade, tariffs and protectionism but in 2024 the market has preferred to adopt a wait-and-see stance.

Leading markets over the year were Taiwan, Singapore, Malaysia, China and India. Taiwan's performance was led by the technology sector and Taiwan Semiconductor Manufacturing Co (TSMC), which dominate the market. What has been most notable about technology performance has been the differing fortunes of those associated with AI investment and those higher exposure to consumer electronics (smartphones, personal computers) which has seen tepid growth in recent years. Singapore and Malaysia's markets are dominated by banks whose business do better in a falling interest rate environment as the rates they pay on deposits fall faster than the rates on loans and with improved asset quality in the loan books.

The outperformance by China has the greatest significance for the region. The unwinding of the property market has weighed heavily on consumer confidence. It has also precipitated a local government funding crisis which has seen revenues from land sales (a key source of funding) dry up. The importance lies in the role local government play in the local economies at a city and municipal level. The government's economic stance changed abruptly in September with moves to address these issues and while we did not see the kind of massive stimulus injection of the past, there has been a steady set of measures announced and implemented which we see carrying on in 2025. This has been enough to deliver stock market outperformance versus the region and versus India and Australia, after three years of under-performance.

Source: Bloomberg. MSCI region and country net total return (NTR) indices in USD terms as at 31 December 2024.

The biggest contributions to Fund outperformance in 2024 came from banks & insurance and from technology companies. All our banks and insurers, except for Bank Rakyat in Indonesia, contributed to outperformance. In technology, significant outperformance by TSMC drove the strength in Taiwan, but the fact we cannot hold anywhere close to a benchmark weight means we needed to find other performance drivers which Elite Material, Hon Hai Precision, Broadcom and Tech Mahindra were able to provide. The zero exposure to Samsung Electronics, whose under-performance does much to explain Korean market weakness, also contributed to the Fund's outperformance.

The main performance drags came from consumer discretionary, health care and property. In consumer we had two stocks that reported disappointing results, from Corporate Travel Management to which we added and from Hanon Systems which we sold. In healthcare we had a disappointing result from China Medical System to which we also decided to add. Property sector weakness came primarily from our three Real Estate Investment Trusts (REITs) that are commercially focussed. They have contributed well in the past and gave back some of their performance this year but the income from them continues to grow.

We expect US policy, both foreign and domestic, to introduce greater volatility to equity markets. The operating environment will become more uncertain especially with respect to global trade. US dollar interest rates will also be an important factor, primarily affecting valuations. The downward trajectory appears to be elongated as core inflation remains stickier, even if the Federal Reserve Open Markets Committee (FOMC) were to place greater emphasis on a different, market-based, assessment of inflation. China's domestic economic path also remains an important variable. Policy changes were announced in response, we think, to the increased likelihood that without it the 2024 economic growth target might not be achieved. Policy changes have happened and consumer-supportive moves like the popular trade-in programme have been extended; but the overall approach has been measured, and confidence remains fragile.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Asian Equity Income Fund (the "Fund") (continued)

Activity

We changed one portfolio position with the sale of Hanon Systems and the purchase of Bank Rakyat.

Hanon Systems is a Korean auto stock, which gave us exposure to a growing electric vehicle market. Their expertise lies in engine cooling technology for both internal combustion engines and electric vehicles, with a sticky customer list reflecting the quality of their products. However, the sector outlook has deteriorated, and roadmap for recovery continues to lengthen. Dividend growth has suffered with it. To their credit, Hanon has focused on labour and supply chain streamlining to improve profitability. However, demand pressure from the end market persists, with recent news of VW's struggles emphasising the problem and so we have taken the decision to sell the holding.

Bank Rakyat is an Indonesian state-owned commercial bank which has expertise in the Micro, Small and Medium Enterprise lending segments, with micro loans making up 48% total loans. Rakyat has a history of managing the higher-risk but higher-yielding micro loan book well, leading to a Net Interest Margin well above its peer set. Rakyat has focused on improving efficiency and digitisation leading to better underlying profitability, lower leverage and greater consumer focus. The bank has a history of high returns on equity which, after a three-year decline through the Covid period have now returned to historical levels.

Portfolio Positioning

Fund Allocation vs MSCI AC Pacific ex Japan Index

Sources: MSCI, Bloomberg, Guinness Global Investors. Data as of 31 December 2024

The Fund has a full weight in China, relative to the benchmark, and is overweight relative to peer funds. The exposure to the US consists of companies that generate over half their revenue from the region. The Fund is significantly under-weight in Australia and Korea. On a sector basis, the Fund is overweight in the Consumer discretionary, Financials and real estate sectors. It is neutral in Technology, underweight in Communication Services and has no exposure to Energy, Industrials and Materials.

Outlook

Our focuses in 2025 are broadly a continuation of 2024; China recovery, US policy, inflation and technology spend. We do not expect any dramatic moves from the Chinese government. Instead, we believe they will continue to ease monetary policy by recapitalising banks and, more interestingly, by recapitalising local authorities. Domestic sentiment, whilst incrementally more optimistic, remains cautious as the country shifts away from using property as an economic driver towards newer growth pillars such as electric vehicles, industrial automation, sustainable energy. We believe it will take a few more years before the transition is complete but are encouraged by what we see as an improving domestic environment that continues to offer us interesting and appropriately valued opportunities.

US policy has swung back into focus, in particular, policies surrounding trade and tariffs to attain geopolitical objectives. Whilst we accept that this environment will likely pressure company valuations, we believe the effect on operational performances of quality companies like the ones we hold and the ones we look for will be smaller than market sentiment would suggest. The last decade has brought about a diversification in global supply chains; quality companies will have proactively adapted to these trends and so should offer a more diverse footprint leading to, in our view, a lower-than-expected tariff impact.

Technology spend has continued to be driven by AI trends in 2024, and we believe this will continue for at least the next twelve months. We are seeing evidence of growing demand in AI-related products, for example, with TSMC expecting strong AI-related chip demand in 2025. With planned tax cuts in the US, we could also see improvements in consumer spending lifting sales in consumer electronics, further boosted by an incoming replacement cycle of devices bought during the pandemic era, and promotion of personal computers (PCs) with integrated AI functionality- according to Nielsen, 10% consumers already claim that AI integration is a key criterion when purchasing their PC. This in turn, would benefit Asia as whole, given the region's dominance in manufacturing.

The portfolio's average annual earnings growth over the 2024-26 period is forecast by the market consensus to be a reasonable 6.2%. This is in line with Fund's long term (10-year) average annual earnings growth rate. It compares to 13.5% for the benchmark. The Fund's 2024 price/earnings (P/E) ratio of 10.9x values it at a 19% discount to the market's 13.5x.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness European Equity Income Fund (the "Fund")

In 2024, the Fund rose +3.1% (in USD) compared to the MSCI Europe Ex UK Net Return Index, which rose +0.2% (in USD). The Fund therefore outperformed the index by 2.9% over the year and was first quartile vs IA Europe ex UK income peers.

Performance summary in US Dollars: Class Y compared with MSCI Europe ex UK Net Return Index

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	3.1%	2.9%	5.6%	3.3%	16.4%	-14.9%	24.2%	3.1%
Index	0.2%	0.0%	5.1%	10.9%	15.7%	-18.0%	21.7%	0.2%

The Dividend

The dividend grew by 16.1% in 2024 (July 2024 and January 2025 payments). Since the Fund's inception on 19 December 2013, the dividend has grown at a CAGR of 7.6% in GBP. The full-year dividend is now 38.9% above 2019 levels. Over the year, our portfolio holdings continued to demonstrate their ability to grow their dividends, reflecting their strong cash generation, effective capital allocation, and strong balance sheets. Based on year-end pricing, the last twelve-month dividend yield is 3.6% (net of withholding tax).

European Market Backdrop

In Q4, sentiment turned decisively against European markets in the run up to and following the November 5th US presidential election and victory of Donald Trump with his America first agenda. From the Fund's perspective, we feel we are well placed with regard to the risk of tariffs. We have no holdings in auto OEMs, steel, or other commodity areas that have historically been targeted with tariffs. Some 30% of the Fund has next to no US sales at all, while approximately 29% of company holding revenues are derived from the US.

In Europe, the year ended on a soft note, with the ECB cutting interest rates for a fourth time by 0.25bps in December, taking the deposit rate down to 3% from 4% at the beginning of June. The ECB also cut its 2025 growth forecast to 1.1% vs. 1.3% previously, and forecasts headline inflation of 2.1% in 2025 and 1.9% in 2026, alongside core inflation of 2.3% in 2025 and 1.9% in 2026. This suggests further rate cuts may be in store for 2025 as inflation tapers to below the 2% target. The Bundesbank rounded off the year with a similarly downbeat forecast of 0.1% growth for 2025 vs its prior forecast of 1% back in June, amid ongoing weakness in China and concerns over US tariffs. While the German IFO Expectations Index and the Belgium Business Confidence Index continued to decline, there was one chink of light, measures of liquidity, including M1 and M3, which tend to lead PMIs, rebounded in H2 2024, arguably highlighting a nascent improvement in the backdrop as the lagged effect of ECB rate cuts start to feed into the real economy.

Politics cast a shadow over Europe in Q4, with France remaining politically grid locked and Emmanuel Macron appointing his second Prime Minister in three months. While far from ideal, the market fixated on the rise in French government bond yields, arguably missing a wider, more positive narrative. 2024 may have been the year that France-Germany government bond yields widened, but it was also the year when Italy-Germany spreads contracted meaningfully, along with most of the so called "periphery". Recent commentary from the Bundesbank, Banque de France, and ECB focused on increased European integration and cooperation. Following Mario Draghi's report on European competitiveness, this suggests that the chances of a policy response to Trump (and China) are growing. Additionally, the German election on 23rd February 2025 may also represent a positive catalyst if the CDU/CSU, led by free marketeer Friedrich Merz, prevails.

Performance Drivers

MSCI Europe ex UK suffered a sharp drawdown in USD terms in Q4 2025 as European markets and the Euro fell in response to the election of Donald Trump as President of the United States on 5th November. As a result, MSCI Europe ex UK generated a negligible return in USD for 2024. Meanwhile MSCI World returned 19.2% for FY, led by the US (+25.1%) as the magnificent seven and AI-related exposures led markets. Among the main regions, Asia Pac ex-Japan returned 10.8% for FY as stimulus measures buoyed Chinese markets over H2 2024.

At a sector level, Financials was the leading MSCI Europe ex UK sector in both Q4 and for FY, as the return of yield fed into higher returns and valuations following years of low returns in the era of zero interest rates. At the other end of the spectrum, Consumer Staples was the worst-performing MSCI Europe ex UK sector in both Q4 and over the FY, impacted by both higher discount rates stemming from higher, longer-dated US treasury yields and the threat of tariffs on Staples companies exporting from the EU, notably the beverage companies. The Fund performed well in this environment, holding none of the spirits companies, and with Unilever, Danone, and Royal Unibrew all materially outperforming for the FY, and only Nestle underperforming.

IT, Industrials, and Communications Services all performed well in both Q4 and for FY, helped by declining European interest rates in the second half of the year and relatively high USD earnings exposure for many IT and Industrials companies. Meanwhile, economically sensitive sectors including Energy and Materials suffered in both Q4 and for the FY, as softening economic data resulted in a weakening price environment. Healthcare also suffered in Q4, giving up most of its gains for the year, as Europe's largest company, Novo Nordisk, fell sharply following the weaker-than-expected outcome of obesity-related drug trials.

Activity

In 2024, portfolio turnover totalled approximately 6.6% (buys only). In May, the Fund purchased Publicis in the Communications Services sector against the sale of Henkel in the Consumer Staples sector. The Fund then subsequently acquired Sampo Oyj (Financials), replacing Mercedes (Consumer Discretionary) in October. Exposure to France and Finland rose by 3.3% while exposure to Germany fell by 6.6%. In each case, switches represent a step up the quality curve to higher margins, higher returns, and better long-term capital and dividend growth potential.

Publicis is arguably the best positioned of the big four global advertising companies, being a leader in data and digital, notably ad personalization at scale and digital transformation. This has resulted in persistent share gains for Publicis, with an organic sales CAGR of 4.7% from 2019 to 2023, twice that of peers. The shares look reasonably valued at 12.9x 2025e earnings, set against high teens sustainable return on equity and a balance sheet that is turning net cash on a forward-looking basis. The company also offers an attractive dividend yield of 3.7% 2025e, which has grown by 10% and 12% on a 5Y and 10Y annualised basis, respectively. With some 61% of sales stemming from the US and digital leadership amongst sector peers, the company has a good runway to continue recent form.

Sampo Oyj occupies the market-leading position in property & casualty (P&C) insurance in the Nordics, with approximately a 20% market share. It is some 60% bigger than the next largest insurer, Tryg. Sampo displays best in class use of technology, with over €1bn spent on digitalization in the last ten years, and €200m in 2023. The group is strongly customer-focused, with a track record for profitable growth combined with efficiency gains. In fact, the group has reduced its P&C cost ratio by over 20bps per annum for over 14 years, driven by its digitalization agenda, whilst at the same time reporting the highest customer retention numbers in the industry, driven by fair and stable pricing and a trusted brand. All of this is reflected in a long history of 10-15% cash returns on investment over ten years. Sampo looks well placed to continue to grow, and the timing looks good. The recent buy out of Topdanmark minorities sets the stage for higher returns via scale and efficiency in the Danish market, which has historically been dilutive to group margins. Sampo also has a fortress balance sheet underscoring significant dividend paying capacity, alongside a track record for both special dividends and buybacks, something we expect to hear more about in the future.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness European Equity Income Fund (the "Fund") (continued)**Portfolio breakdown**

The following table shows the sector allocation of the Fund.

Asset allocation as % NAV	Current	Last year end	Change					
	31/12/2024	31/12/2023		31/12/2022	31/12/2021	31/12/2020	31/12/2019	31/12/2018
Consumer Discretionary	3.4%	6%	-3%	10%	10%	3%	6%	6%
Consumer Staples	16.6%	18%	-2%	20%	19%	16%	16%	17%
Energy	0.0%	0%	0%	0%	0%	0%	0%	0%
Financials	27.0%	22%	5%	20%	19%	19%	19%	19%
Health Care	13.0%	13%	0%	13%	14%	13%	7%	14%
Industrials	22.1%	25%	-3%	23%	27%	29%	30%	23%
Information Technology	8.7%	10%	-1%	10%	7%	10%	7%	6%
Materials	0.0%	0%	0%	0%	3%	7%	4%	0%
Communication Services	6.9%	3%	4%	3%	0%	0%	9%	9%
Utilities	0.0%	0%	0%	0%	0%	0%	0%	0%
Real Estate	0.0%	0%	0%	0%	0%	0%	0%	0%
Cash	2.2%	2%	0%		2%	3%	2%	5%

*GICS sector reclassification end Sept 2018: Communication Services replaced Telecommunication Services.

With the sale of Henkel in May 2024, the Fund reduced its overweight position in Consumer Staples, while the simultaneous purchase of Publicis brought the Communication Services sector to an overweight position. In October, the Fund sold its position in Mercedes, further reducing exposure to Consumer Discretionary, and bought Sampo Oyj, which further increased the exposure to Financials.

Outlook

Whatever the economic weather in 2023, we believe our focus on quality companies that generate persistent high cash returns supported by strong balance sheets will serve investors well for the long-term. The Guinness European Equity Income Fund holdings are characterised by high levels of self-determination; namely identifiable barriers to entry, leading market positions, widening moats, aligned interests, and long runways for growth. Across quality value and dividend metrics, holistically, the high-conviction fund has companies which are significantly higher quality and better value versus the index.

In contrast to the political noise reported in the press in 2024 and some widening of France minus Germany yields, national spreads over German 10Y yields haven't looked so unified for some time, following peripheral convergence in 2024. Trump and China are both putting pressure on Europe and the stage appears set for a degree of policy response in 2025. Far right and populist parties abound but what choice does Europe ultimately have if it wants to stand up to the US and China, other than integration and cooperation. We suspect a little bit of good news on this front could go a long way to alleviating historically low European valuations compared to the US. Mario Draghi's report on European competitiveness has given policy makers a route map. Meanwhile, the German federal election on February 23rd could represent a positive catalyst if the CDU/CSU party led by Frederick Merz prevails. As ever, European politics will remain complicated. We will continue to focus on quality companies trading at fair valuations with strong long-term structural growth drivers.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Fund	19.7%	5.7%	14.3%	36.3%	21.5%	-29.6%	40.0%	19.7%
Index	18.7%	6.3%	11.2%	15.9%	21.8%	-18.1%	23.8%	18.7%

Source: FE Analytics (data as at 31 December 2024)

Performance review

The Fund in 2024 produced a total return of 19.7% (in USD). This compares to the return of the MSCI World Index net return of 18.7% (in USD). The Fund therefore outperformed by 1.0%.

2024 can be split into a number of distinct performance periods, each with different drivers and leaders from both a style and sector perspective.

MSCI World Indices Total Return 2024

Source: MSCI, Guinness Global Investors, Bloomberg, as of 31 December 2024

(1) – Goldilocks Rally (1 January – 31 March)

Equity markets continued their strong performance from the final months of 2023 into the start of 2024, with broad-based gains across all major indices. We entered the year with significant expectations of a 'Goldilocks scenario': continued economic strength, inflation trending towards target levels and prospects of large-scale interest rate cuts. Across the first quarter, the macroeconomic outlook was seemingly more positive particularly in the US with GDP announced at 3.4% for Q4 of 2023 and the US Purchasing Managers Index (PMI) moving into expansionary territory for the first time since April 2023. However, strength in economic data was instead perceived to mean that the Fed may not need to cut interest rates, leading to a marked change in rate-cut expectations through the first quarter. Unexpectedly, this shift in expectations coincided with strong equity performance and the outperformance of growth stocks, as global markets hit record highs in March. Unlike recent years, where strong economic data often delayed rate cuts and dampened equities, this time, good economic news boosted markets. Optimism was driven by economic strength, opportunities in artificial intelligence, and a robust earnings season, with 74% of companies exceeding EPS expectations, lifting sentiment across sectors.

During this period, the Fund benefitted from both positive stock selection and asset allocation effects, driving outperformance relative to the benchmark. In particular, the Fund's largest overweight industry position was to the benchmark's best performing - Semiconductors and Semiconductor Equipment Manufacturers. Strong stock selection amongst names such as Nvidia, Meta and Novo Nordisk was also a significant contributor, alongside the outperformance of 'growth' more generally.

(2) – Sticky Inflation and Slowdown concerns (1 April – 19 April)

Markets reversed course in early April as weaker economic data and sticky inflation reads dampened the 'Goldilocks' narrative. Signs of weakness emerged in April as Q1 GDP and US manufacturing activity and consumer sentiment surveys all came in below consensus forecasts, with markets pausing to reassess the outlook. Concerns of a slowing consumer-led economy grew as companies cited shifts in purchasing habits and whispers of 'stagflation' arose as inflation remained higher than expected. Notably, the possibility of a return to rate hikes began to be debated after Fed Chair Jay Powell's hawkish remarks emphasized slower-than-expected progress on inflation, raising fears of persistent inflation, a weaker economy, and the prospect of delays in rate cuts.

During the sell-off, the Fund performed in-line with the benchmark. The Fund's largest overweight sector position was to the MSCI's bottom performing sector, Information Technology. Whilst this acted as a detractor to relative Fund performance, strong stock selection within Industrials, Communication Services and Information Technology offset the majority of this negative impact. ABB, Alphabet and Anta Sports were standout performers during this period.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Innovators Fund (the "Fund") (continued)

Performance review (continued)

(3) Soft-landing Scenario re-emerges amidst AI growth rally (20 April – 15 July)

Negative sentiment quickly reversed as strong corporate earnings and positive economic data restored confidence. May US CPI of 3.4% signalled price normalisation, boosting hopes for a soft landing. Market-implied rate cuts rose from 1.1 in April to 1.8 in June, driving a notable divergence between Growth and Value stocks. Large-cap tech giants—the "Magnificent 6" (Apple, Amazon, Alphabet, Nvidia, Meta, Microsoft)—led gains, fuelled by AI optimism and robust earnings.

Amidst AI optimism and stronger performance in growth stocks, the Fund outperformed, and the Fund's overweight position to the IT sector and holdings in the Magnificent 6 provided strong asset allocation effects.

(4) – Volatility resurfaces (16 July – 6 September)

The typically quieter summer period saw heightened volatility in global equity markets. In July, investors rotated out of growth stocks amid concerns over AI investment returns and rising capital expenditure. Tensions in US-China trade relations, driven by Donald Trump's remarks on Taiwan and potential U.S. restrictions on non-U.S. semiconductor firms, added to market anxiety. Weak earnings from Tesla and Alphabet pushed the Bloomberg Magnificent Seven index into correction territory (-10%), leading to the outperformance of value, defensive, and small-cap stocks. Early August brought further worries, as weak U.S. economic data, including a contracting ISM Manufacturing Index and higher-than-expected jobless claims, weighed on sentiment. Earnings misses from Intel and Amazon compounded concerns. A global sell-off intensified on August 5th after a surprise rate hike by the Bank of Japan caused Japan's TOPIX to drop 12.4% in a single day, and the unwinding of the so-called yen-dollar carry trade drove volatility higher. The VIX Index spiked to its highest level since 2020, prompting a shift toward more defensive stocks. However, markets quickly rebounded and the MSCI World Index recovered to mid-July levels by the end of August, regaining all losses from the beginning of this sell off. However, moving into September, disappointing U.S. non-farm payrolls and persistent manufacturing weakness reignited fears of economic slowdown. Growth sectors lagged while defensives outperformed amid ongoing uncertainty over interest rate cuts, prompting a continued 'risk-off' stance from investors.

Given the volatility across the period and a sell-off affecting semiconductor companies to which the Fund has a relative overweight positioning, the Fund underperformed. More defensive sectors such as Consumer Staples, Utilities and Real Estate outperformed and the Fund's zero-weight position to these sectors, created a headwind to relative performance.

(5) – Fed delivers first rate Cut as markets eagerly await the outcome of the US election (7 September - 4 November)

The Federal Reserve delivered the long-awaited beginning of the rate cutting cycle on the 18 September, and with a 50bp reduction. This marked the first interest rate cut in the US since March 2020. Markets rallied on news of the bumper cut, with the S&P500 reaching record highs and large-cap technology stocks leading the move. Elsewhere, Chinese stocks jumped to record highs, experiencing their best day since 2008 following President Xi Jinping's surprising pledge of broad stimulus to boost slowing growth in September. The period ended with the overhang of the US election, with the rising odds of a Trump victory throughout the month, driving significant uncertainty.

As interest rate expectations reversed, following the Fed's first rate cut, all equities were driven higher, leading the Fund to outperform the broader Index. Further, it was encouraging to see new Fund Holding Ametek, outperform, providing position stock selection effects for the Fund.

(6) – Trump Trade and shifting interest rate expectations (5 November – 31 December)

Donald Trump's 2024 presidential victory sparked an initial market rally, driven by expectations of tax cuts and deregulation favouring financials, industrials, and energy. However, while markets initially expected continued Fed rate cuts to support growth, stronger economic data and hawkish remarks from Jerome Powell, citing higher inflation forecasts, pressured equity valuations, into the year end.

Following Trump's election success growth outperformed value, acting as a tailwind to Fund performance. Though the Fund saw positive asset allocation from the overweight position to the IT sector, this was offset by stock selection effects as the Fund does not hold Broadcom which outperformed over the period, leading to overall underperformance during this period.

Over 2024, Fund performance relative to the MSCI World Net TR Index can be attributed to a number of factors:

- The Fund held six of the 'Magnificent Seven' stocks that have continued to dominate developed market equity performance. The Fund held Apple, Alphabet, Amazon, Meta, Microsoft and Nvidia but did not own Tesla. Collectively the fund had a higher weight in these names than the benchmark providing a positive contribution to relative performance.
- Through the year, a number of events brought 'growth' stocks into favour namely the Fed's first interest rate cut, continued enthusiasm for Artificial Intelligence and Trump's election success within the final months of the year, all benefitting Fund performance over 2024.
- The Fund's largest overweight position was to the Information Technology sector and this contributed to positive asset allocation as it was among the top-performing sectors over the year (+33.1% USD). Further, having no exposure to the weaker performing sectors of Materials, Energy and Consumer Staples provided a material benefit to performance.
- Stock selection within the Information Technology sector was the greatest detractor to relative Fund performance. The software company Adobe, (-25.5% USD), was the Fund's weakest performer over the year as the company struggled with intensifying competition and monetisation of its AI tools.

Activity

As part of our one-in-one-out process, we sold four positions and initiated four new positions over the course of 2024, leaving the portfolio with 30 positions at the end of the year.

Buy:

Siemens Healthineers, spun out of the broader Siemens group in 2017, develops and sells medical technology solution to healthcare providers.

LSEG, owner of the London Stock Exchange, provides both data solutions and infrastructure for global financial markets.

Netflix. The dominant streaming giant, that is growing into new international markets and additional content channels such as sports.

Ametek is a niche manufacturer of highly engineered electromechanical and electronic instruments across a wide range of end-markets, including MedTech, Power, Aerospace and Defence, among others.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Global Innovators Fund (the "Fund") (continued)

Activity (continued)

Sells:

Zoom Video Communications has struggled since coming out of the pandemic with changing consumer trends and a tougher macroeconomic environment.

Comcast, which offers cable TV, internet, and phone services where we saw the market backdrop has shifted and in recent years, the stock has been weighed down by several factors including slower growth in broadband and subscriber losses in its Cable TV segment.

Nike. The firm's decision to focus on Direct-To-Consumer (DTC) and 'Online' while moving away from wholesale partners worked well, and particularly during the pandemic period, but more recently appears to have opened the business up to increased competition from newer brands who have taken shelf space in their place.

PayPal. The company was a pioneer in digital payments and established itself as a convenient and secure alternative to traditional payment methods. Recent investor concerns have mounted due to intensifying competition in its core PayPal Button business from emerging digital payment wallets like Apple Pay and CashApp, as well as slower growth in PayPal's subsidiary products, Venmo and Braintree.

Outlook

The Fund seeks to invest in high-quality growth companies, that have exposure to long-term secular growth trends and that are trading at reasonable valuations.

During the year, the Fund benefitted from a number of tailwinds, including a rotation back towards 'growth' over 'value', following the start of the Fed's rate cutting cycle. Following from 2023, markets were also buoyed by developments in Artificial Intelligence— one of the nine key innovation themes in which the Fund has significant exposure. However, we also saw a year characterised by heightened volatility particularly across industries such as semiconductors. Thus, we are pleased with the Fund's outperformance this year and more broadly the longer-term performance. The Fund remains in the top quartile versus peers across 1, 3, 5-, 10-, 15-, and 20-year periods, despite the varying market conditions seen during the past few years and particularly the difficult environment for 'growth' stocks during 2022. Our focus on quality growth-at-a-reasonable-price has helped the Fund in more difficult market environments, not only benefitting from businesses who are able to withstand more difficult demand periods with strong balance sheets and higher margins, but also avoiding the volatile non-profitable tech businesses that have swung between large rises and falls, and often underperforming over longer time frames.

In addition, the Fund has good exposure to the long term secular trend that it Artificial Intelligence, investing in a number of the leading enablers and integrators within the space, and this has been the key driver of performance over 2024. However, the Fund is diversified across a number of other long term secular themes, that we believe should benefit from continued growth prospects with less sensitivity to the broader economic cycle. In our view, a diversified approach helps protect the Fund against the potential 'boom/bust' cycles that investing in a single theme may experience, thereby reducing volatility of returns but maintaining the ability to potentially capture the upside of strong growth trends. A focus on valuation further aids our ability to avoid costly de-ratings of more speculative companies when growth, or the macro environment, disappoints.

The table below illustrates how the portfolio at year-end reflects the four key tenets of our approach: growth, quality, value, and conviction. The Fund has superior growth characteristics to the broader market, with both a higher trailing revenue growth rate, alongside higher estimated growth over 2025 (vs 2024). Fund holdings, on average, offer higher quality attributes than the broader index, with a significantly greater Return on Capital and more robust balance sheets. The Fund currently trades at a 22.9% premium to the benchmark on a 1 year forward P/E basis which we believe is reasonable relative to the more attractive set of characteristics.

Portfolio metrics versus MSCI World Index

		Fund	MSCI World Index
Growth	Trailing 5-year sales growth (annualised)	13.7%	4.3%
	Estimated earnings growth (2024 vs 2023)	22.4%	15.7%
Quality	Return-on-Capital	21.4%	8.6%
	Median net debt / equity	19.8%	39.1%
Valuation	PE (2025e)	23.6x	19.2x

Conviction	Number of stocks	30	1480
	Active share	79%	-

Source: Guinness Global Investors, Bloomberg, as of 31 December 2024

Though the outlook for 2025 offers much uncertainty, market developments over 2024 point to strength, laying stable foundations for the year ahead. Concerns early in the year over hotter inflation, a hard landing scenario and weakening consumer sentiment have largely abated. Inflation has continued to trend towards targeted levels, reports of jobs data have surprised to the upside and GDP growth particularly in the US has held up, which allowed the Federal Reserve to deliver the much-awaited start of the interest rate-cutting cycle. Despite this broad optimism, we are aware that risks remain. Donald Trump's return to the presidency introduces policy uncertainty, particularly around tariffs, corporate taxes, and energy policies. His proposed tariffs on imports, if implemented aggressively, could elevate inflation and increase volatility in global markets. Focusing on the US equity market, we enter 2025 with elevated valuations as many stocks are trading at a premium to long term averages. This leaves equities vulnerable to external shocks or negative catalysts. In such an environment, we remain grounded in our investment philosophy of finding high quality stocks with exposure to long term secular growth themes as these companies have scope to grow whilst being protected by better fundamental characteristics in terms of margins and balance sheets but also performing well during cyclical upswings. We are confident that the Fund's focus on high quality growth stocks, underpinned by structural changes stands us in good stead going forward. Our bottom-up approach helps to identify these quality growth companies, whilst also maintaining a valuation discipline. In addition, our equally weighted positions limit over-reliance on any single company. We continue to focus on these key tenets in the Fund and remain confident of this process over the long term.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Greater China Fund (the "Fund")

Performance

Performance summary in US Dollars: Class Y compared with MSCI Golden Dragon Net Return Index

	1 year	Annualised		Calendar years				
		3 years	5 years	2020	2021	2022	2023	2024
Fund	4.5%	-10.1%	-3.1%	17.9%	0.1%	-23.0%	-9.9%	4.5%
Index	22.5%	-1.9%	1.8%	28.2%	-9.5%	-22.3%	-0.9%	22.5%

In 2024, the Fund rose by 4.5% while the MSCI Golden Dragon NTR Index rose 22.5%. Therefore the Fund underperformed the MSCI Golden Dragon Index by 18.0%.

The market saw significant fluctuations in 2024 due to a mix of weak macroeconomic data, shifting government policies, and global factors. A steep drop in January reflected disappointing December data and limited stimulus, with retail investors following state-backed funds into large-cap stocks. February saw an rally as government support expanded to small- and mid-cap stocks, alongside restrictions on short selling. Stabilisation followed in March, while in April and early May markets rebounded before weak summer data drove declines. September marked a turning point as the Federal Reserve's rate cut and unexpected Chinese stimulus buoyed markets, including a larger than expected PBOC rate cut and a significant liquidity injection. Efforts to stimulate property and consumer spending saw limited success, with mortgage rate cuts and subsidies having modest economic effects. In November, a \$1.4 trillion debt swap aimed to alleviate local government budget pressures caused by falling land sales revenue and high interest burdens on off-balance-sheet debt. While reducing local governments' costs, the savings were likely offset by lower bank earnings, yielding minimal net economic growth.

Areas which helped the Fund's performance were:

- Stock selection in the Consumer Staples sector, driven by Inner Mongolia Yili (total return +14.6%) and Chongqing Fuling Zhacai (-1.5%). Both outperformed the sector which fell 6.0%.
- Stock selection in the Consumer Discretionary Sector, driven by Geely (+77.7%), Pinduoduo (not held, -33.7%), Haier Smart Home (+29.9%), Suofeiya Home Collection (+10.2%) and Midea Group.

Areas which detracted from the Fund's relative performance were:

- In the Fund, we hold two positions in Taiwan which collectively have a neutral weight of ~6.4%. In the benchmark, Taiwan has a weight of 38.2%. As the MSCI Taiwan Index has risen by 34.4% year-to-date (in USD), the MSCI Golden Dragon Index has captured far more of the stronger performance in Taiwan than the Fund.
- Within the Communications Services sector, a combination of the underweight to the sector and stock selection, driven by Tencent (+44.0%) and Baidu (-29.2%). The Fund is run on an equally weighted basis and so each position has a neutral weight of 3.3%. As of the end of December, Tencent's weight in the benchmark was 8.8%. Tencent's share price rose by 44.0% so the index benefited much more from Tencent's rally than the Fund.
- Underweight to Financials, and more specifically the underweight to the large state owned enterprise (SOE) banks. The Fund does not hold any of the large SOE banks which have been significant outperformers as a value play. We do not own these large SOE banks as they do not give exposure to the long-term structural growth themes in China.
- The combined underweight to Materials, Energy and Utilities where the Fund has no exposure, whereas in the index these sectors have a cumulative weight of 6.17% (as of year-end). The Fund targets quality companies which give exposure to the structural growth themes in China. In our universe, there are no Energy names which give this exposure. The Material names which have been strong this year are related to metals and cement – these companies do not generally make the quality threshold we target in the Fund. Relevant companies are Zijin Mining, China Hongqiao (aluminium), Aluminium Corp, Jiangxi Copper and Zhaojin Mining. The Fund holds no companies in the Utilities sector.
- Additionally, we point out the Fund's overweight to growth stocks, the onshore markets and small- and -mid caps worked against it:
 - The MSCI China Growth Index rose by 15.0% while the corresponding Value Index rose by 25.1%. The Fund is overweight to growth stocks.
 - The MSCI China A Onshore Index rose by 11.7% compared to the Hang Seng Composite Index which rose by 22.1%. The Fund is 17% overweight to the onshore market which worked against it.
 - The small cap index rose by 6.7% and the mid cap index rose by 10.4%. Meanwhile, the large cap index rose by 20.8%. The Fund is overweight to small- and mid-cap stocks.

Activity

We sold China Medical System, Venustech Group and Wuxi Lead Intelligent Equipment. We bought Midea Group and Haitian International.

Sells

We sold the full position in China Medical System following its profit warning at the end of March. CMS reported an unexpected decline in sales in the second half of 2023, as for some of its major drugs the decline in prices was larger than management had previously guided for. The gulf between guidance and reality concerned us, reflecting poor communication from management. The company expects it will take until 2025 for revenue to beat 2022's amount, and until 2026 for net profits to do the same.

Venustech is a cybersecurity company whose largest shareholder is China Mobile. Though cybersecurity standards have been made more stringent in China over the past few years, the industry has struggled. Some local governments, whose incomes are under pressure from the weak property market, have cut budgets for cybersecurity spending. So despite the attractive long-term picture for cybersecurity demand, in the current environment the entire industry has struggled and has failed to provide the secular growth we look for.

Wuxi Lead Intelligent Equipment is a leading manufacturer of battery production equipment. As the domestic battery market may be in a state of overcapacity, the business has looked to foreign markets for growth. But even here, as EV sales have slowed, some battery manufacturers are cutting on capex. For example, Volkswagen is considering closing factories in Germany while Northvolt filed for bankruptcy in the US. Our concern was that some of Lead Intelligent's customers, whether well known or not, may not be able to pay Lead Intelligent. Given the high receivable days, there was a non-trivial chance that the business has to write off some of its receivables, leading to a hit to earnings.

Buys

Midea is one of the world's largest household appliances companies, selling items such as fridges, freezers, dishwashers. It is also one of the world's largest air conditioner manufacturers. The company has a long track record of growing its asset base at a high cash return on capital. We expect revenues and profits to continue to grow, which is attractive in the current economic environment in China. We also like Midea because it owns Kuka which it bought from a German company in 2016. As China's working population shrinks and wages rise, greater automation is likely to be a trend and so owning one of the world's most advanced robotics companies makes Midea very attractive.

Haitian International is the world's largest manufacturer of plastic injection moulding machines. It is likely to benefit from government stimulus for its customers to upgrade older equipment. Additionally, Haitian gives indirect exposure to the trade-in of consumer goods, where consumers are given subsidies to trade in their older household appliances for newer products. This should lead to greater capex for some of Haitian's downstream customers, leading to greater demand for their machines. Management also say reshoring is creating opportunities for the business, as if new plants are being created in, for example, South East Asia, this should also boost demand for plastic injection moulding machines. Haitian trades at a very favourable risk reward ratio for a consistently high return on capital business.

Investment Manager's report (continued)

Guinness Greater China Fund (the "Fund") (continued)

Portfolio Position

On a sector basis, the Fund's largest exposures are to the Consumer Discretionary and Information Technology sectors. Relative to the MSCI China Index, the Fund is overweight in the Information Technology and Industrials sectors. The Fund is underweight in the Communication Services sector.

Fund Sector Allocation vs MSCI China Index

Fund over/underweights

(Data as of 31/12/24, source: Guinness Global Investors calculations, Bloomberg)

On a listing basis, the Fund has 55% exposure to stocks listed in Hong Kong, 32% exposure to the A share market and a small 7% allocation to Taiwan. Relative to the MSCI China Index, this makes the Fund 17% overweight to the A share market and 23% underweight to stocks listed in Hong Kong.

Fund Listing Allocation vs MSCI China Index

Fund over/underweights

(Data as of 31/12/24, source: Guinness Global Investors calculations, Bloomberg)

Outlook

The signals from the government indicate that more support for the economy is forthcoming. In early December the Politburo further strengthened its wording on economic policy, as "more proactive" fiscal policy and "moderately loose" monetary policy was called for. These phrases are important as "more proactive" fiscal policy was last mentioned soon after the covid outbreak started, and "moderately loose" monetary policy was last used after the financial crisis.

The Minister of Finance has said China will expand the number of consumer goods that are eligible for the trade in subsidy, as well as the total value of subsidies provided. Already in January, the scope of the trade in program was expanded to include dishwashers, rice cookers, smartphones, tablets and smart watches. Funding for the trade-in program was increased from CNY 30bn (\$4bn) in 2024 to CNY 81bn (\$11bn) in 2025.

A Reuters report says China plans to issue CNY 3 trillion (\$411 bn) in special government bonds, far higher than the CNY 1 trn (\$138bn) issued in 2024. The report argues ~CNY 1.3 trillion is to be used to expand the consumer trade in programs (from the current level of CNY 150bn) and to support unspecified construction projects. More than CNY 1 trillion is to be spent on supporting new pillar industries, leaving ~CNY 700 billion to recapitalise the large SOE banks. The headline budget deficit is also reportedly to be increased from 3% of GDP in 2024 to 4% of GDP in 2025. Bloomberg estimate that taking into account both plans, the aggregate fiscal stimulus would be worth 2.6% of China's GDP, which we view as substantial.

Of course, the new Trump administration coming into power in January is another factor to watch and we believe it is likely the Chinese government is waiting to see how tariffs play out, before they move decisively on policy. China now has a deeper set of tools it can use to retaliate, compared to Trump's first term. From China's perspective, imposing tariffs across the board on imports from the US is not viewed as highly effective. Instead, restricting exports in goods where China dominates the supply chain in critical materials is considered more useful. For example, in December exports of gallium, germanium and antimony to the US were restricted, on the basis of their potential for use in military and civilian applications. This "dual use" argument mirrors the restrictions the US has imposed on Chinese companies, where we have just seen Tencent and CATL have been designated by the Pentagon as companies with links to the Chinese military. There are also other ways the Chinese can apply pressure – for example, in December China started an anti-trust probe on Nvidia.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Emerging Markets Equity Income Fund (the "Fund")

Performance summary in US Dollars: Class Y compared with MSCI Emerging Markets Net Return Index

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	10.9%	3.1%	3.8%	6.7%	3.1%	-12.6%	12.9%	10.9%
Index	7.5%	-1.9%	1.7%	18.3%	-2.5%	-20.1%	9.8%	7.5%

Review

In 2024, the Y share class distribution in USD terms rose by 6.1%. This represented a new record distribution for both the full year, and for any semi-annual payment. Some of the increase in the second half payment is due to timing differences, where dividends that fell in the first half previously have slipped into the second (and thus were recouped later in the year). Since the launch of the Fund to the full year 2024, the dollar dividend has grown at a compound annual growth rate of 6.7% per annum.

Emerging markets again underperformed developed markets, with the MSCI Emerging Markets Index rising 7.5% compared with the MSCI World Index which climbed 18.7% and the S&P 500 Index which rose 25.0%.

Asia was the strongest performing region, rising 12.0%. Taiwan was the best performer on an individual country basis (among the larger countries) up 34.4%, but other strong contributors included Malaysia (up 20.8%), China (up 19.4%), and India (up 11.2%). EMEA (Europe, Middle East and Africa) was next, regionally, up 5.6%. Latin America was by far the weakest region, down 26.4%, driven by weakness in both Brazil, where the deterioration of the fiscal situation has dragged on the currency and in Mexico, where the judicial reforms in the country have undermined investor confidence.

Following good relative outperformance in 2023, in 2024 the Fund again outperformed the benchmark. For year overall, the Fund was up 10.9% against the benchmark index up 7.5%.

The best performers in the portfolio were those with exposure to the AI theme, notably Broadcom, TSMC and Hon Hai. Following the China stimulus measures which included easing monetary policy, the Chinese banks were also among the best performers, benefitting from the improved environment.

On the weaker side, the detractors in the portfolio were mainly due to idiosyncratic, or individual company-specific reasons, although holdings in Latin America also suffered from currency weakness. Among the weaker stocks towards the end of the year were those most exposed to global trade, following Trump's victory in the US presidential election.

Activity

Portfolio activity in 2024 was slightly above recent years, as we added four new positions to the Fund. Three positions were sold from the Fund during the year, restoring the number of holdings in the portfolio to 36.

The effect of the switches during the year was to increase exposure to Consumer Staples by two positions (2.75% at neutral weight) and to decrease exposure to Financials by one position.

Geographic exposures shifted marginally over the course of the year. The effect of the switches during the year was to increase exposure to China, Taiwan and Mexico by one position each and reduce exposure to Korea, South Africa and Colombia by one position each.

Portfolio positioning

The Fund is significantly overweight in Consumer Staples, as well as the Consumer Discretionary, Health Care, Information Technology and Financials sectors. The Fund has no holdings in the materials, energy, utilities or real estate sectors, and is also underweight communication services and industrials.

Excluding the positions listed in developed markets, the Fund is most overweight China, Brazil, Mexico and Taiwan. The Fund is most underweight India, South Korea and Saudi Arabia.

Outlook

Our overriding comment is that our outlook for global emerging markets contends with many diverse economies – all with their own strengths and challenges. Nevertheless, we think the Fund's focus on quality, dividend-paying companies at attractive valuations will be supportive of long-term returns to shareholders.

Following the outcome of the US election in November, we remain focused on the impact of a Trump presidency on emerging markets, with the direct effects likely to be centered around the US-China relationship and the policy towards China, and also the trading relationship between the US and Mexico.

On China, the stimulus measures that we saw announced in 2024 are likely to continue to have a positive effect, and the direction of travel in terms of further stimulus seems almost inevitable. We sense that more details will be made clear once policymakers have had a chance to gauge the future US-China relationship under Trump.

This time around, China has had time to adjust and adapt to a more uncertain environment in trade relations. One area we will continue to watch is expansion of production capacity overseas, which is particularly relevant in the electric vehicle industry, where China has rapidly developed cars of a quality that can rival western manufacturers at lower prices.

Within China, we think that low valuations provide opportunities to invest in quality businesses – those that have a track record of generating strong returns on capital, persistently overtime.

India's stock market has attracted higher stock valuations, although there are early signs that the economy has started to lose steam, which could cause valuations to correct downwards. Our value discipline helps to ensure that we will not overpay for anticipated future growth, which has meant we have until recently found relatively few opportunities to invest in India – although this could start to change.

In Latin America, the outlook in Brazil is impacted by the fiscal situation there, and the impact begin felt though the weaker currency. The Fund's holdings in Brazil have mainly domestic exposure, so the impact is felt mostly at the stock return level. We are hopeful that the market reaction will prompt a reworking of plans to curb spending. And our holdings listed in Mexico have diversified consumer exposure across Latin America, and so are relatively well-insulated from the cross-border trade that is likely to be the subject of any future tariffs by the US.

Given the multiple uncertainties that we face at this juncture, and the ability for multiple different scenarios to unfold, we believe that a focus on individual companies and their ability to sustain strong operating and financial results is now more important than ever.

The emphasis we place on the underlying quality of a business, earning high returns on capital and generating cash, provides the underpinning for rewarding shareholders with dividends while seeking to compound their earnings over the long term. It is this combination, embedded in an equally-weighted portfolio, that we believe works particularly well in an emerging market context, and provides investors with access to a disciplined strategy with which they can navigate an uncertain environment.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Best of Asia Fund (the "Fund")

Performance summary in US Dollars: Class Y compared with MSCI AC Asia Pacific ex Japan Net Return Index

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	13.3%	-2.7%	4.1%	28.8%	2.8%	-23.7%	6.6%	13.3%
Index	10.2%	-0.8%	3.0%	22.4%	-2.9%	-17.5%	7.4%	10.2%

Review

In 2024, the Fund rose 13.3% compared to the MSCI AC Asia Pacific ex Japan Net Total Return Index which rose 10.2%.

Regional market leaders over the year were Taiwan, Singapore, Malaysia, China and India. The weakest markets were Korea and Indonesia. The drivers behind each of these captured what we see as having been key themes behind equity markets. Taiwan's market is dominated by the technology sector, and particularly by Taiwan Semiconductor Manufacturing Co (TSMC) which is a major beneficiary of spending on Artificial intelligence (AI) computing equipment. However, the differing fortunes of AI-related technology and those exposed to consumer electronics have been marked. Demand growth for smartphones and personal computers has been tepid to which the significant under-performance of Samsung Electronics, which dominates the Korean market, is partly attributable.

The performance of Singapore and Malaysia were led by banks and, in Malaysia's case, by utilities both of which are sensitive to interest rates. Declining US interest rates have been a significant story this year and the federal reserve delivered on that in September with the Fed Funds rate ending 2024 1% lower than the start at 4.5%.

Asian Markets' Performance in USD

Source: Bloomberg. MSCI country indices net returns in USD as of 31 December 2024

The most significant regional event was the sudden policy turn executed by China at the end of September. The domestic economic slowdown became more pronounced in 2024 with diminished local government participation in municipal and city-level business activity due to lack of funds, being a big part of that. Central government policy has since become more supportive of near-term growth but an unwillingness to risk a consumer blowout, similar to 2009, has seen the adoption of a cautious approach which has disappointed some. Nevertheless, for the first time in three years, China has outperformed and for once, India has been left a little in the shade. Recent data point to incremental improvement in domestic conditions and it appears the government is ready to step up consumer support further.

The main contributors to outperformance this year came from the Consumer Staples, Financials and Technology sectors. The decisions to hold nothing in Energy, Materials and Real estate also contributed positively to outperformance. Detractors from relative performance came from Communication Services, Healthcare and Industrials. Digging a little deeper, the consumer staples sector as a whole declines last year but our single holding in Inner Mongolia Yili outperformed both sector and market. Our financials exposure consists of China Merchants Bank and Ping An Insurance in China and DBS in Singapore, all of which had a very strong year. In Technology, as discussed above, AI-related stocks including Broadcom, Elite Material and TSMC performed well; consumer electronic names such as Largan Precision (phone camera lenses) and Venture Corp, a contract manufacturer, did not.

Detractors from performance within Communication Services came from Chinese internet names such as Autohome, a car dealer platform, and Baidu, a Chinese search engine and advertising business. NetEase, a Chinese video game business also underperformed, having a weaker year following a very strong 2023. In Health care, we had a disappointment from China Medical System which reported poor results following price cuts imposed on some of its big selling drugs, just off patent, as part of China's efforts to bring down health costs. The impact was reflected immediately in the share price and given our positive view of growth from upcoming new formulations we chose to add to the position. The Industrials position was led lower by Wuxi Lead intelligent, a Chinese manufacturer of battery-making equipment which has been impacted by slower demand growth for Electric Vehicles.

Activity

There were no changes to the portfolio during the year.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Best of Asia Fund (the "Fund") (continued)

Portfolio Positioning

The Fund's major exposure is to China, accounting for 41% of the Fund. The other main exposures are to Taiwan and India, accounting for 16% and 11% respectively. As a reminder, our mandate allows us to hold companies not listed in Asia provided at least 50% of revenues come from the region, hence our 10% allocation to the US.

Fund allocation vs MSCI AC Asia Pacific ex Japan Index

Sources: Guinness Global Investors, MSCI. Data as of 31 December 2024

The Chinese exposure reflects our views on the long-term structural growth that we see across diverse sectors. Our stocks here continue to be driven by long-term structural growth themes we have identified in China, giving a wider selection of names than the typically benchmark-dominating e-commerce and technology companies.

Outlook

Our focuses in 2025 are broadly a continuation of 2024; China recovery, US policy, inflation and technology spend. We do not expect any dramatic moves from the Chinese government. Instead, we believe they will continue to ease monetary policy by recapitalising banks and, more interestingly, by recapitalising local authorities.

We expect US policy, both foreign and domestic, to introduce greater volatility to equity markets. The operating environment will become more uncertain especially with respect to global trade. US dollar interest rates will also be an important factor, primarily affecting valuations. The downward trajectory appears to be elongated as core inflation remains stickier, even if the Federal Reserve Open Markets Committee (FOMC) were to place greater emphasis on a different, market-based, assessment of inflation.

China's domestic economic path also remains an important variable. Policy changes were announced in response, we think, to the increased likelihood that without it the 2024 economic growth target might not be achieved. Policy changes have happened and consumer-supportive moves like the popular trade-in programme have been extended; but the overall approach has been measured, and confidence remains fragile.

Based on consensus estimates for the three-year period 2024 to 2026, portfolio earnings are expected to grow 13.2% per annum versus 13.5% per annum for the market. The Fund's 2024 price/earnings (P/E) ratio of 15.1x values it at a 2% premium to the market's 14.8x.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Performance

Performance summary in US Dollars: Class Y compared with MSCI World Midcap Net Return Index

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	3.9%	-3.5%	-	-	26.7%	-25.7%	16.4%	3.9%
Index	10.7%	1.1%	7.1%	15.7%	17.6%	-19.1%	25.5%	10.7%

Source: FE Analytics (data as at 31 December 2024)

Over 2024, the Fund returned +3.9% (in USD) whilst the MSCI World Midcap Index returned +10.7%. The Fund therefore underperformed the Index by 6.8% over the year.

Since launch, the Fund has returned +3.9% (in USD) whilst the MSCI World Midcap Index has returned +5.4%. The Fund has therefore underperformed the Index by 1.5% since launch.

Source: Financial Express, as of 31 December 2024

Broadly, when markets rallied, the Fund outperformed; when markets were weak, it tended to lag. However, the most notable deviation occurred in Q4 2024 due to stock specific reasons.

Performance breakdown in 2024:

- First Half of the Year:** Quality growth stocks outperformed, while speculative growth significantly underperformed. During this period, the Fund outperformed the MSCI World Mid Cap Index by approximately 6.5% (USD), with our overweight position in the semiconductor industry contributing positively from both an asset allocation and stock selection perspective.
- Q3 Rotation:** Markets shifted considerably, favouring speculative growth and value stocks over quality growth. Sectors that had been the weakest in H1 - Utilities, Real Estate, Materials, and Consumer Staples - led the market, while the semiconductor industry was the worst performer. Given the Fund's emphasis on high-quality businesses and overweight positions in IT and semiconductors, it underperformed the benchmark during this phase.
- Q4 Challenges:** Stock-specific factors weighed heavily on performance, contributing to the Fund's overall underperformance for the year.
 - Earnings:** A few holdings reported weaker-than-expected earnings, triggering sharp market reactions during October and November. Following a reassessment of these positions, we remain confident in their long-term prospects and have rebalanced where appropriate, taking advantage of lower valuations.
 - Election-Driven Selloff:** Trump's early November election victory triggered a sharp decline in sustainability-linked stocks, including our holding in Enphase, which fell ~33% (USD) in the days following the election. Despite this, our long-term investment thesis for the solar industry - and Enphase in particular - remains intact, given its asset-light model and resilient margins (unlike close peer SolarEdge). We used this period to rebalance our underweight position, and while the stock recovered roughly half its losses by year-end, it remained a relative drag on performance.
 - Semiconductor Volatility:** Monolithic Power Systems declined 25% in November after a report suggested its allocation to Nvidia's Blackwell GPUs was "at risk." Morningstar later stated they could not verify the claim, suggesting the selloff may have been excessive. We remain comfortable with the position, which has been one of the Fund's strongest performers since its initiation in 2023 and will look to upcoming earnings reports for further clarity.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Sustainable Global Equity Fund (the "Fund") (continued)

Market review

The equity market continued in its strength with the MSCI World recording 19% (USD) returns off the back of 24% in 2023. However, the year saw varying market drivers throughout, from shifts in interest rate expectations, the impact of the US Election, and recessionary fears. Below, we divide the year into 6 distinct periods of varying length characterised by their drivers:

In 2024, the MSCI World Index outperformed by equally-weighted index by the widest margin in more than 25 years.

Source: Bloomberg, as of 31 December 2024

The top 5 contributors (Nvidia, Apple, Amazon, Alphabet, and Broadcom), made up 43% of the MSCI World's 19% total return in 2024 – the most concentrated it has been in at least 15 years. Within this, Nvidia recorded the largest individual contribution by any one stock in a year with 18% of the Indices' return driven by Nvidia alone!

The main event that moved markets over the fourth quarter of 2024 was the re-election of Donal Trump to the White House. 8 years on from winning the 2016 presidential Election, Trump will be sworn back in as the 47th US President in January 2025. Whilst his policies are yet to be confirmed, investors on the one hand have a fairly good idea of what to expect from the upcoming term (tariffs, protectionism, lower taxes etc.) and yet, there will almost certainly be plenty of surprises on the way. The initial market reaction was positive. In part, this was down to the result: either candidate winning with a clear majority may well have been taken as a positive given a more stable political and legislative environment. However, there is also a broader consensus that Trump's proposed policies will be good for US equities with lower taxes likely to increase corporate earnings and a more relaxed regulatory regime, alongside wider fiscal stimulatory measures, seen as beneficial for growth. However, the year ended on a more pessimistic note for equities given the final 2024 Fed meeting in December, where Chair Jerome Powell struck a markedly hawkish tone. Whilst markets had been expecting further accommodative Fed policy going into 2025, stronger economic data and hawkish remarks from Powell (citing higher inflation forecasts) caused investors to reprice the number of rate cuts in 2025. As a result, sentiment turned more bearish and equities retracted.

Over Q4, Financials outperformed, led by the prospect of financial deregulation & higher M&A volumes (given the incoming Trump administration) as well as potentially higher interest rates (given changing Fed cut expectations). The Consumer Discretionary sector also notched gains (+8.8% in USD) led overwhelmingly by Amazon and Tesla, the latter up over +54% (USD) in Q4, with most of the gains coming post-election as Elon Musk's increasingly close ties with the incoming administration and the expected tailwind to the autos industry of self-driving deregulation supported the stock. The Mag7 continued their strong momentum and saw further gains as the IT sector generally outperformed over this period. As outlined above, hopes that a more accommodative FTC commissioner would soon be sworn in and would allow a return to M&A (which has seen a freeze under the Biden administration) particularly benefitted the technology sector.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Sustainable Global Equity Fund (the "Fund") (continued)

Market review (continued)

From a stylistic perspective, Growth outperformed Value by ~8% (USD) over the quarter, given that higher beta and lower quality areas of the market rallied the most. On that note, Speculative Growth (as shown by the Goldman Sachs Unprofitable Tech Index) rallied ~7% (USD). Additionally, from a size perspective, Small- and Mid- cap generally outperformed (as US tax policies and onshoring are predicted to disproportionately benefit the more domestically exposed smaller players) however, as noted, the Mag7 continued to perform well.

Activity

Over the year, we sold two positions in Q3, KLA Corp and Steris, and initiated two new positions, Advanced Drainage Solutions and Enphase.

Portfolio Positioning

Looking at the Fund's exposure based on GICS sectors versus the MSCI World Mid Cap Index, the Fund continues to have no exposure to highly regulated and commoditised areas of Real Estate, Energy, Materials, and Utilities. We continue to hold the majority of Fund holdings within the IT (40%), Industrial (29%), Health Care (27%), and Financial (3%) sectors. This is not a conscience view of the select sectors' outlooks but rather a bottom-up consequence of 1) our focus on quality, 2) our emphasis on mid-cap growth businesses, and 3) our search for companies with sustainable products and services.

On a regional basis, North America continues to be the Fund's largest exposure (66%), followed by Europe (29%) and Asia Pacific (3%). The Fund has an in-line exposure to North America, whilst having a relative underweight to Asia-Pacific, which is offset by its overweight exposure to Europe.

Outlook

Despite market volatility in 2024, the Fund's focus on quality growth remained well-positioned relative to speculative growth, which has consistently underperformed since the Fund's launch in late 2020. Looking ahead, we expect this trend to persist.

- **Quality Remains Key:** We believe interest rates are unlikely to return to ultra-low levels, and global economic growth is expected to remain challenging. As such, businesses with strong balance sheets—those not reliant on excessive debt for growth—and companies benefiting from structural growth drivers are likely to be best positioned.
- **Mid-Cap Opportunity:** The Fund's mid-cap focus has faced challenges in recent years as markets have been dominated by a small number of large-cap names, resulting in heightened market concentration. Despite this, the Fund has performed well, particularly given that many peers and broader market participants focus on large-cap stocks, often holding the same names. We believe this presents a compelling opportunity for investors to diversify into the often-overlooked mid-cap space—where companies combine the resilience of established businesses with the dynamism of growth-oriented firms.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness China RMB Income Fund (the "Fund")

Performance summary in US Dollars: Class Y

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	-0.6%	-	-	-	-	-	-	-0.6%

The Fund's USD Y class fell -0.6% in 2024 but rose 2.5% in RMB (Chinese Yuan) terms. The largest contributors to performance came from the China government bonds maturing in 2028 and US dollar bonds, China Cinda and QNB, maturing in 2025.

Review

The year began with China's economy facing significant headwinds, as deflationary concerns took centre stage. January's CPI reading of -0.8%yoy rattled markets, prompting the People's Bank of China (PBoC) to implement a larger-than-expected 50bps RRR cut. Early stress was evident in the bond market, with the 30-year China Onshore bond yield reaching unprecedented lows below 2.5% in February.

China Inflation Rate

Source: Bloomberg

Economic green shoots emerged in March, with improving industrial production and the official manufacturing PMI returning to expansion at 50.8. However, the second quarter presented a mixed picture, highlighting an uneven recovery between state-owned and private enterprises. Consumer spending showed resilience, though industrial output and fixed asset investment lagged expectations.

The property sector remained challenging through mid-year, prompting innovative responses including ultra-long sovereign bond issuances and local government initiatives to convert unsold properties into affordable housing. A significant policy shift occurred in July when the PBoC cut one-year policy loans by 20bps to 2.3%, signalling stronger support for growth.

September marked a turning point as authorities unveiled a comprehensive stimulus package that resonated with markets. The Politburo meeting demonstrated renewed commitment to growth targets, while explicitly recognising capital markets' role in economic recovery. The final quarter saw intensified policy coordination, though new challenges emerged as the renminbi faced pressure following Trump's US election victory and widening US-China interest rate differentials.

The yield on the 2-year benchmark China Government closed 54bps lower, at 1.64%. Against the euro the onshore and offshore renminbi currencies returned +7.20% and +6.49%, respectively. The currencies returned +0.50% and -0.16%, respectively against the dollar. The A1 (WARF) rated portfolio yields 2.35% and has a duration of 1.34 years.

Activity

During February the Hong Kong Mortgage Corp 2.7% 2024s bond matured, the proceeds were used to add a HK Mortgage 2.98% 2026 position. Export-Import Bank of Korea 2.8% 2024s matured on the final day of the month; we reinvested proceeds from the Export-Import Bank of Korea 2.8% 2024s maturity into a China Government 2.52% 2028 bond in March. The KfW 2.7% 2024 bond also matured, we added the KfW 2.9% 2026s, in March. The China Government 4% 2024s and 3.03% 2024s matured in May and June, respectively. The proceeds of these were used to add to the 2.2% 2025 and 2.55% 2025 sovereign issues, and a new holding in 2.3% 2026s.

In July we reinvested funds received from the maturity of the China 3.03% 2024 bond into the China 2.3% 2026s. In November the Agricultural Development Bank 3.4% 2024 and the China Government 3.38% 2024 bonds matured. We reinvested in China Government 3.38% 2026 and Export-Import Bank of China 4.15% 2027.

Portfolio Positioning

Government-backed bonds account for 77% of the portfolio, of which 70% are China government-backed and 7% is German-backed. 19% is held in investment grade corporate bonds issued by financial institutions and the balance is held in Yuan cash. The A1 (WARF) rated portfolio yields 2.35% and has a duration of 1.34 years.

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness China RMB Income Fund (the "Fund") (continued)

Outlook

China's economy shows promising signs of renewed momentum for 2025. Whilst markets await further policy specifics, several positive catalysts are emerging across key sectors. Of course, we remain cognisant of clear challenges.

The property sector appears poised for stabilisation after a prolonged adjustment, with construction activity likely to find its footing at sustainable levels. Infrastructure investment should see meaningful expansion, supported by an ambitious fiscal programme including increased treasury bond issuance and a wider 4% deficit target, which should help drive growth.

Government spending is set to provide fresh impetus, benefiting from lower interest rates and a more supportive fiscal stance. The administration's heightened focus on boosting household consumption could bear fruit through expanded subsidy programmes and initiatives to stimulate durable goods purchases, particularly in the automotive and appliance sectors.

On the trade front, China's robust export machine continues to demonstrate resilience, maintaining healthy trade surpluses despite global headwinds. The potential for currency flexibility provides an important buffer against external pressures.

With policymakers demonstrating clear commitment to growth and multiple sectors showing signs of improvement, China appears well-positioned to maintain steady economic momentum through 2025, supported by its substantial policy toolkit and improving domestic dynamics.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness China A Share Fund (the "Fund")

Performance summary in US Dollars: Class Y compared with MSCI China A Onshore Index

	1 year	Annualised		Calendar years				
		3 years	5 years	2020	2021	2022	2023	2024
Fund	-2.7%	-	-	-	-	-	-	-2.7%
Index	11.6%	-	-	-	-	-	-	11.6%

In 2024, the Fund fell by 2.7% while the MSCI China A Onshore Index rose 11.6%. Therefore the Fund underperformed the MSCI China A Onshore Index by 14.3%.

The market saw significant fluctuations in 2024 due to a mix of weak macroeconomic data, shifting government policies, and global factors. A steep drop in January reflected disappointing December data and limited stimulus, with retail investors following state-backed funds into large-cap stocks. February saw an rally as government support expanded to small- and mid-cap stocks, alongside restrictions on short selling. Stabilisation followed in March, while in April and early May markets rebounded before weak summer data drove declines. September marked a turning point as the Federal Reserve's rate cut and unexpected Chinese stimulus buoyed markets, including a larger than expected PBOC rate cut and a significant liquidity injection. Efforts to stimulate property and consumer spending saw limited success, with mortgage rate cuts and subsidies having modest economic effects. In November, a \$1.4 trillion debt swap aimed to alleviate local government budget pressures caused by falling land sales revenue and high interest burdens on off-balance-sheet debt. While reducing local governments' costs, the savings were likely offset by lower bank earnings, yielding minimal net economic growth.

Areas which helped the Fund's performance were:

- Stock selection in the Health Care sector, driven by Amoy Diagnostics.
- Within the Consumer Staples sector, a combination of the slight underweight to the sector and stock selection, driven by Inner Mongolia Yili, Kweichow Moutai and Luzhou Laojiao (neither held) and Chongqing Fuling Zhacai.

Areas which detracted from the Fund's relative performance were:

- Underweight to Financials, and more specifically the underweight to the large state owned enterprise (SOE) banks. The Fund does not hold any of the large SOE banks which have been significant outperformers as a value play. We do not own these large SOE banks as they do not give exposure to the long-term structural growth themes in China.
- Stock selection in the Materials sector, driven by Shandong Sinocera Functional Material, Shenzhen Capchem, Shanghai Putailai and Zijing Mining (not held).
- Stock selection in the Industrials sector, driven by CATL (not held), Wuxi Lead Intelligent Equipment and Kuang-Chi Technologies (not held).
- The underweight to the Utilities and Energy sectors, where the Fund has no exposure.
- Additionally, we point out the Fund's overweight to growth stocks and small-and -mid caps worked against it. As discussed earlier:
 - The MSCI China Growth Index rose by 6.0% while the corresponding Value Index rose by 24.5%. The Fund is overweight to growth stocks.
 - The small cap index rose by 2.8% and the mid cap index rose by 7.4%. Meanwhile, the large cap index rose by 18.2%. The Fund is overweight to small- and mid-cap stocks.

Portfolio Position

On a sector basis, the Fund's largest exposures are to the Industrials, Information Technology and Consumer Discretionary sectors. Relative to the MSCI China A Onshore Index, the Fund is overweight in the Consumer Discretionary and Industrials sectors. The Fund is underweight in the Financials sector.

(Data as of 31 December 2024, source: Guinness Global Investors calculations, Bloomberg)

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness China A Share Fund (the "Fund")

Outlook

The signals from the government indicate that more support for the economy is forthcoming. In early December the Politburo further strengthened its wording on economic policy, as "more proactive" fiscal policy and "moderately loose" monetary policy was called for. These phrases are important as "more proactive" fiscal policy was last mentioned soon after the covid outbreak started, and "moderately loose" monetary policy was last used after the financial crisis.

The Minister of Finance has said China will expand the number of consumer goods that are eligible for the trade in subsidy, as well as the total value of subsidies provided. Already in January, the scope of the trade in program was expanded to include dishwashers, rice cookers, smartphones, tablets and smart watches. Funding for the trade-in program was increased from CNY 30bn (\$4bn) in 2024 to CNY 81bn (\$11bn) in 2025.

A Reuters report says China plans to issue CNY 3 trillion (\$411 bn) in special government bonds, far higher than the CNY 1 trn (\$138bn) issued in 2024. The report argues ~CNY 1.3 trillion is to be used to expand the consumer trade in programs (from the current level of CNY 150bn) and to support unspecified construction projects. More than CNY 1 trillion is to be spent on supporting new pillar industries, leaving ~CNY 700 billion to recapitalise the large SOE banks. The headline budget deficit is also reportedly to be increased from 3% of GDP in 2024 to 4% of GDP in 2025. Bloomberg estimate that taking into account both plans, the aggregate fiscal stimulus would be worth 2.6% of China's GDP, which we view as substantial.

Of course, the new Trump administration coming into power in January is another factor to watch and we believe it is likely the Chinese government is waiting to see how tariffs play out, before they move decisively on policy. China now has a deeper set of tools it can use to retaliate, compared to Trump's first term. From China's perspective, imposing tariffs across the board on imports from the US is not viewed as highly effective. Instead, restricting exports in goods where China dominates the supply chain in critical materials is considered more useful. For example, in December exports of gallium, germanium and antimony to the US were restricted, on the basis of their potential for use in military and civilian applications. This "dual use" argument mirrors the restrictions the US has imposed on Chinese companies, where we have just seen Tencent and CATL have been designated by the Pentagon as companies with links to the Chinese military. There are also other ways the Chinese can apply pressure – for example, in December China started an anti-trust probe on Nvidia.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Multi-Asset Balanced Fund (the "Fund")

Performance summary in £ Sterling: Class Y

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	11.7%	4.7%	5.8%	2.0%	13.1%	-5.4%	8.6%	11.7%

Background

The Fund, which launched 28 December 2018, is designed to provide investors with long-term capital appreciation. It provides exposure to a range of asset classes, focusing on equities, fixed income and property.

The underlying funds invested in are mainly passive funds, but there is also some exposure to active products, particularly in the absolute return sector.

RBC Brewin Dolphin Limited, a leading UK wealth manager, are appointed as investment advisor to the Fund, providing advice on asset allocation and the choice of underlying funds. This advice is reviewed by the Guinness investment team, who are ultimately responsible for the make-up of the portfolios.

The Fund, which can invest up to 85% in equities, aims to outperform the IA 40-85% Mixed Investment benchmark over the medium term.

In late January 2021, the Fund was repositioned from having a relatively high UK exposure to greater international exposure.

Review

Strong economic momentum in the first half of 2024 slowed in the second and inflation trended downward, allowing the Federal Reserve to start cutting interest rates. Despite headline inflation moderating, the service component remained stickier than expected, leading to a slower decline in the headline rate than initially hoped. As a result, the US rate cutting cycle not only started later than initially forecast, but also resulted in fewer cuts – just 75bps of cuts over 2024 versus the 150-175bps of easing expected at the start of the year.

Other western central banks also deemed it appropriate to cut rates. The European Central Bank lowered its main deposit rate from 4.0% to 3.0% from June to December while the Bank of England embarked on its own easing cycle with 25 bp cuts at its August and November meetings. The Bank of Japan was a notable exception, raising rates in both March and July to 0.25%, ending eight years of negative interest rates and surprising investors across the globe.

The reduction of rates in the West, combined with optimism over the growth of Artificial Intelligence (AI) drove equity markets higher in 2024 with the MSCI World produced a total return of 18.7%. Growth outperformed value, large caps outperformed small caps and the US outperformed regional markets.

In 2024, the US was the best performing region for equities, with strong performance from the "Magnificent 7" being responsible for more than half the S&P 500's gains in the year. Chinese equities also performed well, benefitting from the announcement of new stimulus measures.

While equities rallied, fixed income generally lagged with Global investment grade bonds falling 1.7% in the period. Commodities were quieter, with Brent crude prices continuing to average around \$80 per barrel, though gold rallied over 25%, reaching \$2,600 per ounce by the end of the year.

Against this backdrop, the Fund (Y class) returned 9.6% in USD terms, outperforming the IA Mixed Investment 40-85% Shares benchmark (+7.0%) by +2.6%.

Activity

Within equities, the Fund saw a new allocation to the HSBC Global Semiconductor ETF. The picks and shovels of the AI boom are semiconductors. If AI makes computers intelligent then their reliance on semiconductors is unquestioned. With digital functionality creeping into an increasing array of goods, the growing demand for semiconductors becomes structurally significant, hence an allocation to this specific theme.

Portfolio positioning

In 2024, the Fund increased its allocation to Equities (+2.0%) and Alternatives (+0.5%), funded by selling down our exposure to Fixed Income (-0.5%) and Cash (-2.0%).

- Within Equities, we increased our exposure to the US and Chinese equities, while reducing exposure to the UK, Europe, Japan and Emerging markets.
- The reduction in exposure to Fixed Income was achieved by reducing our weighting to Corporate bonds, offset by an increase in exposure to Government and Inflation-Linked bonds.
- Within Alternatives, we increased our exposure to Property and Gold, while reducing exposure to Absolute Return.

These changes are summarised in the table below:

31-Dec-23 vs 31-Dec-24	Balanced Fund
Equities	+2.00%
UK equities	-0.20%
US equities	+5.40%
European equities	-3.20%
Japanese equities	-0.20%
Pacific (ex Japan) equities	+0.40%
EM equities	-0.20%
Fixed income	-0.50%
Government Bonds	+1.00%
Corporate Bonds	-2.00%
Inflation linked bonds	+0.50%
Absolute Return	-1.00%
Property	+0.50%
Gold	+1.00%
Cash	-2.00%

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Multi-Asset Balanced Fund (the "Fund") (continued)

Outlook

Following Donald Trump's election success, US government debt to GDP is very likely going to continue to rise as tariffs and reduced environmental spending are unlikely to be able to offset planned tax cuts and spending increases. However, any election promises could be watered down by congress. US jobs remain healthy, though Trump's tough stance on immigration could act as a headwind to GDP growth. Inflation remains a problem and progress may be hampered by tariffs and tax cuts, although weakening shelter inflation and a strong dollar have been positive developments. Whilst the Fed cut rates in December, future cuts and market expectations have been tempered and will be data dependent.

Emerging markets and Asia equities were impacted by weakness in China as the market digested news of the US election. Looking to 2025, the region is expected to benefit from announced Chinese stimulus measures which exceeded expectations, but until all the actions are implemented in full, the impact will be difficult to assess.

In Europe, given falling inflation pressures, growth headwinds and policy rates remaining significantly above neutral, we see ample scope for the European Central Bank to cut rates further albeit at a cautious, measured pace. Germany looks to be transitioning towards a more business friendly government following the federal election. Odds have risen that Germany's debt brake will be loosened and the economy receives a moderate boost from greater fiscal stimulus. Also hope remains that US/EU trade relations don't deteriorate as badly as some investors fear. Meanwhile in France, the EU's second largest economy, fiscal policy looks set to tighten rather than loosen.

In the UK, the chancellor announced a big increase in government spending, partly financed by higher taxes. The size of the borrowing announced was higher than expected, which has put upward pressure on UK government bond yields. The key question going forwards is whether this budget will help boost UK growth with the answer depending on how effectively new spending is deployed. The BoE recently kept rates on hold but were surprisingly dovish. UK wage growth and shelter inflation should begin to moderate, which should allow further rate cuts. Nevertheless, after missing its inflation target for so long, the BoE will likely want firm evidence inflation is slowing before cutting further.

With the environment described, the Fund has adopted the following positioning:

- Underweight cash. Although cash continues to offer a decent yield, we are underweight and feel there are better opportunities in other asset classes. We see continued scope for equity market gains and gold to move higher.
- Equal weight bonds. Expectations for central bank rate cuts have been pared back. In light of continued inflation challenges, the expectations appear fair, in our view. Inflation should eventually moderate further on the back of labour market coming into better balance. Meanwhile, sentiment towards bonds is bearish. Against this backdrop we remain overweight government bonds and underweight corporate bonds where spreads are very tight, leaving us neutral to fixed income overall.
- Overweight global equities. We expect the global economy to continue to expand, which is consistent with corporate profits going up. We also believe there is the potential for AI themes to drive both strong economy wide productivity and solid profit gains among the pick and shovel players. Despite strong momentum, sentiment is already bullish and we see limited room for cyclical economic growth, suggesting that it may not be a great time to raise our exposure further. As such, we remain modestly overweight.
- Underweight alternatives. Gold has corrected from overbought territory following the US election. Looking ahead, there are both cyclical and structural factors supporting gold and it acts as a good hedge against several risks. We maintain a modest overweight. We hold a neutral position to property where fundamentals are challenging in the office space, but the backdrop is notably brighter than other REIT sectors. We are underweight absolute return, leaving the portfolios underweight Alternatives as a whole.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Investment Manager's report (continued)

For the financial year ended 31 December 2024

Guinness Multi-Asset Growth Fund (the "Fund")

Performance

Performance summary in £ Sterling: Class Y

	Annualised			Calendar years				
	1 year	3 years	5 years	2020	2021	2022	2023	2024
Fund	13.5%	5.9%	6.8%	1.5%	15.5%	-5.4%	10.5%	13.5%

Background

The Fund, which launched 28 December 2018, is designed to provide investors with long-term capital appreciation. It provides exposure to a range of asset classes, focusing on equities, fixed income and property.

The underlying funds invested in are mainly passive funds, but there is also some exposure to active products, particularly in the absolute return sector.

RBC Brewin Dolphin Limited, a leading UK wealth manager, are appointed as investment advisor to the Fund, providing advice on asset allocation and the choice of underlying funds. This advice is reviewed by the Guinness investment team, who are ultimately responsible for the make-up of the portfolios.

The Fund, which can invest up to 100% in equities, aims to outperform the IA Flexible Investment benchmark over the medium term.

In late January 2021, the Fund was repositioned from having a relatively high UK exposure to greater international exposure.

Review

Strong economic momentum in the first half of 2024 slowed in the second and inflation trended downward, allowing the Federal Reserve to start cutting interest rates. Despite headline inflation moderating, the service component remained stickier than expected, leading to a slower decline in the headline rate than initially hoped. As a result, the US rate cutting cycle not only started later than initially forecast, but also resulted in fewer cuts – just 75bps of cuts over 2024 versus the 150-175bps of easing expected at the start of the year.

Other western central banks also deemed it appropriate to cut rates. The European Central Bank lowered its main deposit rate from 4.0% to 3.0% from June to December while the Bank of England embarked on its own easing cycle with 25 bp cuts at its August and November meetings. The Bank of Japan was a notable exception, raising rates in both March and July to 0.25%, ending eight years of negative interest rates and surprising investors across the globe.

The reduction of rates in the West, combined with optimism over the growth of Artificial Intelligence (AI) drove equity markets higher in 2024 with the MSCI World produced a total return of 18.7%. Growth outperformed value, large caps outperformed small caps and the US outperformed regional markets.

In 2024, the US was the best performing region for equities, with strong performance from the "Magnificent 7" being responsible for more than half the S&P 500's gains in the year. Chinese equities also performed well, benefitting from the announcement of new stimulus measures.

While equities rallied, fixed income generally lagged with Global investment grade bonds falling 1.7% in the period. Commodities were quieter, with Brent crude prices continuing to average around \$80 per barrel, though gold rallied over 25%, reaching \$2,600 per ounce by the end of the year.

Against this backdrop, the Fund (Y class), returned +11.3% in USD terms over the year, outperforming the IA Flexible Investment benchmark (+7.2%) by +4.1%.

Activity

In February, the Fund established a position in property through the Amundi FTSE EPRA NAREIT Global fund.

Within equities, the Fund also saw a new allocation to the HSBC Global Semiconductor ETF. The picks and shovels of the AI boom are semiconductors. If AI makes computers intelligent then their reliance on semiconductors is unquestioned. With digital functionality creeping into an increasing array of goods, the growing demand for semiconductors becomes structurally significant, hence an allocation to this specific theme.

Portfolio positioning

In 2024, the Fund increased its allocation to Equities (+2.0%) and Alternatives (+1.5%), funded by selling down our exposure to Fixed Income (-0.5%) and Cash (-3.0%).

- Within Equities, we increased our exposure to the US and Chinese equities, while reducing exposure to the UK, Europe, Japan and Emerging markets.
- The reduction in exposure to Fixed Income was achieved by reducing our weighting to Corporate bonds, offset by an increase in exposure to Government and Inflation-Linked bonds.
- Within Alternatives, we added exposure to Property and increased our weighting to Gold.

These changes are summarised in the table below:

31-Dec-23 vs 31-Dec-24	Growth Fund
Equities	+2.00%
UK equities	-0.30%
US equities	+6.00%
European equities	-3.60%

We are underweight absolute return, leaving the portfolios underweight Alternatives as a whole.

On 2 April 2025, the President of the United States of America announced widespread tariffs on global trading partners. The effects of these tariffs are yet to be seen, as are the possible counter measures to be imposed by trading partners. The Board of Directors will monitor the impact of these tariffs as they pertain to the Fund.

Guinness Asset Management Limited

Report of the Depositary to the Shareholders

For the period from 1 January 2024 to 31 December 2024

We have enquired into the conduct of Guinness Asset Management Funds plc (the "Company") for the period 1 January to 31 December 2024, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in the Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations; and
- (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

Brown Brothers Harriman Trustee Services (Ireland) Limited

Date: 24 April 2025

Independent Auditors' report to the shareholders of Guinness Asset Management Funds plc

For the financial year ended 31 December 2024

Report on the audit of the financial statements

Opinion on the financial statements of Guinness Asset Management Funds PLC ("the company")

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2024 and of the loss for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets attributable to holders of Redeemable Participating Shares;
- the Statement of Cash Flows;
- the Schedule of Investments; and
- the related notes 1 to 26, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Independent Auditors' report to the shareholders of Guinness Asset Management Funds plc

For the financial year ended 31 December 2024

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Independent Auditors' report to the shareholders of Guinness Asset Management Funds plc

For the financial year ended 31 December 2024

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements.
- In our opinion, those parts of the directors' report specified for our review, which does not include sustainability reporting when required by Part 28 of the Companies Act 2014, have been prepared in accordance with the Companies Act 2014.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the financial statements

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

1. General information

Guinness Asset Management Funds plc (the "Company") is an open-ended investment company with variable capital and segregated liability between sub-funds, incorporated in Ireland on 12 December 2007 under the Irish Companies Acts and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") with registration number 450670. The Company is organised in the form of an umbrella fund. Each sub-fund has a distinct portfolio of investments. At the reporting date there are fifteen active sub-funds.

2. Material accounting policies

(a) Basis of preparation

The audited financial statements of the Company have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and as adopted by the European Union ("IFRS") and Irish statute comprising the Companies Act 2014, the UCITS Regulations, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) UCITS Regulations 2019 (the "Central Bank Regulations"). The financial statements have been prepared under the historical cost convention, except for financial assets and liabilities classified at fair value through profit or loss that have been measured at fair value. The financial statements have been prepared on a going concern basis.

The preparation of financial statements in accordance with IFRS as adopted by the European Union requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the financial year. Actual results could differ from those estimates and these differences could be material.

(i) Judgements

Information about judgements made in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in note 2 (d), determination of functional currency.

(ii) Assumptions and estimation uncertainties

The determination of what constitutes an active market and what inputs are "observable" requires judgement by the Directors. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the financial year ended 31 December 2024 is included in note 3 (ii).

(b) Standards, interpretations and amendments issued and effective

There are no new standards, amendments to standards and interpretations effective for annual periods beginning on or after 1 January 2024, which would have a material impact on the financial statements of the Company.

(c) Standards, interpretations and amendments issued but not yet effective

A number of new standards, amendments to standards and interpretations were issued but not effective and have not been early adopted in preparing these financial statements. The Company assessment of the impact of these new standards and amendments is set out below:

(i) Lack of Exchangeability – Amendments to IAS 21

The IASB has amended IAS 21, 'The Effects of Changes in Foreign Exchange Rates', by adding requirements which will help entities to:

- assess whether a currency is exchangeable into another currency, and
- determine the spot exchange rate to use, when exchangeability is lacking.

If an entity has estimated a spot exchange rate because a currency is not exchangeable into another currency, it will have to provide additional information to help users to understand the effects and associated risks, the estimated rates and estimation process used.

The amendments are effective for annual reporting periods beginning on or after 1 January 2025. These amendments are not expected to have a significant impact on the financial statements of the Company.

(ii) Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7

The targeted amendments to IFRS 9 and IFRS 7 are in response to recent questions arising in practice, and to include new requirements not only for financial institutions but also for corporate entities. Among other amendments, the date of recognition and derecognition of some financial assets and liabilities is clarified, with a new exception for some financial liabilities settled through an electronic cash transfer system. The amendments are effective for annual reporting periods beginning on or after 1 January 2026. These amendments are not expected to have a significant impact on the financial statements of the Company.

(iii) IFRS 18 Presentation and Disclosure in Financial Statements

The new standard on presentation and disclosure in financial statements, replaces IAS 1, with a focus on updates to the statement of profit or loss. The key new concepts introduced in IFRS 18 relate to the structure of the statement of profit or loss with defined subtotals, the requirement to determine the most useful structured summary for presenting expenses in the statement of profit or loss, required disclosures in a single note within the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures) and enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general.

The standard is effective for annual reporting periods beginning on or after 1 January 2027. The Company is currently still assessing the effect of the forthcoming standard.

(d) Foreign currency

(i) Functional and presentation currency

The functional and presentation currency of each sub-fund is U.S. Dollar ("USD") with the exception of Guinness Multi-Asset Balanced Fund and Guinness Multi-Asset Growth Fund which both have a functional and presentation currency of British Pound ("GBP") and Guinness China RMB Income Fund and Guinness China A Share Fund which both have a functional and presentation currency of Chinese Yuan Renminbi (Offshore) ("CNH"). The Company has adopted the USD as its presentation currency.

(ii) Foreign currency translation

Monetary assets and liabilities denominated in currencies other than the functional currencies of the sub-funds are translated into the functional currency using exchange rates prevailing at the reporting date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the reporting date exchange rates, of assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income in the year in which they arise.

The foreign exchange adjustment was due to the use of exchange rates at the reporting date to translate sub-funds that have a functional currency that differs to the presentation currency of the Company. The translation of the sub-funds' functional currencies into the presentation currency of the Company is recognised separately within the total Company column through the statement of changes in net assets attributable to holders of redeemable participating shares and through the statement of cash flows. For the financial year ended 31 December 2024, the translation adjustment presented on the statement of changes in net assets was a notional loss of \$3,494,145 (2023: notional loss of \$8,145,007) and on the statement of cash flows was a notional loss of \$135,187 (2023: notional loss of \$314,583); which has no impact on the net asset value ("NAV") of each individual sub-fund.

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

2. Material accounting policies (continued)

(e) Financial assets and liabilities at fair value through profit or loss

(i) Classification

The Company classifies its investments based on the business model in which the financial instruments are managed and its contractual cash flow characteristics. The portfolio of financial instruments is managed, and performance is evaluated on a fair value basis. The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. Derivative contracts that have a positive fair value are presented as assets at fair value through profit or loss. Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss. Consequently, all investments are measured at fair value through profit or loss.

(ii) Recognition

All "regular way" purchases and sales of financial instruments are recognised using trade date accounting, the day that the Company commits to purchase or sell the investment. From this date any gains and losses arising from changes in fair value of the financial instruments are recorded. Regular way purchases, or sales, are purchases and sales of financial instruments that require delivery of the asset within a time frame generally established by regulation or convention in the market place.

At initial recognition financial instruments categorised at fair value through profit or loss are recognised initially at fair value, with transaction costs for such instruments being recognised directly in the statement of comprehensive income.

(iii) Measurement

At initial recognition financial instruments categorised at fair value through profit or loss are recognised initially at their fair value, with transaction costs for such instruments being recognised directly in the statement of comprehensive income.

(iv) Subsequent Measurement

Subsequent to initial recognition, all instruments classified at fair value through profit or loss, are measured at fair value with changes in their fair value recognised in the statement of comprehensive income.

- Investments in listed equity securities are valued at their last traded price.
- Investments in listed debt securities are valued at their last traded price.
- Investments in forward currency contracts are valued at the settlement price as determined by the market.
- Investments in investment funds are valued at their net asset value ("NAV") as calculated by the relevant Administrator.
- Investments in exchange traded funds are valued in accordance with the last traded market price on the exchange on which they are traded.

In the event that any of the assets or liabilities on the relevant valuation day are not listed or dealt on any recognised exchange, such assets will be valued by a competent person selected by the Directors and approved for such purpose by Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depository") with care and in good faith. There were no financial instruments valued using this method at the reporting date, see note 3 (ii) for details (2023: nil).

(v) Derecognition

Financial assets are derecognised when the contractual rights to the cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled or expires.

(vi) Offsetting

The Company only offsets financial assets and liabilities at fair value through profit or loss if the Company has a legally enforceable right to set off the recognised amounts and either intends to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(vii) Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Company measures the fair value of an instrument using the last traded price in an active market for that instrument and at the settlement price as determined by the market for forward currency contracts. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The Company measures instruments quoted in an active market at a last traded price, because this price provides a reasonable approximation of the exit price. If there is no quoted price on an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

(f) Income

Dividend and interest income, arising on the investments, is recognised as income of the Company on an ex-dividend or interest date basis, and interest on deposits of the Company is recognised, on an accrual basis. Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the statement of comprehensive income, and net of any tax credits.

(g) Capital gains tax

Capital gains tax includes capital gains tax withheld on the sale of investments held on Brazilian and/or Indian based equities and a provision for capital gains tax in respect of unrealised gains on such investments.

(h) Securities sold receivable and securities purchases payable

Securities sold receivable represent receivables for securities sold that have been contracted for but not yet settled or delivered on the reporting date. These amounts are recognised at cost and include all transaction costs and commissions due in relation to the trade.

Securities purchased payable represent payables for securities purchased that have been contracted for but not yet settled or delivered at the reporting date.

(i) Subscriptions receivable and redemptions payable

Subscription trades and redemption trades awaiting settlement on the reporting date are reflected as subscriptions receivable and redemptions payable respectively, in the statement of financial position.

(j) Net gain/(loss) on financial assets and liabilities at fair value through profit or loss and foreign exchange

Net gain/(loss) from financial assets and liabilities at fair value through profit or loss includes all realised and unrealised fair value changes and foreign exchange differences. These amounts are recognised at cost and include all transaction costs and commissions due in relation to the trade.

(k) Cash and cash equivalents and bank overdrafts

Cash and cash equivalents in the statement of financial position comprise cash on hand and short-term deposits held at the Depository that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, with original maturities of three months or less. Short term investments that are not held for the purpose of meeting short-term cash commitments and restricted margin accounts are not considered as cash and cash equivalents. Cash and cash equivalents also include cash held in the investor money collection account held at Brown Brothers Harriman Trustee Services (Ireland) Limited and overnight sweeps of cash into accounts with counterparties approved by the Depository. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above. See note 4 for further details of cash balances.

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

2. Material accounting policies (continued)

(l) Expenses

Expenses represent fees paid to Guinness Asset Management Limited (the "Investment Manager" and the "Global Distributor"), recorded on an accrual basis. The Investment Manager will be responsible for paying all other administrative expenses of the Company from its fee. All expenses are recognised in the statement of comprehensive income on an accrual basis.

(m) Redeemable participating shares

All redeemable shares issued by the Company provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the Company's net assets at the redemption date. In accordance with IAS 32 Financial Instruments: Presentation, such instruments give rise to a financial liability for the present value of the redemption amount.

(n) Withholding tax

The Company currently incurs withholding taxes imposed by certain countries on investment income. Such income is recorded gross of withholding taxes in the statement of comprehensive income. Withholding taxes are shown as a separate item in the statement of comprehensive income. This line also includes reclaims of withholding tax received during the financial year.

(o) Transaction costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. Transaction costs are included in the statement of comprehensive income as part of net gain/(loss) on financial assets and financial liabilities at fair value through profit or loss and foreign exchange.

The following costs are included in the transaction costs disclosure in note 9:

- identifiable brokerage charges and commissions; and
- identifiable transaction related taxes and other market charges.

(p) Exchange traded funds

Investments in exchange traded funds are presented as investment funds in the statement of financial position.

(ii) Fair value of financial instruments

IFRS 13 – Fair Value Measurement establishes a fair value hierarchy for inputs used in measuring fair value that classifies investments according to how observable the inputs are. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The Company uses the following hierarchy for classifying and disclosing the fair value of financial instruments by valuation technique:

Level 1 – Inputs reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active; and

Level 3 – Inputs that are not observable.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Observable data is considered to be market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the perceived risk of that instrument by the Investment Manager.

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

3. Financial assets and liabilities at fair value through profit or loss (continued)

(ii) Fair value of financial instruments (continued)

There were no transfers between any levels during the financial year ended 31 December 2024 and 31 December 2023.

The following tables provides an analysis of financial assets and liabilities that are measured at fair value, grouped into levels 1 to 3 at the reporting dates 31 December 2024 and 31 December 2023:

Cash and cash equivalents have been classified at level 1, due to the liquid nature of the asset. Other than cash and cash equivalents and the financial assets and liabilities disclosed in the table above, all other assets and liabilities held by the Company at the reporting dates 31 December 2024 and 31 December 2023 are carried at amortised cost. In the opinion of the Directors the carrying values of these other assets and liabilities are a reasonable approximation of fair value and they have been classified at level 2.

(iii) Financial derivative instruments

The derivative instruments that the Company holds or issues are forward currency contracts. The Company records its derivative activities on a mark-to-market basis.

A forward currency contract involves an obligation to purchase or sell a specific currency at a future date, at a price set at the time the contract is made. Forward currency contracts will be valued by reference to the forward price at which a new forward contract of the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward currency contracts is calculated as the difference between the contract rate and this forward price, and this difference is recognised in the statement of comprehensive income. When a forward currency contract is closed, a realised gain/(loss) is recorded in the statement of comprehensive income equal to the difference between the value at the time the contract was opened and the value at the time it was closed.

Class Y USD distribution	Guinness Global Equity Income Fund	0.99%	0.75%

When the sub-fund net asset value is less than the tier 1 value of \$500 million the fee rate for each share class is the tier 1 fee rate. When the sub-fund size exceeds the tier 1 value of \$500 million the fee rate for each share class is calculated as:

Average fee rate = (tier 1 fee rate x tier 1 value / sub-fund net asset value) + (tier 2 fee rate x (sub-fund net asset value – tier 1 value) / sub-fund net asset value)

For Guinness Multi-Asset Growth Fund and Guinness Multi-Asset Balanced Fund the fee for each share class is payable on the net asset value of the relevant share class at the following rates:

Share Class	Fee Rate
Class C EUR accumulation	Up to 1.80%
Class C EUR hedged accumulation	Up to 1.80%
Class C GBP accumulation	Up to 1.80%
Class C USD accumulation	Up to 1.80%
Class C USD hedged accumulation	Up to 1.80%
Class O EUR accumulation	Up to 0.80%
Class O EUR hedged accumulation	Up to 0.80%
Class O GBP accumulation	Up to 0.80%
Class O USD accumulation	Up to 0.80%
Class O USD hedged accumulation	Up to 0.80%
Class R EUR accumulation	Up to 2.00%
Class R EUR hedged accumulation	Up to 2.00%
Class R GBP accumulation	Up to 2.00%
Class R USD accumulation	Up to 2.00%
Class R USD hedged accumulation	Up to 2.00%
Class Y GBP accumulation	Up to 0.60%

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

5. Management fee (continued)

For Guinness China RMB Income Fund the maximum permitted fee rates for each share class of the sub-fund for the management fee are set out below:

Share Class	Fee Rate
Class F EUR distribution	Up to 0.31%
Class F GBP distribution	Up to 0.31%
Class F USD distribution	Up to 0.31%
Class Y CNH distribution	Up to 0.40%
Class Y EUR distribution	Up to 0.40%
Class Y GBP distribution	Up to 0.40%
Class Y USD distribution	Up to 0.40%
Class Y EUR hedged distribution	Up to 0.40%

The Investment Manager shall be responsible for paying the administrative expenses of each sub-fund, to include establishment costs, fees and expenses payable to the Manager, the Investment Adviser (where applicable), the Custodian, the Administrator, including transfer agency transaction fees, all fees for investment research, Directors fees, any Paying Agent appointed by or on behalf of the Company, and general administrative expenses, which include but are not limited to legal and other professional advisory fees, company secretarial fees, Companies Registration Office filings and statutory fees, regulatory fees, auditing fees, translation and accounting expenses, taxes and governmental expenses applicable to the Fund, costs of preparation, translation, printing and distribution of reports and notices, all marketing material and advertisements and periodic update of the Prospectus, stock exchange listing fees, all expenses in connection with registration, listing and distribution of the Fund and Shares issued or to be issued, all expenses in connection with obtaining and maintaining a credit rating for the Fund or Classes or Shares, expenses of Shareholders meetings, Directors' insurance premia, expenses of the publication and distribution of the Net Asset Value, clerical costs of issue or redemption of Shares, postage, telephone, facsimile and telex expenses and any other expenses in each case together with any applicable value added tax.

Given the fixed nature of the management fees the Investment Manager takes the risk or benefit of any price changes to the cost of the services covered by the management fees and takes the risk of expense levels relating to such services increasing above the management fees as a result of a decrease in net assets. The Shareholders do not take any of this potential risk or benefit.

6. Sub-Investment Manager

For Guinness China RMB Income Fund, the Investment Manager will pay to EPIC Markets (UK) LLP (the "Sub-Investment Manager") a sub-investment manager fee out of the assets of the sub-fund. The sub-investment manager fee will be accrued at each valuation point and is payable monthly in arrears. The maximum permitted fee rates for each share class of the sub-fund for the sub-investment manager, are set out below:

Share Class	Fee Rate
Class F EUR distribution	Up to 0.14%
Class F GBP distribution	Up to 0.14%
Class F USD distribution	Up to 0.14%
Class Y CNH distribution	Up to 0.20%
Class Y EUR distribution	Up to 0.20%
Class Y GBP distribution	Up to 0.20%
Class Y USD distribution	Up to 0.20%
Class Y EUR hedged distribution	Up to 0.20%

7. Global Distributor's fee

Guinness Asset Management Limited (the "Global Distributor") shall be entitled to receive a distribution fee of up to 5% on subscription proceeds in respect of any Class C Shares, Class D Shares, Class O Shares and Class R Shares on each relevant sub-fund. The Global Distributor is also entitled to receive a fee in respect of Class Y Shares on each relevant sub-fund except for Guinness Multi Asset Growth Fund and Guinness Multi Asset Balanced Fund.

The Global Distributor fees relating to the financial year ended 31 December 2024 were \$4,111,994 (31 December 2023: \$4,645,251).

8. Administrative expenses

The below provides details of administrative expenses for the financial year's ended 31 December 2024 and 31 December 2023. The below fees were paid by the Investment Manager from the management fee during the financial year.

(i) Auditors' remuneration

Fees and expenses charged by the Company's statutory Auditor, Deloitte Ireland LLP, in respect of the financial year, entirely relate to the audit of the financial statements of the Company and were €82,500 – exclusive of VAT (2023: €78,750 - exclusive of VAT). Fees charged by the Company's statutory Auditor in relation to VAT services provided amounted to €3,900 – exclusive of VAT (2023: €3,900). There were no other tax compliance fees charged during the financial year (2023: nil). There were no fees and expenses charged in respect of other assurance, tax advisory or non-audit services provided by the statutory Auditor during the financial year (2023: nil).

(ii) Directors' fees

Aggregate directors' fees charged during the financial year ended 31 December 2024 amounted to €140,340 (31 December 2023: €134,168).

(iii) Management and administration fees

Where combined assets for the first eleven sub-funds in the umbrella are greater than €495m, the Manager is entitled to receive out of the assets of the Company a fee as detailed below. The below tiers are increased by €45m for any additional sub-funds.

- For assets up to €495m	10 basis points per annum
- For assets between €495-€750m	8 basis points per annum
- For assets over €750m	2.5 basis points per annum

The Administrator was paid by the Manager out of the fees which the Manager earned. The Administrator is also entitled to be repaid out of the assets of the Company, all of its reasonable out of pocket expenses incurred on behalf of the Company which shall include, inter alia, legal fees, courier's fees, telecommunication costs and expenses.

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

9. Transaction costs

The transaction costs incurred by the Company are commissions on purchase and sales trades and are included in the net gain/(loss) on financial assets at fair value through profit or loss and foreign exchange, in the statement of comprehensive income, on the trade date. During the financial year, the Company incurred transaction costs as follows:

Sub-fund	Currency	31 December 2024	31 December 2023
Guinness Global Energy Fund	USD	55,488	64,454
Guinness Sustainable Energy Fund	USD	305,010	345,040

Guinness Asset Management Funds plc

11. Share capital

Authorised

The authorised share capital of the Company is 500,000,000,000 shares of no par value and 2 redeemable non-participating shares of Euro 1.00 each.

Subscriber shares

There are two non-participating shares currently in issue which were taken by the subscribers to the Company and are held by the Investment Manager. The subscriber shares do not form part of the NAV of the Company and are thus disclosed in the financial statements by way of this note only.

Redeemable participating shares

Redeemable participating shares carry the right to a proportionate share in the assets of the sub-funds and the holders of redeemable participating shares are entitled to attend and vote on all meetings of the Company and the relevant sub-fund. Shares are redeemable by holders of the relevant share class at the respective NAV. Shareholders may redeem their shares with effect from any dealing day at the NAV per share calculated on or with respect to the relevant dealing day in accordance with the procedures specified in the relevant supplements.

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

12. Financial instruments and risk management

The Company's risks are set out in the prospectus and any consideration of the risks here should be viewed in the context of the prospectus which is the primary document governing the operation of the Company. The Company's investing activities expose it to various types of risks that are associated with the financial investments and markets in which it invests. Asset allocation is determined by the Investment Manager, who manages the distribution of assets to achieve the investment objectives. Divergence from target asset allocation and the composition of the portfolio is closely monitored by the Investment Manager.

The Investment Manager has developed mechanisms designed to ensure that risk is controlled effectively and systematically in all markets, strategies and sectors and if total risk deviates outside pre-determined thresholds, the risk is brought back within acceptable limits. The nature and extent of the financial instruments outstanding at the reporting date and the specific risk management policies employed by the sub-funds are discussed below.

Market risk

Market risk arises from uncertainty about future prices of financial investments held by a sub-fund, whether those changes are caused by factors specific to individual financial instruments, or other factors affecting a number of similar financial instruments traded in the markets. It represents the potential loss a sub-fund might suffer through holding market positions in the face of price movements. Usually the maximum risk resulting from financial instruments is determined by the opening fair value of the instruments.

Market risk consists of currency risk, interest rate risk and other price risk.

(i) Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. A substantial portion of the net assets of the Company are denominated in currencies other than the functional currency of the sub-funds with the effect that the financial statements and total return can be significantly affected by currency movements. The Company entered into forward currency contracts in order to hedge the currency exposure of the assets of Guinness Global Energy Fund, Guinness Sustainable Energy Fund, Guinness Global Equity Income Fund, Guinness Global Innovators Fund, Guinness China RMB Income Fund, Guinness Multi-Asset Balanced Fund and Guinness Multi-Asset Growth Fund to non-base share classes in order to mitigate against currency risk.

The following table sets out the Company's total exposure to foreign currency risk as at 31 December 2024:

	Guinness Global Energy Fund USD	Guinness Sustainable Energy Fund USD	Guinness Global Money Managers Fund USD	Guinness Global Equity Income Fund USD	Guinness Asian Equity Income Fund USD

Guinness Multi-Asset Growth Fund	GBP	6,366,991	4,714,035

(ii) Interest rate risk

Interest rate risk represents the potential losses that a sub-fund might suffer due to adverse movements in relevant interest rates. The value of fixed interest securities may be affected by changes in the interest rate environment and the amount of income receivable from floating rate securities and bank balances, or payable on overdrafts, will also be affected by fluctuations in interest rates. With the exception of Guinness China RMB Income Fund, the sub-funds do not have a material exposure to interest rate risk as 100% of their investments are in non-interest-bearing securities and the interest rate risk in relation to cash and cash equivalents is not regarded as a material risk. Guinness Multi-Asset Balanced Fund and Guinness Multi Asset Growth Fund may be indirectly exposed to interest rate risk in respect of investments in underlying funds. The below tables outline the interest rate exposure of Guinness China RMB Income Fund.

31 December 2024

Sub-fund	Less than 6 months CNH	6 to 12 Months CNH	> 12 months CNH	Total CNH
Guinness China RMB Income Fund				
Financial assets at fair value through profit or loss	6,492,903	7,977,559	15,359,375	29,829,837
Cash and cash equivalents	1,163,791	-	-	1,163,791
Total interest-bearing assets	7,656,694	7,977,559	15,359,375	30,993,628
Total interest-bearing liabilities	-	-	-	-
Total interest rate gap	7,656,694	7,977,559	15,359,375	30,993,628

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

12. Financial instruments and risk management (continued)

(ii) Interest rate risk (continued)

31 December 2023

Sub-fund	Less than 6 months CNH	6 to 12 Months CNH	> 12 months CNH	Total CNH
Guinness China RMB Income Fund				
Financial assets at fair value through profit or loss	11,021,835	4,032,980	14,382,974	29,437,789
Cash and cash equivalents	685,957	-	-	685,957
Total interest-bearing assets	11,707,792	4,032,980	14,382,974	30,123,746
Total interest-bearing liabilities	-	-	-	-
Total interest rate gap	11,707,792	4,032,980	14,382,974	30,123,746

The duration of the portfolios of Guinness China RMB Income Fund is a measure of the sensitivity of the fair value of the sub-fund fixed interest securities to changes in market interest rates. This measure of duration for the portfolio indicates the approximate percentage change in the value of the portfolios if interest rates change by 1%.

	31 December 2024	31 December 2023
Guinness China RMB Income Fund	1.34	1.18

The following table demonstrates the impact on net assets attributable to holders of redeemable participating shares of a movement in interest rates. The table assumes a 0.50% upwards movement in interest rates with all other variables remaining constant (a negative 0.50% would have an equal but opposite effect).

	31 December 2024 CNH	31 December 2023 CNH
Guinness China RMB Income Fund	205,679	177,113

(iii) Other price risk

Other price risk arises mainly from uncertainty about future prices of investments held. It represents the potential loss the Company might suffer through holding market positions in the face of price movements. Details of all investments held at the reporting date are listed in the schedule of investments. The Investment Manager manages each sub-fund's other price risk on a daily basis in accordance with each sub-fund's investment objective and policies. The sub-funds' overall market positions are monitored on a quarterly basis by the Board of Directors.

Price fluctuations for investments in debt securities are expected to arise principally from interest rate or credit risk. As Guinness RMB Income Fund holds predominately debt securities at the reporting date, they are not considered to be subject to significant market price risk.

The following table demonstrates the impact on net assets attributable to holders of redeemable participating shares of a movement in investments market prices. The table assumes a 10% upwards movement in investment market prices (a negative 10% would have an equal but opposite effect).

Sub-fund	Currency	31 December 2024	31 December 2023
Guinness Global Energy Fund	USD	22,416,728	34,724,767
Guinness Sustainable Energy Fund	USD	48,181,328	113,731,906

Guinness Sustainable Global Equity Fund	USD	1,494,525	1,350,666
Guinness China A Share Fund	CNH	479,049	348,598
Guinness Multi-Asset Balanced Fund	GBP	7,738,290	7,217,082
Guinness Multi-Asset Growth Fund	GBP	6,219,404	4,666,541

Liquidity risk

Liquidity risk is the risk that the Company may not be able to settle or meet its obligations on time or at a reasonable price. In some circumstances, investments may be relatively illiquid making it difficult to acquire or dispose of them at the prices quoted on the various exchanges. Accordingly, the sub-funds' ability to respond to market movements may be impaired and the sub-fund may experience adverse price movements upon liquidation of its investments. There can be no assurance that the liquidity of the investments of underlying funds will always be sufficient to meet redemption requests as and when made. Any lack of liquidity may affect the liquidity of the shares of a sub-fund and the value of its investments.

The liquidity of the exchanges and that of the individual stocks are monitored by the Investment Manager and where liquidity issues arise the Investment Manager will trade accordingly. The main liability of the Company is the net assets attributable to holders of redeemable participating shares, which may be redeemed by shareholders in writing on any dealing day.

The contractual date of the financial liabilities for each sub-fund at the reporting dates 31 December 2024 and 31 December 2023 is less than one month.

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

12. Financial instruments and risk management (continued)

Credit risk

Credit risk is the risk that a sub-fund's counterparty or investment issuer will be unable or unwilling to meet a commitment that it has entered into and cause a sub-fund to incur a financial loss. A sub-fund will be exposed to settlement risk on parties with whom it trades and depositary risk on parties with whom the sub-fund has placed its assets in custody. In managing this risk, the Investment Manager, on behalf of the Company, seeks to do business with institutions that are well known, financially sound and where appropriate well rated by rating agencies.

Guinness China RMB Income Fund will invest primarily in fixed and/or floating rate bonds, convertible bonds, money market instruments (such as commercial paper, treasury bills and bankers acceptance) and bank deposits, all of which will be denominated in CNY or hedged back to CNY. The bonds in which the sub-fund will invest may be rated or unrated by credit rating agencies such as S&P, Moody's or Fitch. The sub-fund can invest up to 100% in onshore bonds issued by the sovereign itself and by the policy banks, which may be unrated by a Nationally Recognised Statistical Rating Organisation ("NRSRO"). Where the sub-fund invests in offshore bonds, which can be up to 100%, the sub-fund will only invest in bonds that are rated by an NRSRO. The sub-fund may invest without limitation in investment-grade securities and debt instruments. Investment grade securities are those securities that are rated by at least one NRSRO within one of the four highest long-term quality grades at the time of purchase. The debt securities in which the sub-fund may invest are traded over the counter and are typically unsecured.

As at 31 December 2024, 100% of debt securities held on Guinness China RMB Income Fund have an investment grade credit rating.

Settlement risk: Most transactions in listed securities are settled on a cash versus delivery basis ("DVP") with settlement a few days after execution. Default by the Broker could expose the sub-fund to an adverse price movement in the security between execution and default. Because the sub-fund would only be exposed to a potentially adverse market move (rather than 100% of the principal sum) during a short period, this risk is limited. In addition, default by regulated Brokers in the major markets is rare.

Depositary risk: Depositary risk is the risk of loss of assets held in custody. This is not a "primary credit risk" as the unencumbered assets of the sub-fund are segregated from the Depositary's own assets and the Depositary requires its sub-custodians likewise to segregate non-cash assets. This mitigates depositary risk but does not entirely eliminate it. The Depositary has the power to appoint sub-custodians, although, in accordance with the terms of the Depositary agreement, the Depositary's liability shall not be affected by the fact that it has entrusted some or all of the assets in safekeeping to any third party (in order for the Depositary to discharge this responsibility, the Depositary must exercise care and diligence in choosing and appointing a third party as a safe-keeping agent so as to ensure that the third party has and maintains the expertise, competence and standing appropriate to discharge the responsibilities concerned and the Depositary must maintain an appropriate level of supervision over the safe-keeping agent and make appropriate enquiries from time to time to confirm that the obligations of the agent continue to be competently discharged).

The credit rating of Brown Brothers Harriman & Co., the parent company of the Depositary, is A+ at the reporting date (2023: A+). The Depositary is not rated.

The sub-funds avail of a Cash Management Service ("CMS") provided by the custodian, Brown Brothers Haiiman & Co. End-of-day cash balances held at the Custodian are transferred overnight to various eligible institutions. The placement of the cash in an overnight deposit, gives the sub-funds deposit exposure to the particular institution with which such cash is placed. The Custodian maintains a listing of eligible institutions based on credit risk assessments. The Investment Manager selects which of the institutions to use for overnight deposits on each sub-fund. The credit ratings of the institutions used during the financial year ended 31 December 2024 were A or above (2023: CMS not in place). The counterparties used as at 31 December 2024 were:

Counterparty	Rating
Australia and New Zealand Banking Group Ltd	AA-
Bank of Nova Scotia	A+
Canadian Imperial Bank of Commerce	A+
Citibank NA	A+
DBS Bank Ltd	AA-
DNB Bank	AA-
JP Morgan Chase Bank NA	A+
Royal Bank of Canada	AA-
SEB Bank	A+

The Company uses the commitment approach to calculate its global exposure.

13. Taxation

The Company qualifies as an investment undertaking as defined in Section 739B (1) of the Taxes Consolidation Act, 1997 (the "Taxes Act"). Under current Irish law and practice, the Company is not chargeable to Irish tax on its income and gains. However, tax can arise on the happening of a "chargeable event" in the Company. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation, transfer or deemed disposal (a deemed disposal will occur at the expiration of an eight year period beginning with the acquisition of such shares) of shares or the appropriation or cancellation of shares of a shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer. No tax will arise on the Company in respect of chargeable events in respect of a shareholder who is neither Irish resident nor ordinarily resident in Ireland at the time of the chargeable event provided that a relevant declaration is in place and the Company is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct and certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) which the Company or any sub-fund receives with respect to their investments (other than securities of Irish issuers) may be subject to taxes, including withholding taxes, in the countries in which the issuers of investments are located. It is anticipated that the Company may not be able to benefit from reduced rates of withholding tax in double taxation agreements between Ireland and such countries. If this position changes in the future and the application of a lower rate results in a repayment to the Company the NAV will not be re-stated and the benefit will be allocated to the existing shareholders rateably at the time of the repayment. Any claims due to the sub-funds are accounted for on a receipt basis. In addition, where the Company invests in securities that are not subject to local taxes, for example withholdings tax, at the time of acquisition, there can be no assurance that tax may not be charged or withheld in the future as a result of any change in the applicable laws, treaties, rules or regulations or the interpretation thereof.

No stamp duty is payable in Ireland on the issue, transfer, repurchase or redemption of shares in the Company. Where any subscription for or redemption of shares is satisfied by the in specie transfer of securities, property or other types of assets, Irish stamp duty may arise on the transfer of such assets. No Irish stamp duty will be payable by the Company on the conveyance or transfer of stock or marketable securities provided that the stock or marketable securities in question have not been issued by a company registered in Ireland and provided that the conveyance or transfer does not relate to any immovable property situated in Ireland or any right over or interest in such property or to any stocks or marketable securities of a company (other than a company which is an investment undertaking within the meaning of the Taxes Act) which is registered in Ireland. Further details on tax applicable to the Company can be found in the prospectus.

The Company is exposed to Brazilian and Indian Rupee tax when it disposes (or is deemed to dispose) of assets located in Brazil and India. As at 31 December 2024, Guinness Emerging Markets Equity Income Fund, Guinness Asian Equity Income Fund and Guinness Best of Asia Fund held Brazilian and/or Indian based equities. A capital gains tax provision in respect of unrealised gains on the investments is recorded at the reporting date in the statement of financial position and amounts charged during the financial year are disclosed in the statement of comprehensive income.

Guinness Asset Management Funds plc

16. Distribution

All share classes of the Company have obtained "Reporting Fund Status" under the United Kingdom Offshore Funds (Tax) Regulations 2009 for the purpose of United Kingdom taxation. Dividends may be paid out of the net investment income as declared by the Directors. Otherwise all income and gains of the sub-funds will be accumulated within the sub-funds. Where the amount of any distribution payable to an individual shareholder would be less than US\$100 the Directors in their sole discretion may determine that such amount shall not be distributed but shall be retained and reinvested within and for the benefit of the sub-fund. Income equalisation is applied to all share classes of the Guinness Global Equity Income Fund, Class Y USD distribution shares on the Guinness Global Energy Fund, and to distributing share classes of Guinness Asian Equity Income Fund, Guinness European Equity Income Fund and Guinness Emerging Markets Equity Income Fund. There were no distributions paid from capital for any sub-fund during the financial year ended 31 December 2024 (2023: nil).

The following distributions were declared during the financial year ended 31 December 2024:

Guinness Global Energy Fund

Class	Currency	Distribution per share	Net distribution charge	Income received on subscriptions	Income deducted on redemptions	Total distribution (local)	Total distribution (base)	Ex -date

¹Shareholders should note that all of the fees and expenses including management fees are charged to capital. This will have the effect of lowering the capital value of your investment.

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

17. Transactions involving connected persons

Regulation 43 of the Central Bank Regulations requires that any transaction between the Company and its management company or depositary; and their respective group companies and delegates ("connected persons") is conducted at arm's length and is in the best interests of the unitholders of the Company.

Waystone Management Company (IE) Limited (the "Manager") is satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43 are applied to all transactions with connected parties and were complied with during the financial year.

18. Related party disclosures and other key contacts

In accordance with IAS 24 'Related Party Disclosures' the related parties of the Company and the required disclosures relating to material transactions with parties are outlined below.

Manager

The Manager is considered a related party to the Company as it is considered to have significant influence over the Company in its role as Manager. The Manager has delegated certain administration services to Waystone Fund Administrators (Ireland) Limited by way of a tri-party administration agreement between the Manager, the Company and the Administrator. The Manager and Administrator receive fees as set out in note 8. Total fees charged for the financial year ended 31 December 2024 amounted to €4,127,641 (2023: €3,549,329).

Investment Manager

The Investment Manager was appointed by the Manager on behalf of the Company to provide investment management and advisory services to the Company. Directors, Edward Guinness, Andrew E. Martin Smith and alternate Director Timothy W.N. Guinness are employees of the Investment Manager. Each sub-fund pays the Investment Manager fees at the rates set out in note 5.

The Investment Manager is responsible for paying the administrative expenses of the Company, to include establishment costs, fees and expenses payable to the Manager and Administrator, the Depositary, independent auditor, directors' fees and general administrative expenses. Administrative expenses are paid by the Investment Manager out of the management fee. Given the fixed nature of the management fees the Investment Manager takes the risk or benefit of any price changes to the cost of the services covered by the management fees and takes the risk of expense levels relating to such services increasing above the management fees as a result of a decrease in net assets.

Details of fees charged are outlined below:

	31 December 2024 USD	31 December 2023 USD
Management fees	80,335,141	66,600,818
Total	80,335,141	66,600,818

Distributor

Guinness Asset Management Limited, the Global Distributor was appointed by the Manager on behalf of the Company to promote and market the sale of shares and to use all reasonable endeavours to procure subscribers for shares. The Global Distributor shall be entitled to receive a distribution fee as outlined in note 7. The Global Distributor fee charged during the financial year ended 31 December 2024 was \$4,111,994 (31 December 2023: \$4,645,251).

Sub-Investment Manager

EPIC Markets (UK) LLP, the Sub-Investment Manager for Guinness China RMB Income Fund was appointed to act as a discretionary sub-investment manager to the Investment Manager in connection with the securities and other assets of the sub-fund. The Sub-Investment Manager shall be entitled to receive a fee as outlined in note 6. The Sub-Investment Manager fee charged during financial year ended 31 December 2024 was \$8,579 (31 December 2023: \$6,824).

Directors

The Directors are also considered to be related parties. The Company pays the Directors remuneration for acting as Directors of the Company. Aggregate directors' fees charged during the financial year ended 31 December 2024 amounted to €140,340 (31 December 2023: €134,168).

At the reporting dates 31 December 2024 and 31 December 2023, the two non-participating shares taken by the subscribers to the Company were held by the Investment Manager.

Notes to the financial statements (continued)

For the financial year ended 31 December 2024

Guinness Asset Management Funds plc

19. Soft commission arrangements and directed brokerage services

There were no soft commission arrangements, directed brokerage services or similar arrangements in place during the financial year ended 31 December 2024 (31 December 2023: nil).

20. Fund Asset regime

The Company operates under a Fund Asset Model, whereby umbrella cash accounts designated in different currencies at umbrella level are held in the name of the Company. The umbrella cash accounts are used to collect subscription monies from investors and pay out redemption monies and also dividends (where applicable) to shareholders. The balances held in the accounts are reconciled on a daily basis and monies are not intended to be held in the accounts for long periods. The monies held in the umbrella cash accounts are considered an asset of the Company and are disclosed in the statement of financial position within cash and cash equivalent.

21. Efficient portfolio management

The below Guinness sub-funds entered into forward currency contracts for efficient portfolio management purposes in order to hedge the currency exposure of assets attributable to a particular Class into the currency of denomination of the relevant Class to non-base share classes with the exception of Guinness China RMB Income Fund which entered into forward currency contracts for efficient portfolio management purposes in order to hedge the currency exposure of investments held. A description of forward currency contracts and details of unrealised gains/losses are detailed in note 3 and open positions as at 31 December 2024 are also detailed within the schedule of investments. No collateral was posted. Losses from these transactions may arise from unfavourable changes in currency value of if the counterparties do not perform under a contract's terms. The table below shows the realised gains and losses, movement in unrealised gains and losses and transaction costs incurred on the purchase and sale of forward foreign currency contracts.

During the financial year ended 31 December 2024:

	Guinness Global Energy Fund USD	Guinness Sustainable Energy Fund USD	Guinness Global Equity Income Fund USD	Guinness Global Innovators Fund USD
Net realised loss from efficient portfolio management techniques	(411)	(385)	(470)	(589)
Net movement in unrealised gain/(loss) from efficient portfolio management techniques	(152)	(130)	(184)	(235)
Transaction costs incurred	8	7	9	11

During the financial year ended 31 December 2024:

	Guinness China RMB Income Fund CNH	Guinness Multi- Asset Balanced Fund GBP	Guinness Multi- Asset Growth Fund GBP
Net realised loss from efficient portfolio management techniques	(47,247)	(705,005)	(525,028)
Net movement in unrealised gain/(loss) from efficient portfolio management techniques	(98,868)	262,524	220,804
Transaction costs incurred	-	25,883	20,260

During the financial year ended 31 December 2023:

	Guinness Global Energy Fund USD	Guinness Sustainable Energy Fund USD	Guinness Global Equity Income Fund USD	Guinness Global Innovators Fund USD
Net realised loss from efficient portfolio management techniques	(611)	(695)	(651)	(724)
Net movement in unrealised gain/(loss) from efficient portfolio management techniques	13	11	15	17
Transaction costs incurred	8	7	8	9

During the financial year ended 31 December 2024:

	Guinness China RMB Income Fund CNH	Guinness Multi- Asset Balanced Fund GBP	Guinness Multi- Asset Growth Fund GBP
Net realised loss from efficient portfolio management techniques	(212,061)	(898,569)	(725,290)
Net movement in unrealised gain/(loss) from efficient portfolio management techniques	53,377	(387,238)	(255,500)
Transaction costs incurred	-	22,610	16,520

A Class will not be leveraged as a result of currency hedging transactions. Although the Company does not intend to over-hedge or under-hedge positions, over- or under-hedging may arise due to factors outside the control of the Company. However, over-hedged positions will not exceed 105% of the Net Asset Value of the Class and under-hedged positions shall not fall short of 95% of the portion of the Net Asset Value of the Class which is hedged against currency risk. Hedged positions will be kept under review to ensure that under-hedged positions do not fall short of 95% and over-hedged positions do not exceed 105%. The commitment approach was used to calculate global exposure.

22. Capital management

The redeemable shares issued by the Company provide an investor with the right to require redemption for cash at a value proportionate to the investor's shares in the sub-fund's net assets at each redemption date and are classified as liabilities. The sub-funds' objectives in managing the redeemable shares are to ensure a stable base to maximise returns to all investors and to manage liquidity risk arising from redemptions.

23. Changes to prospectus and supplements

Effective 19 April 2024, the Supplements were updated for several sub-funds of the Company to take account of the share class renaming and new share launches noted in note 24.

Guinness Asset Management Funds plc

For the financial year ended 31 December 2024

The Central Bank Regulations requires all material changes that have occurred in the disposition of the assets of the UCITS to be documented in the report. A material change is defined as the aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales for the year.

Appendix 3 – Remuneration disclosure (unaudited)

UCITS V Remuneration disclosure

The Manager has designed and implemented a remuneration policy (the "Policy") in line with the provisions of S.I. 257 of 2013 European Union (Alternative Investment Fund Managers) Regulations 2013 (the "AIFM Regulations"), S.I. 352 of 2011 European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and of the ESMA Guidelines on sound remuneration policies under the UCITS Directive and AIFMD (the "ESMA Guidelines"). The Policy is designed to ensure that the remuneration of key decision makers is aligned with the management of short and long-term risks, including the oversight and where appropriate the management of sustainability risks in line with the Sustainable Finance Disclosure Regulations.

The Manager's remuneration policy applies to its identified staff whose professional activities might have a material impact on the Company's risk profile and so covers senior management, risk takers, control functions and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profile of the Company. The Manager's policy is to pay identified staff a fixed component with the potential for identified staff to receive a variable component. It is intended that the fixed component will represent a sufficiently high proportion of the total remuneration of the individual to allow the Manager to operate a fully flexible policy, with the possibility of not paying any variable component. When the Manager pays a variable component as performance related pay certain criteria, as set out in the Manager's remuneration policy, must be adhered to. The various remuneration components are combined to ensure an appropriate and balanced remuneration package that reflects the relevant staff rank and professional activity as well as best market practice. The Manager's remuneration policy is consistent with, and promotes, sound and effective risk management and does not encourage risk-taking which is inconsistent with the risk profile of the funds it manages.

These disclosures are made in respect of the remuneration policies of the Manager. The disclosures are made in accordance with the ESMA Guidelines.

Total remuneration (in EUR) paid to the identified staff of the Manager fully or partly involved in the activities of the Company that have a material impact on the Company's risk profile during the financial year to 31 December 2024 (the Manager's financial year):

Fixed remuneration	EUR
Senior Management	3,377,918
Other identified staff	-
Variable remuneration	
Senior Management	732,962
Other identified staff	-
Total remuneration paid	4,110,880

No of identified staff – 20

Neither the Manager nor the Company pays any fixed or variable remuneration to identified staff of the Investment Manager.

There have been no material changes made to the Remuneration Policy or the Manager's remuneration practices and procedures during the financial year.

Appendix 4 – Sustainable Finance Disclosure Regulation (unaudited)

The below sub-funds have been classified as Article 6 funds under the European Union's ("EU") Sustainable Finance Disclosures Regulation (Regulation EU/2019/2088) ("SFDR"). The investments underlying the sub-funds do not take into account the EU criteria for environmentally sustainable economic activities.

Guinness Global Energy Fund
Guinness Global Money Managers Fund
Guinness China RMB Income Fund
Guinness Multi-Asset Balanced Fund
Guinness Multi-Asset Growth Fund

Funds promoting environmental and/or social characteristics (classified pursuant to Article 8 of SFDR) and funds that have sustainable investment as their objective (classified pursuant to Article 9 of SFDR) are required to include in periodic reports information on the extent to which environmental and/or social characteristics have been met or the overall sustainability impact by means of relevant sustainability indicators. Details of the relevant disclosures can be found in the subsequent pages 159 to 237.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Guinness Sustainable Energy Fund

Legal entity identifier: 635400CS2PNX9ELKKQ77

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

---	---

To what extent was the sustainable investment objective of this financial product met?

During the period, the Fund invested in line with its investment objective and invested in sustainable energy companies that contribute towards reduced global carbon emissions, based on the Investment Manager’s assessment.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● ***How did the sustainability indicators perform?***

The Investment Manager estimates the carbon dioxide emissions displaced and generated through use of investee companies' products and services. Please note that these are unaudited figures which rely on internal estimates.

The Investment Manager estimates that the annualised carbon cost associated with the portfolio was 54 tCO₂e per million US dollars of portfolio assets and that the annualised carbon displaced associated with the portfolio was 682 tCO₂e per million US dollars of portfolio assets.

For further details, please see the Impact Report available here [<https://www.guinnessgi.com/funds/guinness-sustainable-energy-fund#tab-literature>].

These figures are estimates of the positive impact enabled by companies held by the fund at the end of 2023, based on calendar year 2023 data. This data is the most recent available.

● ***...and compared to previous periods?***

In the previous reporting period, the Investment Manager estimated that the annualised carbon cost associated with the portfolio was 40 tCO₂e per million US dollars of portfolio assets and that the annualised carbon displaced associated with the portfolio was 527 tCO₂e per million US dollars of portfolio assets.

We note that our headline figure of 682 tCO₂e displaced / \$1m of portfolio assets is higher than last year. The main driver behind this was the year-on-year increase in positive impact activity, followed by changes in valuation and market capitalization. Stripping out changes in market capitalization, the aggregate positive impact of companies owned in the portfolio at the end of 2023 increased by +16% year-on-year. Other factors which had less of an effect included updates and revisions to assumptions, methodologies and product lives, and changes in portfolio holdings.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The investment process operated by the Investment Manager includes assessment that the business activities of the portfolio holdings will not harm any other sustainable investment objectives (do no significant harm, "DNSH"). This has been assessed, as follows.

The Investment Manager acted in compliance with the Investment Manager's exclusion policy, available here [<https://www.guinnessgi.com/funds/guinness-sustainable-energy-fund#tab-literature>].

Company ESG analysis was carried out to confirm that the proposed investments did not cause significant harm to any environmental or social sustainable investment objective.

This ESG analysis is proprietary, based on information provided by the investee company and third parties. It is designed to assess the ESG risks and opportunities of the proposed investment. The ESG analysis may include, but is not limited to i) a materiality assessment of ESG risk and opportunities based on the Investment Manager's own proprietary analysis as well as the assessment of the company and third-party providers and ii) an assessment of how the Investment Manager considers the company is able to manage these risk and opportunities. Examples of ESG risk and opportunities include opportunities in clean tech, management of greenhouse gas emissions, health and safety, physical climate risk, stakeholder management

and corporate governance.

Good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance) were assessed.

The Investment Manager's DNSH test used a variety of data sources, including company reporting, MSCI, Bloomberg, CDP and Glass Lewis to ensure the proposed sustainable investments were appropriately analysed.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager considered principal adverse impacts on sustainability factors in its ESG analysis when assessing whether a sustainable investment did not cause significant harm ("DNSH") to any environmental or social sustainable objective. These were evaluated on a qualitative and quantitative basis.

Each portfolio company is assessed under the mandatory PAIs and compared to an MSCI benchmark as well as relevant sector, country and peer groups.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager's ESG analysis assessed whether sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business and Human Rights. This evaluation was conducted by the Investment Manager through third party research and company engagement. No evidence of non-alignment in the period was noted.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered principal adverse impacts on sustainability factors when assessing whether a sustainable investment did not cause significant harm to any environmental or social sustainable objective.

Each portfolio company is assessed under the mandatory PAIs and compared to an MSCI benchmark as well as relevant sector, country and peer groups.

What were the top investments of this financial product?

Largest investments	Sector	% Assets*	Country
Iberdrola	Utilities	4.8%	Spain
Trane Technologies	Industrials	4.7%	Ireland
NextEra Energy	Utilities	4.6%	United States
Schneider Electric	Industrials	4.6%	France
Hubbell	Industrials	4.6%	United States
Eaton Corp	Industrials	4.5%	United States
Legrand	Industrials	4.4%	France
Itron	Information Technology	3.6%	United States
First Solar	Information Technology	3.5%	United States
Ormat Technologies	Utilities	3.3%	United States
NXP Semiconductors	Information Technology	3.3%	Netherlands
Infineon Technologies	Information Technology	3.2%	Germany
Siemens AG	Industrials	3.2%	Germany
ON Semiconductor	Information Technology	3.1%	United States
Installed Building Products	Consumer Discretionary	3.1%	United States

*weights including cash

The above is calculated as an average of quarter end holdings.

The above sectoral allocation is based on the Global Industry Classification Standard ("GICS").

What was the proportion of sustainability-related investments?

98.4% of the investments held by the Fund during the period were sustainable investments which contributed to an environmental objective.

What was the asset allocation?

Asset allocation is calculated as an average of quarter end holdings.

During the period covered by the financial statements, 98.4% of the Fund's investments were invested in sustainable Investments (i.e., #1 Sustainable) which contribute to an environmental objective.

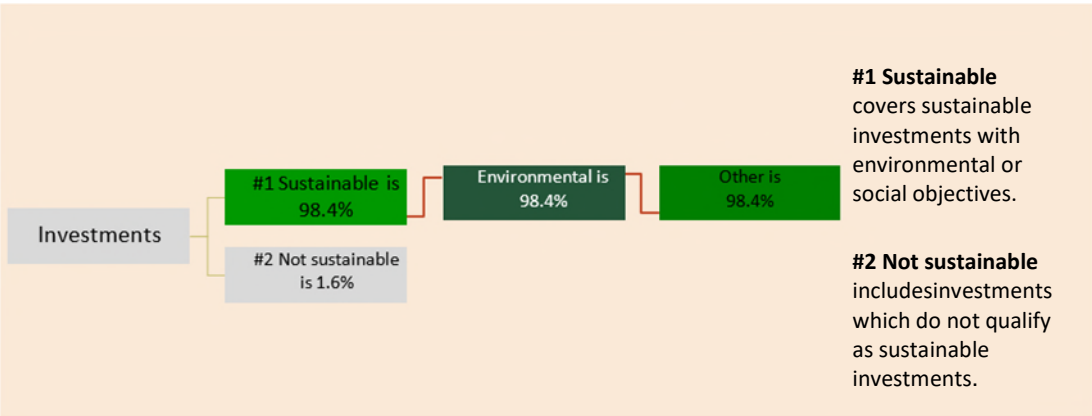

During the period covered by the financial statements, 1.6% of the Fund's investments were held as "#2 Not Sustainable", comprising cash held as ancillary liquidity and derivatives, in accordance with the provisions in the Supplement for the Fund.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Sector	Weight
Industrials	39.3%
Information Technology	25.8%
Utilities	18.0%
Consumer Discretionary	8.3%
Materials	5.5%
Cash	1.6%
Energy	1.5%

The above is calculated as an average of quarter end holdings. Cash is included in the calculation.

The above sectoral allocation is based on the Global Industry Classification Standard (“GICs”).

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy¹?

0%. The Investment Manager cannot currently satisfy itself that the investments within the portfolio meet the necessary criteria in order to be considered Taxonomy aligned.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

What was the share of investments made in transitional and enabling activities?

0%. The Investment Manager cannot currently satisfy itself that the investments within the portfolio meet the necessary criteria in order to be considered transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting period and therefore this question is not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

100% of sustainable investments. The Investment Manager cannot currently satisfy itself that the investments within the portfolio meet the necessary criteria in order to be considered Taxonomy aligned.

What was the share of socially sustainable investments?

0%. The Fund does not invest in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

During the period covered by the financial statements, 1.6% of the Fund’s investments were held as “#2 Not Sustainable”, comprising cash held as ancillary liquidity and derivatives, in accordance with the provisions in the Supplement for the Fund.

The Fund’s exclusion strategy outlined above applies to 100% of the net assets of the portfolio because all of the Fund’s investments are screened against its exclusion strategy.

What actions have been taken to attain the sustainable investment objective during the reference period?

All sustainable investments made by the Fund during the reporting period were subject to a due-diligence process. This allowed the evaluation of the contribution of a proposed sustainable investment to the sustainable investment objective.

The Investment Manager ensured all investments (excluding cash) were sustainable investments. To achieve this, the Investment Manager positively screened for companies where it believed their sustainable energy activities were or would be the key driver of equity value. The Investment Manager acted in compliance with the Investment Manager's exclusion policy. Company ESG analysis was carried out to take into account and monitor adverse impacts on sustainability factors. Good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance) were assessed. An estimation of the gross carbon dioxide emissions avoided by products and services of the investee companies was calculated, as described above.

To support the Investment Manager's actions in attaining the sustainable investment objective, a variety of data sources, including company reporting, MSCI, Bloomberg, CDP and Glass Lewis were used.

How did this financial product perform compared to the reference sustainable benchmark?

The fund does not have a reference sustainable benchmark.

- ***How did the reference benchmark differ from a broad market index?***
NA
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***
NA
- ***How did this financial product perform compared with the reference benchmark?***
NA
- ***How did this financial product perform compared with the broad market index?***
NA

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Guinness Global Equity Income Fund

Legal entity identifier: 635400NTZHLHONBYQG56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics were promoted in the following manner:

Exclusions

The Fund did not invest in companies as per the Fund's exclusion policy, which included investing in companies directly involved in the design, manufacture or sale of cluster munitions and anti-personnel mines, and companies that generate more than 30% of revenues via thermal coal extraction or thermal coal power generation. A copy of Exclusion Policy can be found here [<https://www.guinnessgi.com/funds/guinness-global-equity-income-fund#tab-literature>].

Engagement

The Investment Manager undertook engagement activities, where relevant, to encourage investee companies to improve aspects of some or all of their environmental, social or governance practices. The Investment Manager voted proxies on behalf of portfolio holdings, where possible and when in the best interests of clients, for example we do not vote where there are restrictions on liquidity or share blocking. Voting results are published here quarterly: [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis, by the investment team. Each investee company was assessed against industry relevant material ESG factors, which can be different between industries. Therefore, we do not aggregate all ESG factors at the Fund level.

- ***How did the sustainability indicators perform?***

The indicators that follow covers the activity during the reporting period: 1st January 2024 to 31st December 2024.

Exclusions

0% of the Fund's holdings breached the Investment Manager's exclusion policy during the reporting period.

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund's exclusion policy.

Engagement

In the reporting period, the Investment Manager in relation to investments in the Fund:

- Voted in favour with regards to 7 items related to environmental and/or social practices, across 4 company proxy votes. All 7 votes were against management. Engaged with 4 companies with regards the incorporation of an environmental and/or social metric within executive incentive packages.
- Engaged with 2 companies, encouraging them to participate in the Carbon Disclosure Project (CDP) questionnaire.
- Following on from our participation as a co-signatory to the CDP Science Based Targets initiative (SBTi) campaign in 2023, we followed up again with our own separate engagement letter to the 7 remaining portfolio holdings that had still not set a SBTi target following the 2023 initiative, in addition to 1 other company that was not part of the campaign. These engagements are ongoing. Proxy voting is recorded in the Investment Manager's voting database, which can be analysed for relevant voting themes. Voting records are published quarterly.

Engagement activity is tracked and recorded in the Investment Manager's Engagement Log on an ongoing basis.

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to,

climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis.

● ***...and compared to previous periods?***

We continue to meet our exclusion policy requirements.

We continue to vote in favour of items related to environmental and/or social practises where deemed appropriate.

We continue to support the Carbon Disclosure Project (CDP). Whilst we were not leads to any portfolio companies within the CDP non-disclosure campaign in 2024, we continued our engagement with the 2 remaining portfolio companies that are yet to report to the initiative. We continued to engage with companies (8) regarding setting Science Based Targets and registering these targets with the Science Based Targets initiative (SBTi).

Voting and Engagement activity and data continues to be tracked internally.

The Investment Manager continues to assess the environmental and social credentials of investee companies, and their governance practices.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:
N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are not considered at present.

What were the top investments of this financial product?

Largest investments	Sector	% Assets*	Country
Broadcom	Information Technology	3.2%	United States
Taiwan Semiconductor	Information Technology	3.1%	Taiwan
AbbVie	Health Care	3.1%	United States
Aflac	Financials	3.1%	United States
Arthur J Gallagher & Co	Financials	3.1%	United States

Paychex	Industrials	2.8%	United States

*weights including cash

Asset allocation is calculated as an average of quarter end holdings.

The above sectoral allocation is based on the Global Industry Classification Standard (“GICs”).

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

Asset allocation
describes the
share of
investments in
specific assets.

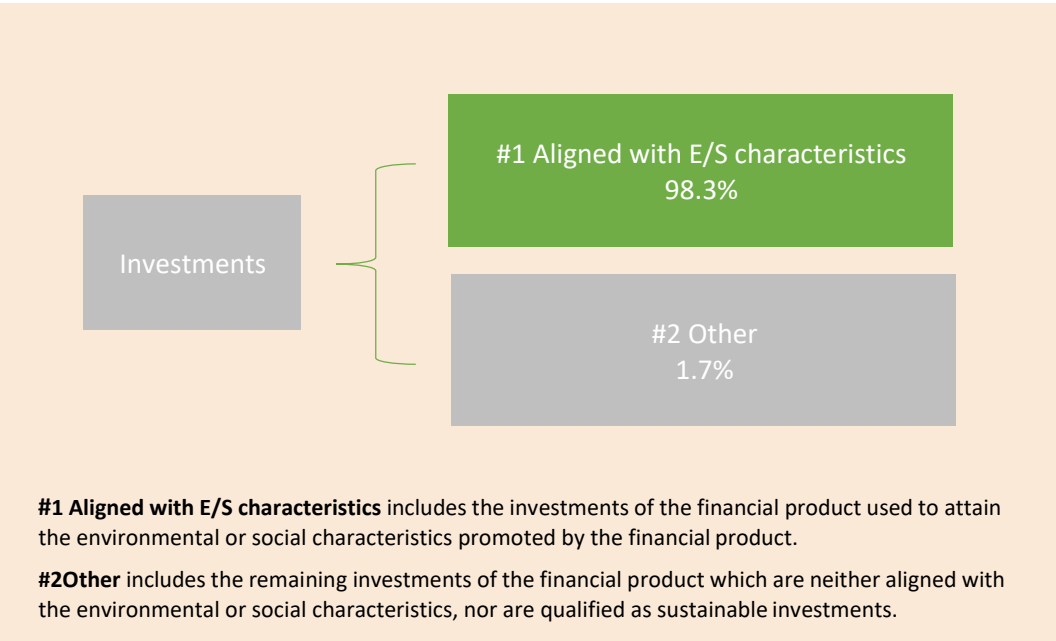

● **What was the asset allocation?**

Asset allocation is calculated as an average of quarter end holdings.

98.3% of the investments of the Fund attained the promoted environmental or social characteristics during the period covered by the periodic report.

The remainder of the investments disclosed under “#2 Other” was held as cash used for the purpose of ancillary liquidity.

There are no minimum environmental or social safeguards.

● **In which economic sectors were the investments made?**

Sector	Weight
Industrials	25.0%
Consumer Staples	24.6%
Health care	16.7%
Financials	15.2%
Information Technology	14.9%
Communication Services	2%
Cash	1.7%

The above is calculated as an average of quarter end holdings. Cash is included in the calculation.

The above sectoral allocation is based on the Global Industry Classification Standard (“GICs”).

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

☐ In fossil gas ☐ In nuclear energy

No

☒

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**
0% of NAV.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
N/A.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments. Taxonomy-aligned investments are a sub-set of sustainable investments.

What was the share of socially sustainable investments?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments in cash held as ancillary liquidity.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund’s exclusion policy.

The Investment Manager undertook engagements covering environmental and social practices for Fund holdings, where relevant.

The Investment Manager assessed and reviewed the environmental and social credentials of investee companies, and their governance practices. These assessments were conducted on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

N/A

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Guinness Asian Equity Income Fund

Legal entity identifier: 635400YDHWXLSEWXQA52

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics were promoted in the following manner:

Exclusions

The Fund did not invest in companies as per the Fund's exclusion policy, which included investing in companies directly involved in the design, manufacture or sale of cluster munitions and anti-personnel mines, and companies that generate more than 30% of revenues via thermal coal extraction or thermal coal power generation. A copy of Exclusion Policy can be found here [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Engagement

The Investment Manager undertook engagement activities, where relevant, to encourage investee companies to improve aspects of some or all of their environmental, social or governance practices. The Investment Manager voted proxies on behalf of portfolio holdings, where possible and when in the best interests of clients, for example we do not vote where there are restrictions on liquidity or share blocking. Voting results are published here quarterly: [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Integration

The Investment Manager assessed the ¹⁷⁴environmental and social credentials of investee

companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis, by the investment team. Each investee company was assessed against industry relevant material ESG factors, which can be different between industries. Therefore, we do not aggregate all ESG factors at the Fund level.

- ***How did the sustainability indicators perform?***

The indicators that follow covers the activity during the reporting period: 1st January 2024 to 31st December 2024.

Exclusions

0% of the Fund's holdings breached the Investment Manager's exclusion policy during the reporting period.

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund's exclusion policy.

Engagement

In the reporting period, the Investment Manager in relation to investments in the Fund:

- Participated in the Carbon Disclosure Project (CDP) non-disclosure campaign (NDC) and was lead signatory for the request to 4 companies.
- Following on from our participation as a co-signatory to the CDP Science Based Targets initiative (SBTi) campaign in 2023, we followed up again with our own separate engagement letter to the 9 holdings that still had not set a SBTi target following the 2023 initiative, in addition to 1 other company that was not part of the campaign. These engagements are ongoing.

Engagement activity is tracked and recorded in the Investment Manager's Engagement Log on an ongoing basis.

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis.

...and compared to previous periods?

We continue to meet our exclusion policy requirements.

We continue to support the Carbon Disclosure Project (CDP) non-disclosure campaign and led engagements on 4 companies in the reporting period. We continued to engage with companies (9) regarding setting Science Based Targets and registering these targets with the Science Based Targets initiative (SBTi).

Voting and Engagement activity and data continues to be tracked internally.

The Investment Manager continues to assess the environmental and social credentials of investee companies, and their governance practices.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: ____%

☒ ☐ **No**

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics were promoted in the following manner:

Exclusions

The Fund did not invest in companies as per the Fund's exclusion policy, which included investing in companies directly involved in the design, manufacture or sale of cluster munitions and anti-personnel mines, and companies that generate more than 30% of revenues via thermal coal extraction or thermal coal power generation. A copy of Exclusion Policy can be found here [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Engagement

The Investment Manager undertook engagement activities, where relevant, to encourage investee companies to improve aspects of some or all of their environmental, social or governance practices. The Investment Manager voted proxies on behalf of portfolio holdings, where possible and when in the best interests of clients, for example we do not vote where there are restrictions on liquidity or share blocking. Voting results are published here quarterly: [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Integration

The Investment Manager assessed the ¹⁸² environmental and social credentials of investee

companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis, by the investment team. Each investee company was assessed against industry relevant material ESG factors, which can be different between industries. Therefore, we do not aggregate all ESG factors at the Fund level.

- ***How did the sustainability indicators perform?***

The indicators that follow covers the activity during the reporting period: 1st January 2024 to 31st December 2024.

Exclusions

0% of the Fund's holdings breached the Investment Manager's exclusion policy during the reporting period.

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund's exclusion policy.

Engagement

In the reporting period, the Investment Manager in relation to investments in the Fund:

- Engaged with 1 company, encouraging them to participate in the Carbon Disclosure Project (CDP).

Engagement activity is tracked and recorded in the Investment Manager's Engagement Log on an ongoing basis.

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis.

● **...and compared to previous periods?**

We continue to meet our exclusion policy requirements.

We continue to vote in favour of items related to environmental and/or social practises where deemed appropriate.

Voting and Engagement activity and data continues to be tracked internally.

The Investment Manager continues to assess the environmental and social credentials of investee companies, and their governance practices.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are not considered at present.

What were the top investments of this financial product?

Largest investments	Sector	% Assets*	Country
GBP Cash	Cash	4.1%	Cash
Konecranes	Industrials	3.7%	Finland

*weights including cash

Asset allocation is calculated as an average of quarter end holdings.

The above sectoral allocation is based on the Global Industry Classification Standard ("GICs").

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

Asset allocation is calculated as an average of quarter end holdings.

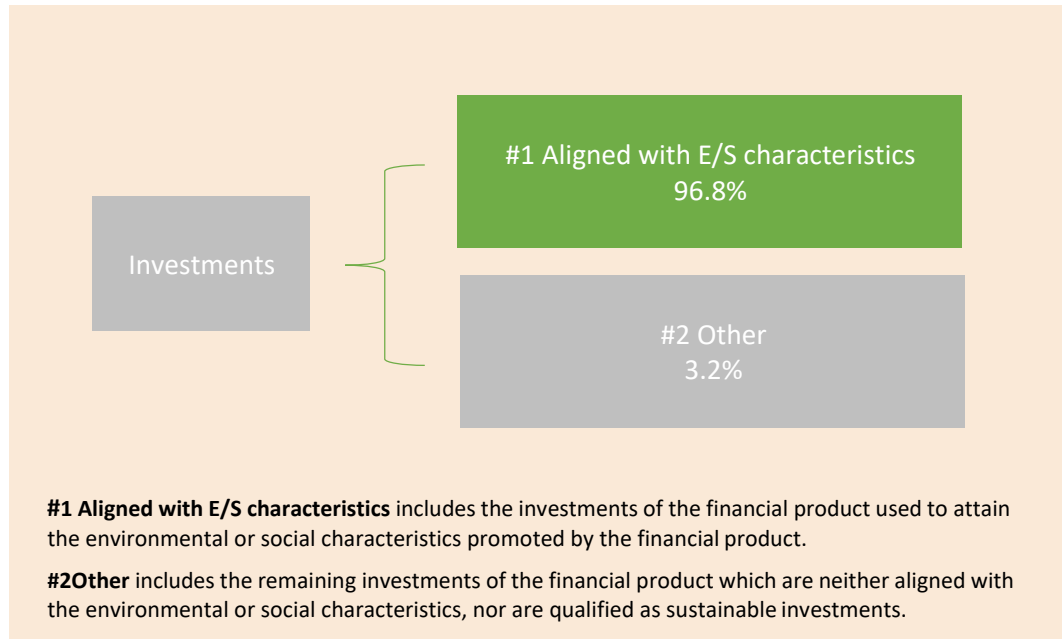

96.8% of the investments of the Fund attained the promoted environmental or social characteristics during the period covered by the periodic report.

The remainder of the investments disclosed under "#2 Other" was held as cash used for the purpose of ancillary liquidity.

There are no minimum environmental or social safeguards.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

Sector	Weight
Financials	23.8%
Industrials	23.5%
Consumer Staples	16.7%
Health care	13.2%
Information Technology	8.7%
Communication Services	5.8%
Consumer Discretionary	5.2%
Cash	3.2%

The above is calculated as an average of quarter end holdings. Cash is included in the calculation.

The above sectoral allocation is based on the Global Industry Classification Standard (“GICs”).

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

☐ In fossil gas ☐ In nuclear energy

No

☒

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**
0% of NAV.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
N/A.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments. Taxonomy-aligned investments are a sub-set of sustainable investments.

What was the share of socially sustainable investments?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments in cash held as ancillary liquidity.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund’s exclusion policy.

The Investment Manager undertook engagements covering environmental and social practices for Fund holdings, where relevant.

The Investment Manager assessed and reviewed the environmental and social credentials of investee companies, and their governance practices. These assessments were conducted on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

N/A

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Guinness Global Innovators Fund

Legal entity identifier: 635400BU7LWE1NNRL570

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics were promoted in the following manner:

Exclusions

The Fund did not invest in companies as per the Fund's exclusion policy, which included investing in companies directly involved in the design, manufacture or sale of cluster munitions and anti-personnel mines, and companies that generate more than 30% of revenues via thermal coal extraction or thermal coal power generation. A copy of Exclusion Policy can be found here [<https://www.guinnessgi.com/funds/guinness-global-equity-income-fund#tab-literature>].

Engagement

The Investment Manager undertook engagement activities, where relevant, to encourage investee companies to improve aspects of some or all of their environmental, social or governance practices. The Investment Manager voted proxies on behalf of portfolio holdings, where possible and when in the best interests of clients, for example we do not vote where there are restrictions on liquidity or share blocking. Voting results are published here quarterly: [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Integration

The Investment Manager assessed the environmental and social credentials of investee

companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis, by the investment team. Each investee company was assessed against industry relevant material ESG factors, which can be different between industries. Therefore, we do not aggregate all ESG factors at the Fund level.

- ***How did the sustainability indicators perform?***

The indicators that follow covers the activity during the reporting period: 1st January 2024 to 31st December 2024.

Exclusions

0% of the Fund's holdings breached the Investment Manager's exclusion policy during the reporting period.

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund's exclusion policy.

Engagement

In the reporting period, the Investment Manager in relation to investments in the Fund:

- Voted in favour with regards to 19 items related to environmental and/or social practices, across 6 company proxy votes. All 19 votes were against management.
- Engaged with 2 companies, encouraging them to participate in the Carbon Disclosure Project (CDP) questionnaire.
- Following on from our participation as a co-signatory to the CDP Science Based Targets initiative (SBTi) campaign in 2023, we followed up again with our own separate engagement letter to the 6 remaining portfolio holdings that had still not set a SBTi target following the 2023 initiative, in addition to 1 other company that was not part of the campaign. These engagements are ongoing. Proxy voting is recorded in the Investment Manager's voting database, which can be analysed for relevant voting themes. Voting records are published quarterly.

Engagement activity is tracked and recorded in the Investment Manager's Engagement Log on an ongoing basis.

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis.

● **...and compared to previous periods?**

We continue to meet our exclusion policy requirements.

We continue to vote in favour of items related to environmental and/or social practises where deemed appropriate.

We continue to support the Carbon Disclosure Project (CDP). Whilst we were not leads to any portfolio companies within the CDP non-disclosure campaign in 2024, we engaged with the 2 remaining portfolio companies that are yet to report to the initiative. We continued to engage with companies (7) regarding setting Science Based Targets and registering these targets with the Science Based Targets initiative (SBTi).

Voting and Engagement activity and data continues to be tracked internally.

The Investment Manager continues to assess the environmental and social credentials of investee companies, and their governance practices.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Guinness Greater China Fund

Legal entity identifier: 6354002LFFIZOSQPA502

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics were promoted in the following manner:

Exclusions

The Fund did not invest in companies as per the Fund's exclusion policy, which included investing in companies directly involved in the design, manufacture or sale of cluster munitions and anti-personnel mines, and companies that generate more than 30% of revenues via thermal coal extraction or thermal coal power generation. A copy of Exclusion Policy can be found here [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Engagement

The Investment Manager undertook engagement activities, where relevant, to encourage investee companies to improve aspects of some or all of their environmental, social or governance practices. The Investment Manager voted proxies on behalf of portfolio holdings, where possible and when in the best interests of clients, for example we do not vote where there are restrictions on liquidity or share blocking. Voting results are published here quarterly: [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis, by the investment team. Each investee company was assessed against industry relevant material ESG factors, which can be different between industries. Therefore, we do not aggregate all ESG factors at the Fund level.

- ***How did the sustainability indicators perform?***

The indicators that follow covers the activity during the reporting period: 1st January 2024 to 31st December 2024.

Exclusions

0% of the Fund's holdings breached the Investment Manager's exclusion policy during the reporting period.

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund's exclusion policy.

Engagement

In the reporting period, the Investment Manager in relation to investments in the Fund:

- Participated in the Carbon Disclosure Project (CDP) non-disclosure campaign (NDC) and was lead signatory for the request to 6 companies.
- Following on from our participation as a co-signatory to the CDP Science Based Targets initiative (SBTi) campaign in 2023, we followed up again with our own separate engagement letter to the 13 holdings that still had not set a SBTi target following the 2023 initiative. These engagements are ongoing.

Engagement activity is tracked and recorded in the Investment Manager's Engagement Log on an ongoing basis.

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis.

● **...and compared to previous periods?**

We continue to meet our exclusion policy requirements.

We continue to support the Carbon Disclosure Project (CDP) non-disclosure campaign and led engagements on 6 companies in the reporting period. We continued to engage with companies (13) regarding setting Science Based Targets and registering these targets with the Science Based Targets initiative (SBTi).

Voting and Engagement activity and data continues to be tracked internally.

The Investment Manager continues to assess the environmental and social credentials of investee companies, and their governance practices.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Guinness Emerging Markets Equity Income Fund

Legal entity identifier: 635400MSP6BFVEUJJU77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics were promoted in the following manner:

Exclusions

The Fund did not invest in companies as per the Fund's exclusion policy, which included investing in companies directly involved in the design, manufacture or sale of cluster munitions and anti-personnel mines, and companies that generate more than 30% of revenues via thermal coal extraction or thermal coal power generation. A copy of Exclusion Policy can be found here [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Engagement

The Investment Manager undertook engagement activities, where relevant, to encourage investee companies to improve aspects of some or all of their environmental, social or governance practices. The Investment Manager voted proxies on behalf of portfolio holdings, where possible and when in the best interests of clients, for example we do not vote where there are restrictions on liquidity or share blocking. Voting results are published here quarterly: [<https://www.guinnessgi.com/about-us/responsible-investment#tab-literature>].

Integration

The Investment Manager assessed the environmental and social credentials of investee

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis, by the investment team. Each investee company was assessed against industry relevant material ESG factors, which can be different between industries. Therefore, we do not aggregate all ESG factors at the Fund level.

- ***How did the sustainability indicators perform?***

The indicators that follow covers the activity during the reporting period: 1st January 2024 to 31st December 2024.

Exclusions

0% of the Fund's holdings breached the Investment Manager's exclusion policy during the reporting period.

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund's exclusion policy.

Engagement

In the reporting period, the Investment Manager in relation to investments in the Fund:

- Participated in the Carbon Disclosure Project (CDP) non-disclosure campaign (NDC) and was lead signatory for the request to 4 companies.
- Following on from our participation as a co-signatory to the CDP Science Based Targets initiative (SBTi) campaign in 2023, we followed up again with our own separate engagement letter to the 8 holdings that still had not set a SBTi target following the 2023 initiative. These engagements are ongoing.

Engagement activity is tracked and recorded in the Investment Manager's Engagement Log on an ongoing basis.

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis.

● ***...and compared to previous periods?***

We continue to meet our exclusion policy requirements.

We continue to support the Carbon Disclosure Project (CDP) non-disclosure campaign and led engagements on 4 companies in the reporting period. We continued to engage with companies (8) regarding setting Science Based Targets and registering these targets with the Science Based Targets initiative (SBTi).

Voting and Engagement activity and data continues to be tracked internally.

The Investment Manager continues to assess the environmental and social credentials of investee companies, and their governance practices.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are not considered at present.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

Largest investments	Sector	% Assets*	Country
Broadcom	Information Technology	3.5%	United States
Bajaj Auto	Consumer Discretionary	3.2%	India
Novatek Microelectronics	Information Technology	3.1%	Taiwan
Hon Hai Precision Industry	Information Technology	3.0%	Taiwan
Ping An Insurance	Financials	2.9%	China
Taiwan Semiconductor	Information Technology	2.9%	Taiwan
Haitian International Holdings	Industrials	2.9%	China
China Merchants Bank	Financials	2.9%	China
Catcher Technology	Information Technology	2.9%	Taiwan
Shenzhou International	Consumer Discretionary	2.8%	China
Elite Material	Information Technology	2.8%	Taiwan
Credicorp	Financials	2.8%	Peru
Zhejiang Supor	Consumer Discretionary	2.8%	China
Nien Made Enterprise	Consumer Discretionary	2.7%	Taiwan
Suofeiya Home Collection	Consumer Discretionary	2.7%	China

*weights including cash

Asset allocation is calculated as an average of quarter end holdings.

The above sectoral allocation is based on the Global Industry Classification Standard (“GICs”).

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

Asset allocation is calculated as an average of quarter end holdings.

98.9% of the investments of the Fund attained the promoted environmental or social characteristics during the period covered by the periodic report.

The remainder of the investments disclosed under “#2 Other” was held as cash used for the purpose of ancillary liquidity.

There are no minimum environmental or social safeguards.

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

Sector	Weight
Information Technology	26.2%
Financials	23.7%
Consumer Discretionary	20.9%
Consumer Staples	17.5%
Health care	5.0%
Industrials	2.9%
Communication Services	2.7%
Cash	1.1%

The above is calculated as an average of quarter end holdings. Cash is included in the calculation.

The above sectoral allocation is based on the Global Industry Classification Standard (“GICs”).

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

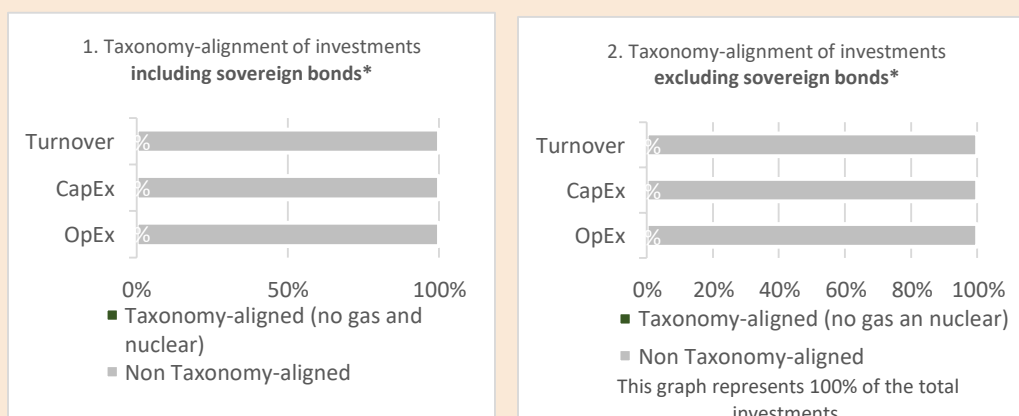

Yes:

☐ In fossil gas ☐ In nuclear energy

No

☒

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**
0% of NAV.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
N/A.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments. Taxonomy-aligned investments are a sub-set of sustainable investments.

What was the share of socially sustainable investments?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments in cash held as ancillary liquidity.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund’s exclusion policy.

The Investment Manager undertook engagements covering environmental and social practices for Fund holdings, where relevant.

The Investment Manager assessed and reviewed the environmental and social credentials of investee companies, and their governance practices. These assessments were conducted on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

N/A

*weights including cash

Asset allocation is calculated as an average of quarter end holdings.

The above sectoral allocation is based on the Global Industry Classification Standard ("GICs").

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Asset allocation is calculated as an average of quarter end holdings.

98.5% of the investments of the Fund attained the promoted environmental or social characteristics during the period covered by the periodic report.

The remainder of the investments disclosed under "#2 Other" was held as cash used for the purpose of ancillary liquidity.

There are no minimum environmental or social safeguards.

● ***In which economic sectors were the investments made?***

Sector	Weight
Information Technology	41.2%
Industrials	27.4%
Health care	26.9%
Financials	3%
Cash	1.5%

The above is calculated as an average of quarter end holdings. Cash is included in the calculation.

The above sectoral allocation is based on the Global Industry Classification Standard (“GICs”).

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

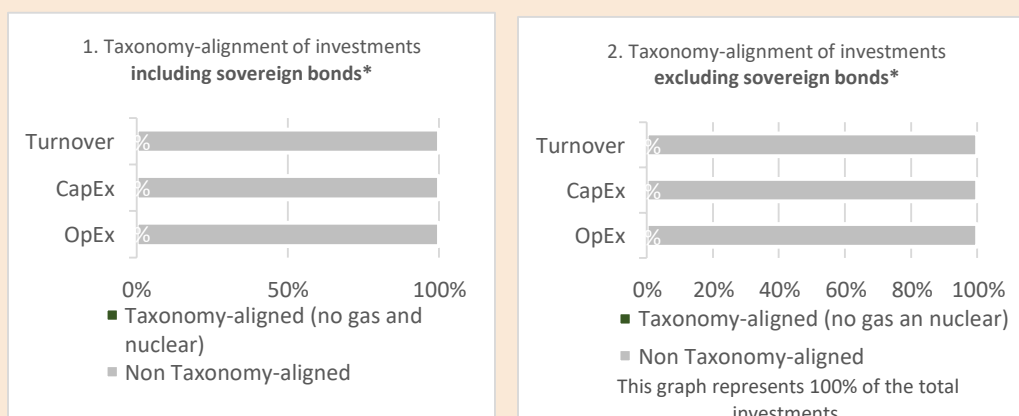

Yes:

☐ In fossil gas ☐ In nuclear energy

No

☒

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**
0% of NAV.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
N/A.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments. Taxonomy-aligned investments are a sub-set of sustainable investments.

What was the share of socially sustainable investments?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments in cash held as ancillary liquidity.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund’s exclusion policy.

The Investment Manager undertook engagements covering environmental and social practices for Fund holdings, where relevant.

The Investment Manager assessed and reviewed the environmental and social credentials of investee companies, and their governance practices. These assessments were conducted on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

N/A

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Guinness China A Share Fund

Legal entity identifier: 6354006YE51J5L8UH313

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics were promoted in the following manner:

Exclusions

The Fund did not invest in companies as per the Fund’s exclusion policy, which included investing in companies directly involved in the design, manufacture or sale of cluster munitions and anti-personnel mines, and companies that generate more than 30% of revenues via thermal coal extraction or thermal coal power generation. A copy of Exclusion Policy can be found here [https://www.guinnessgi.com/about-us/responsible-investment#tab-literature].

Engagement

The Investment Manager undertook engagement activities, where relevant, to encourage investee companies to improve aspects of some or all of their environmental, social or governance practices. The Investment Manager voted proxies on behalf of portfolio holdings, where possible and when in the best interests of clients, for example we do not vote where there are restrictions on liquidity or share blocking. Voting results are published here quarterly: [https://www.guinnessgi.com/about-us/responsible-investment#tab-literature].

230

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis, by the investment team. Each investee company was assessed against industry relevant material ESG factors, which can be different between industries. Therefore, we do not aggregate all ESG factors at the Fund level.

- ***How did the sustainability indicators perform?***

The indicators that follow covers the activity during the reporting period: 1st January 2024 to 31st December 2024.

Exclusions

0% of the Fund's holdings breached the Investment Manager's exclusion policy during the reporting period.

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund's exclusion policy.

Engagement

In the reporting period, the Investment Manager in relation to investments in the Fund:

- Participated in the Carbon Disclosure Project (CDP) non-disclosure campaign (NDC) and was lead signatory for the request to 14 companies.
- Following on from our participation as a co-signatory to the CDP Science Based Targets initiative (SBTi) campaign in 2023, we followed up again with our own separate engagement letter to the 11 holdings that still had not set a SBTi target following the 2023 initiative, in addition to 1 other company that was not part of the campaign. These engagements are ongoing.

Engagement activity is tracked and recorded in the Investment Manager's Engagement Log on an ongoing basis.

Integration

The Investment Manager assessed the environmental and social credentials of investee companies, and their governance practices, in particular with respect to company-specific material ESG factors and overall disclosure through qualitative and quantitative analysis of company and third-party data. Examples of ESG factors included, but were not limited to, climate and environmental indicators, social and human capital factors, management remuneration and incentivisation, carbon intensity and carbon transition risk, and governance factors. These assessments were conducted on an ongoing basis.

● ***...and compared to previous periods?***

We continue to meet our exclusion policy requirements.

We continue to support the Carbon Disclosure Project (CDP) non-disclosure campaign and led engagements on 14 companies in the reporting period. We continued to engage with companies (12) regarding setting Science Based Targets and registering these targets with the Science Based Targets initiative (SBTi).

Voting and Engagement activity and data continues to be tracked internally.

The Investment Manager continues to assess the environmental and social credentials of investee companies, and their governance practices.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

N/A. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are not considered at present.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

Largest investments	Sector	% Assets*	Country
Shenzhen Mindray Bio-Medic	Health Care	3.5%	China
Shenzhen Inovance Technology	Industrials	3.5%	China
Sino Wealth Electronic	Information Technology	3.5%	China

Haier Smart Home	Consumer Discretionary	3.4%	China
NARI Technology Co Ltd	Industrials	3.4%	China
G-Bits Network Technology	Communication Services	3.4%	China
Zhejiang Jingsheng Mechani	Information Technology	3.3%	China
Jiangsu Hengli Hydraulic	Industrials	3.3%	China
Hongfa Technology	Industrials	3.3%	China

*weights including cash

Asset allocation is calculated as an average of quarter end holdings.

The above sectoral allocation is based on the Global Industry Classification Standard ("GICs").

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

Asset allocation describes the share of investments in specific assets.

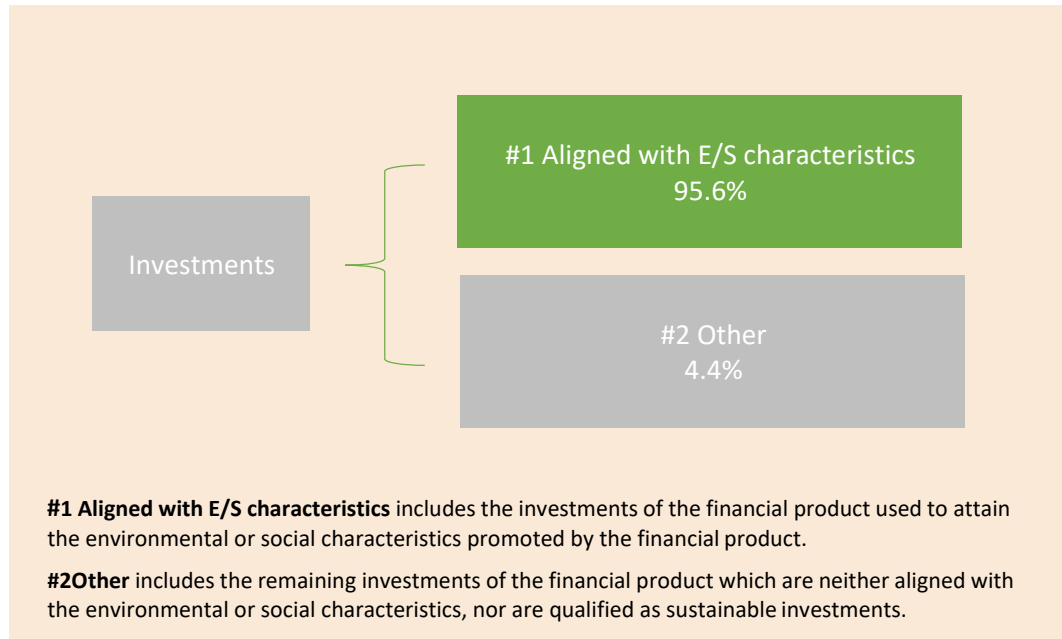

What was the asset allocation?

Asset allocation is calculated as an average of quarter end holdings.

95.6% of the investments of the Fund attained the promoted environmental or social characteristics during the period covered by the periodic report.

The remainder of the investments disclosed under "#2 Other" was held as cash used for the purpose of ancillary liquidity.

There are no minimum environmental or social safeguards.

● ***In which economic sectors were the investments made?***

Sector	Weight
Industrials	25.0%
Information Technology	21.7%
Consumer Discretionary	18.2%
Materials	9.7%
Consumer Staples	7.4%
Health care	6.8%
Cash	4.4%
Financials	3.4%
Communication Services	3.4%

The above is calculated as an average of quarter end holdings. Cash is included in the calculation.

The above sectoral allocation is based on the Global Industry Classification Standard (“GICs”).

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**
0% of NAV.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
N/A.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments. Taxonomy-aligned investments are a sub-set of sustainable investments.

What was the share of socially sustainable investments?

0% of NAV. The Fund promotes environmental and social characteristics but does not commit to make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments in cash held as ancillary liquidity.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Exclusion screens were run using independent third-party sources on a quarterly basis to confirm investee companies did not breach excluded activity per the Fund’s exclusion policy.

The Investment Manager undertook engagements covering environmental and social practices for Fund holdings, where relevant.

The Investment Manager assessed and reviewed the environmental and social credentials of investee companies, and their governance practices. These assessments were conducted on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

N/A
