Who we are

At Janus Henderson our mission is to help clients define and achieve superior financial outcomes through differentiated insights, disciplined investments, and world-class service. This means being ever mindful of the futures of the millions of lives that our thinking and our investments help shape. Our diverse client base and robust balance sheet allow us to offer financial strength and stability with which to help investors achieve their objectives.

The human connection matters in all that we do. Teams across Janus Henderson come together every day to deliver outcomes for our clients – and their clients – that make a difference. We are proud of this responsibility as we fulfil our purpose of 'Investing in a brighter future together'. The goals we set, the strategy we create, and the way that we work are all shaped with this ultimate objective in mind.

Why us

Choosing Janus Henderson means benefiting from:

Differentiated insights

- We are proud of our deep-rooted research culture, which has underpinned our 89-year track record of investing.
- Janus Henderson's investment teams meet thousands of companies each year. Insight from these meetings combined with proprietary analysis results in original views that shape our investment positioning.
- With 340 investment professionals around the world, we benefit from a range of perspectives that we test and share as we seek to differentiate between the winners and losers on behalf of our clients.

Disciplined investments

- Our investment teams set clearly defined objectives and processes to deliver long-term risk-adjusted returns. We value the trust clients place in us and are disciplined in staying true to our investment style through all market conditions.
- We apply robust controls to ensure that risk taken is in accordance with client expectations and investment manager expectations. We have more than 150 experts in our risk and compliance teams.

World class service

- We offer global reach with our broad network of investment and client service specialists. This is combined with the responsiveness, tailored solutions, and personal touch of a local partner.
- Understanding the challenges our clients – and their clients – face globally, and working in partnership, means we can provide support as we blend our best ideas and capabilities to define appropriate tailored outcomes.
- We seek to contribute to clients' understanding and decision-making – we share knowledge through published insights, at events, and by actively participating in debate on the future of investing.

Directors' Report

Introduction

Janus Henderson Horizon Fund (the 'Company') is an open-ended investment company organised as a société anonyme under the laws of the Grand Duchy of Luxembourg and qualifies as a SICAV. The Company was incorporated in Luxembourg on 30 May 1985 pursuant to the Luxembourg laws of 10 August 1915 on commercial companies (as amended) and is qualified as a UCITS under Part 1 of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment, as amended (the 'Law').

The Company is structured as an umbrella company which has the ability to issue various classes of shares. Each sub-fund within the umbrella is treated as an independent entity, with its own portfolio of investments, objective and investment policy.

Shareholders of each sub-fund are entitled only to the wealth and yield of the sub-fund to which they have subscribed. Each sub-fund bears the appropriate amount of liabilities attributable to it and the commitments entered into in the name of one sub-fund covered solely by the assets of that sub-fund. The Company will not be liable as a whole to third parties. Separate accounts and records are maintained for each sub-fund.

Financial Statements

The Board of Directors of the Company (the 'Board') presents its report and the interim financial statements for the period ended 31 December 2023.

A copy of the latest annual and interim financial statements may be obtained upon request from either the offices of the companies registered as Distributors or from the Registered Office of the Company and at www.janushenderson.com.

The Net Assets at 31 December 2023 amounted to USD 13.58 billion.

At the period end, the Company consisted of 26 active sub-funds.

The list of changes in the portfolio are available at the registered office of the representative (for sub-funds distributed in Switzerland).

Other information

- Details of share class launches, closures and share class name changes can be found on pages 242 to 243.
- European Growth Fund changed its investment objective and policy and was renamed Pan European Mid and Large Cap Fund on 10 November 2023.
- Asian Dividend Income Fund investment objective and policy changed on 10 November 2023 to clarify that the income return assessment period is 5 years.
- Global Multi-Asset Fund closed on 21 November 2023.
- Pan European Equity Fund merged into the Pan European Mid and Large Cap Fund (formerly European Growth Fund) on 7 December 2023.

The Directors may from time to time close or merge sub-funds as well as add further sub-funds with different investment objectives, subject to the approval of the Commission de Surveillance du Secteur Financier (CSSF). Notifications will be provided to shareholders on closure and merger of sub-funds, which are also subject to review by the CSSF.

Macro risks

The Investment Manager continues to monitor closely macro risks, including geopolitical risks, such as the ongoing impact of the Russia/Ukraine conflict and the conflict in the Middle East, market risks, such as stresses in the banking sector and the higher inflationary and interest rate environment. We have established processes to be able to respond timely to changes. We have well-established and tested business continuity and crisis management processes in place, which cover a large number of disruptive scenarios, including cyber threats and market events. The Investment Manager also has embedded market risk monitoring processes, including modelling potential stressed market scenarios, to help inform our investment decisions.

Corporate Governance Statement

The Board adheres to the Association of the Luxembourg Fund Industry (ALFI) code of conduct for Luxembourg investment funds. The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds.

On behalf of the Janus Henderson Horizon Fund Board, I would like to thank you for your continued support.

Kevin Adams
Chairman
27 February 2024

The information stated in the report is historical and is not representative of future results.

Market review

For the period 1 July 2023 to 31 December 2023

Overview

Global equities, as measured by the MSCI World Index, increased by 7.8% in US Dollar terms during the reporting period as inflation cooled and major central banks appeared to reach the end of their interest rate hiking campaigns. Markets surged in November – global equity benchmark the MSCI All Countries World Index (ACWI) Index achieved its best monthly performance in three years – and again in December, as investors grew increasingly hopeful that policy makers would cut rates in 2024. However, bouts of uncertainty regarding the direction of monetary policy and anxiety about a global economic downturn dampened sentiment during the period. The yield on US benchmark 10-year Treasuries was little changed overall, having hit a 16-year high in October before reversing course in the final two months of the period on growing expectations that interest rates would be cut in 2024, which also pulled down the US Dollar. Oil prices were only modestly higher, helped by gains in the first half of the period as producers cramped supply, although prices came under pressure towards the period end due to an uncertain demand outlook.

Equities

Continental Europe

In Europe, the MSCI Europe ex UK Index was higher by 3.1% in Euro terms as inflation cooled and markets predicted that monetary policy makers would turn dovish sooner than previously predicted. The positive mood at the end of the period helped the Stoxx Europe 600 Index hit a near two-year high in December. Anxiety about a possible economic downturn – Eurozone Gross domestic product (GDP) contracted by 0.1% over the third quarter, following 0.1% growth over the second quarter – the initial belief that borrowing conditions would remain tight for longer, conflict in the Middle East and China's uncertain economic recovery unsettled investors, however. The European Central Bank (ECB) raised its deposit rate to an all-time high of 4.0% in September and left it on hold thereafter, although in December, it stressed that borrowing conditions would remain tight for as long as needed to contain inflation. However, investors appeared sceptical about its stance, particularly as Eurozone annual inflation slowed to a more than two-year low of 2.4% in November – within reach of the ECB's 2% target – which compared with July's 5.3% level. The Euro strengthened slightly against Sterling and the US Dollar during the period.

UK

In the UK, the FTSE All Share Index rose by 5.2% in Sterling terms as slowing inflation heightened investor expectations that major central banks would loosen monetary policy in 2024. The Bank of England (BoE) increased its benchmark rate just once, by 25 basis points (bps) to 5.25% in August – a 15-year high – and announced its first pause in almost two years in the following month. The BoE continued to warn that monetary policy could remain tight for an extended period, although investors speculated that this appeared less likely as pricing pressures eased. The annual inflation rate hit a more than two-year low of 3.9% in November, down from 6.8% in July. The UK economy contracted by 0.1% over the third quarter, following no growth over the previous quarter, heightening anxiety about a possible recession. More positively, a data revision at the end of September showed that GDP had recovered more strongly than previously thought from the pandemic. Sterling was only slightly stronger against the US Dollar, helped by the latter's weakness, particularly in November.

US

US stocks, as measured by the S&P 500 Index, advanced 8.0% in US Dollar terms on optimism that the US Federal Reserve's (Fed) interest rate hikes had come to an end and that it would shift to cuts in 2024. The market rally in the final two months of the period helped the S&P 500 Index near to a record high in December. Some strong corporate results also boosted sentiment, while the threat of a government shutdown, and some hawkish comments from the Fed earlier in the period limited the overall gains. Consumer prices initially quickened, reaching 3.7% year on year in both August and September, before slowing to 3.1% in November – a five-month low. The Fed raised interest rates once, to a 22-year high of 5.5% from 5.25%, and although its tone was somewhat hawkish for most of the period – largely because of the economy's resilience – it suggested in December that it could ease borrowing conditions in 2024. Third-quarter GDP grew by a stronger-than-expected 4.9%, on an annualised basis, which was up from 2.1% in the second quarter. The US Dollar weakened against a basket of currencies, with the prospect of looser monetary policy pulling down the US currency to a five-month low in December.

Japan

In Japan, the Tokyo Stock Exchange First Section Index (TOPIX) strengthened by 4.5% in Japanese Yen terms as the Japanese currency weakened, which boosted exporters, and on interest from foreign investors and corporate governance reforms. The positive sentiment helped the benchmark Nikkei 225 Index hit a 33-year high during the period. In November, the government announced a US\$113bn stimulus package to boost the economy. The Bank of Japan (BoJ) maintained its highly accommodative monetary policy stance, despite persistent speculation it was about to change course after making minor adjustments to its yield curve controls. The annual core inflation rate, which excludes fresh food prices, moderated to 2.5% in November from 3.1% in July. The economy shrank by an annualised 2.9% in the third quarter, following second-quarter growth of 3.6%, highlighting the challenges facing the government and monetary authorities. Although the Japanese Yen strengthened against the US Dollar during the period – the gains were largely due to the faltering US currency – it remained weak in an historical context.

Market review (continued)

For the period 1 July 2023 to 31 December 2023

Asia

In Asia, the MSCI All Countries (AC) Asia Pacific ex Japan Index was up by 4.4% in US Dollar terms as the improved global mood boosted sentiment. Chinese shares fell as the country's economic recovery remained shaky – although third-quarter GDP growth was higher than expected – while stimulus measures fell short of expectations, deflationary pressures grew and anxiety about the debt-laden property sector persisted. South Korean stocks moved higher as an end-of-year rally, supported by continued economic growth, outweighed sharp losses in October, when a weakening outlook for battery makers and anxiety about inflation unnerved investors. Equities increased in Taiwan as gains in the key technology sector and interest from foreign investors spurred a rally and despite uncertainty ahead of January's presidential election. Australian shares also rose, with the benchmark S&P/ASX 200 Index achieving its best monthly performance in more than three years in December. In November, the Reserve Bank of Australia announced its first rate hike since June, citing worries about inflation, although pricing pressures eased during the period.

Emerging Markets

The MSCI Emerging Markets Index gained by 4.9% in US Dollar terms as investors' risk appetite increased. In India, shares rose as continued economic expansion and interest from overseas investors helped the benchmark Nifty 50 and S&P BSE Sensex indices hit all-time highs. Relatively robust economic growth and interest rate cuts boosted sentiment in Brazil, where the benchmark Bovespa Index also hit record levels. Argentina's market advanced on investor hopes that the new president, Javier Milei, would revitalise growth by pursuing policies of economic liberalisation. South African stocks moved higher, although third-quarter GDP contracted by more than expected, largely because of continued power cuts. Turkey's market strengthened as domestic investors sought to protect their money from rampant inflation, while a series of large interest rate rises to combat the pricing pressures signalled the Turkish central bank's return to monetary policy orthodoxy.

Fixed Income

The JPM Global Government Bond Index returned 3.2% in US Dollar terms, with yields on core government bond markets – including the US, UK, Germany and Japan – generally mixed. The yield on US benchmark 10-year Treasuries rose over much of the period – it hit a 16-year high in October amid anxiety about tighter-for-longer borrowing conditions. However, it reversed course in the final two months of the period on growing expectations that the Fed would cut rates in 2024 and finished little changed overall. The yields on 10-year UK gilts and German bunds fell (prices rose, reflecting their inverse relationship), while the equivalent yield on Japanese government bonds increased – it hit a 10-year high in October – as investors predicted the BoJ would, ultimately, change policy. Corporate credit markets, as measured by the Barclays Global Aggregate Corporate Bond Index, performed positively as investors took advantage of relatively high yields to buy corporate bonds.

Commodities

Oil prices were only modestly higher as output cuts by major producers tightened supply, while uncertainty about demand exerted downward pressure towards the end of the period. US crude benchmark West Texas Intermediate, which hit a 2023 high above US\$90 per barrel in September, ended the period up by about 1%. Spot gold prices increased and reached an all-time high in December on expectations that major central banks would loosen monetary policy in the new year. The prospect of interest rate cuts and a weakening US Dollar helped copper prices to rise mildly.

Emerging Markets Debt Hard Currency Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Bent Lystbaek, Jacob Nielsen, Sorin Pirau and Thomas Haugaard

The fund returned 6.95% (Net), 7.40% (Gross) based on Class H2 in US Dollar terms over the period under review, compared with a return of 6.73% in the JP Morgan EMBI Global Diversified Index and a return of 7.40% in the Target Index + 1.25%, US Dollar terms.

Government bond yields were mixed during the reporting period. The US 10-year Treasury yield rose from 3.84% to 3.88% and the German 10-year bund yield fell from 2.39% to 2.02%. Yields generally moved higher in the first three months, driven by growing expectations of 'higher-for-longer' interest rates. US Treasuries were weak, with the 10-year yield reaching a 16-year high of 4.57% at one point. However, government bonds rallied strongly during the final two months of the period, as investors took heart from cooling inflation and a growing belief that terminal interest rates had been reached. The Fed raised interest rates once, and although its tone was somewhat hawkish for most of the period, it suggested in December that it could ease borrowing conditions in 2024. The ECB raised its deposit rate to 4.0% in September and left it on hold thereafter.

Emerging market sovereign debt returned 6.73% in US Dollar terms during the period, which can be divided into an underlying US Treasury return of 2.12% and a spread return of 4.51%. At the index level, sovereign spreads tightened by 48 bps. The credit spreads of investment-grade countries tightened, in aggregate, by 16 bps, while those of high-yield ones narrowed by 103 bps.

All regions performed positively on a spread return basis, led by Africa, while the weakest growth was in the Middle East. On a country basis, the strongest performers at the market level on a total return basis were Venezuela, Pakistan, El Salvador and Tunisia, while the weakest were Bolivia, Lebanon, Panama and Ethiopia.

As overall credit spreads tightened by 48 bps or more than 10% at the benchmark level, the fund's underweight position in credit spread risk compared with the benchmark caused a substantial drag on relative performance. However, the aggregate impact of country allocation and security selection was significantly positive.

In terms of country allocation, we gained on overweight positions in Tunisia, Sri Lanka, Georgia, supranational financial institutions, Bahamas, Mongolia and Colombia, as we did on underweight positions in Bolivia, Panama, Peru, and Chile. However, overweight positions in Romania, Uzbekistan and Costa Rica detracted, as did underweight allocations to Argentina, Pakistan, South Africa, Turkey and El Salvador.

In terms of security selection, we benefited from bond picking in Mexico, Ukraine, Oman, El Salvador, Colombia, Indonesia, Kenya, the United Arab Emirates and Romania, while security selection in Chile, Pakistan, Uzbekistan and Tunisia detracted from relative performance. During the period, we added to shorter maturity high-yielding bonds, and also bought some protection through emerging market credit default swaps to offset some of the credit risk.

The US economy has continued to show resilience, although leading indicators do not point to a strong revival. Given the current pace of disinflation, the Fed appears to have reached terminal rates (the highest level in the monetary tightening cycle) and seems likely to cut rates in 2024. In our view, the US Dollar is biased to weaken, unless US growth surprises positively compared with the rest of the world. Thus, our base case is that these factors will be a supportive tailwind for emerging market debt. Recession risks remain elevated, although central banks have ample ammunition to ease policy/cut rates if required given the inflation trajectory.

China's economic growth is slowing, although we expect a 'muddle-through' scenario, not a crisis. We expect the Chinese authorities to remain path dependent and adopt more targeted fiscal policies to support balance sheets. However, the property market slump remains a headwind. The negative spill-over effects from China on emerging markets will be more muted than the past, we believe, although it could weigh more heavily on specific commodity exporters.

Our base case is that the emerging market/developed market economic growth differential will shift higher, given the widening disparity in expected global growth dynamics. A slowing global economy weighs on emerging markets, although overall credit quality for the Emerging Market Bond Index constituents has shown a small improvement based on our forward-looking credit ratings model. Many countries have ample scope for monetary policy easing due to the higher starting point for real rates and improved inflation dynamics, and emerging markets are generally less interest rate sensitive than developed economies.

Another bright spot for 2024, in our view, could be market technical conditions, with demand/supply dynamics potentially turning more supportive. Higher all-in yields in fixed income should support demand from emerging market-dedicated investors and bring sequential improvement in flows. Yields on the asset class at high single digits offer a buffer against potential credit spread widening and boost total return prospects. We believe pockets of opportunity remain, and with that in mind, we continue to focus on maintaining the yield/carry in the portfolio through overweight positions in select high-yield issuers.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Emerging Markets Debt Hard Currency Fund

Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the JP Morgan EMBI Global Diversified Index by 1.25% per annum, before the deduction of charges, over any 5-year period.

The fund invests at least 70% of its assets in bonds of any quality, including high yield (non-investment grade) bonds in emerging markets and other debt securities denominated in hard currencies (e.g. USD, EUR, GBP). The fund may invest up to 30% in emerging market corporate bonds; 10% in distressed debt, 10% in contingent convertible bonds (CoCos), 10% in asset-backed and mortgage-backed securities (ABS and MBS) and 10% in unrated securities.

Where investments are made in assets in currencies other than the base currency of the fund, the fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The fund may invest in other assets including bonds of other types (including perpetual bonds), cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) including interest rate futures, bond futures, options, swaps (including total return swaps (up to 20%), interest rate swaps, credit default swaps) and forwards, with the aim of making investment gains or to manage the fund more efficiently.

The fund is actively managed with reference to the JP Morgan EMBI Global Diversified Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, however the geographical scope of the fund may have the effect of limiting the extent to which the fund will deviate from the index.

Strategy

The Investment Manager generates investment ideas through a proprietary assessment of sovereign credit risk which includes both quantitative and qualitative components. Country over/under-weights are identified by comparing the team's assessment of the level and trend of sovereign credit risk with the current market valuation (credit spread) of that country. Within a country, the security selection process seeks to identify superior risk-adjusted opportunities within the broad universe, including off-benchmark securities. The fund promotes environmental and/or social characteristics, which include the application of Greenhouse gas (GHG) intensity related criteria, support of anti-corruption initiatives for sovereign issuers.

Performance history

Fund & Benchmark		Since launch to 30 Jun 23 %	6 months to 31 Dec 23 %
Emerging Markets Debt Hard Currency Fund*	H2 USD (Net)	2.65	6.95
JP Morgan EMBI Global Diversified Index		3.29	6.73
Emerging Markets Debt Hard Currency Fund*	H2 USD (Gross)	3.11	7.40
JP Morgan EMBI Global Diversified Index + 1.25%		3.97	7.40

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

* On 19 December 2022, the Emerging Markets Debt Hard Currency Fund was launched.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Euro Corporate Bond Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Tim Winstone and Tom Ross

The fund returned 6.17% (Net), 6.60% (Gross) based on Class H2 in Euro terms over the period under review, compared with a return of 5.91% in the iBoxx Euro Corporates Index and a return of 6.71% in the Target Index + 1.5%, Euro terms.

Euro-denominated investment-grade corporate bonds generated a positive total return during the reporting period. Investor sentiment on the direction of interest rates dominated global fixed income prices, which fell during the first part of the period before recovering strongly on hopes that peak rates had been reached. In the summer months, the ECB, along with other major central banks, indicated that interest rates would need to stay higher for longer, which created a difficult environment for government bonds in particular. The ECB raised its key deposit rate by 25 bps in both July and September to reach a record high of 4.0% and left it on hold thereafter. Eurozone annual inflation started to slow more meaningfully in the autumn months, reaching an annual rate of 2.4% in November, close to the ECB's 2.0% target. Meanwhile, Eurozone GDP contracted by 0.1% over the third quarter.

Slowing inflation in other core economies, combined with a moderation in economic growth, ignited hope in November that global interest rates may have reached their peak. The ensuing government bond rally continued over the remainder of the period, galvanised by the Fed's December meeting where policy makers signalled 75 bps of rate cuts in 2024.

European investment-grade credit outperformed government bond markets. Despite softening economic growth, corporate bonds were surprisingly resilient during the earlier part of the period and also participated in the year-end rally.

The main driver of strong performance was security selection, while asset allocation also contributed to relative returns. The fund's above-benchmark interest rate (duration) exposure, although challenged for much of the period, delivered a positive contribution, notably in November and December.

At a sector level, the fund's overweight position in banks was the strongest performer as this area saw spread tightening ahead of most other sectors. The fund's basket of additional tier 1 (AT1) banking debt performed particularly well in the rally, with call dates announced for five out of the 11 issues. AT1s are a special type of subordinated, high-yielding debt issued by banks. Elsewhere, underweight allocations to industrial goods and transportation also worked well. By contrast, an overweight position in retail was hurt by issuer-specific weakness in the sector, while an underweight automotive exposure detracted as this area rebounded towards the end of the period.

At an individual issuer level, Icelandic banks Islandsbanki and Arion Banki, along with Swiss bank UBS, were among the best contributors to performance. Logicor Financing, a real estate company that specialises in logistics, also benefited relative returns. While real estate has been a significant beneficiary of the recent shift in interest rate expectations, investors also recognised that Logicor Financing has continued to deliver on expectations amid a challenging environment earlier in the period. Global Switch Finance was a top single-name contributor after its bonds rallied on a change-of-control rumour. Detractors included HSBC, which sold off on weaker sentiment towards Asia-exposed amid concerns about the outlook for economic growth in China. The allocation to CPI Property also weighed on returns, following news that Muddy Waters Research – a short-selling hedge fund – had bet against it.

The significant shift in interest rate expectations has prompted investors to price in an economic 'soft landing', although it is still unclear to us which path the economy will take in 2024. The speed and magnitude of interest cuts will be key and we expect volatility to remain elevated.

We are cautiously optimistic about the prospects for investment-grade credit in 2024, given the resilience of the US economy and as Eurozone inflation begins to approach target levels. Many large companies have already extended their debt maturity profiles and continue to have reasonably good interest cover ratios. However, we continue to see risks as credit fundamentals have gradually deteriorated against a backdrop of weakening economic growth. As a result of these tougher conditions, with weaker issuers facing increasing financing risks, our focus will remain on quality.

We also see elevated risks for the global economy, including the lagged impact of monetary policy tightening and heightened geopolitical tensions. This year is also significant for elections and we are cognisant of the uncertainty – and ensuing volatility – around the upcoming US presidential vote in particular. We believe rates will move a little lower, hence we have been comfortable to maintain the fund's marginal overweight duration exposure, although we recently moderated this. However, given the headwinds, and the strength of the recent rally, we will continue to leverage the expertise of our credit research team and focus on security selection as opposed to making large macroeconomic calls. While we took partial profits on the small credit beta overweight position into December's rally, we believe that spreads have the potential to tighten a little more. We continue to favour the prospects of bank debt as valuations remain attractive, while the banking model benefits from a higher interest rate regime.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Euro Corporate Bond Fund

Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the iBoxx Euro Corporates Index by 1.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in investment grade corporate bonds and other types of investment grade bonds, denominated in Euros. The fund may invest up to 20% of its net assets in total return swaps, and may invest in CoCos; and/or ABS and MBS.

The fund may also invest in other assets including bonds of other types from any issuer (including perpetual bonds), cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the iBoxx Euro Corporates Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to provide a total return in excess of that generated by the benchmark over a market cycle by investing primarily in Euro denominated investment grade rated corporate bonds. The investment process combines asset allocation views with rigorous fundamentally driven security selection from the credit analysts.

Euro High Yield Bond Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Tim Winstone and Tom Ross

The fund returned 7.47% (Net), 7.89% (Gross) based on Class H2 in Euro terms over the period under review, compared with a return of 7.33% in the ICE BofA European Currency Non-Financial High Yield Constrained Index (100% Hedged) and a return of 8.27% in the Target Index + 1.75%, Euro terms.

The European high-yield bond market delivered a positive return during the reporting period. Excess returns (versus government equivalents) were positive, while credit spreads tightened.

European high-yield credit spreads were volatile over the first three months, as persistently high inflation and strong macroeconomic data led to hawkish central bank commentary and expectations of 'higher-for-longer' interest rates. Spreads widened in October when sentiment was mired further by the interest rate outlook and the Israel/Hamas conflict. The market enjoyed a remarkable rally over the latter two months of the period, however, as investors took heart from further slowdowns in inflation and the growing belief that terminal interest rates had been reached. In December, the prospect of looser monetary policy in the US triggered fresh optimism among investors for an economic 'soft landing'. This caused high-yield credit spreads to tighten further in both Europe and the US.

European B rated bonds performed strongly, although all segments delivered positive excess returns, while CCC rated credit lagged. Financials underperformed non-financials, although this was mostly due to real estate, where spreads widened during the period. Banking was one of the best-performing sectors, while in non-financials, retail performed strongly. Spreads also tightened strongly in services and utilities, although they widened in leisure.

The main drivers of outperformance were security selection and sector allocation. The fund had an underweight credit beta exposure relative to the benchmark in the first half of the period, which detracted from returns. An underweight position in real estate and an overweight holding in banks added value, as did security selection in telecommunications, media, retail and utilities. However, security selection in basic industry, real estate and capital goods detracted.

Overweight positions in UK supermarket chain ASDA, where the bonds rallied as demand increased ahead of a potential refinancing, energy company Électricité de France, UK telecommunications firms United and logistics company Logisor Financing contributed. Positioning in the SFR and Altice complex, where the fund had an underweight position in SFR and overweight holding in Altice, also added value. SFR bonds underperformed after the company suffered from significant operational issues.

An overweight position in glass packaging company Ardagh Packaging Finance detracted from performance. Ardagh Packaging Finance was unable to recover from a disappointing earnings report and October's weaker sentiment in the packaging sub-sector. Overweight positions in real estate companies CPI Property, Heimstaden and SBB also hurt performance. Laboratory testing company Cerba detracted, as it struggled following the drop in testing demand in the post-COVID-19 world. The fund moved from an underweight credit exposure relative to the benchmark to a small overweight position.

High-yield bond markets have recently demonstrated an extraordinary ability to weather elevated geopolitical and macroeconomic uncertainty, deteriorating fundamentals and rising default rates – albeit from low levels – in both the US and Europe. However, it is unclear which path the economy will take in 2024. The speed and magnitude of interest rate cuts will likely be key to determining this, and we expect volatility to remain elevated.

Given the market moves, combined with weaker economic growth, we remain cautious about adding risk and believe there will be more compelling opportunities to add exposure in 2024. This is due to the diminished likelihood of the US going into recession, the rapid European disinflation trajectory, reasonable valuations (which are close to long-term averages) and an attractive yield environment, considering the trajectory of underlying rates. US and European consumers have stayed strong so far and real wage gains could protect individual and household finances, and thus consumer spending, in 2024. However, we also see genuine credit risks and think the market has been a bit complacent about the outlook for credit. The cost of servicing debt has risen in the wake of higher yields and may remain elevated.

Liquidity withdrawal and rate hikes have still fed through to money supply and bank lending standards. Stronger, larger companies have still been able to access capital, albeit at a higher price, with each refinancing coming at a premium. Credit fundamentals have gradually moved lower at the aggregate level and interest coverage has been good, although this has been changing as rates have moved higher.

There are also some macroeconomic risks, including the lagged impact of monetary policy tightening, uncertainty about the US presidential election and heightened geopolitical risk. Another concern is that the ECB may have overtightened in its fight against inflation.

Euro High Yield Bond Fund

Investment report for the period from 1 July 2023 to 31 December 2023 (continued)

High-yield bond issuance, particularly in Europe, remains low, which has supported the asset class. That said, we caution that the 'refinancing wall' is getting closer as more and more companies will likely look to refinance. This is something we are monitoring closely. High-yield bond valuations are much tighter following the recent rally. However, the yields on offer are still notably above average and provide some cushion against spread widening through more attractive carry.

In this macroeconomic and credit environment, we continue to draw on the expertise of our credit research team to select attractively priced, high-quality issues in more defensive sectors. We feel a discriminating approach to security selection will be crucial.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Euro High Yield Bond Fund

Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the ICE BofA European Currency Non-Financial High Yield Constrained Index (100% Hedged) by 1.75% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 70% of its assets in high yield (non-investment grade, equivalent to BB+ rated or lower) corporate bonds, denominated in Euros or Sterling. The fund may invest up to 20% of its net assets in total return swaps, and may invest in CoCos; and/or ABS and MBS. The fund may also invest in other assets including bonds of other types from any issuer (including perpetual bonds), cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the ICE BofA European Currency Non-Financial High Yield Constrained Index (100% Hedged), which is broadly representative of the bonds in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to provide a high overall yield and potential for capital growth by investing primarily in Euro and Sterling denominated sub investment grade rated corporate bonds. The investment process combines rigorous fundamentally driven security selection from the credit analysts, which is expected to be the largest driver of performance, with asset allocation views.

Global High Yield Bond Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Seth Meyer, Tom Ross, Tim Winstone and Brent Olson

The fund returned 7.36% (Net), 7.80% (Gross) based on Class H2 in US Dollar terms over the period under review, compared with a return of 7.65% in the ICE BofA Global High Yield Constrained Index (100% Hedged) and a return of 8.60% in the Target Index + 1.75%, US Dollar terms.

The global high-yield bond market delivered a positive return during the reporting period. Excess returns (versus government equivalents) were positive, while credit spreads tightened.

Global high-yield credit spreads were quite volatile over the first three months of the period, as sustained high inflation and strong macroeconomic data led to hawkish commentary from central banks and expectations of 'higher-for-longer' interest rates. Spreads widened in October, when sentiment was mired further by the interest rate outlook and the Israel/Hamas conflict. Global high-yield bonds enjoyed a remarkable rally over the latter two months of the period, however, as investors took heart from cooling inflation and the growing belief that terminal interest rates had been reached. In December, the prospect of looser monetary policy in the US triggered fresh optimism among investors for an economic 'soft landing'. This led to high-yield credit spreads in both the US and Europe tightening further.

Regionally, the US performed strongly on an excess return basis, followed by Europe, with both delivering positive excess returns. Emerging markets underperformed, driven mainly by weakness in China, where the property sector, in particular, weighed on sentiment.

Sector allocation and security selection contributed to performance. An underweight position in real estate and an overweight position in financial services added value, as did security selection in telecommunications, utilities and healthcare. However, security selection in media, capital goods and leisure detracted from performance.

The fund's marginal overweight exposure to interest rate duration relative to the benchmark detracted, as US Treasuries sold off during the first four months of the period.

At an individual issuer level, overweight positions in packaging companies Ardagh Packaging Finance and LABL hampered performance. The packaging subsector suffered from weaker sentiment, and Ardagh Packaging Finance was also hurt by a disappointing earnings report. An overweight position in real estate company CPI Property also detracted, as the real estate sector was particularly weak during the first few months of the period. More positively, the fund benefited from not holding companies that underperformed the market rally in the final two months. This included US telecommunications company Level 3 Communications and US network infrastructure provider CommScope. Overweight positions in US energy company NRG Energy, US residential mortgage company PennyMac Financial Services, US healthcare company Heartland Dental and UK energy company Électricité de France contributed to performance.

The fund moved from an underweight credit exposure relative to the benchmark to a small overweight position.

High-yield bond markets have, more recently, demonstrated an extraordinary ability to weather elevated geopolitical and macroeconomic uncertainty, deteriorating fundamentals and rising default rates – albeit from low levels – in both the US and Europe. However, it remains unclear which path the economy is going to take in 2024. The speed and magnitude of interest rate cuts will likely be key to determining this, and we expect volatility to remain elevated.

Given the market moves, combined with weaker economic growth, we remain cautious about adding risk and believe there will be more compelling opportunities to add exposure in 2024. This is due to the diminished likelihood of the US going into recession, the rapid European disinflation trajectory, reasonable valuations (which are close to long-term averages) and an attractive yield environment, considering the trajectory of underlying rates. US and European consumers have managed to stay strong and real wage gains could protect individual and household finances, and thus consumer spending, in 2024.

However, we see genuine credit risks on the horizon and think the market is a bit complacent about the outlook for credit. The cost of servicing debt has risen in the wake of higher yields and may remain elevated.

Liquidity withdrawal and rate hikes are still feeding through to money supply and bank lending standards. Stronger, larger companies can still access capital, albeit at a higher price, with each refinancing coming at a premium. Credit fundamentals are gradually moving lower at the aggregate level and interest coverage has been good, although that is changing as rates have moved higher.

There are also some macroeconomic risks, including the lagged impact of monetary policy tightening, uncertainty about the US presidential election and heightened geopolitical risk. In the US, we view the labour market as normalising, rather than a cyclical cause for concern. Yet, we still have no clarity on an equilibrium level for growth, inflation, employment and margins.

Issuance in high-yield bond markets remains low and is a positive market technical factor for the asset class. That said, we caution that the 'refinancing wall' is getting closer as more and more companies will likely look to refinance. This is something we are monitoring closely.

Global High Yield Bond Fund

Investment report for the period from 1 July 2023 to 31 December 2023 (continued)

High-yield bond valuations are much tighter following the recent rally. But the yields on offer are still notably above average and provide some cushion against spread widening through more attractive carry.

In this macroeconomic and credit environment, we continue to draw on the expertise of our credit research team to select attractively priced, high-quality issues in more defensive sectors. We feel a discriminating approach to security selection will be crucial in 2024.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Global High Yield Bond Fund

Investment objective and policy

The fund aims to provide an income with the potential for capital growth over the long term.

Performance target: To outperform the ICE BofA Global High Yield Constrained Index (100% Hedged) by 1.75% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in high yield (non-investment grade, equivalent to BB+ rated or lower) corporate bonds, in any country. The fund may invest up to 20% of its net assets in total return swaps, and may invest in CoCos; and/or ABS and MBS. The fund may also invest in other assets including bonds of other types from any issuer (including perpetual bonds), cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the ICE BofA Global High Yield Constrained Index (100% Hedged), which is broadly representative of the bonds in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to provide a high overall yield and potential for capital growth by investing primarily in sub investment grade rated corporate bonds across global high yield markets. The investment process combines rigorous fundamentally driven security selection from the credit analysts, which is expected to be the largest driver of performance, with asset allocation views at the fund and regional levels.

Strategic Bond Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Jenna Barnard, John Pattullo and Oliver Bardot

The fund returned 6.27% (Net) based on Class H2 in US Dollar terms over the period under review.

The reporting period was significant for financial markets. The 10-year US Treasury yield rose slightly, from 3.84% to 3.88%, although it soared to more than 5% in late October, then rallied all the way back into year end. This broadly mirrored economic activity and, indeed, the oil price, while equities did the mirror image. Perhaps, fading US fiscal stimulus and diminishing savings built up during the pandemic explain why economic growth was strong for a while but not sustained. In addition, perhaps much of the slowdown in inflation was due to the freeing up and normalisation of supply chains post-COVID-19, rather than excess demand.

The first four months of the period saw a continued nasty 'bear' market for global government bonds, which was part of a broader three-year bear market that had been in train since yields bottomed in August 2020. The driver was primarily US bonds, which served to drag government yields higher (prices were lower, reflecting their inverse relationship) across the globe. In addition, the BoJ continued to loosen/exit its yield curve control framework. Markets became concerned about excess bond supply and a 'higher-for-longer' interest rate narrative.

This impacted risk assets, which sold off in sympathy. In addition, the move was not driven by higher interest rate expectations but higher risk premiums (known as 'term premiums'). The shape of the sell-off, which was driven by longer-dated maturity bonds as two-year bond yields rose only modestly, is a rare one historically. The scale of this 'bear steepening' (a widening of the yield curve caused by long-term interest rates increasing at a faster rate than short-term rates) from a deeply inverted yield curve has only one historical comparison – and that was in 1969.

In late autumn, easing global inflation, moderating wage and employment growth, and a shorter-dated and lower-than-expected quarterly US Treasury refunding announcement all contributed to the rapid turnaround in the market. Bond yields fell as investors became increasingly confident that the Fed and other major central banks had reached a peak in interest rates, and that the only way from there was down. Further corroboration was gained from most central banks acknowledging that significant progress on inflation had been made and the peak was in view. Of course, the faster that inflation comes down, the faster rates will need to be cut in tandem to keep real rates level. To loosen monetary policy from the current restrictive state, rates would need to be cut faster than inflation slows.

Many investors were cautiously positioned, which exaggerated the not uncommon 'Santa Claus rally' in November and December. It seems that interest rates could be cut materially coming into the spring and summer of 2024. Equities rallied significantly and investment-grade and high-yield bond spreads (the difference in yield between equivalent government bonds) moved to very tight levels of 106 bps and 360 bps, respectively, marking the tightest levels they had been all period.

The fund underperformed the peer group, principally because we held fewer investment-grade and high-yield bonds than the average competitor. Corporate bonds outperformed sovereign bonds during the period. The fund's investment-grade bond holdings performed well, even though most of this was positioned towards the front and middle of the yield curve (and hence the duration contribution was lower than at other times in the cycle). We added extra interest rate sensitivity (duration) during the October sell-off. Further, we added to UK sovereign and corporate bonds during the period, as it appeared the UK inflation picture was not an anomaly, rather it just lagged other international markets. We marginally reduced duration sensitivity during December, taking profit on the favourable additional purchases made in the autumn. However, duration positioning remained very high.

We used interest rate futures across a number of jurisdictions that enabled us to achieve greater exposure to the middle and front of the yield curve, which was preferable. They were also more inexpensive and more liquid to trade than physical bonds.

Markets seemed to be euphoric at the end of 2023, given the rally premised on a forthcoming 'pivot' of monetary policy. Certainly, they seem to have priced in an immaculate disinflationary outlook. Credit markets appear priced for perfection and have entirely discounted an economic 'soft landing'. We are closely monitoring the lagged effects of monetary policy, which, having positively slowed inflation, is soon to hit the employment markets. The effect that tighter financial conditions have on unemployment typically lags by around two years, and we think the spring of 2024 will be a crucial time. The question is whether central banks can cut rates fast enough to glide into this elusive soft landing. Equities typically correlate closely with employment growth and rarely fall until the onset of a recession. The fund remains positioned in quality sovereign bonds and investment-grade bonds, with a high underlying interest rate sensitivity.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Strategic Bond Fund

Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth, over the long term (5 years or more).

The fund invests in bonds of any quality, including high yield (non-investment grade) bonds, ABS and MBS and distressed debt, issued by governments, companies or any other type of issuer, in any country.

The fund may invest up to 50% of its net assets in total return swaps. Where investments are made in assets in currencies other than the base currency of the fund, the fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The fund may also invest in other assets including perpetual bonds, convertible bonds, CoCos, company shares (equities), preference shares, cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed without reference to a benchmark. The Investment Manager has complete freedom to choose individual investments for the fund and to vary allocations between different types of bonds.

Strategy

The Investment Manager follows a flexible strategy that seeks to deliver total returns (capital appreciation and income) from investments across the entire spectrum of fixed income assets. Using careful macroeconomic research and credit analysis, the portfolio managers actively vary the allocation to different types of bonds to suit the prevailing economic environment.

Performance history

Total Return Bond Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Helen Anthony, John Pattullo and Jenna Barnard

The fund returned 4.33% (Net), 4.75% (Gross) based on Class H2 in Euro terms over the period under review, compared with a return of 1.93% in the Euro Short Term Rate (€STR) and a return of 3.21% in the Target Index + 2.5%, Euro terms.

Global government bond yields generally moved higher (prices fell, reflecting their inverse relationship) in the first half of the reporting period, driven by growing expectations that interest rates would stay higher for longer. US Treasuries were particularly weak, with the 10-year yield reaching a 16-year high of 4.57% at one point. In Europe, weak macroeconomic data and still-elevated inflation raised concerns about economic growth, and uncertainty about the ECB's interest rate hiking path. In the final two months of the period, government bonds rallied, as investors took heart from cooling inflation and the growing belief that terminal interest rates had been reached. Improved investor optimism towards the end of the period, on future interest rate cuts and the prospect of economic growth, helped corporate bonds outperform government bonds.

The Fed raised interest rates once, in July, and although its tone was somewhat hawkish for most of the period – largely because of the economy's resilience – it suggested in December that it could ease borrowing conditions in 2024. The ECB raised its deposit rate to an all-time high of 4.0% in September and left it on hold thereafter. The BoE increased its benchmark rate just once, by 25 bps to 5.25% in August – a 15-year high. The BoE continued to warn that monetary policy could remain tight for an extended period, although investors speculated that this appeared less likely as pricing pressures eased. The UK annual consumer inflation rate hit a more than two-year low of 3.9% in November, down from 6.8% in July. The UK economy contracted by 0.1% over the third quarter, following no growth over the previous quarter, heightening anxiety about a possible recession.

Over the period as a whole, the UK 10-year gilt yield fell by 85 bps to 3.54%, the German 10-year bund yield declined by 37 bps to 2.02%, while the US 10-year Treasury yield rose by 4 bps to 3.88%. Within credit, spreads of high-yield bonds and emerging market debt tightened by more than investment-grade bonds.

The fund has been positioned with higher duration (higher interest rate sensitivity) at the top end of the permitted range, on the expectation that government bond yields would fall. Over the period as a whole, this positioning was beneficial for performance, although the gains mainly came in the last two months of the period as government bond yields peaked in October and then rallied. The main contributors were positions in the US, Germany, the UK and Australia. In September, we switched some duration out of the US into Germany given the sharp growth divergence between the regions.

The fund's investment-grade bond holdings also aided performance, even though most of this was positioned towards the front and middle of the yield curve (and hence the duration contribution was lower than at other times in the cycle). Sterling sovereign bonds and corporate bonds outperformed other developed markets. The fund's exposure to floating rate ABS and MBS was a smaller positive contributor, driven by 'carry'. We continued to add to higher-quality bonds, including agency mortgages, which reflected relative valuations compared with investment-grade corporate debt, still-elevated recession risks and our expectation that asset classes more correlated to the rate cycle would perform more strongly.

Credit spreads continued to tighten during the period. The fund did not benefit from the outperformance of higher beta areas of fixed income markets, such as high-yield corporate debt and emerging markets, given the low allocation to these areas.

The catalyst for this recent bond rally has been a growing realisation that terminal rates occurred months ago, driven by continued strong progress in core disinflation. This is now a game changer for central bank policy as the next move will likely be rate cuts, so the debate has become when and how many. We believe these cuts could be as early as March for the Fed and the ECB. We expect this environment to be supportive for sovereign bonds, which so far have lagged historical moves lower in yields as central banks have begun to shift to easing mode. Corporate credit spreads have been moving lower and appear priced for a more optimistic outcome in 2024. A turndown in employment is normally the fundamental catalyst for a more 'risk off' environment and for a repricing in credit/equities. Our base case is still that 2024 provides an opportunity to lock into wider corporate bond spreads, so the theme is one of patience.

Total Return Bond Fund

Investment objective and policy

The fund aims to provide income and capital growth, exceeding that of cash, over a rolling 3-year period.

Performance target: To outperform the €STR by at least 2.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests in bonds of any quality, including high yield (non-investment grade) bonds and distressed debt, of governments, companies or any other type of issuer in any country. The fund may invest up to 30% of its assets in ABS and MBS, including up to 10% of which may be high yield (non-investment grade, equivalent to BB+ rated or lower). The fund may invest up to 20% of its assets in China onshore bonds traded through Bond Connect. The fund may invest up to 50% of its net assets in total return swaps.

Where investments are made in assets in currencies other than the base currency of the fund, the fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The fund may also invest in other assets including CoCos, perpetual bonds, cash and money market instruments.

The fund makes extensive use of derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the €STR, as this forms the basis of the fund's performance target. For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison. The Investment Manager has complete discretion to choose investments for the fund and is not constrained by a benchmark.

Strategy

The Investment Manager follows a highly flexible, 'go anywhere' approach to investing in bonds globally, without restrictions of a benchmark. The disciplined investment process considers the relative risks and potential returns from a wide variety of bond assets while seeking to maintain a moderate level of volatility.

* In the case of derivative instruments, Unrealised Gains/Losses refers to the net unrealised profit or loss and is used in the calculation of the fund Net Asset Value. Any differences in the percentage of Net Assets figures are the result of roundings.

As at 31 December 2023, the counterparties for each category of derivatives held by the fund were as follows:
Futures: UBS
Swaps: Citi
Forward Foreign Exchange: Barclays, BNP Paribas
Forward Foreign Exchange (Hedged): JPMorgan Chase

Investment Fund Managers

Michael Kerley and Sat Duhra

The fund returned 6.81% (Net) based on Class H2 in US Dollar terms over the period under review, compared with a return of 10.03% in the MSCI AC Asia Pacific ex Japan High Dividend Yield Index, US Dollar terms.

Asia-Pacific markets remained rangebound until the final two months of the reporting period. Expectations of peaking interest rates, amid softer inflation and employment data and supportive comments from the Fed, led to forecasts for loosening monetary policy in 2024. As a result, Asian equities rallied in the latter part of the period as investors welcomed the prospect of rate cuts. In addition, Asian currencies strengthened against the weakening US Dollar, which supported investor sentiment in the region. However, China underperformed the broader regional market for a number of reasons. Firstly, a meeting between US President Joe Biden and his Chinese counterpart, Xi Jinping, which was aimed at improving relations, did not yield any tangible progress. Secondly, there was no sign of a resolution to the structural issues that have faced China's economy, including indebted local governments, collapsing property volumes, weak consumption trends and record high youth unemployment. While there were announcements to address the weakness of the property market and measures to stimulate demand, they failed to impact the overriding negative sentiment.

India, South Korea and Taiwan were the strongest markets during the period. In India, positive macroeconomic data, coupled with private-sector capital expenditure and government investment, supported the longer-term growth outlook. South Korea and Taiwan performed strongly given the significant weighting of information technology (IT) constituents in both markets. The sector benefited from a shift towards growth stocks as discount rates fell with lower bond yields. The emergence of themes such as artificial intelligence (AI) also supported the move, given the critical components manufactured by companies in these markets. IT, along with materials, was one of the best performing sectors.

The fund benefited from its underweight position in China, although this was offset, to a degree, by an underweight holding in Taiwan, which performed strongly. However, an overweight position in India was a key contributor, led by strong performances from utility holdings NTPC and Power Grid. Electricity demand grew strongly while expectations increased that the incumbent infrastructure-focused BJP party would remain in power following better-than-anticipated wins during state elections. Lenovo was the second-highest contributor after NTPC following the expected trough in personal computer volumes and the prospect of AI driving a rebound in hardware demand. No exposure to Chinese banks was a key positive given the high benchmark weighting, with banks considered candidates for 'national service' in providing support to weak property groups. The fall in the lithium price was negative for the fund's holding in Pilbara Minerals, which was the key detractor during the period. Continued lacklustre economic data and the risk of a deflationary environment were negative for our holdings in China, with ANTA Sports weak as consumer names were out of focus. The impact of not owning Fortescue was a significant negative contributor given the strength of iron ore prices.

The fund continued to increase its positioning in India with the addition of two IT services sector companies, HCL Technologies and Infosys. The strength of contract wins, what we viewed as attractive valuations and a focus on shareholder returns were key positives. We added a position in HDFC Bank, a high-quality Indian franchise that aims to double its branch network, with a period of weak sector performance creating an opportunity to acquire a traditionally expensive growth name. We added two insurance companies in South Korea, DB Insurance and Samsung Fire & Marine Insurance, on expectations of an improved competitive landscape and what we deemed to be attractive valuations. We sold the position in Santos given rising execution risks and project costs and an unfavourable court ruling on the commencement of a key project. We reduced the fund's exposure to Chinese consumers by selling JD.com and Li Ning given concerns about domestic consumption trends.

As the probability of a severe recessionary environment recedes in developed markets, the fact that many Asian central banks have paused interest rates for some months hands the region an advantage in terms of moving swiftly to loosen monetary policy if required. In our view, this would provide stimulus to already attractively priced equities.

Asian equity valuations continue to look attractive to us relative to global equities and have already witnessed a sharp downgrade in earnings ahead of developed markets. Inflationary pressures also remain less pronounced in the region. We are more confident about the outlook for dividends, considering the excess cash being generated and the low level of dividends paid out compared with earnings. We remain focused on domestically orientated companies with strong cash flows and what we see as sustainable and growing dividends.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Asian Dividend Income Fund

Investment objective and policy

The fund aims to provide an income in excess of the income generated by the MSCI AC Asia Pacific ex Japan High Dividend Yield Index over any 5 year period with the potential for capital growth over the long term (5 years or more).

The fund invests at least two-thirds of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in the Asia Pacific region (excluding Japan) and may include China A-Shares. The fund may also invest in other assets including companies outside this region, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk, to manage the fund more efficiently, or to generate additional income for the fund.

The fund is actively managed with reference to the MSCI AC Asia Pacific ex Japan High Dividend Yield Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's income target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager aims to capture the income and capital growth potential of companies in Asia, one of the world's fastest-growing regions. The strategy looks to tap into the region's strong structural growth opportunities and the shift toward a more progressive dividend culture. The disciplined, value-driven investment process places an emphasis on dividend growth and high-yielding companies.

Asian Growth Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Daniel J. Graña and Matthew Culley

The fund returned 1.88% (Net), 2.53% (Gross) based on Class H2 in US Dollar terms over the period under review, compared with a return of 4.21% in the MSCI AC Asia Pacific ex Japan Index and a return of 5.26% in the Target Index + 2%, US Dollar terms.

Asian market equities delivered positive returns during the reporting period, despite bouts of volatility as investors tried to assess the outlook for global economic growth and inflation. Stocks generally declined during the third quarter of 2023 as the prospect of additional central bank interest rate hikes kept upward pressure on global rates. A weaker-than-expected post-pandemic economic recovery in China also weighed on investor sentiment. Stocks delivered a strong fourth-quarter rally as evidence of cooling inflation fuelled investor hopes that major central banks may pause or even reduce interest rates in 2024. This led to falling bond yields, which provided a tailwind for equity performance. Most markets delivered positive returns during the period, with India and Australia generating the strongest performance in US Dollar terms. Stocks in Hong Kong and China lagged the broader index with negative returns.

Stock selection detracted from relative performance, while country allocation was a positive contributor.

The fund's relative performance benefited from an underweight exposure to China, although several individual Chinese holdings were detractors. These included Linklogis, which provides supply chain financing for small and medium-sized businesses. In addition to economic headwinds, the company faced uncertainty about reduced technology-related capital spending by banks, a critical consumer of its products. As a result, the stock declined.

Australia-based materials company Allkem was another detractor. Allkem supplies lithium chemicals to end markets such as electric vehicle manufacturers. The shares suffered due to a slowdown in US electric vehicle sales and supply/demand dynamics in Europe that led to weaker lithium prices. We saw these as short-term issues and believed Allkem was well placed as the electric vehicle market has continued to underpin lithium demand.

Kalyan Jewellers India was a top positive contributor to relative performance. The Indian jewellery store chain continued to execute well, and it reported better-than-expected sales and profitability. These results helped raise market sentiment around the company's strategy of new store development through a franchise model, a transition it hoped would reduce the business' capital intensity. We believed Kalyan Jewellers India was well positioned as jewellery retail trade has continued to formalise.

Indian online travel agent MakeMyTrip was another strong performer. The stock rose on the company's better-than-anticipated financial results, which balanced strong revenue growth and improved profitability. The company's efforts to invest heavily in the business over recent years, including during the COVID-19-related downturn, have started to bear fruit as travel volumes have normalised. In addition, MakeMyTrip has been able to expand its share of a rebounding market. We liked the company's dominant position in the online travel space and its exposure to India's growing travel sector, which has been supported by rising consumer incomes.

We are cautiously optimistic about the outlook for global economic growth even as we recognise uncertainty about central bank policies, which could affect the cost of capital in Asian markets. We are closely monitoring macroeconomic and policy developments in China, which could have broader implications for the global economy. We see risks attached to an increasingly complex geopolitical environment, as potential conflicts, legislative changes and electoral results could have reverberations for global economic growth, inflation and trade policy.

Despite these sources of uncertainty, we remain optimistic about the outlook for Asian emerging markets relative to developed economies, where economic growth remains relatively slow, policy rates relatively elevated and valuations for many stocks near historical highs. By contrast, most emerging markets have generally seen more accommodative monetary policy and improving economic trends, at least outside of China. We are also seeing exciting innovations in emerging markets, as visionary companies have worked to improve economic efficiencies, expand access to healthcare and address the global climate crisis through electrification and green energy initiatives. We are also excited about pro-market reforms in several markets, with India standing out due to demographics, corporate governance and transparency. We have been encouraged by the country's recent infrastructure investments and changes to the bankruptcy code that may increase economic productivity. As we look to take advantage of such opportunities, we continue to pay close attention to company and country fundamentals and corporate governance. We believe this strategy could lead to favourable long-term outcomes for our investors.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Asian Growth Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI AC Asia Pacific ex Japan Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least two-thirds of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in the Asia Pacific region (including the Indian subcontinent and Australasia, but excluding Japan). Companies will have their registered office in or do most of their business (directly or through subsidiaries) in this region. The fund may invest up to 20% of its assets in China A-Shares. The fund may also invest in other assets including companies outside this region, investment grade government bonds, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI AC Asia Pacific ex Japan Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to identify quality companies and capture growth in the dynamic and fast-growing Asia Pacific region through different market conditions. The investment process is driven by stock selection, based on in-depth research, resulting in a high-conviction portfolio.

Euroland Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Manager

Nick Sheridan

The fund returned 6.36% (Net) based on Class H2 in Euro terms over the period under review, compared with a return of 3.03% in the MSCI EMU Net Return EUR Index, Euro terms.

Stock selection within the fund is based on the belief that operational characteristics drive the share price over the longer term and that by buying high return stocks at a discount to the market, we can outperform – ‘quality value’, for want of a better term. Really, it is just the compounding effect of capital allocation reflected in stocks, enhanced by buying them when they are inexpensive relative to these returns. Investor sentiment can clearly influence valuation multiples, although dislocations from a fair value caused by ‘fear and greed’ are, in our opinion, an opportunity rather than a threat.

Thinking of the fund as a company, we believe it would be seen as a ‘fallen angel’. That is, a company that in the past had good growth opportunities, as exhibited by an above-market return on equity (ROE), but which is now viewed as unlikely to maintain this growth/return profile, as exhibited by a below average price-to-earnings (P/E) multiple. Assuming our stock selection is correct, in aggregate, this should prove not to be the case and the fund’s returns should grow quicker than those of the market. If this happens, the valuation multiple P/E should expand, so theoretically the fund is doubly leveraged to the upside.

Performance during the reporting period benefited from the fund’s underweight exposure to the consumer discretionary sector.

In terms of individual holdings, we saw good relative performance from the positions in Solvay, a chemicals company that underwent corporate reorganisation; BE Semiconductor Industries, a producer of assembly equipment to the semiconductor industry on the back of good results; Stellantis, an automotive manufacturer that produced good results and benefited from its geographic end market exposure; CRH, a construction company that has moved its main listing to the US and consequently saw its P/E multiple expand; and Indra Sistemas, a Spanish IT company that has been undergoing a change of business model. On the other hand, the holdings in Mercedes-Benz, an automotive company (sold due to pricing competition from electric vehicles, led by Tesla); Kering, a luxury group (sold following weak demand and unclear future direction); Smurfit Kappa, a manufacturer of paper packaging products (sold due to an unattractively priced acquisition); Andritz, a supplier of equipment to the mining, hydropower and paper industries (sold on valuation grounds); and Koninklijke Ahold Delhaize a supermarket operator (reduced due to concern about a weakening business environment) all disappointed.

During the period, we slightly reduced the number of holdings in the fund. In addition to the above stocks (among others), we sold the holding in Bayer. In our view, Bayer appeared inexpensive on a sum-of-the-parts basis, although for this value to be realised, we believed that some reorganisation at the group (either internally decided on or externally pressured) was required. Although management recently changed, it did not seem that this was likely, hence the sale.

Stock purchases included Aena and Prysmian – all figures mentioned are to the last full year as at mid-December 2023.

Aena operates airports and provides airport management services. Cash incremental returns on assets (ICROA) over the past 10 years have been attractive, in our view, supporting the belief that capital allocation has been good over this period. Five-year returns were more variable, although this covered the pandemic and was understandable, in our view, given the nature of the business. Recent results have shown a strong recovery from its COVID-19 lows.

Prysmian manufactures both optical and electrical cables. While this does not sound like the most high-tech industry, impurities in the wires would demonstrably affect performance and customers want someone they can trust and someone who offers delivery on time. We thought the company looked well positioned given the need to both update and extend national electricity networks, together with other environment, social and governance-related demand. In our view, capital allocation looks to have added value, as measured by ICROA over both the 10 and five-year timeframes.

The long-term drivers of shareholder returns typically reflect a company’s operational returns. Shorter-term macroeconomic events can influence how investors feel – fearful or greedy – and hence the valuation level they are prepared to pay for financial assets. However, at the end of the day, it is our belief that the return profile of a company determines the fair value of its shares. At present the macroeconomic backdrop does not look particularly supportive for investor sentiment, although markets are anticipatory by nature. As interest rates look to have peaked, sentiment could become more positive quite quickly.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Euroland Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI EMU Net Return EUR Index, after the deduction of charges, over any 5 year period.

The fund invests at least 75% of its assets in shares (equities) and equity-related securities of companies, of any size, in any industry, in the Eurozone. Companies will be incorporated in or having their principal business activities in the Eurozone. The fund may also invest in other assets including companies outside the Eurozone, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI EMU Net Return EUR Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager follows a disciplined investment process that sets aside sentiment in order to benefit from market mispricing. The investment process combines 'bottom-up' (company-level) analysis with a qualitative overview that helps the team to control risk while seeking to maximise performance. The process seeks to construct a portfolio of companies with established track records that are priced at a level that does not reflect their intrinsic value or future prospects.

Performance history

Fund & Benchmark		1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22	1 year to 30 Jun 23	6 months to 31 Dec 23
		%	%	%	%	%	%
Euroland Fund	H2 EUR (Net)*	(0.38)**	(4.17)**	32.04**	(13.72)	22.29	6.36
MSCI EMU Net Return EUR Index		2.04	(5.55)	30.21	(13.82)	24.08	3.03

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 EUR is disclosed as it is the representative share class.

* The representative share class has changed from the A2 EUR to the H2 EUR share class with effect from August 2021.

** The performance history has been restated to reflect the H2 EUR share class.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Japan Opportunities Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Manager

Junichi Inoue

The fund returned 7.38% (Net), 7.97% (Gross) based on Class H2 in US Dollar terms over the period under review, compared with return of 6.99% in the TOPIX and a return of 8.07% in the Target Index + 2%, US Dollar terms.

Global equity markets navigated a challenging environment during the reporting period. Initially, markets were hampered by a sharp 25% rise in oil prices, stoking inflationary fears and prompting major central banks to persist with interest rate hikes. These factors, alongside strong US macroeconomic data, led to expectations of sustained higher rates, pressuring bond markets and pushing the US 10-year Treasury yield to a 16-year zenith. As the period progressed a shift in sentiment emerged. Global equity markets experienced a robust rally, underpinned by more favourable inflation data from the US, Europe and the UK, which revised investor expectations regarding future interest rate reductions. This optimism extended to bond markets, with significant gains and a decline in the US 10-year Treasury yield.

In Japan, the TOPIX saw modest gains of about 4% in Japanese Yen terms and 7% in US Dollar terms. As the inflation rate trended around 3%, the yield curve gradually steepened. The BoJ widened its yield curve control band, although kept its negative interest rate policy unchanged. Expectations of an interest rate gap between US and Japan resulted in volatile exchange rate. Lower-quality value stocks continued to perform strongly, buoyed by investor interest in low price-to-book stocks as the Tokyo Stock Exchange pushed for corporate reforms. In the fourth quarter, market sentiment improved, mirroring global trends, and quality and growth stocks regained favour, especially within the semiconductor sector.

The most significant contributor to performance was Shin-Etsu Chemical, as investors anticipated strong growth, aided by the semiconductor market's recovery and a rebound in US housing construction. Disco and other semiconductor equipment manufacturers also contributed positively, as the chip market showed signs of recovery. In contrast, healthcare sector performance was weak, and Daiichi Sankyo and Astellas Pharma were the biggest detractors as the market almost ignored strong development of their drug pipelines.

We established new positions in Canon Marketing Japan and Shimamura. Although these companies are in different sectors, their balance sheet structures and valuations looked similar. Pressured by corporate governance reform, we expected the companies to take some action on extremely conservative balance sheet management.

We sold the position in Fujifilm following good performance. We reduced the fund's stakes in several companies whose shares had enjoyed a substantial run.

Despite a robust performance in 2023, we maintain a favourable view of the risk/reward balance in Japanese equities, particularly considering the transformational changes taking place in corporate governance. The fundamentals remain solid, we believe. We expect corporate earnings to exhibit positive growth, thanks to a weaker Japanese yen and lower input costs, while companies have successfully managed to realign their margins through price increases. Wages are likely to grow at a rate higher than the Consumer Price Index, which has been a key point of debate in the market for sustained growth. Owing to strong market performance, share price valuations have risen from what we considered very attractive levels to still-attractive levels, as the market's P/E ratio has shifted to 15 times. We believe this level of valuation, with conservatively managed balance sheets, can be justified even without significant earnings per share growth.

The market does not seem to have been as selective, as the P/E ratio is within a very narrow range for companies operating in similar sectors. To us, this presents a great opportunity for stock pickers. We are also focused on governance improvement as a key value driver, as we believe it will lead to better capital allocation decisions. We have strong confidence in the stocks we own and will continue to focus on stock picking, which we expect to be a key determinant of fund performance.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Japan Opportunities Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the TOPIX by 2% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in Japan. The fund may also invest in other assets including cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the TOPIX, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to achieve long-term capital appreciation by investing in undervalued, cash-generative and capital-efficient businesses, which can create value for investors. The focus is on stock selection, which is a result of rigorous, fundamental research and a strict valuation discipline, and incorporates strong risk management. The fund is a diversified portfolio of companies across a variety of sectors, which the Investment Manager believes has the potential to perform well over time.

Performance history

Fund & Benchmark		1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22	1 year to 30 Jun 23	6 months to 31 Dec 23

Pan European Equity Fund

Investment report for the period from 1 July 2023 to 7 December 2023

Investment Fund Manager

Marc Scharz

The fund returned 1.45% (Net) based on class H2 in Euro terms between 1 July 2023 and 7 December 2023, when the fund merged into the Pan European Mid and Large Cap Fund (formerly European Growth Fund), compared with a return of 2.80% in the FTSE World Europe Index, Euro terms.

Pan European Equity Fund

Investment objective and policy as at 7 December 2023

The fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE World Europe Index, after the deduction of charges, over any 5 year period.

The fund invests at least 75% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in the European Economic Area (EEA) or the UK. Companies will have their registered office in the EEA or the UK. The fund may also invest in other assets including cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the FTSE World Europe Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager looks to invest in good quality large or mid-sized European companies capable of delivering a sustained or improving return on capital over the long term, with some tactical exposure to companies benefiting from a short-term market or stock-specific catalyst. The fund utilises a proprietary and adaptive screening tool based on fundamental research to deliver a comparable thesis for every stock under consideration, to help foster greater consistency and conviction in analysis and decision making. Smaller companies are not normally a significant focus of the portfolio.

Pan European Mid and Large Cap Fund (formerly European Growth Fund)

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Manager

Marc Scharzt

The fund returned 3.58% (Net) based on Class H2 in Euro terms over the period under review, compared with a return of 4.27% in the MSCI Europe Index, Euro terms.

The reporting period was a game of two halves, whereby the market narrative changed materially in the last two months of the period. Up to October, markets were preoccupied by the unfolding economic slowdown. However, the mood music turned positive in November and December as the ever-growing evidence of slowing inflation started to translate into more dovish tones from central banks. This narrative culminated with the Fed's communication at its December meeting, which the market interpreted as a signal that the 'monetary pivot' (i.e. from interest rate tightening to interest rate cutting) is around the corner. Against this backdrop, US and European bond yields initially surged to multiyear highs, before starting to compress markedly from mid-October (the US 10-year Treasury yield moved from a 4.9% peak in October to 3.9% by the end of December, while the yield on German 10-year bunds fell from 2.8% to 2%). While mid-caps underperformed large caps (by 100 bps, which took the tally for 2023 to -12%), the decline of yields has also stabilised the relative performance of mid-caps since early November.

The main positive contributors to the fund's returns were UPM-Kymmene, Munters, RELX and Zealand Pharma. UPM-Kymmene's financial results remained under pressure in the short term, although signs of improvement in the Chinese pulp market and the successful ramp-up of its new Uruguayan pulp mill were sufficient to trigger a relief rally. Munters performed strongly due to large order announcements for its data centre cooling equipment. Global information and analytics provider RELX's performance was driven by further solid delivery and, arguably, the market's realisation that it was not an AI 'loser'. Biotech company Zealand Pharma performed strongly because of positive sentiment towards its obesity drug pipeline.

The main detractors were Carlsberg, Argenx and Puma. Despite Carlsberg's sound fundamental performance, the share price drifted lower because of market worries about the brewer's sizeable exposure to China, a poor summer season for beer in Europe (i.e. too much rain) and a flagged management change that brought an end to the highly successful tenure of the previous chief executive officer/chief financial officer team. Argenx's share price pulled back after it suffered unexpected setbacks in its new drug pipeline. Sporting goods company Puma was another performance laggard, following cautious messaging from US peer Nike.

Given the fund's change from continental to pan-European (including the UK), we undertook some rebalancing trades. During December, the Janus Henderson Horizon Pan European Equity Fund's holdings were liquidated, and its assets were merged into this fund. Besides those trades, we initiated 12 new positions and exited 11. Among the new names were Daetwyler, Trigano and Qiagen. Daetwyler is a leading supplier of elastomer-based solutions to industries including healthcare. The shares have been under pressure as its COVID-19-related business (i.e. sealings for vaccines) unravelled and as it faced a surge in input costs that could only be passed on with a time lag. With these headwinds having largely played out, we believed that Daetwyler was well positioned, particularly given the heightened focus on obesity drugs. Trigano is the European leader in the motor home industry. While demand has been strong for a while, supply chain disruptions have hampered progress. Those appeared to be behind us and while the economic slowdown has raised some questions about demand for large ticket discretionary items, we liked its exposure to favourable demographics. While Qiagen offered exposure to the diagnostics market, the share price suffered from a COVID-19 hangover in 2023. However, we felt that earnings had sufficiently rebounded, which has allowed for underlying fundamentals to shine through.

We took profits and exited our long-standing position in German defence company Rheinmetall. The share price was up by more than 200% since the beginning of 2022 and we believed it was a good time to take a breather.

We are likely to be in the final phase of the interest rate hiking cycle, the main driver of the unfolding economic slowdown. While the debate around hard versus soft economic landing is difficult to call at this stage, rates have or are close to topping out, which should help establish the conditions for economic uncertainty to gradually dissipate in the coming quarters. We believe that the monetary tightening cycle and the resulting uncertainties were the main drivers for the significant, and occasionally indiscriminate, underperformance of mid-caps that has resulted in their material de-rating. The likely end of monetary tightening should allow the solid fundamentals of medium-sized companies in general and especially those in which we invest to shine through, creating more benign conditions for our approach. They believe the pronounced de-stocking activities that have undermined the underlying economics in many industries over the past year should be approaching their conclusion and offer some comparative tailwinds into next year. We have used the share price volatility around those temporary de-stocking-related demand disruptions to build various positions in structurally well positioned companies. Consistent with our core approach, the fund is set up in a balanced way in terms of factor/sector exposures, meaning relative performance is not dependent on a specific macroeconomic development.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Pan European Mid and Large Cap Fund (formerly European Growth Fund)

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI Europe NR Index, after the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, in any industry, in Europe (excluding UK). Companies will be located, listed or do most of their business in this region. The fund may invest in companies of any size but will normally have a strong bias towards medium sized companies. The fund may also invest in other assets including companies outside this region, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI Europe NR Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to identify companies with hidden quality by focusing on company profitability and the efficiency with which capital is used. The fund will have a bias to medium sized companies as these often have attractive niches, potential to grow, or could be potential takeover targets in the future. The Investment Manager takes a long term view, looking beyond short term data, while the risk management process focuses on identifying risks specific to the companies and industries in which the fund may be exposed rather than in relation to the wider market.

Performance history

Fund & Benchmark		1 year to 30 Jun 19 %	1 year to 30 Jun 20 %	1 year to 30 Jun 21 %	1 year to 30 Jun 22 %	1 year to 30 Jun 23 %	6 months to 31 Dec 23 %

MSCI Europe Index***		6.67***	(1.02)***	30.07***	(10.33)***	20.02***	4.27****

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 EUR is disclosed as it is the representative share class.

* The representative share class has changed from the A2 EUR to the H2 EUR share class with effect from August 2021.

** The performance history has been restated to reflect the H2 EUR share class.

*** From 10 November 2023, the fund benchmark changed from the FTSE World Europe ex UK Index to MSCI Europe Index. Past performance before 10 November 2023 is shown for the previous fund benchmark.

**** Performance is a blend of the old and new benchmark.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Asia-Pacific Property Income Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Tim Gibson and Xin Yan Low

The fund returned 3.46% (Net) based on Class H2 in US Dollar terms over the period under review, compared with a return of 3.35% in FTSE EPRA Nareit Developed Asia Dividend Plus Index, US Dollar terms.

It was a period of two halves. The higher-for-longer interest rate narrative took a turn midway, erasing more than 100 bps in the US benchmark 10-year Treasury yield, which ended the reporting period exactly where it started, at less than 4.0%. Asian property equities declined in the first half of the period, although they subsequently rebounded, ending up by 3.3%, with real estate investment trusts (REITs) outperforming developers. Australian REITs (+8.5%) led the region, with logistics and retail landlords performing the best. Japan (+7.1%) maintained its positive performance, with developers ahead of REITs. Japanese office REITs, which had been laggards for a while, enjoyed a rebound, however. Singapore delivered a +4.8% return, with industrial/logistics REITs maintaining the lead. Meanwhile, poor sentiment and a lacklustre recovery saw continued weakness in Hong Kong, where property equities were lower by 10.3%, dragged down, in particular, by developers and landlords with stretched balance sheets.

The fund outperformed the index, with positive contributions from Singapore, Japan and Australia partially offset by Hong Kong's weak performance. At the stock level, the fund's holdings in Singapore-listed Digital Core REIT, Australian logistics owner Goodman and Japanese developer Mitsubishi Estate were key contributors, while Hong Kong landlords Swire Properties and Hysan Development detracted.

We exited the holding in LaSalle Logiport REIT to add to Kenedix Office REIT and Japan Hotel REIT Investment, where we saw better opportunities. In Australia, we switched out of retail landlord Vicinity Centres into peer Scentre as we preferred the latter's higher-quality portfolio. We also took profits and exited the holding in Stockland REIT and added a new position in Mirvac, where we liked the apartment and prime office portfolio and what we deemed to be an attractive valuation. In Hong Kong, we switched out of Sun Hung Kai Properties and Hysan Development and added Sino Land given its net cash balance sheet and large dividend payment.

The recent change in narrative from the Fed, which signalled the potential end of interest rate hikes, has resulted in a significant adjustment in expectations for lower interest rates in 2024. The market has interpreted this view as a positive development and, if correct, would mark a change in sentiment for property equities, which have had a challenging few years.

We have already seen some rebound in pricing, although we note, at the time of writing, that valuations are still inexpensive relative to private real estate (trading at a significant discount to net asset value) and to history. Fundamentals, however, have been mixed by country and sector and therefore we believe that stock selection will remain important.

The long-term benefit of owning listed real estate remains as the asset class offers lower correlations to many other asset classes. It also provides investors the benefit of portfolio enhancement by increasing risk-adjusted returns within a balanced portfolio. In our view, the real estate market continues to provide an attractive, reliable and growing income stream for investors, something we expect to be rewarded over time.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Asia-Pacific Property Income Fund

Investment objective and policy

The fund aims to provide a sustainable level of income, with a dividend yield higher than that of the FTSE EPRA Nareit Developed Asia Dividend Plus Index, plus the potential for capital growth over the long term (5 years or more).

The fund invests at least 75% of its assets in a concentrated portfolio of shares (equities) or equity-related securities of REITs and companies, of any size, which invest in property, in the Asia Pacific region. Securities will derive the main part of their revenue from owning, developing and managing real estate which in the view of the Investment Manager offer prospects for above average dividends or reflect such prospects. The fund may also invest in other assets including investment grade government bonds, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the FTSE EPRA Nareit Developed Asia Dividend Plus Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the fund's income target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to identify listed property companies and REITs which derive the main part of their revenue from the Asia Pacific region, that can deliver a regular and stable dividend with the potential for capital growth over the long term. The investment process follows a high conviction, 'bottom-up' (fundamental company analysis) approach, aiming to identify the best risk adjusted opportunities from across the investment universe.

Performance history

Fund & Benchmark		1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22	1 year to 30 Jun 23	6 months to 31 Dec 23
		%	%	%	%	%	%

FTSE EPRA Nareit Developed Asia Dividend Plus Index***		13.49***	(19.22)***	25.54	(14.83)	(6.00)	3.35

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

** The performance history has been restated to reflect the H2 USD share class.

*** From 1 July 2020, the fund benchmark changed from the FTSE EPRA Nareit Pure Asia total return net dividend Index (Capital constrained) to the FTSE EPRA Nareit Developed Asia Dividend Plus Index. Past performance before 1 July 2020 is shown for the previous fund benchmark.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Biotechnology Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Andy Acker, Daniel Lyons and Agustin Mohedas

The fund returned 11.74% (Net), 13.49% (Gross) based on Class H2 in US Dollars terms over the period under review, compared with a return of 7.62% in the NASDAQ Biotechnology Total Return Index and a return of 8.70% in the Target Index + 2%, US Dollar terms.

Biotechnology stocks ended the reporting period in positive territory, although they experienced volatility. The market declined on rising US Treasury yields and concerns about the impact of glucagon-like peptide 1 (GLP-1) weight-loss drugs on other biotechnology therapies, before rising as the Fed, signalled its monetary policy tightening cycle was coming to an end. Positive clinical data in large therapeutic areas and merger and acquisition (M&A) activity were additional tailwinds.

Cytokinetics was the top individual contributor. The firm's lead drug candidate, aficamten, is a small molecule myosin inhibitor being studied for hypertrophic cardiomyopathy, a condition that causes a thickening of the heart muscle and restricts blood flow. The stock soared after Cytokinetics reported positive phase 3 results that showed a statistically significant and clinically meaningful improvement in exercise capacity for patients. The results also increased speculation that the company could be an acquisition candidate.

ImmunoGen shares surged when AbbVie announced plans to buy the company for US\$10bn, representing a 95% premium to the prior closing price. ImmunoGen, in which Janus Henderson was among the top active holders, develops antibody drug conjugates (ADC), among the hottest areas of cancer research. One can think of an ADC as a precision-guided missile that brings chemotherapy directly to cancer cells with less collateral toxicity. Earlier in 2023, ovarian cancer patients taking ImmunoGen's Elahere saw a 33% reduction in mortality risk compared with chemotherapy – the first time an overall survival benefit had been achieved in chemotherapy-resistant ovarian cancer. AbbVie expected to complete the acquisition by mid-2024.

Other holdings weighed on performance, including PTC Therapeutics. The company is a specialist in small molecules that regulate ribonucleic acid splicing – that is, operating at the key transition stage between the genetic code and translation into proteins. PTC Therapeutics has leveraged this platform to create Evrysdi, a blockbuster (defined as having annual sales of US\$1bn or more) spinal muscular atrophy product sold by Roche, and Translarna, a medication conditionally approved in Europe for Duchenne muscular dystrophy. However, in September, regulators threatened to remove access after Translarna missed its primary end point in a confirmatory study (the drug did not show a benefit in a chosen subset of patients, although it showed a benefit in the overall trial population). PTC Therapeutics, which will appeal the decision, has shifted into cost-cutting mode, while it has other drug candidates.

Avadel Pharmaceuticals also detracted from returns. The stock declined after a lawsuit was levelled at the US Food and Drug Administration (FDA), challenging the approval and orphan drug exclusivity (ODE) designation for Avadel Pharmaceuticals' narcolepsy drug, Lumryz. In addition, investors reacted to data from several competing orexin receptor agonists being developed for narcolepsy, which could be a promising new mechanism for the disease. Should the FDA prevail, this would allow Lumryz to stay on the market and retain its ODE designation. Orexin agonists, which have been plagued by safety and tolerability issues in clinical trials, are likely years from launching. Lumryz sales and prescriptions continued to grow strongly, with quarterly revenues exceeding consensus estimates.

The fund retained an overweight allocation to small and mid-cap biotechnology stocks, although we favoured companies in the early commercial or late-stage development settings. In our view, these firms reduced clinical risk which had put them in a better position to raise capital in the current economic environment. More recently, some of these companies have been the targets of M&A activity, a trend we expect to continue. At the same time, we have added to large-cap biotechnology companies with strong free cash flows and whose stocks could continue to appeal to investors should economic growth slow further.

Following a sharp sell-off in mid-2023, biotechnology stocks rebounded as they benefited from optimism that the US interest rate hiking cycle was coming to an end. Positive clinical data and a surge of M&A activity also boosted sentiment.

We believe low valuations create room for upside. As US Treasury yields climbed in 2023, markets punished biotechnology firms that failed to meet clinical milestones or fell short in other ways. While some industry rationalisation was arguably needed – the sector saw a surge of new biotechnology companies funded during the pandemic, many without proof-of-concept data – we felt that many valuations had been pushed too low.

At the same time, innovation has accelerated, with the FDA approving a record 73 new therapies in 2023. Many of these drugs target large disease categories that could represent major new product cycles and drive revenue growth for the next decade. We expect no shortage of additional data and approvals in 2024.

M&A activity has picked up and could maintain momentum as cash-flush pharmaceutical companies seek to replace blockbuster products that will lose patent protection in the coming years. Growing market opportunities, including GLP-1s (for diabetes and obesity), ADCs, radiopharmaceuticals and cell therapy treatments for autoimmune diseases, could also tempt biopharmaceutical companies to break out their chequebooks. In short, we believe the set-up for biotechnology is compelling heading into 2024 and feel innovation, M&A and attractive valuations could combine to generate stronger returns for investors in the year ahead.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Biotechnology Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the NASDAQ Biotechnology Total Return Index by 2% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, which are biotechnology or biotechnology-related, of any size, including smaller capitalisation companies, in any country. The fund may also invest in other assets including bonds (including convertible bonds), preference shares, cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments) with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the NASDAQ Biotechnology Total Return Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager looks to identify innovative biotechnology companies addressing high unmet medical needs and trading at a significant discount to their intrinsic value. The team understands that success of drug development is binary in nature, creating wide disparities between winners and losers. The investment process leverages proprietary statistical models to analyse the probability of a company's success, focusing on products they believe can overcome the rigours of clinical development. Additional tools such as physician surveys, prescription models and scenario simulations attempt to more accurately predict commercial viability.

TER is calculated in accordance with AMAS.

The TER includes performance fees as at 31 December 2023.

The amounts earned in relation to performance fees for the period are shown in note 6 to the financial statements.

In some cases where the fund's outperformance target (before the deduction of charges) has been achieved, the return for an individual class may ultimately be below the benchmark return, if its TER exceeds the outperformance.

China Opportunities Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Manager

May Ling Wee

The fund fell 5.56% (Net), 5.03% (Gross) based on Class H2 in US Dollar terms over the period under review, compared with a fall of 6.27% in the MSCI Zhong Hua 10/40 Index and a fall of 5.10% in the Target Index + 2.5%, US Dollar terms.

Chinese equities trended downwards for the better part of the reporting period. Gains in July were fuelled by expectations that the Communist Party's politburo meeting would bring action to support the economy. However, these hopes met with disappointment. China's post-COVID-19 recovery was sluggish and volatile, with the rebound in economic momentum over the early part of third quarter of 2023 losing steam during the fourth quarter. During the period, measures to support the property market were announced. The cost of mortgage financing was reduced and mortgage credit was made more accessible to those looking to upgrade their homes. Banks were also asked to lend to developers on a so-called 'white' list. The August earnings season disappointed overall, although the internet sector stood out, leading with earnings and cash-flow delivery as well as stock buybacks. In early December, the politburo finally signalled that driving economic growth had gained prominence in the policy agenda. However, the pre-Christmas release of a draft consultation document on the management of online gaming practices was unexpected. This was especially so after policy makers' earlier attempts to stabilise and shore up growth and employment expectations, and private-sector confidence.

Personal computer (PC) brand owner Lenovo and education services provider New Oriental were the top contributors to performance during the period. Lenovo performed well on expectations linked to the launch of its AI PC in 2024 and as PC inventories were cleared. The shares also traded at attractive multiples with good dividend support. New Oriental continued to deliver strong earnings and cash flow, after successfully re-orientating its classes away from academic subjects to non-academic ones. The company also continued to buy back its stock.

Consumer stocks, such as sportswear brand Li Ning and brewer Tsingtao Brewery, were the largest detractors during the period. Chinese consumer sentiment remained weak due to concerns about income growth and employment. Li Ning suffered from high inventories and poor management of its wholesale channels after initial optimism that 2023 would see a strong recovery of its business. Overall weak consumption also impacted Tsingtao Brewery, whose sales, and the industry's more generally, fell short of expectations.

The fund initiated a position in automotive glass maker Fuyao Glass Industry and microchip designer MediaTek. We liked Fuyao Glass Industry's ability to raise product prices as it sold more one-piece glass products to electric vehicle and parts manufacturers. The highly consolidated industry backdrop was conducive for Fuyao Glass Industry's profit growth, while the company also paid an attractive dividend. In terms of MediaTek, the clearing of chip inventories in the smartphone and technology markets provided a much-improved pricing environment. The launch of the company's latest Dimensity chip received positive feedback while we believed it was well placed to diversify away from its reliance on smartphones.

We sold the fund's positions in Ping An Insurance and food delivery and life services platform Meituan. We were uncertain about the full extent of Ping An Insurance's property exposure, while the change in the competitive dynamics in the life services businesses continued to weigh on Meituan's profitability.

We expect the state of the property market, consumption (which, in turn, is dependent on income and employment) and the government's stance on the private sector to determine the performance of the Chinese asset class in 2024. The expected fall in US Dollar rates later in the year should support the Chinese market, we believe. However, the level of performance will ultimately depend on the economy. We expect the recovery to take time to emerge and that policy makers will need to do more to shore up growth and confidence. As before, cash flows are key in this weaker macroeconomic environment. While the macroeconomic backdrop remains challenging, we are still finding companies that are continuing to grow cash flows and earnings. Many of these companies are globalising their brands and businesses, paying dividends and buying back their stock while their valuations remain attractive.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

China Opportunities Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI Zhong Hua 10/40 Index by 2.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) of companies, of any size, in any industry, in China or Hong Kong. Companies will have their registered office in or do most of their business (directly or through subsidiaries) in this region. The fund may invest up to 50% of its assets in China A-Shares. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund may also invest in other assets including companies outside this region, investment grade bonds (including convertible bonds), cash and money market instruments.

The fund is actively managed with reference to the MSCI Zhong Hua 10/40 Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to identify companies that can generate unexpected earnings growth, at both an industry and stock level, not yet recognised by the broader market.

Performance history

	MSCI Zhong Hua 10/40 Index + 2.5%	****	****	33.77	(26.68)	(13.73)	(5.10)

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

** The performance history has been restated to reflect the H2 USD share class.

*** From 1 July 2020, the fund benchmark changed from the MSCI China Index to the MSCI Zhong Hua 10/40 Index. Past performance before 1 July 2020 is shown for the previous fund benchmark.

**** Target benchmark return is not quoted as the fund did not have a target prior to 1 July 2020.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Emerging Markets Innovation Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Matthew Culley and Daniel J. Graña

The fund returned 1.69% (Net) based on Class H2 in US Dollar terms over the period under review, compared with a return of 4.71% in the MSCI Emerging Markets Index, US Dollar terms.

We believe conditions remain highly supportive of an explosion in emerging market-led innovation, driven by digitised economies, large populations and a new era of policy support. And, importantly, we consider these drivers to be secular in nature. The forces behind future emerging market prosperity and earnings growth will be increasingly driven by the themes of innovation, deglobalisation and decarbonisation. While prior innovations were predominantly led by developed market companies and countries, we see this current wave as very different.

In line with our benchmark-agnostic approach, the key drivers of performance during the reporting period were stock specific. Detractors from performance included Chinese battery supplier Contemporary Amperex Technology (CATL), Indian financial technology (fintech) company One97 Communications and Chinese fintech business Linklogis. CATL is a battery manufacturer and leader in global supply, with around 40% of the global market share in lithium-ion batteries for electric vehicles. The company, which supplies many of the world's leading automotive manufacturers, has continued to outspend its competition on research and development (R&D). Despite this impressive lead and operational performance, the shares showed weakness given slower global sales of electric vehicles. One97 Communications owns the leading Indian mobile payments company, Paytm. The company reported solid financial performance, although it faced uncertainty after the Reserve Bank of India announced new restrictions that require lenders to maintain higher credit reserves. Linklogis also faced increased uncertainty, as Chinese regulators took steps to limit the ability of banks to share data with third-party data vendors. This significantly compromised the company's business model and, as a result, we took the decision to sell the holding.

The most significant positive contributor to performance was the fund's holding in Indian online travel agent MakeMyTrip, with the share price up by more than 70% during the period. The company has benefited from the structural growth of increased travel in India and its market leading position, while it has developed what we believed to be an attractive margin structure.

Other key contributions came from two of the fund's Latin American holdings: online retailer MercadoLibre and Brazilian digital marketing services company Globant. MercadoLibre continued to dominate Latin American e-commerce and has benefited from the network and scale effects of its investment in logistics, delivery and payment technology. After share price weakness in 2022 that was driven largely by general micro-concerns, the company showed continued strong growth and operational execution in 2023. This led to a near 90% rise in the share price during the period.

The fund's investment approach is long term in nature and we expect modest levels of turnover. During the period, we sold three holdings: Linklogis, LG Energy Solution (LGES) and JD Health, and initiated positions in Sichuan Kelun-Biotech Biopharmaceutical and Legend Biotech.

As noted, Linklogis was sold after changes to the regulatory environment challenged the company's business model. We exited LGES, a South Korean manufacturer of batteries and electric storage systems, given our increased concern about the competitive environment, particularly sales of electric vehicle batteries in Europe. We sold JD Health, a Chinese online medical and health services platform, given evidence of increased competitive and regulatory pressures.

Both Sichuan Kelun-Biotech Biopharmaceutical and Legend Biotech are innovative Chinese biotechnology companies that have, in our view, exciting pipelines of drugs to address cancers. They are both clear examples of the leadership that emerging market companies are providing in pioneering clinical research. Sichuan Kelun-Biotech Biopharmaceutical has a number of drugs in development, most notably in the oncology field with its antibody conjugating drugs and where it is partnered with Merck. Legend Biotech is a leader in cell therapy research and has both pipeline and commercial therapies.

Emerging market companies are playing a prominent role in shaping this next wave of economic development across the asset class, innovating and addressing a diverse array of end markets. We see attractive opportunities across the healthcare and biotechnology sectors; we see many companies highly aligned with the structural decarbonisation and digitisation trends; and we see many entrepreneurs addressing specific emerging markets' societal and environmental frictions, like the need for greater financial inclusion or simply more efficient business models.

For investors with a longer-term perspective, we believe that this new era of innovation across emerging markets will help reshape global equity investing and could provide exceptional capital appreciation for equity investors.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Emerging Markets Innovation Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI Emerging Markets Index, after the deduction of charges, over any 5 year period.

The fund will invest at least 80% of its net assets in equities or equity-related instruments of emerging markets companies. The fund will invest in companies focused on innovation, meaning companies that the Investment Manager believes:

- have, or will develop, products, processes, or services, that will provide advancements or improvements in their geographical region or consumer market; or
- rely on technology in connection with their operations or services.
- the fund may invest in companies of any size, including smaller capitalisation companies, in any industry. Equities may include China A-Shares, directly through the Stock Connect Programs and other eligible exchanges or indirectly through derivative instruments. Exposure to China A-Shares will not be more than 60% of the fund's net asset value. The fund may also invest in other assets including companies outside emerging markets. For treasury management and/or defensive purposes, the fund may hold cash, treasury bills pending reinvestment, investment grade fixed income instruments and money market instruments. The Investment Manager may use derivatives (complex financial instruments) (e.g. total return swaps) for investment purposes, to reduce risk or to manage the fund more efficiently. The fund is actively managed with reference to the MSCI Emerging Markets Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager constructs the fund's investment portfolio by identifying innovative emerging market companies that, in the Investment Managers view, have undiscovered potential for sustained earnings growth. These companies can be at various stages of development, establishing a foundation for market leadership in opportunities that are not yet proven or widely recognised; companies gaining market share with proven commercial traction; or companies with a clear leadership position and competitive differentiation and are simultaneously seeding new business opportunities.

Performance history

Fund & Benchmark		Since launch to 30 Jun 23	6 months to 31 Dec 23
		%	%
Emerging Markets Innovation Fund*	H2 USD (Net)	1.88	1.69
MSCI Emerging Markets Index		1.72	4.71

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

* On 10 May 2023, the Emerging Markets Innovation Fund was launched.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Global Multi-Asset Fund

Investment report for the period from 1 July 2023 to 21 November 2023

Investment Fund Managers

Oliver Blackburn and Nicholas Harper

The fund fell 0.87% (Net), 0.48% (Gross) based on Class H2 in Sterling terms between 1 July 2023 and 21 November 2023, when the fund closed, compared with a return of 2.06% in the Sterling Overnight Index Average (SONIA) and a return of 3.64% in the Target Index + 4%, Sterling terms.

Global equities, as measured by the MSCI All Country World Index, increased by 1.6% in US Dollar terms during the reporting period, following a late rally as investors became increasingly convinced about a peak in interest rates. The gains followed a decline for much of the period as US Treasury yields rose to new highs for the current economic cycle, before reverting towards the level at which they ended 2022.

The S&P 500 Index rose by 2.6% in US Dollar terms. Anxiety about how high the Fed would raise interest rates caused concern about valuations for much of the period, before increasing conviction that there would not be a further hike led to a late rally. Investors have become almost certain that July's rate increase to 5.5% was the final one in the Fed's hiking cycle, and by the end of the period, had started to price in cuts from mid-2024.

The MSCI Europe ex UK Index fell by 0.9% in Euro terms, as the late rally in risk assets was not enough to lift it into positive territory. The FTSE All Share Index finished 0.9% higher in Sterling terms, after mostly trading sideways. The ECB increased its deposit rate to 4.0% in September and the BoE raised its base rate to 5.25% in August, although these increasingly looked like they may have been the final increases of this cycle.

In Japan, the TOPIX was up by 4.3% in Japanese Yen terms, as a weakening Japanese currency helped to support earnings expectations. The MSCI Emerging Markets Index rose by 0.8% in US Dollar terms, helped by the increased investor appetite for riskier assets late in the period. However, Chinese equities continued to struggle as hopes for significant government stimulus faded and default concerns lingered in the property, trust company and local government financing spaces.

In fixed income, 10-year government bond yields finished higher in the US, Germany and Japan than where they started, although UK gilt yields fell. However, all major government bond yields were in decline by the end of the period as investors began to price interest rate cuts from the Fed, ECB and BoE in 2024. Credit spreads were little changed, with US investment-grade debt producing a negative return. High-yield markets generated positive returns due to the high level of income being paid.

To the end of October, the largest contributions to the fund's performance came from cash, given increased interest rates. Commodities and all areas of credit also contributed positively. However, this was offset by equities, government bonds, real assets and foreign exchange exposures. Equities contributed negatively across all regions in response to rising sovereign bond yields, with emerging markets detracting the most, followed by Japanese and US equities. Concerns about a higher peak in interest rates saw government bonds sell off across developed markets, and also weighed on real assets.

From the end of June to the end of October, the largest individual contributions came from cash, the iShares Physical Gold ETC, TOPIX index futures, the Janus Henderson Horizon Euro High Yield Bond Fund and the Janus Henderson Global Investment Grade Bond Fund. The largest detractors were US Dollar hedging, the FSSA Japan Equity Fund III Accumulation, US Treasury Ultra Bond futures and the Invesco Markets S&P 500 UCITS ETF.

High-level allocation changes were somewhat limited as we believed that the fund was already well set up to benefit from a shift towards recognising that interest rates were likely approaching their peak. The allocation to Japanese equities was trimmed as we became concerned about a reversal in the Japanese Yen, and the exposure to Chinese equities was reduced as geopolitical tensions and a lack of concerted stimulus pushed against our investment thesis. The allocation to real assets was topped up, given the relative value on offer compared with other asset classes. Finally, the fund was liquidated in early November in preparation for closure.

Following the surge in the late stages of 2023, we think markets look somewhat stretched as we enter 2024. Sentiment and positioning indicators suggest high levels of optimism among investors and a degree of overextension in many moves. A lot of the enthusiasm appears to be based on the increasingly dovish outlook for interest rates, with the Fed and ECB priced to start cutting rates in the second quarter. While the Eurozone has continued to show worrying signs, the US economy has remained relatively durable in the face of significant and rapid increases in interest rates. With markets already expecting a very dovish outcome, it is increasingly difficult to see where positive catalysts are likely to come from in the near term. Better-than-expected growth outcomes may delay interest rate cuts and weigh on valuations, although weaker data may raise the spectre of a harder landing that has yet to be definitively averted.

From 7 July 2023 Paul O'Connor no longer manages this fund.

The fund closed on 21 November 2023.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Global Multi-Asset Fund

Investment objective and policy as at 21 November 2023

The fund aims to provide a return, from a combination of capital growth and income, with volatility lower than that of equity market volatility, over the long term.

Performance target: To outperform the SONIA by 4% per annum, before the deduction of charges, over any 5 year period.

The fund invests in Collective Investment Schemes (CIS) (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified global exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property and commodities. The fund may also invest in other assets including shares (equities), bonds, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the SONIA, as this forms the basis of the fund's performance target. For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison. The Investment Manager has complete discretion to choose investments for the fund.

Strategy

The Investment Manager follows a strategy that combines strategic asset allocation (based on long-term return, risk and correlation expectations of various asset classes), dynamic asset allocation (giving the strategy the flexibility to reflect the team's shorter term market views and to react quickly in times of market stress), and careful underlying fund and instrument selection. The investment process is underpinned by a robust, multi-faceted approach to risk management. The strategy results in a portfolio with exposure to a wide variety of asset classes, both traditional and alternative, in the expectation that investors will benefit from the significant diversification benefits multi-asset investing provides.

Global Property Equities Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Guy Barnard, Tim Gibson and Greg Kuhl

The fund returned 6.37% (Net), 6.94% (Gross) based on Class H2 in US Dollar terms over the period under review, compared with a return of 8.56% in the FTSE EPRA Nareit Developed Index and a return of 9.65% in the Target Index + 2%, US Dollar terms.

Having seen weakness for much of the reporting period, property equities enjoyed a strong finish to 2023, gaining 23% from the lows at the end of October. Despite heightened geopolitical tensions, markets were supported by evidence of cooling inflation and the Fed signalling 75 bps of interest rate cuts in 2024.

Declining bond yields proved a substantial tailwind for the real estate sector, with notable strength in Europe, where property stocks rose by 28% (in US Dollar terms), led by Nordic markets and Germany. In the US, despite the real estate investment trust (REIT) sector's rapid ascent in the fourth quarter of 2023, not all stocks or sectors fared equally as names with high leverage and high short interest made more significant gains. Notably, office, mall and hotel landlords enjoyed stellar returns. More defensive sectors such as net lease, healthcare, data centres and manufactured housing lagged the broader recovery. Elsewhere, stocks in Hong Kong/China continued to lag meaningfully.

While REITs have led the rate-driven recovery, direct property markets remained relatively moribund, with transaction volumes down by about 50% on the period. Despite this, most real estate markets and sectors have continued to perform well operationally, although there has been some demand normalisation in some areas that saw the greatest strength through the pandemic and recovery. This has translated into further earnings and dividend growth for the sector in 2023. Importantly, REIT balance sheets remained very healthy, characterised by low leverage, well-staggered debt maturity profiles and still favourable access to capital. Encouragingly, evidence of REITs utilising their superior cost and access to capital to acquire high-quality real estate has begun to emerge, a trend we expect to continue in 2024.

The fund underperformed its benchmark, driven by stock selection. The key detractors were in the US, where an absence of more highly shorted, higher leveraged REITs impacted relative performance at the end of the year, notably in the office and retail sectors. Apartment landlords also lagged the rally, given supply concerns, while the holding in cold storage owner/operator Americold Realty Trust was impacted by negative sentiment around the demand impact from new weight-loss drugs. Conversely, we saw positive returns from Japanese developer Mitsui Fudosan, capping a strong period. Australia-listed, global logistics-focused company Goodman made gains, boosted by an additional growth driver from data centres. Canadian senior living-focused company Chartwell Retirement Residences also performed well, given an ongoing demand recovery. In Europe, Fastighets AB Balder in Sweden and Merlin Properties Socimi in Spain made positive contributions.

The fund remained close to index weightings at a regional level and, therefore, continued to provide well-diversified global exposure. We continued to focus on those companies with stronger balance sheets and areas where we saw earnings resilience in the face of a slowing economy. Notable changes included the addition of data centre owner Equinix REIT, given an improving demand backdrop aided by emerging AI demand; increased exposure to the US healthcare sector through Sabra Health Care REIT; and a repositioning in the fund's residential exposure. Here, we added US single-family landlord American Homes 4 Rent, apartment landlord AvalonBay Communities REIT and Canadian residential landlord Canadian Apartment Properties REIT. The fund exited Tricon Residential and house builder NVR given lower expected forward total returns. We also sold net lease owner Spirit Realty Capital following its merger-related strong performance; reduced the overweight allocation to the logistics sector, selling southern California-focused Rexford Industrial Realty REIT; exited US mobile tower owner SBA communications REIT; and increased the underweight exposure to US storage, given weakness in new tenant demand.

In Australia, we switched out of retail landlord Vicinity Centres into peer Scentre and took profit in Stockland REIT, adding Mirvac due to its high-quality apartment and prime office portfolio. In the UK, we sold the position in UK diversified landlord Land Securities, switching into peer British Land following significant relative underperformance. Finally, we used front-footed equity raisings to add Mexican logistics developer Corporación Inmobiliaria Vesta real estate, Belgian logistics developer Montea and self-storage owner Shurgard Self Storage.

While parts of real estate markets will continue to face headwinds from a slowing economy and more restrictive financial conditions, increasing confidence that we have reached peak interest rates is likely to prove a key moment for the listed property sector. The private commercial real estate market can dominate media headlines and is slow to adjust reported values to the challenging macroeconomic landscape, whereas the listed market has already reacted. This has resulted in shares trading at wide discounts to private asset values and 'pricing in' the impact of higher interest rates, a reversal of which should, therefore, benefit the REIT market first.

Importantly, public REITs have continued to offer reliable and growing income streams, supported by strong balance sheets, more exposure to high-quality properties in areas of structural growth and astute management teams. From pricing levels that we believe reflect today's economic reality, we think these characteristics can reward investors with current income and growth over time, as they have historically.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Global Property Equities Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE EPRA Nareit Developed Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of REITs and companies, which invest in property, in any country. Securities will derive the main part of their revenue from owning, developing and managing real estate. The fund may also invest in other assets including cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the FTSE EPRA Nareit Developed Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to identify listed property companies and REITs that can deliver the highest total return over the long-term. The investment process follows a high conviction, 'bottom-up' (fundamental company-level) research approach aiming to identify the best risk-adjusted value from across the capitalisation spectrum.

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

** The performance history has been restated to reflect the H2 USD share class.

*** Historical performance has been restated.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

TER is calculated in accordance with AMAS.

There were no performance fees on the fund as at 31 December 2023.

In some cases where the fund's outperformance target (before the deduction of charges) has been achieved, the return for an individual class may ultimately be below the benchmark return, if its TER exceeds the outperformance.

Global Smaller Companies Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Manager

Nick Sheridan

The fund returned 9.01% (Net) based on Class H2 in US Dollar terms over the period under review, compared with a return of 7.54% in the MSCI World Small Cap Index, US Dollar terms.

The fund's stock selection is based on the belief that operational characteristics drive the share price over the longer term and that by buying high return stocks at a discount to the market, we can outperform – 'quality value', for want of a better term. Really, it is just the compounding effect of capital allocation reflected in stocks, enhanced by buying them when they are inexpensive relative to these returns. Investor sentiment can clearly influence valuation multiples, although dislocations from a fair value caused by 'fear and greed' are, in our opinion, an opportunity rather than a threat.

Thinking of the fund as a company, we believe it would be seen as a 'fallen angel' – one that in the past had good growth opportunities, as exhibited by an above-market ROE, but which is now viewed as unlikely to maintain this growth/return profile, as shown by the below-market P/E multiple. Assuming our stock selection is correct, in aggregate, this should prove not to be the case and the fund's returns should grow quicker than those of the market. If this happens, the valuation multiple P/E should expand, so theoretically the fund is doubly leveraged to the upside.

During the reporting period, the fund benefited from its underweight exposure to the healthcare sector, although it suffered slightly from its underweight stance on the energy sector.

The holdings in H&R Block, a US accounting services provider (strong results); Kobe Steel, a Japanese metals company (domestically orientated business that raised full-year guidance); Fair Isaac, a US credit score provider (results surprised to the upside and it enjoyed broker upgrades); Lindab International, a Swedish supplier to the construction industry (good results and upgrades); and Vistry, a UK social housing group (a new business model to release capital to shareholders was well received) all performed relatively well. Conversely, the holdings in Envista, a US supplier of dental products (poor third-quarter results accompanied with fourth-quarter outlook downgrade – we sold the position); Zehnder, a Switzerland-based heating system supplier (increased macroeconomic pressures – sold); Iuka Resources, an Australian mining company (China economic weakness impacted demand – sold); Diodes, a US-based semiconductor devices supplier (weak end markets – sold); and Perficient, a US IT consulting firm (demand uncertainty – sold) disappointed.

We slightly reduced the number of holdings and moved closer to our minimum of 100. At the time of writing, the fund held 108 stocks. Small-cap stocks seem to have suffered disproportionately from the rise in interest rates to fight inflation. However, with inflation having slowed and the rate cycle hopefully peaking, small-cap stocks may start to attract attention. Hence, we have begun to move towards a more concentrated portfolio, albeit at the edges.

Core & Main, a speciality distributor focused on products for the water, waste water, storm drainage and fire protection industries, was among the stocks included in the fund. Floated in 2021, the group is one of the leaders in the fragmented US water works market. Since 2019, sales have grown from US\$3.2bn to US\$6.7bn, with operating profit rising from US\$140m to US\$781m. Acquisitions have played a part as the group has consolidated the industry, which has allowed its operating margin to increase from 4.4% to 11.7%, while ROE is 25%.

The fund closed the period with a slight overweight holding in Europe balanced by a slight underweight exposure in all other regions.

The largest weightings to individual stocks included (all figures quoted are to the last year end as at mid-December 2023):

Comfort Systems, a leading service provider of mechanical, electrical and plumbing building systems that operates in more than 170 locations across the US. Over the past 10 years, incremental cash return on assets (ICROA) has virtually doubled, the group has shown good cash-flow characteristics (positive for 24 consecutive years) and has a double-digit ROE, with a 23.1% average for the past five years.

Fugro, which collects and interprets geological data, has been recovering from a rather nasty bout of restructuring and more recent ICROA (five years) has been positive. Profit has begun to recover, with earnings before interest, taxes, depreciation and amortisation compound growth of around 13% over five years. In addition, the company looked well placed given the global move to environmentally friendly energy sources (wind farms).

Kadant supplies equipment to the papermaking and paper recycling industries. In 2022, 63% of group revenue came from recurring parts and consumables sales. ICROA over 10 years has widened nicely, so capital allocation over this period has been good, in our view. Over five years, sales have enjoyed a compound growth rate of 12%, the operating profit compound growth rate was 18% and ROE was in the double digits. Its gross margin has shown little variation over five years, averaging 43%, and we believe that management has done a good job in reducing costs and allowing the operating margin to expand.

Global Smaller Companies Fund

Investment report for the period from 1 July 2023 to 31 December 2023 (continued)

Looking at the investment environment, the macroeconomic background does not look particularly supportive. However, if the interest rate cycle has peaked, then sentiment towards small-cap stocks (which has, as already mentioned, been negative in recent times) could become positive quite quickly.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Global Smaller Companies Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI World Small Cap Index, after the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in shares (equities) and equity-related securities of smaller companies, in any industry, in any country. The fund may also invest in other assets including cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI World Small Cap Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager aims to deliver capital growth by investing in small companies listed globally. The fund looks to identify good quality, but potentially undervalued stocks, driven by the belief that the level of real returns delivered depends on the initial price paid.

Performance history

Fund & Benchmark		Since launch to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22	1 year to 30 Jun 23	6 months to 31 Dec 23
		%	%	%	%	%
Global Smaller Companies Fund*	H2 USD (Net)**	1.80***	60.12***	(21.50)	25.40	9.01
MSCI World Small Cap Index		(1.88)	52.88	(21.97)	12.94	7.54

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

* On 6 August 2019, the Global Smaller Companies Fund was launched.

** The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

*** The performance history has been restated to reflect the H2 USD share class.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Global Sustainable Equity Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Hamish Chamberlayne and Aaron Scully

The fund returned 5.28% (Net) based on Class H2 in US Dollar terms over the period under review, compared with a return of 7.56% in the MSCI World Index, US Dollar terms.

After a tough third quarter, the narrative of 'higher-for-longer' interest rates melted away from October as headline inflation continued to slow. In its place came growing expectations of a Fed 'pivot' in 2024 and resurgent hopes of an economic 'soft landing'. This helped investors rediscover their risk appetite, and equities, especially those in growth-oriented sectors, rounded off a strong period. Throughout the period, market narrowness was a prevailing trend. The reporting period was no exception and many of the so-called Magnificent Seven of Alphabet, Amazon, Apple, Meta Platforms, Microsoft, Nvidia and Tesla continued to perform strongly.

The period presented, incrementally, confirmatory evidence of our primary investment thesis – that the global economy is migrating to a more sustainable footing, which will drive exciting investment opportunities as companies play their role in addressing these challenges. Our approach remains almost entirely bottom-up, focused on companies with secular growth opportunities, strong cash generation and indispensable products that drive positive change.

Within the global benchmark, the financials sector (notably banks) performed best as concerns about March's banking crisis faded and investors later rotated into cyclicals. The IT and communication services sectors also performed well, helped by the prospect of lower interest rates and optimism about AI. Defensive sectors such as consumer staples, utilities and healthcare lagged the broader market.

The fund's overweight position in IT and underweight holdings in consumer staples and healthcare thus benefited relative performance. By contrast, an overweight position in utilities and an underweight exposure to communication services dragged on returns.

Overall stock selection detracted from relative performance. In IT, although there was a good performance through Lam Research, Autodesk and Workday, this was overshadowed by weak performances by companies such as IPG Photonics, Shimadzu and Keyence. In financials, our preference for insurance companies such as AON, AIA and Intact Financial weighed on returns as markets rotated into banks. In consumer discretionary, Aptiv and Shimano posted soft earnings. The fund's communication services and industrial holdings helped to offset some of the relative underperformance. In communication services, Nintendo and T-Mobile USA performed well. In industrials, Wabtec (Westinghouse Air Brake Technologies), Prysmian and water holdings Core & Main and Advanced Drainage Systems were among the top performers. Positioning within the Magnificent Seven added value. No exposure to Apple and Tesla was beneficial, and the fund's two largest positions, Microsoft and Nvidia, performed strongly, which offset some of the underperformance from not owning Alphabet, Amazon and Meta.

Top performers included real estate financing firm Walker & Dunlop, semiconductor company Lam Research and Wabtec. Walker & Dunlop rebounded as interest rate expectations boosted sentiment towards real estate companies. As a leading provider of mortgages in multi-family lending, the firm enables home ownership for millions of Americans. Lam Research posted better-than-expected earnings and rallied with other growth-style stocks. The company's technology underpins the application of connectivity, advanced computing and AI technology. Wabtec's third-quarter earnings beat expectations and investors liked its entry into railcar telematics. As a leading manufacturer of railway locomotives and components, we believed it was well placed as government spending increases across the rail sector as part of reshoring and green industry initiatives.

Key detractors included AON, laser manufacturer IPG Photonics and rail components firm Knorr-Bremse. AON shares fell after the company announced the acquisition of brokerage firm NFP, a deal we are reviewing closely. AON uses big data analytics to help clients manage complex and emerging risks such as climate change and cyberattacks. IPG Photonics lowered its earnings guidance due to challenging global macroeconomic conditions. Its lasers deliver considerable energy and cost savings, and the firm has continued to gain traction in markets with strong secular trends. Knorr-Bremse lowered some key financial targets and several European peers reported weak trading. We felt the firm was aligned with similar secular trends as Wabtec.

We added new positions in nVent Electric, Prysmian, S&P Global, HDFC Bank, Infineon Technologies and Core & Main. We liked Core & Main's exposure to appealing growth drivers in the water industry, while Prysmian is aligned with secular trends such as electrification and electrical grid upgrades to facilitate decarbonisation. We sold Olympus, Atlassian, Microchip Technology, Nidec, Adidas and Workday.

The period was challenging for sustainable investing due to geopolitical discord, inflation and interest rate increases. However, the forthcoming year, with pivotal elections in major economies, is expected to bring additional fiscal support and lower interest rates, which could benefit sustainable investing and other sectors.

We have already witnessed impressive underlying progress in the laying of foundations for a period of accelerated growth in relation to reshoring manufacturing in key clean technology industries such as batteries and semiconductors, the electrification of transportation, 'greening' buildings, decarbonising electricity and transforming industry, among others.

Global Sustainable Equity Fund

Investment report for the period from 1 July 2023 to 31 December 2023 (continued)

As long-term bottom-up investors, it is important to focus on the micro aspects of high-quality businesses that are exposed to attractive secular trends and have strong financial resilience. We continue to meticulously follow our robust investment process, identifying sustainable businesses exposed to these growth trends, focusing on cash-flow generation, strong balance sheets, financial resilience and exercising valuation discipline.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Global Sustainable Equity Fund

Investment objective and policy

The fund aims to provide capital growth over the long term (5 years or more) by investing in companies whose products and services are considered by the Investment Manager as contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy.

The fund invests at least 80% of its assets in shares (also known as equities) of companies, of any size, in any industry, in any country. The fund will avoid investing in companies that the Investment Manager considers to potentially have a negative impact on the development of a sustainable global economy. The fund may also invest in other assets including cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI World Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the fund's performance. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager, within its thematic framework of environmental and social themes and positive/negative (avoidance) criteria screening, seeks to construct a differentiated and well diversified global portfolio of companies, based on the belief that superior returns can be generated by companies that are providing solutions to environmental and social challenges. These companies should have attractive financial attributes such as persistent revenue growth and durable cash flows, as well as exhibiting strong management of environmental, social and corporate governance risks. Companies will typically be strategically aligned with themes such as climate change, resource constraints, growing populations, and ageing populations. The fund avoids investing in fossil fuels and companies that stand to be disrupted by the transition to a low-carbon economy.

Performance history

Global Technology Leaders Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Alison Porter, Graeme Clark and Richard Clode

The fund returned 12.82% (Net) based on Class H2 in US Dollar terms over the period under review, compared with a return of 10.23% in the MSCI ACWI Information Technology Index + MSCI ACWI Communications Services Index, US Dollar terms.

The first half of 2023 benefited from a rebound in earnings expectations and bearish positioning. In the second half of the year, the strong fundamental drivers of cost discipline and margin expansion, and the building momentum of AI as a major new technology wave, combined to drive sector gains. Interest rate expectations also peaked, which enabled a broadening of sector performance, although the so-called mega-cap stocks continued to benefit from accelerating growth expectations, driven by their leading AI exposures.

Our philosophy of focusing on technology leaders with unappreciated earnings growth positioned the fund well with a return of more than 50% as we again built on our consistency of outperforming the peer group.

Ambarella detracted from performance despite strength in its AI automotive-related shipments, as its video processor business was hampered by industry destocking and weakening end demand. Tencent weighed on performance as it fell abruptly on a draft proposal of new regulations for the Chinese gaming sector. We had felt that the company benefited from a superior macroeconomic backdrop following China's reopening and as momentum in the West slowed, while we expected these regulatory headwinds to pass. However, this view was overwhelmed by geopolitical concerns, and the move at period end was a stark reminder to investors of the low level of visibility on regulatory developments.

At a stock level, we continued to see strong positive contributions from so-called AI winners across the internet, software and semiconductor sub-sectors. The standout performances during the period included the position in Uber Technologies, a long-term holding. Uber Technologies benefited returns as it transitioned from an unprofitable technology basket to a company growing at scale with significant increases in profit and free cash flow and the prospect of share buybacks. Advanced Micro Devices, a new position, rose strongly as investors gained an appreciation of the breadth of its customer engagement and the size of the addressable market for its expanding AI product line up. The holding in Arista Networks, a cloud-focused networking company, benefited from announcements of next generation AI-focused data centres. Similarly, the holding in Micron Technology benefited from a rationalisation of capital expenditure plans and a growing appreciation of the need for high bandwidth memory for AI use cases.

We retained a consistent focus on unappreciated beneficiaries of the AI inflection across our long-term investment themes within a rational valuation framework. We exited some stocks where we were concerned about the earnings outlook, including Alibaba (lack of visibility on value creation strategy), or where we felt companies were fully valued, such as BE Semiconductor Industries and Booking. We added names where we saw unappreciated growth from investment in AI infrastructure, including Advanced Micro Devices (semiconductor). We initiated a position in Pinterest, following its partnership with Amazon, which we expected to attract incremental advertisers and make the site more easily shoppable for users. In addition, we opened a new position in Flex, which reflected the company's active shareholder returns policy, leading role in the global manufacturing supply chain and the value of its holding in Nextracker, a utility-scale solar technology tracking company.

We are excited to be at the start of another great wave of technology innovation and see a very favourable environment for active stock pickers ahead.

While still in its early phases, we believe the new AI computing wave can deliver significant productivity gains, both to the economy and companies, driving lower inflation and profit growth. While there will be volatility around inventory cycles and lagged effects of interest rate rises, our investments around our key themes of next-generation infrastructure (computing, networking and cloud platforms), electrification, and resource and productivity optimisation platforms are set to benefit significantly. Digital advertising has been one of the first areas to show the benefits of AI deployments, and while financial technology was an area that was neglected in 2023, we see opportunities that are not yet fully appreciated.

It will take years, rather than months, for all of the benefits of AI to come to fruition and it may take time for the beneficiaries to become more apparent to investors. We are wary of extrapolating early adoption in a parabolic manner, although, equally, we recognise the significant opportunity as AI enables technology to disrupt more industries. Similar to how we have navigated prior computing waves, we continue to stay focused on sustainable barriers to entry, incorporate environmental, social and governance (ESG) insights and rely on our valuation discipline to guide us in identifying those companies that will become or will remain global technology leaders. The technology sector benefits from one of the strongest tailwinds in the equity market, although with more macroeconomic turbulence still likely, experienced investment 'co-pilots' with proven navigation skills are needed to help chart a smoother path to achieve investors' risk and return objectives.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Global Technology Leaders Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index, after the deduction of charges, over any 5 year period.

The fund invests at least 90% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, which are technology-related or derive profits from technology, in any country. The fund may also invest in other assets including investment grade government bonds, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The strategy is based on identifying companies that are considered by the Investment Manager to be current or future leaders in driving or enabling technology adoption and as such have undiscovered potential for sustained earnings growth. These companies are typically aligned with themes that drive long-term technology growth trends (e.g. internet transformation, next generation infrastructure and payment digitisation). The Investment Manager looks to navigate the hype cycle (different stages in the development of a technology from conception to widespread adoption) around technology adoption by assessing the company's fundamental business model.

Performance history

Fund & Benchmark		1 year to 30 Jun 19 %	1 year to 30 Jun 20 %	1 year to 30 Jun 21 %	1 year to 30 Jun 22 %	1 year to 30 Jun 23 %	6 months to 31 Dec 23 %
Global Technology Leaders Fund	H2 USD (Net)*	7.16**	23.98**	48.78**	(29.42)	29.81	12.82
MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index***		7.20***	23.70***	44.76	(23.26)	27.70	10.23

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

** The performance history has been restated to reflect the H2 USD share class.

*** From 1 July 2020, the fund benchmark changed from the MSCI All Countries World IT Index to the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index. Past performance before 1 July 2020 is shown for the previous benchmark.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Japanese Smaller Companies Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Manager

Yunyoung Lee

The fund returned 11.11% (Net), 11.72% (Gross) based on Class H2 in US Dollar terms over the period under review, compared with a return of 9.84% in the Russell/Nomura Small Cap Index and a return of 11.22% in the Target Index + 2.5%, US Dollar terms.

The Japanese equity market dropped in the July-September quarter due to concerns about US interest rates, China's economy and a potential US government shutdown. Japanese stocks were pushed up by large foreign fund inflows in the first half of 2023, although there was a slight pause as foreign investors sold down their holdings. Companies announced strong fiscal first-quarter results (April-June), although this failed to support the equity market. The market surged in the October-December quarter as investors welcomed lower-than-expected US inflation, a reduced probability of further Fed interest rate hikes and a decline in US long-term Treasury yields. Meanwhile, the overall trend of quarterly earnings was favourable. A preliminary estimate showed Japan's GDP shrank by an annualised 2.1% in the third quarter, well below a market forecast of a 0.4% contraction. However, more positively, the electric vehicle parts inventory cycle, to which Japanese economy is sensitive, seemed to bottom out. At the BoJ meeting in December, policy makers maintained their yield curve controls, asset purchase programmes and forward guidance.

Positive contributors to performance during the reporting period were Nitto Boseki (electric materials), JINS (eyewear), Sawai (generic drugs), Benefit One (employee benefit schemes) and Septeni (internet advertising). Nitto Boseki shares rose from low levels as its earnings recovered. The company had suffered from lower 5G base station demand and higher material prices, although it benefited from a growth in AI servers and a decline in material costs. Shares of JINS, which we thought were underappreciated by market, jumped thanks to better-than-expected monthly sales while demand for higher-priced eyewear recovered after the pandemic. Sawai shares rose from low levels due to expectations that the company would benefit from changes to public drug pricing rules. Price premiums for generic drug makers that provide high-quality products and contribute to stable supply have come under discussion because of supply problems. Benefit One shares increased sharply as Dai-ichi Life made a rival 2,123 Japanese Yen/share bid for the company, following M3's 1,600 Japanese Yen/share offer in November. The bids demonstrated that both companies highly appreciated Benefit One's business. The rise of Septeni's shares were driven by the announcement of an activist investor's share purchases and the sale of a loss-making subsidiary.

Detractors from performance were Nihon M&A Center (mergers and acquisitions agent), Oporun (optical thin film equipment), Pigeon (baby products), Central Security Patrols (security services) and Taiyo Yuden (electronic components). Nihon M&A Center, Oporun and Pigeon shares dropped because earnings were lower than expected. We increased the fund's position in Nihon M&A Center as we believed it was well positioned in a growing market while its risk/reward profile was attractive to us. Central Security Patrols shares decreased after the company announced shareholder returns which disappointed investors. Taiyo Yuden shares dropped due to the company's convertible bond issuance. We held meetings with the managements of these companies during the period and confirmed that their risk/reward profiles remained attractive to us.

We added to the fund's positions in Aiful (consumer finance), Demae-Can (food delivery), Denka (electric vehicle-related materials), Fuji Oil (food ingredients), GMO Financial (foreign exchange trading), Harmonic Drive Systems (factory automation), Ines (software), JINS, KH Neochem (chemicals), Nihon M&A Center, Sawai, Septeni, SG (transportation), CyberAgent (internet advertising), Japan Steel Works (machinery) and Park24 (parking lots) after management meetings confirmed our convictions in these stocks.

We initiated positions in Union Tool (semiconductor manufacturing applications), Central Glass (chemicals), Koa (electronic components), Kanto Denka Kogyo (semiconductor-related chemicals) and TRE (recycling service) given favourable risk/reward profiles.

We reduced the holdings in Asahi Intecc (medical devices), Noritake (electric materials), Sakata INX (printing inks), Taikisha (air-conditioning), Infocom (e-books), Oracle Japan (IT services), Life (supermarkets), Daito Trust Construction (apartments), Benefit One, DKK (base station antennas), GMO Financial, Toyo Denki Seizo (electric parts) and Yorozu (automotive parts) after we confirmed our conviction levels in meetings with the companies.

We closed the positions in Nippon Road (road maintenance), Tachi-S (automotive parts), Iida (housing), Ibiden (semiconductors) Taisho Pharmaceutical (drugs), Sumitomo Bakelite (electric materials), Horiba (semiconductors), Tokyo Century (leases) and Nitto Boseki.

We believe the Japanese smaller companies' market is the most under-researched among developed markets and, therefore, one of best for active management to consistently generate excess returns. We believe our bottom-up approach, which is based on an intensive management interview programme, gives us a competitive edge. We aim to carry out interviews with all our holding companies each quarter, and rebalance the portfolio based on what we learn from these discussions. Japanese smaller companies face major challenges, although these also offer opportunities, such as an ageing domestic population, rapidly growing neighbouring Asian markets, digitisation, and ESG requirements. We expect many Japanese smaller companies to undergo drastic business transformations over the next five years, which will offer attractive investment opportunities.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Japanese Smaller Companies Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the Russell/Nomura Small Cap Index by 2.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least two-thirds of its assets in a concentrated portfolio of shares (equities) and equity-related securities of smaller companies, in any industry, in Japan. The fund may also invest in other assets including companies of any size, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the Russell/Nomura Small Cap Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager believes in-depth stock analysis, coupled with superior stock picking are the main drivers of superior long-term performance in Japanese smaller companies. The fund is designed to capture the undervalued growth potential of Japanese smaller companies by typically investing in the smallest 25% of listed Japanese companies by market capitalisation using a, disciplined, pragmatic and risk-aware investment process. The investment approach focuses on stock valuation, investment catalysts and long-term structural growth to drive earnings and returns.

Performance history

Fund & Benchmark		1 year to 30 Jun 19 %	1 year to 30 Jun 20 %	1 year to 30 Jun 21 %	1 year to 30 Jun 22 %	1 year to 30 Jun 23 %	6 months to 31 Dec 23 %

TER is calculated in accordance with AMAS.

The TER includes performance fees as at 31 December 2023.

The amounts earned in relation to performance fees for the period are shown in note 6 to the financial statements.

In some cases where the fund's outperformance target (before the deduction of charges) has been achieved, the return for an individual class may ultimately be below the benchmark return, if its TER exceeds the outperformance.

Pan European Absolute Return Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

John Bennett and Robert Schramm-Fuchs

The fund returned 3.43% (Net) based on Class H1 in Euro terms over the period under review, compared with a return of 1.93% in the €STR and a return of 2.45% in the Target Index + 1%, Euro terms.

Equity markets staged a significant rally in the fourth quarter of 2023. After a weak third quarter, the upbeat mood in November and December mainly reflected that the ever-growing evidence on slowing inflation had started to translate into more dovish rhetoric from central banks. This narrative culminated with the Fed's communication at its December meeting, which the market interpreted as a signal that the monetary policy 'pivot' (the shift from interest rate rises to cuts) is around the corner. Against this backdrop, US and European bond yields compressed markedly. US 10-year Treasury yields fell from a 4.9% peak in October to 3.9% by the end of December, and German 10-year bund yields declined from 2.8% to 2.0%. Long duration sectors like technology and real estate led the market higher.

Long positions in semiconductor equipment companies ASML, BE Semiconductor Industries, ASM International and VAT continued to perform well. Aerospace engine company Rolls-Royce did well as its turnaround under new management continued apace. We also had good returns from long positions in Nemetschek and SAP. Many investors viewed Nemetschek sceptically, due to its exposure to the construction sector. We felt that this was unfair given its much higher share in infrastructure construction projects, which tend to be more resilient in a weaker macroeconomic environment. Moreover, the degree of digitisation in the industry has remained low, although pressure to transition has increased. A need to budget closer to true cost, build more cost efficiently, control deviations from budget more tightly and energy efficiency mapping are helping to drive construction digitisation. Meanwhile, Nemetschek's new management has managed the transition from a licence to a subscription business successfully. SAP has benefited from an ongoing client base migration from on premises to the cloud and a product upgrade cycle. The short book benefited from short positions in renewable energy companies that struggled to operate in a higher interest rate environment.

The main detractors were luxury goods stocks that struggled to achieve their growth targets and French pharmaceutical business Sanofi. The latter shocked the market with an abrupt decision to significantly increase its R&D spending by €1bn. Previously, the equity story had been about the company being a relative 'safe haven', its already promising development pipeline and the optionality of a consumer business spin-off. However, we were concerned more emphasis on binary pipeline outcomes had increased risk. We felt the explanations given were insufficient and also noted, in hindsight, the surprising change in its R&D head earlier in 2023. We sold the full position on the day of the announcement.

The fund's underlying book composition remained pro-cyclically oriented, with semiconductors the largest net long position. Outside of semiconductors, long positions were concentrated in the areas of 'always looking good', small-ticket consumer discretionary items, as we have seen positive real wage growth for the first time in two years due to fading inflation. This included some consumer-driven medical technology stocks such as Straumann, which historically has traded closely correlated to consumer confidence, and financial services firms such as brokerages and exchanges, where money has returned to the stock market from money market funds. In the short book, we chiefly targeted consumer staples, given that slow volume growth has put firms at risk of having to give back the aggressive pricing taken over the past two years, along with the late-cycle de-stocking dynamics. The short book also included healthcare stocks, due to the more challenged R&D pipeline, China procurement disruptions from an anti-corruption drive and late-cycle de-stocking in consumables.

Our outlook for 2024 is one of cautious optimism. Central banks are now openly talking about interest rate cuts and even an end to quantitative tightening. Real narrow money creation across the G7 group of wealthy nations and even the E7 group of the largest emerging market economies has inflected up, and even though it remains in weak negative territory, it is no longer getting worse. Market-based financial condition measures have clearly eased. It will likely take time for those factors to translate into an improving real economy, and thus we think it will remain a more tactical equities playing field. We see a significant opportunity set to play idiosyncratic early-cycle winners versus stocks with a very high risk of profit warnings.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Pan European Absolute Return Fund

Investment objective and policy

The fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period and, particularly over the shorter term, the fund may experience periods of negative returns. Consequently your capital is at risk.

Performance target: To outperform €STR by at least 1% per annum, after the deduction of charges, over any 3 year period.

The fund invests in shares and makes extensive use of derivatives (complex financial instruments) to take both 'long' and 'short' positions in companies the Investment Manager believes will either rise in value (long positions) or fall in value (short positions) meaning that the fund may benefit from either scenario.

The fund will hold a significant proportion of its assets in cash and money market instruments as a result of holding derivatives and for when the Investment Manager wishes to take a defensive stance. Conversely, the fund may also employ 'leverage' (so that the fund can invest a greater amount than its actual value) when the Investment Manager has greater confidence in the opportunities available.

Typically, at least two-thirds of the exposure to the long and short positions (in aggregate) will be to companies of any size, in any industry, in Europe (including UK). Companies may be located or do most of their business in this region. The balance of the long and short exposure may be to companies outside this region. The fund may invest in other assets including bonds (including convertible bonds) and preference shares. The Investment Manager may also use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to €STR as this forms the basis of the fund's performance target and the calculation of performance fees (if applicable). For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison and for calculating performance fees. The Investment Manager has complete discretion to choose investments for the fund and is not constrained by a benchmark.

Strategy

The Investment Manager targets long-term capital appreciation through exposure primarily to European equities. The Investment Manager selects stocks using a fundamental approach, blended with sector themes. The process results in a high-conviction portfolio with a bias towards long positions (where the manager believes the prospects for the companies are positive), complemented by 'short positions' (where prospects are less positive) and other market hedging securities.

Performance history

Fund & Benchmark		1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22	1 year to 30 Jun 23	6 months to 31 Dec 23
		%	%	%	%	%	%

€STR***		0.00***	0.00***	0.00***	(0.58)	1.63	1.93
€STR + 1%***		-.****	-.****	-.****	(0.24)	2.64	2.45

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H1 EUR is disclosed as it is the representative share class.

* The representative share class has changed from the A2 EUR to the H1 EUR share class with effect from August 2021.

** The performance history has been restated to reflect the H1 EUR share class.

*** From 1 July 2021, the fund benchmark changed from the Euro Main Refinancing Rate to €STR. Past performance before 1 July 2021 is shown for the previous fund benchmark.

**** Target benchmark return is not quoted as the fund did not have a target prior to 25 February 2022.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

TER is calculated in accordance with AMAS.

There were no performance fees on the fund as at 31 December 2023.

In some cases where the fund's outperformance target (before the deduction of charges) has been achieved, the return for an individual class may ultimately be below the benchmark return, if its TER exceeds the outperformance.

Pan European Property Equities Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Guy Barnard and Nicolas Scherf

The fund returned 28.03% (Net) based on Class H2 in Euro terms over the period under review, compared with a return of 26.62% in the FTSE EPRA Nareit Developed Europe Capped Index, Euro terms.

Having seen modest gains in the third quarter of 2023, property equities enjoyed their best quarter since the global financial crisis, delivering a 21.5% return in the fourth quarter and materially outperforming wider stock markets. Despite heightened geopolitical tensions, markets took off as inflation cooled and the Fed surprised investors by signalling 75 bps of interest rate cuts in 2024. Declining bond yields proved a substantial tailwind for the sector, with higher leveraged names in the Nordic region and Germany performing well.

Leaving aside the macroeconomic situation, the companies held in the fund continued to report robust operational trends and generally growing rental income streams. They benefited from the impact of indexation in many lease structures and continued market rent growth in areas such as industrial/logistics, student accommodation, rental housing and prime offices. Those companies with superior balance sheets and hedging profiles were able to capture this top-line growth in underlying earnings.

Asset values continued to drift down in most markets, which reflected the impact of higher funding costs while transaction evidence remained low. UK valuers continued to be more aggressive, posting a 25% decline from the peak level, with further declines seen in office and retail assets. However, more recently, there was stability in logistics, student, storage and rental residential values. Encouragingly, transaction volumes have been building in certain structurally supported sectors.

The mismatch between public and private real estate values we previously spoke about was again highlighted by a private equity cash offer for Belgian logistics and office owner Intervest Offices & Warehouses. The offer price represented a substantial 52% premium to the undisturbed share price, although it was a small discount to the net asset value. There were also several well supported equity raisings from REITs across Europe, most notably in logistics, student accommodation and storage, to fund accretive investment in development pipelines and new acquisitions.

The fund outperformed its index during the reporting period, driven by bottom-up stock selection. We saw a notable rally in Swedish names Fastighets AB Balder and Castellum. The gains helped to offset the impact of the fund's underweight position in the Swedish market, which posted a 46% return during the period. German residential landlords LEG Immobilien and Vonovia also delivered notably strong performances. Their results highlighted an acceleration in rental growth while they also took steps towards reducing borrowing, which, alongside falling rates, resulted in a significant shift in sentiment. In the logistics space, Central and Eastern Europe-focused CTP performed well on continued operational strength, while the fund benefited from the bid for Intervest Offices & Warehouses. By contrast, mobile tower owner Cellnex Telecom, office landlord Helical and self-storage operator Safestore detracted from performance as they lagged the strong rally in the sector.

We had an active period as we looked to take advantage of several front-footed equity raisings in preferred sectors. We increased exposure to logistics-focused Montea, storage providers Big Yellow and Lok'nStore, and added new names in healthcare provider Cofinimmo, European storage owner Shurgard Self Storage and light industrial-focused Sirius Real Estate.

We also increased the allocation to retail. We added France-listed shopping centre owner Unibail-Rodamco-Westfield in the third quarter, when the shares were trading at highly discounted multiples, which more than reflected the need to further reduce debt and in contrast to strong operating fundamentals. We added Klépierre late in the period given that its attractive income and cash-flow metrics had lagged in the fourth-quarter rally. Conversely, we reduced the fund's office exposure, exiting Gecina following strong performance. We sold out of UK diversified landlord Land Securities, switching into peer British Land, and divested the remaining position in UK residential landlord Grainger. Finally, we used Intervest Offices & Warehouses as a source of funding, following the bid for the company. We also trimmed various strong performers, notably in Sweden later in the period.

We believe real estate markets will continue to face headwinds from a slowing economy and more restrictive financial conditions, although increasing confidence that we have reached peak rates in Europe is likely to prove a key moment for the listed property sector. While the direct property market will need more time to reflect higher rates in published asset values, in the listed market we can start to look forward. Typically, REITs begin to recover 6-9 months before direct values stabilise and we are now in this phase.

Even after a recovery, European property shares have still been trading at wide discounts to the realistic bottom of the cycle asset values. While further balance sheet strengthening will be required in some cases, we expect this to be manageable for most. In a lower growth environment, the importance of management, asset and balance sheet quality will matter more and we continue to expect divergence across different property types, driven by the themes of changing demographics, digitisation, sustainability and the convenience lifestyle. It therefore remains important, in our view, to remain selective.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Pan European Property Equities Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE EPRA Nareit Developed Europe Capped Index, after the deduction of charges, over any 5 year period.

The fund invests at least 75% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of REITs and companies, which invest in property, in the EEA or the UK if not part of the EEA. Securities will derive the main part of their revenue from owning, developing and managing real estate. The fund may also invest in other assets including cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the FTSE EPRA Nareit Developed Europe Capped Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager seeks to identify European listed property companies and REITs that can deliver the highest total return over the long-term. The investment process follows a high conviction, 'bottom-up' (fundamental company-level) research approach aiming to identify the best risk-adjusted value from across the capitalisation spectrum.

Performance history

FTSE EPRA Nareit Developed Europe Capped Index		(2.01)	(7.42)	24.97	(21.68)	(19.57)	26.62

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 EUR is disclosed as it is the representative share class.

* The representative share class has changed from the A2 EUR to the H2 EUR share class with effect from August 2021.

** The performance history has been restated to reflect the H2 EUR share class.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Pan European Smaller Companies Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Ollie Beckett and Rory Stokes

The fund returned 2.57% (Net) based on Class H2 in Euro terms over the period under review, compared with a return of 6.67% in the MSCI Europe Small Cap Index, Euro terms.

The reporting period started with a 'risk off' mood in markets due to the prospect of stubbornly elevated inflation leading to 'higher-for-longer' interest rates. However, from late October, there was an astonishing rally in European equities and risk assets more broadly, as cooling inflation led investors to grow increasingly excited about a 'soft landing' for the global economy. Short covering (where an investor purchases a security to close an open short position) in sectors most affected by the interest rate hiking cycle, such as REITs and industrials, led the rally in equities. Mid-cap stocks outperformed small caps as they attracted more of the returning capital, likely because they are well represented in equity exchange traded funds and futures. As the economic recovery becomes more evident, small caps (and the lower end of the small-cap universe) are expected to benefit further.

The top contribution came from On the Beach, a UK-based travel company. The company's heavy investment in advertising after the COVID-19 pandemic has paid off, with strong summer bookings for the upcoming season. We remained holders at the end of the period, when the company was still trading at a valuation that was well below its pre-COVID-19 average. Gaztransport et Technigaz (GTT) was another large positive contributor. The French company builds storage containers/liners for liquefied natural gas and announced strong results by beating revenue estimates. With its strong net cash position, order backlog and opportunities in new technologies, the stock has had strong positive momentum. We also enjoyed good returns from outdoor advertising company Stroeer, which we bought earlier in the period. Its shares had been sold down due to their perceived dependence on a strong economic backdrop, although we liked the firm's regional focus, which we expected to experience less cyclicality, along with its move to digital screens, something that was evidenced in its latest results.

The main detractor from performance was AMG Advanced Metallurgical, a speciality metal producer, as the company downgraded its guidance because of weaker lithium pricing. AMG Advanced Metallurgical faced the additional headwinds of lower production at one of its mines and sales problems in its clean energy segment. However, we liked the company's exposure to the circular economy theme, as it recycles lithium and vanadium. Online targeted advertising company Criteo also hampered returns, as it suffered with a decrease in advertising spending (particularly online). However, we continued to like the business fundamentals.

Trading activity was primarily focused on growth-style stocks. Here, we saw a de-rating in 2023 due to higher interest rates. At the time of writing, these stocks were trading at what we viewed as attractive valuations (albeit higher than the market average). We bought Belgian specialty chemical distributor Azelis, whose latest results demonstrated strong resilience against a difficult market backdrop. Its commentary around tentative improvements observed in demand patterns further contributed to our decision. We also bought Bonesupport, a Swedish healthcare company. The company has developed and launched three innovative injectable bone substitute products based on its proprietary technology platform. The technology has a proven ability to heal bone defects by remodelling into host bone in 6-12 months.

We sold food processing and automation company Marel. We had thought the company would benefit from slowing cost inflation, although order demand from customers was worse than we expected, and we moved on. We also sold Construcciones y Auxiliar de Ferrocarriles (CAF), a railcar manufacturer. The shares had performed well, although we were concerned about the low-margin nature of the industry. Additionally, we sold Dometic, a company that manufactures outdoor equipment for cars and trucks. We had some reservations about the company's smaller marine division as well as its stretched balance sheet.

We think small caps will perform positively as it becomes clear an economic soft landing is likely and investors become less risk averse. For significant progress in 2024 we will need to see earnings upgrades come through as we expect, as valuations are no longer at the extreme levels of October 2023.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Pan European Smaller Companies Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI Europe Small Cap Index, after the deduction of charges, over any 5 year period.

The fund invests at least 75% of its assets in shares (equities) and equity-related securities of smaller companies, in any industry, in the EEA or the UK if not part of the EEA. Companies will have their registered office in the EEA or the UK if not part of the EEA. The fund may also invest in other assets including companies of any size, in any region, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI Europe Small Cap Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager focuses on meetings and calls with company management, along with the use of quantitative filters, to identify potential companies for investment. Emphasis is placed on the robustness of a company's business model, an analysis of what drives the business, what its competitive advantage is, and the sustainability of returns. The fund maintains a well-diversified portfolio of companies which generally fall within the bottom 25% of their relevant market by way of size. The liquidity of the company (the degree to which shares can be quickly bought or sold in the market at a price reflecting its intrinsic value) is important in determining whether to invest and the size of the holding for the fund.

Performance history

MSCI Europe Small Cap Index***		(2.83)***	(4.20)***	45.05***	(18.45)****	6.74	6.67

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 EUR is disclosed as it is the representative share class.

* The representative share class has changed from the A2 EUR to the H2 EUR share class with effect from August 2021.

** The performance history has been restated to reflect the H2 EUR share class.

*** From 25 February 2022, the fund benchmark changed from the EMIX Smaller European Companies Index to MSCI Europe Small Cap Index. Past performance before 25 February 2022 is shown for the previous fund benchmark.

**** Performance is a blend of the old and new benchmark.

Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

Responsible Resources Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Daniel Sullivan, Darko Kuzmanovic, Tal Lomnitzer and Tim Gerrard

The fund returned 3.84% (Net), 4.40% (Gross) based on Class H2 in Sterling terms over the period under review, compared with a return of 6.82% in the S&P Global Natural Resources Index and a return of 8.16% in the Target Index + 2.5%, Sterling terms.

Global equities ended the reporting period higher as investors started to anticipate a pivot in Fed monetary policy. The S&P Global Natural Resources Index lagged the MSCI World Index. The benchmark's sub-sector returns were led by metals and mining stocks, which rose by 9.7%. Energy shares gained 7.4%, despite a continued fall in oil prices in the fourth quarter, while agriculture stocks advanced 4.5%.

The fund underperformed its benchmark, largely because of selection in metals and mining, where an overweight position in lithium miners detracted. This was partly offset by selection in energy, where the fund's overweight holding in uranium miners was beneficial.

At the stock level, notable detractors included Albemarle and FMC. Albemarle cut its guidance amid falling lithium prices, while FMC shares fell due to concerns about generic competition for its diamide crop protection product. The top performers included uranium miners Uranium Energy and Cameco as prices of the commodity rallied by about 80% during the period. Vestas Wind Systems also performed strongly, as the prospect of lower interest rates improved sentiment towards renewable energy stocks. In addition, the company started to display a long-anticipated return to positive operating margins.

The biggest moves in positioning during the period were a reduction in the fund's exposure to agriculture and an increase in its energy holding. In agriculture, positions including Archer-Daniels-Midland, Deere, FMC and Costa were sold. However, the fund formed new holdings in UPM-Kymmene and Bunge Global. In energy, we bought shares in Iberdrola and increased the fund's exposure to uranium through Uranium Energy and Denison Mines. We also took advantage of market weakness to add to the holding in NextEra Energy and increased renewables exposure by expanding the holding in Vestas Wind Systems and re-establishing a position in Orsted towards the end of the period. In metals and mining, we continued to value copper's vital role in the energy transition. During the period, we added new positions in miners K92 Mining and Sandfire Resources and a new holding in high-voltage copper cabling firm Prysman.

Sentiment towards many natural resource companies has been clouded by concerns about China's economy and the impact of higher interest rates. The latter has weighed, in particular, on companies seeking to invest in growth opportunities related to the transition to net zero GHG emissions. Despite this, we remained optimistic about the medium-term prospects for well-run companies with an exposure to this trend.

In energy, additions in renewable energy capacity hit another record in 2023. Given that the most recent United Nations Climate Change Conference brought an agreement to triple renewable energy capacity by 2030, it appears likely that investment in this area will continue to accelerate. Although companies will need to adapt to the reality of higher interest rates, developments such as the European Union (EU) wind package suggest that they will get plenty of support in the way of legislation. We remain bullish on uranium, the price of which rose considerably in 2023, although will need to stay high to encourage investment in new supply.

In metals and mining, the transition to renewables and electric vehicles remains a strong demand tailwind for several commodities. At the same time, long-term supplies of many materials look tight due to rising costs and the obstacles involved in establishing new mines. This has caused mining capital expenditure to fall towards a 30-year low in inflation-adjusted terms, with few signs of an increase in 2024. As demand for copper and electric vehicle battery materials continues to grow, this presents a potentially lucrative challenge to producers. We expect that it will result in further takeover activity, with a focus on smaller, high-quality assets and larger targets of strategic value to major mining companies.

As for agriculture, a growing global population entails a need to produce more food, but to do so with less of an environmental impact. Meanwhile, farming acreage is constrained by urbanisation and extreme weather exacerbated by increased GHG emissions. This imbalance will require more innovation and investment in farm equipment, precision farming services and inputs, such as fertiliser, that increase yield. The fund's agriculture exposure also includes forestry assets, wooden building products and biomaterial-based packaging.

Key thematic drivers that underpin the resource sector's attractiveness, such as unprecedented investment in renewable energy, are likely to continue regardless of the economic environment. However, we remain mindful that weakness in China and a slowdown in the US could put short-term pressure on commodity prices and company earnings. As a result, we continue to prefer quality natural resource companies with world-class assets, strong balance sheets, low costs or high margins, good access to funding and strong or improving ESG profiles. We wish our investors a prosperous and peaceful 2024.

Responsible Resources Fund

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the S&P Global Natural Resources Index by 2.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, whose revenues come mostly from the natural resources sector, such as, but not limited to, the mining, energy and agriculture sectors, in any country. The fund may also invest in other assets including cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the S&P Global Natural Resources Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager focuses on identifying responsible resource companies including those from the mining, energy, and agriculture sectors that are benefiting from the ongoing and future demand for natural resources. The strategy has the flexibility to invest across the supply chain, taking advantage of price shifts between upstream, mid-stream and downstream sectors as well as across industries. The investment process seeks to construct a focused, yet diversified portfolio of high-quality responsible resource companies globally.

Performance history

Sustainable Future Technologies Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Richard Clode, Graeme Clark and Alison Porter

The fund returned 10.13% (Net) based on Class H2 in US Dollar terms over the period under review, compared with a return of 10.32% in the MSCI ACWI Information Technology Index, US Dollar terms.

Given the dual mandate of the fund (aiming to provide capital growth over the long term (five years or more) by investing in technology-related companies that contribute to the development of a sustainable global economy), the positive/negative screening criteria for the portfolio is constructed in a benchmark agnostic manner.

The following commentary on fund performance contributors and detractors is provided on an absolute return basis (rather than relative to the benchmark).

Technology equities continued to outperform the broader equity market during the reporting period. The sector's gains were driven by strong balance sheets, cost discipline and margin expansion combined with AI as a major new technology wave with the potential to unlock solutions to critical sustainability problems. In particular, spending on AI enablement directly benefited the fund's most heavily weighted themes – low-carbon infrastructure, and resources and productivity optimisation. Our sustainable transport theme lagged due to a combination of inventory digestion and electric vehicle production challenges.

Nvidia contributed strongly to performance as demand accelerated for its graphics processing units, which are fundamental for generative AI and have helped to solve some of the world's biggest ESG questions. Competitor Advanced Micro Devices (AMD) also performed well, expanding its energy-saving AI product line. ServiceNow, a leading global cloud software platform enabling organisations to optimise and automate their workflows in a low resource manner, aided returns as it continued to execute well on its business plan.

Ambarella, a leader in low-power computer vision, detracted from performance because of an ongoing inventory correction and weak demand. Infineon Technologies, a leader in power semiconductors used in electric vehicles and renewables, weighed on returns as concerns emerged that its margins may have peaked after pressures in its automotive segment. Cellnex Telecom, which provides telecommunication towers for low-carbon infrastructure, detracted on interest rate pressure.

We continued to increase the fund's exposure to companies that provide low-carbon, more effective power solutions for AI infrastructure, adding AMD, Pure Storage (low energy consumption) and Flex, a global contract manufacturer for cloud infrastructure and electric vehicles. Following the sell-off in sustainable transport-related stocks in 2023, we initiated a small position in Rivian, a vertically integrated electric vehicle maker, towards the period end as we believed it was improving execution. We also added a position in Universal Display, which contributed to our smart cities theme, with its low energy consuming display technology close to commercialisation.

While we eliminated the fund's exposures to residential solar and clean technology in the first half of 2023 due to competitive and macroeconomic concerns, we added NEXTracker for its provision of solar tracking technology to utilities, which have more stable demand. We exited Amdocs and Veeva Systems due to macroeconomic and growth concerns. We also exited BE Semiconductor Industries, a next-generation infrastructure investment, locking in gains after a strong run and as it reached a high valuation. Asset tracker Zebra Technologies suffered earnings downgrades, and while its contribution to the circular economy and productivity remained consistent, we exited the position given concerns about poor execution and inventory accumulation.

Technology is the science of solving problems, and the global challenges that we face require the innovation of the sector to provide solutions. We are excited to be at the start of another great wave of technology innovation through AI and foresee a very favourable environment for active stock pickers. We believe that this fourth computing wave will be crucial to unlocking new sustainable investment solutions to key environmental and social challenges as well as controlling inflation through productivity gains.

We expect continued short-term volatility around macroeconomic and inventory cycles, while the upcoming 2024 election cycle will elevate geopolitical uncertainty. Over the longer term, we believe in the significant growth opportunities provided by our eight sustainable technology investment themes, which naturally access and focus on the largest and longest potential growth markets. Our themes of low-carbon infrastructure, clean energy technology, smart cities and data security are enablers of AI development in a safe and power efficient manner, while sustainable transport, resource and productivity optimisation, digital democratisation and technology health are key use cases of AI with significant environmental and social benefits.

We believe that we are entering a period less driven by macroeconomic factors and more by bottom-up fundamentals and a new wave of innovation. As a dedicated team of technology and sustainability experts, we are focused on uncovering opportunities through both an AI and sustainability lens. By navigating the hype cycle with our rational valuation framework and continuing our active stewardship of capital, we believe we are well positioned to deliver on our dual mandate.

Sustainable Future Technologies Fund

Investment report for the period from 1 July 2023 to 31 December 2023 (continued)

With estimates of a UN Sustainable Development Goals funding gap of US\$4.2trn and a climate funding gap of US\$7trn to achieve a maximum 1.5°C global warming, we believe our sustainable technology themes are necessary for long-term value creation and both environmental and social progress.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Sustainable Future Technologies Fund

Investment objective and policy

The fund aims to provide capital growth over the long term (5 years or more) by investing in technology-related companies that contribute to the development of a sustainable global economy.

The fund invests at least 90% of its assets in shares (equities) or equity-related securities of technology-related companies, whose products and services are considered by the Investment Manager as contributing to positive environmental or social change, thereby having an impact on the development of a sustainable global economy. The fund's investment universe is defined by technology-related companies that derive at least 50% of their current or future expected revenues from the sustainable technology themes identified by the Investment Manager (as further outlined in Investment Strategy section). The fund will avoid investing in companies that the Investment Manager considers could contribute to significant environmental or societal harm. The fund may also invest in other assets including investment grade government bonds, cash and money market instruments. The Investment Manager may use derivatives to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI ACWI Information Technology Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the fund's performance. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager, within its thematic framework of environmental and social themes and positive/negative (avoidance) criteria screening, seeks to identify undervalued growth companies that are aligned with the UN's Sustainable Development Goals, and derive at least 50% of their current or future expected revenues from the sustainable technology themes the Investment Manager has identified as having a positive impact on those goals. Examples of themes the Investment Manager has identified include clean energy technology, sustainable transport, low carbon infrastructure, digital democratisation, health technology, smart cities, data security and resource and productivity optimisation. The Investment Manager looks to navigate the hype cycle (different stages in the development of a technology from conception to widespread adoption) around technology adoption by assessing the company's fundamental business model and by focusing on companies with high quality management following good governance practices and sustainable barriers to entry, driving longer term unappreciated earnings growth. The fund will avoid investing in companies that the Investment Manager considers could contribute to environmental or societal harm.

Performance history

Fund & Benchmark		Since launch to 30 Jun 22	1 year to 30 Jun 23	6 months to 31 Dec 23

US Sustainable Equity Fund

Investment report for the period from 1 July 2023 to 31 December 2023

Investment Fund Managers

Hamish Chamberlayne and Aaron Scully

The fund returned 5.79% (Net) based on Class H2 in US Dollar terms over the period under review, compared with a return of 7.78% in the S&P 500 Index, US Dollar terms.

After a tough third quarter, the narrative of 'higher-for-longer' interest rates melted away from October as headline inflation continued to slow. In its place came growing expectations of a Fed 'pivot' in 2024 and resurgent hopes of an economic 'soft landing'. This helped investors rediscover their risk appetite, and equities, especially those in growth-oriented sectors, rounded off a strong period. Throughout the period, market narrowness was a prevailing trend. The reporting period was no exception and many of the so-called Magnificent Seven of Alphabet, Amazon, Apple, Meta Platforms, Microsoft, Nvidia and Tesla continued to perform strongly.

The period presented, incrementally, confirmatory evidence of our primary investment thesis – that the global economy is migrating to a more sustainable footing, which will drive exciting investment opportunities as companies play their role in addressing these challenges. Our approach remains almost entirely bottom-up, focused on companies with secular growth opportunities, strong cash generation and indispensable products that drive positive change.

At the sector level, financials performed best as concerns about March's banking crisis faded and investors later rotated into cyclicals. IT and communication services shares also performed well, helped by the prospect of lower interest rates and further optimism about AI. Defensive sectors such as consumer staples, utilities and healthcare lagged the broader market.

The fund's overweight position in IT and underweight holdings in consumer staples and utilities thus benefited relative performance. By contrast, an overweight position in healthcare and underweight holding in communication services dragged on returns.

Overall stock selection detracted from relative performance. In IT, although there was a good performance through Lam Research, Autodesk and Workday, this was overshadowed by weak performances by companies such as IPG Photonics, ON Semiconductor and Keysight Technologies. In financials, our preference for insurance companies such as AON and Marsh & McLennan detracted as markets rotated into banks. In healthcare, the weak performance of medical technology companies Edwards Lifesciences, Illumina and STAAR Surgical outweighed ICON's positive contribution. The fund's industrial holdings helped to offset some of the relative underperformance. Companies such as Wabtec (Westinghouse Air Brake Technologies), Carrier Global and water-related holdings Core & Main and Advanced Drainage Systems performed well. Positioning within the Magnificent Seven also added value. No exposure to Apple and Tesla was beneficial, and the fund's two largest positions, Microsoft and Nvidia, performed strongly, which offset some of the underperformance from not owning Alphabet, Amazon and Meta.

Top performers included real estate financing firm Walker & Dunlop, property and casualty insurer Progressive and semiconductor company Lam Research. Walker & Dunlop benefited from improved sentiment towards real estate companies as interest rate expectations fell. As a leading provider of mortgages in multi-family lending, the firm is a key enabler of home ownership for millions of Americans. Progressive's monthly metrics improved and it duly reported strong third-quarter earnings. The company's analytics technology has delivered excellent underwriting results over a long time, which has allowed it to offer essential financial protection at lower prices. Lam Research posted better-than-expected earnings and rallied with other growth stocks towards the period end. The company's technology underpins the application of connectivity, advanced computing and AI technology to everything from medicine to connected vehicles.

Key detractors included laser manufacturer IPG Photonics, AON and ON Semiconductor. IPG Photonics lowered its earnings guidance in July due to challenging global macroeconomic conditions. IPG Photonics' lasers deliver considerable energy and cost savings, and the firm has continued to gain traction in markets with strong secular trends. AON shares fell after the company announced that it had agreed to buy middle-market brokerage firm NFP, a deal we are reviewing closely. AON uses big data analytics to help clients manage complex and emerging risks such as climate change and cyberattacks and has benefited from a near duopoly market structure. ON Semiconductor shares fell after the company announced redundancies and softened guidance. ON Semiconductor holds a strong position in electric vehicle microchips and has also expanded into other industries, including medicine. New positions included nVent Electric, S&P Global, ON Semiconductor and Core & Main. We sold Microchip Technology, Atlassian, Twilio, Moderna and Workday.

The period was challenging for sustainable investing due to geopolitical discord, inflation and interest rate increases. However, the forthcoming year, with pivotal elections in major economies, is expected to bring additional fiscal support and lower interest rates, which could benefit sustainable investing and other sectors.

We have already witnessed impressive underlying progress in the laying of foundations for a period of accelerated growth in relation to reshoring manufacturing in key clean technology industries such as batteries and semiconductors, the electrification of transportation, 'greening' buildings, decarbonising electricity and transforming industry, among others.

US Sustainable Equity Fund

Investment report for the period from 1 July 2023 to 31 December 2023 (continued)

As long-term bottom-up investors, it is important to focus on the micro aspects of high-quality businesses that are exposed to attractive secular trends and have strong financial resilience. We continue to meticulously follow our robust investment process, identifying sustainable businesses exposed to these growth trends, focusing on cash-flow generation, strong balance sheets, financial resilience and exercising valuation discipline.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

US Sustainable Equity Fund

Investment objective and policy

The fund aims to provide capital growth over the long term (5 years or more) by investing in US companies whose products and services are considered by the Investment Manager as contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy.

The fund invests at least 80% of its assets in a concentrated portfolio of shares (also known as equities) of US companies, of any size, in any industry. The fund will avoid investing in companies that the Investment Manager considers to potentially have a negative impact on the development of a sustainable global economy. The fund may also invest in other assets including cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the S&P 500 Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the fund's performance. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

Strategy

The Investment Manager, within its thematic framework of environmental and social themes and positive/negative (avoidance) criteria screening, seeks to construct a differentiated and well diversified portfolio of US companies, based on the belief that superior returns can be generated by companies that are providing solutions to environmental and social challenges. These companies should have attractive financial attributes such as persistent revenue growth and durable cash flows, as well as exhibiting strong management of environmental, social and corporate governance risks. Companies will typically be strategically aligned with themes such as climate change, resource constraints, growing populations, and ageing populations. The fund avoids investing in fossil fuels and companies that stand to be disrupted by the transition to a low-carbon economy.

General policies applicable to all sub-funds

To the extent permitted by the section 'Investment Restrictions' of the prospectus, the sub-funds may also invest in either closed-ended or open-ended investment funds, or other transferable securities, including derivatives, which invest in, or provide a return linked to, any of the transferable securities that they are permitted to invest in.

For the purpose of maximising portfolio returns, the sub-funds may also, within the limits set forth in the section 'Investment Restrictions' of the prospectus, engage in a policy of currency hedging and make use of derivatives for efficient portfolio management when it is thought by the Investment Manager to be appropriate.

Further, some of the sub-funds may invest in derivatives within the limits set forth in the section 'Investment Restrictions' of the prospectus in order to enhance returns. All sub-funds may also, to the extent permitted by applicable regulations, on a temporary basis or for defensive purposes, invest in government debt securities.

Where a sub-fund's investment remit is restricted to companies in a particular country or geographical area, a portion of that sub-fund's total assets may be invested in companies domiciled outside of that country or geographical area, respectively, but which derive a significant portion of their revenues and/or profits from operations in that country or geographical area, respectively.

Cross sub-fund investments

As at 29 December 2023, there were no cross sub-fund investments.

2. Presentation of financial statements

The accompanying financial statements present the financial position including the assets and liabilities of the Company and each sub-fund in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements. They are prepared in the designated currency of each sub-fund as stated in the prospectus. The combined statements of the Company are prepared in US Dollars.

The financial statements are prepared on a going concern basis of accounting, with the exception of the Pan European Equity Fund which merged into the Pan European Mid and Large Cap Fund on 7 December 2023 and the Global Multi-Asset Fund which closed on 21 November 2023.

The financial statements include dividend declarations as at the accounting date 31 December 2023. As such the NAVs disclosed throughout the report may differ from those published at the official valuation point on 29 December 2023 or 28 December 2023 for Japan Opportunities Fund, Asia-Pacific Property Income Fund and Japanese Smaller Companies Fund.

3. Significant accounting policies

The following is a summary of the significant accounting policies followed by the Company:

Valuation of investment securities

The investments within the portfolio of each sub-fund will normally be valued on the basis of either the last available mid-market price (the mid-point between the quoted bid and offer prices) or, for certain markets, the last traded price on the principal stock exchange or market on which the investments are quoted, listed or normally dealt in on the relevant dealing day as at 13:00 Luxembourg time with the exception of Emerging Markets Debt Hard Currency Fund, Global High Yield Bond Fund, Strategic Bond Fund, Biotechnology Fund, Global Multi-Asset Fund, Global Property Equities Fund, Global Smaller Companies Fund, Global Sustainable Equity Fund, Global Technology Leaders Fund, Responsible Resources Fund, Sustainable Future Technologies Fund and US Sustainable Equity Fund, which are valued as at 16:00 Luxembourg time. For the purposes of the financial statements, the investments have been valued on the relevant market or traded price as at 29 December 2023 or 28 December 2023 for Japan Opportunities Fund, Asia Pacific Property Income Fund and Japanese Smaller Companies Fund.

Notes to the Financial Statements (continued)

As at 31 December 2023

3. Significant accounting policies (continued)

Valuation of investment securities (continued)

The exchange rates used to value the investments of each sub-fund are as the valuation point on or after the dealing cut off on the dealing day concerned.

All other assets, including restricted and not readily marketable securities, will be valued in such manner as the Directors consider appropriate to reflect their fair value. The Company reserves the right to utilise fair value techniques where the underlying markets are closed for trading at the sub-fund's valuation point and where the latest available market prices may not accurately represent the fair value of the sub-fund's holdings due to prevailing market conditions.

Units or shares of a CIS are valued at their last determined and available NAV where possible. If such price is not representative of the fair market value of such assets, then the price is determined by the Directors on a fair and equitable basis. Units or shares of a listed closed-ended CIS are valued at their last available stock market value.

In the case of short term instruments, the value of the instrument based on the net acquisition cost, is gradually adjusted to the par value price thereof. In the event of material changes in market conditions, the valuation basis is adjusted to the new market yields.

As a result of time variations in certain markets the prices applied to some investments do not necessarily reflect the closing market prices for the same calendar day as the relevant dealing day.

Any difference arising between the cost of securities held at the reporting date and their market value at that date is recognised in the Statement of Operations and Statement of Net Assets.

Realised gains or losses resulting from investments, including derivative investments, are recognised in the Statement of Operations and Statement of Changes in Net Assets.

Private placement investments

A private placement is a private alternative to issuing a publicly offered security as a means for raising capital. In a private placement the sale of securities is made directly by the issuer to a select number of investors without public offering through an investment bank.

Typically, when the sub-fund invests through a private placement, the sub-fund makes a commitment to invest a specified amount of capital in the investee private company in a series of tranches. The capital commitment for the initial and any future closings are triggered following the completion of defined conditions or events.

The sub-fund recognises investment purchases in the financial statements for tranches that completed or became binding transactions prior to the end of the financial reporting period. These are then included in the period end investment portfolio as an investment holding.

Future tranches that have not completed before the period end and are dependent on future events are unfunded commitments and not recognised in the financial statements. There were no unfunded commitments at the current period end.

Special purpose acquisition companies

The sub-funds may invest in stock, warrants, and other securities of special purpose acquisition companies (SPACs) or similar entities that pool funds to seek potential acquisition opportunities. Unless and until an acquisition is completed, a SPAC typically invests its assets (less a portion retained to cover expenses) in US Government securities, money market fund securities, and cash. If an acquisition that meets the requirements for the SPAC is not completed within a pre-established period of time (typically two years), the invested funds are returned to the SPAC's shareholders. Because SPACs and similar entities are in essence blank check companies without an operating history or ongoing business other than seeking acquisitions, the value of a SPAC's securities is particularly dependent on the ability of the SPAC's management to timely identify and complete a profitable acquisition. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their prices. To the extent the SPAC is invested in cash or similar securities while awaiting an acquisition opportunity, a sub-fund's ability to meet its investment objective may be negatively impacted. In addition, some SPACs may be traded in the over-the-counter (OTC) market and may be considered illiquid and/or be subject to restrictions on resale.

Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the Statement of Net Assets date for the period until maturity. Gains or losses resulting from forward foreign exchange contracts are recognised in the Statement of Operations and Statement of Changes in Net Assets. Open forward foreign exchange contracts are shown in the portfolio statement at fair value.

Unrealised gains or losses resulting from forward foreign exchange contracts are recognised in the Statement of Operations and Statement of Net Assets.

Notes to the Financial Statements (continued)

As at 31 December 2023

3. Significant accounting policies (continued)

Forward foreign currency contracts on hedged share classes

Open forward currency contracts on hedged share classes are shown in the portfolio statement at fair value. The net gains/(losses) on forward currency contracts on hedged share classes are apportioned between hedged income on forward currency contracts in the revenue account and forward currency contracts on hedged share classes in the Statement of Operations and Statement of Changes in Net Assets, reflecting the income and capital elements of the hedged share classes.

Unrealised gains or losses resulting from forward foreign exchange contracts on hedged share classes are recognised in the Statement of Net Assets.

Financial futures contracts

Financial future contracts are valued at the exchange quoted price at 13:00 Luxembourg time with the exception of the Emerging Markets Debt Hard Currency Fund, the Global High Yield Bond Fund and the Strategic Bond Fund, which are valued as at 16:00 Luxembourg time. Initial margin deposits are made in cash upon entering into futures contracts. During the period when the financial future contract is open, changes in the value of the contract are recognised as unrealised gains and losses in the Statement of Net Assets by marking to market on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. Variation margin payments are recorded in the futures margin account in the Statement of Net Assets. When the contract is closed, the sub-fund records a realised gain or loss in the Statement of Operations and Statement of Changes in Net Assets equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

Open financial future contracts are shown in the portfolio statement at fair value.

Contracts for difference

Changes in the value of the contracts for difference are recognised as unrealised gains or losses in the Statement of Net Assets by 'marking-to-market' the value at the Balance sheet date, using prices supplied by independent pricing services that are based on the closing prices of the underlying securities on the recognised exchanges. When a contract is closed, the difference between the proceeds from (or cost of) the closing transaction and the original transaction is recorded as a realised gain or loss in the Statement of Operations and Statement of Changes in Net Assets.

Open contracts for difference are shown in the portfolio statement at fair value.

Options

When a sub-fund purchases an option, it pays a premium and an amount equal to that premium is recorded as an investment. When a sub-fund sells an option, it receives a premium and an amount equal to that premium is recorded as a liability. The investment or liability is adjusted daily to reflect the current market value of the option. If an option expires unexercised, the sub-fund realises a gain or loss to the extent of the premium received or paid.

For the Asian Dividend Income Fund only, option premiums are treated as revenue and distributed accordingly.

Swap contracts

Sub-funds may enter into credit default swaps and other types of swap agreements such as interest rate swaps, overnight index swaps, total return swaps, swaptions and inflation linked swaps. Gains or losses resulting from swap contracts are recognised in the Statement of Operations and Statement of Changes in Net Assets. The premiums received resulting from credit default swaps are recognised under Derivative income/expense in the Statement of Operations. Swaps are OTC investments valued at fair market value as determined in good faith pursuant to procedures established by the Management Company and ratified by the Directors.

Realised gains & losses on sale of investments

The computation of realised gains and losses on sales of investments is made on the basis of average cost.

Income

Distributions from CIS and dividends receivable from quoted equity and non equity shares are credited to revenue, when the security is quoted ex-dividend. Dividends on unquoted stocks are credited to revenue when the dividend is announced.

Bank interest and margin interest earned on derivative positions are recognised on an accruals basis. Positive margin interest is disclosed under the caption 'Derivative income' and any negative margin interest is disclosed under 'Derivative expense' in the Statement of Operations.

Bond interest and interest from certificates of deposit are accrued on a daily basis.

Long positions held on contracts for difference are subject to financing costs. Interest is calculated and charged on a daily basis on the contract value. Similarly if short positions are held, interest will be paid or received and recorded as 'Interest received/paid on contracts for difference' within the Statement of Operations, depending on its nature and may be further influenced by the monetary policy adopted in each jurisdiction.

Notes to the Financial Statements (continued)

As at 31 December 2023

3. Significant accounting policies (continued)

Income (continued)

Special dividends are recognised as either revenue or capital depending on the nature and circumstances of the special dividend declared.

Dividend, REIT and interest income is disclosed net of withholding tax (WHT) where applicable.

Dividend charges or credits are used to ensure that the contracts for difference mirror the value of the underlying stock when a dividend is announced. If a long position is held, a payment will be received on the ex-dividend date and is reflected within 'Derivative income' in the Statement of Operations. If a short position is held, a charge is deducted on ex-dividend date and is reflected within 'Derivative expenses' in the Statement of Operations.

Where the sub-fund invests into a CIS, management fee rebates may be received from Investment Managers and are recognised when the entitlement arises, as either income or capital in accordance with the treatment of the management fee charged on the underlying CIS. Capital management fee rebates are reflected in the Statement of Operations under 'Net realised gain on investment securities' and income management fee rebates under 'Other income'. Any capital or income management fee rebates receivable are reflected in the Statement of net assets under 'Other assets'.

Revenue derived from the realised and unrealised gains/losses on hedged class forward currency contracts is allocated to both the capital and revenue of the share class based upon the prior day capital/revenue split.

If an option is written for revenue generation purposes for the Asian Dividend Income Fund then its premium is deemed part of the revenue of the fund and is considered distributable.

Securities lending

The Company has entered into a securities lending programme with J.P. Morgan SE acting as the Securities Lending Agent for the purposes of efficient portfolio management and in order to generate additional revenue. As part of this agreement the sub-funds can reinvest collateral and enter into reverse repurchase agreements.

The Securities Lending Agent shall ensure that sufficient value and quality of collateral is received before or simultaneously with the movement of loaned collateral. This will then be held throughout the duration of the loan transaction and only returned once the lent asset has been received or returned back to the relevant sub-fund. The Securities Lending Agent will also monitor and maintain all operational aspects of the assets while they are on loan.

Securities lending revenue is accounted for in the Statement of Operations within 'Other income'.

Designated currencies

As permitted by Luxembourg Law, the accounts and records of the Company are maintained in US Dollars with the exception of the Euro Corporate Bond Fund, the Euro High Yield Bond Fund, the Total Return Bond Fund, the Euroland Fund, the Pan European Mid and Large Cap Fund, the Pan European Equity Fund, the Pan European Absolute Return Fund, the Pan European Property Equities Fund and the Pan European Smaller Companies Fund which are maintained in Euros. The base currency of Global Multi-Asset Fund is Sterling and the base currency of Japan Opportunities Fund and Japanese Smaller Companies Fund are in Japanese Yen.

Transactions carried out in any other currency other than US Dollars, which is the designated currency of the Company, are translated at the exchange rates ruling at the transaction date. Assets and liabilities are translated at the exchange rates ruling at the Statement of Net Assets date.

When the designated currency of a sub-fund is not US Dollars, the difference between the opening net assets converted at exchange rates ruling at the beginning of the period, and closing net assets converted at exchange rates ruling at the end of the financial accounting period are disclosed in the Combined Statement of Changes in Net Assets as 'Exchange rate effect on opening net assets'.

Hedged share classes

Any gains or losses that are incurred as a result of the hedging transaction will accrue to the relevant share class only with apportionment reflecting the income and capital elements of the hedge share classes.

The value of the share class to be hedged will be made up of both capital and income elements and the Investment Manager intends to hedge between 95-105% of the value of each hedged share class. Adjustments to any hedge to keep within this target range will only be made when the required adjustment is material. As such the hedged share classes will not be completely protected from all currency fluctuations.

4. Swing pricing adjustment

The Company operates a swing pricing policy, the threshold of which is determined by the Directors. The maximum swing factor applied during the period was a swing of 52 bps applied to Emerging Markets Debt Hard Currency Fund on 17 November 2023 and 23 November 2023.

Notes to the Financial Statements (continued)

As at 31 December 2023

4. Swing pricing adjustment (continued)

The Directors have implemented a swing pricing policy to protect existing shareholders from the dilution effects they may suffer as a result of dealing activity by other Investors in a particular sub-fund. The swing pricing policy gives the Directors the power to apply a swing price adjustment to the NAV per share to cover dealing costs and to preserve the value of the underlying assets of a particular sub-fund.

The sub-funds operate a partial swing pricing mechanism, where the NAV per share will only swing when a predetermined threshold (the swing threshold) is exceeded at each dealing day. The swing threshold level is approved by the Directors at their discretion to ensure that those flows that would represent a significant amount of dilution in a particular sub-fund are captured. The Directors may decide to adjust the swing pricing mechanism in exceptional circumstances to protect the interests of remaining shareholders.

If the net dealing on any dealing day is greater than the swing threshold, the NAV per share will be adjusted up or down dependent on aggregate net transactions on any given dealing day. It will increase the NAV per share when there are net inflows into the sub-fund and decrease the NAV per share when there are net outflows from the sub-fund. The same swing price adjustment will be applied to all share classes within the relevant sub-fund, therefore all transacting investors in the relevant sub-fund, whether subscribing or redeeming, will be affected by the swing price adjustment. It is not possible to accurately predict whether a swing price adjustment will occur at any future point in time and consequently how frequently it will need to be made.

The Directors may also make a discretionary dilution adjustment if the threshold is not met if, in their opinion, it is in the interest of existing shareholders to do so.

During the period under review, swing pricing mechanism has been applied for all sub-funds.

On 29 December 2023, the last working day of the period under review none of the sub-funds' NAV per share were adjusted.

5. Exchange rates

The exchange rates used for the conversion into US Dollars of assets and liabilities of each sub-fund denominated in other currencies and with respect to sub-funds whose investment are valued at 13:00 Luxembourg time as detailed in Note 3 to the financial statements as at 29 December 2023 are as follows:

USD 1=AUD 1.4704586	USD 1=IDR 15396.9995910	USD 1=PLN 3.9184776
USD 1=CAD 1.3255002	USD 1=ILS 3.6066691	USD 1=RON 4.4914863
USD 1=CHF 0.8364460	USD 1=INR 83.2137272	USD 1=SEK 10.0085521
USD 1=CNH 7.1182026	USD 1=JPY 141.5399695	USD 1=SGD 1.3192231
USD 1=CNY 7.0922322	USD 1=KRW 1287.8999786	USD 1=THB 34.1325208

USD 1=HKD 7.8143523	USD 1=PHP 55.3749973	

Notes to the Financial Statements (continued)

As at 31 December 2023

6. Fees and operational expenses

General

The Management Company and/or the Principal Distributors may discount, or share the whole or any part of the charges or fees outlined below with the Administrator, Registrar and Transfer Agent, Authorised Distributors or other intermediary or investor. In addition, the Management Company and/or the Principal Distributors may waive any of the charges or fees outlined below, in whole or in part, which the Management Company and/or the Principal Distributors are respectively entitled to receive.

Furthermore, the Investment Manager may discount the whole or any part of the charges and fees outlined below to the Authorised Distributor or other intermediary or investor.

Allocation of charges and expenses

Each share class of each sub-fund is charged with all costs and expenses attributable to it. Such costs may be amortised over such period as the Directors may determine but not in excess of five years. Costs and expenses not attributable to a particular class or sub-fund are allocated between all of the classes of shares pro rata to their respective NAVs.

In the case of amortised costs allocated pro rata, the Directors reserve the right to recalculate such allocation over the course of the amortisation period if they believe that such is fair and equitable in the light of the changes in sub-funds' respective NAVs.

Management fees

The management fee is payable out of the assets of the sub-fund in respect of all share classes. The management fee accrues daily and is paid monthly in arrears to the Management Company.

For the period ended 31 December 2023 the maximum management fees that can be charged as a percentage per annum on the total net assets of the relevant sub-fund, were as follows:

	Class A & X	Class B	Class C	Class GU & E - Up to	Class F - Up to	Class G	Class H	Class I	Class HB IU - Up to	Class M Bond Funds - Up to	Class Q, S, & SB - Up to	Class R

** Pan European Equity Fund merged into the Pan European Mid and Large Cap Fund on 7 December 2023.

*** Global Multi-Asset Fund closed on 21 November 2023.

The management fee for Class Z shares is agreed between the investor and the Company and is not payable out of the total net assets of the relevant sub-fund.

Notes to the Financial Statements (continued)

As at 31 December 2023

6. Fees and operational expenses (continued)

Performance fees

In consideration of the investment services provided in relation to the relevant sub-funds, the Investment Manager, in addition to the management fee, is entitled to receive out of the assets of the relevant sub-fund a performance fee (excluding the China Opportunities Fund, Global Sustainable Equity Fund, Sustainable Future Technologies Fund, US Sustainable Equity Fund and the Bond Funds). The performance fee is payable in respect of classes A, E, F, G, GU, H, HB, I, IU, Q, S, SB and X. The basis of the calculation is detailed in the prospectus.

As at 31 December 2023, the following accruals were made for performance fees. There were no performance fees accrued at 31 December 2023 for the remaining share classes.

Notes to the Financial Statements (continued)

As at 31 December 2023

6. Fees and operational expenses (continued)

Performance fees (continued)

Sub-fund	Share class	Performance fees charged during period*
Pan European Property Equities Fund	A3 EUR	EUR 49,654
Pan European Smaller Companies Fund	H2 HUSD	EUR 7,237

* The performance fees are disclosed in accordance with guidelines issued by the European Securities and Markets Authority (ESMA).

The performance fee for the relevant share classes of each sub-fund will be 10% (with the exception of the Biotechnology Fund and the Pan European Absolute Return Fund where the performance fee rate is 20%) of the outperformance of the share class relative to the hurdle rate, subject to the high water mark.

The hurdle rate is a rate of return that the share class must achieve before it can charge a performance fee. It may be a set percentage or it may be referenced to a financial rate or index.

The high water mark means the initial launch price of the share class for the first crystallisation period or, in subsequent crystallisation periods, the NAV at the end of the last crystallisation period where crystallisation occurs and a performance fee is paid. The high water mark is adjusted for any distribution paid.

If the funds underperform in relation to either the hurdle rate or the high water mark, no performance fee is paid.

For all base currency and unhedged share classes, the performance fee will be calculated with reference to the returns of the NAV and the hurdle NAV in the base currency of the relevant sub-fund.

Unhedged share classes may be subject to exchange rate movements which may lead to differences in performance between the relevant unhedged share class and the relevant base currency share class. In certain circumstances, the relevant unhedged share class may incur a performance fee even if the relevant unhedged share class did not receive a positive return.

For hedged share classes, with the exception of the hedged share classes of the Pan European Absolute Return Fund, the performance fee will be calculated with reference to the return of the NAV in the relevant share class currency and the return of the hurdle NAV in the base currency of the relevant sub-fund.

For hedged share classes of the Pan European Absolute Return Fund, the performance fee will be calculated with reference to the returns of the NAV and the hurdle NAV in the relevant share class currency.

The performance fee may crystallise at an annual crystallisation period end and on cancellation of shares with the Depositary on a dealing day. Once a performance fee crystallises it is due to the Investment Manager and is paid as soon as practicable. No refund will be made in respect of any performance fee paid out at that point even if the NAV of the relevant share class subsequently falls below the high water mark and/or hurdle rate.

In accordance with the Prospectus, performance fees are taken to capital for the purpose of calculating the distribution.

Additional fees and expenses

Shareholders of share classes A, B, E, F, GU, H, HB, IU, R, S, SB, X and Z will be charged additional fees and expenses in addition to the relevant, 'Management fees' set out on page 248.

Additional fees and expenses will be charged to shareholders of share classes C, G, I, M and Q as part of the management fee set out in 'Management fees' on page 248. Any additional fees and expenses that the Company cannot recover from the shareholders of share classes C, G, I M and Q through the management fee shall be borne by the Investment Manager.

The additional fees and expenses which are set out in detail, are:

- Administration fees
- Registrar and Transfer Agent fees
- Depositary and Custody fees
- Shareholder servicing fee
- Distribution fee
- Other expenses
- Collective Investment Schemes
- Directors' fees

Administration fees

BNP Paribas, Luxembourg Branch has been appointed by the Management Company as Administrator under a fund administration agreement (the 'Fund Administration Service Agreement').

Notes to the Financial Statements (continued)

As at 31 December 2023

6. Fees and operational expenses (continued)

Administration fees (continued)

The Administrator is entitled to receive out of the assets of each sub-fund, fees in consideration for providing administration services to the Company along with such out-of-pocket expenses and disbursements as are deemed reasonable and customary by the Directors. The fees of the Administrator comprise transaction based fees and asset based fees and do not exceed 0.18% p.a. of the total net assets of the relevant sub-fund. The actual fees paid are disclosed in the 'Statement of Operations' and are accrued on a daily basis.

Registrar and Transfer Agent fees

International Financial Data Services (Luxembourg) S.A., was appointed by the Management Company as Registrar and Transfer Agent under a registrar and transfer agent agreement (the 'Registrar and Transfer Agent Agreement'). The Registrar Agent is responsible for processing the issue, redemption and transfer of shares as well as the keeping of the register of shareholders.

The Registrar and Transfer Agent is entitled to receive out of the assets of each sub-fund, fees in consideration for providing registrar agency services to the Company along with such out-of-pocket expenses and disbursements as are deemed reasonable and customary by the Directors. The fees of the Registrar Agent comprise transaction based fees and asset based fees and do not exceed 0.12% p.a. of the total net assets of the relevant sub-fund. The actual fees paid will be disclosed in the 'Statement of Operations'.

Depositary and Custody fees

BNP Paribas, Luxembourg Branch has been appointed as Depositary for the Company in order to comply with the UCITS V Directive.

The Depositary is entitled to receive out of the assets of each sub-fund, fees in consideration for providing services to it, along with such out-of-pocket expenses and disbursements as are deemed reasonable and customary by the Directors. The Company will pay to the Depositary a fee for fiduciary services, which is set at a rate of 0.006% per annum of the total net assets of the relevant sub-fund (subject to a minimum fee of GBP 1,200 (USD 1,800) per sub-fund).

BNP Paribas, Luxembourg Branch has been appointed by the Company under an agreement (the 'Custodian Agreement') to assure the safe custody of the Company's assets.

The Depositary is also entitled to receive out of the assets of each sub-fund, custody fees comprising asset-based fees and transaction-based fees that vary depending on the market in which a particular sub-fund invests; these fees will not exceed 0.65% per annum of the value of the assets of the relevant sub-fund and GBP 120 (USD 190) per transaction respectively.

Both the Depositary fee and Custodian fee are accrued daily and paid monthly in arrears.

Shareholder servicing fee

A shareholder servicing fee is payable from the assets of each sub-fund at the rate of 0.50% per annum for share classes A, F and X and 0.30% per annum for share classes H and SB of the Regional and Specialist Funds (except for the Global Multi-Asset Fund) and 0.25% per annum for the Global Multi-Asset Fund and the Bond Funds of the sub-funds average total net assets. This fee is accrued daily and payable monthly in arrears. This fee is payable to the Principal Distributors for the provision of the following services; responding to existing investors' queries, maintenance of records of shareholders' accounts, issuance and delivery of periodic account statements to shareholders and assistance in handling purchases, exchanges and redemption of shares.

No shareholder servicing fees are payable in respect of all other share classes of the relevant sub-funds.

Distribution fee

A distribution fee is payable on class X shares from the assets of each sub-fund at the annual rate of 0.6% per annum for the Regional and Specialist Funds, and 0.35% per annum for the Bond Funds of the relevant sub-fund's average total net assets. The distribution fee is accrued daily and payable monthly in arrears. The fee is payable to the Authorised Distributor as compensation for providing distribution-related services to the sub-funds with respect to share class X.

Other expenses

The Company will also pay, as far as allowable under applicable regulations, all other operating expenses, which include, without limitation, taxes, expenses for legal and auditing services, printing shareholders' reports, prospectuses, all reasonable out of pocket expenses incurred by the Directors, registration fees and other expenses payable to supervisory and local authorities, regulatory and tax representatives appointed in various jurisdictions, insurance, interest costs, brokerage fees and costs. The Company will also pay fees or other charges levied in respect of the provision and use of benchmarks, dividend and redemption payment costs and the costs of publication of the NAV or other sub-fund information, including, but not limited to, that required to be published by any regulatory authority.

Collective Investment Schemes

Where a sub-fund may invest all or substantially all of its assets in CIS, there may be additional costs of investing in the underlying funds (underlying funds' TERs) which could increase the TER and/or the Ongoing Charges of the sub-fund. Accordingly, the sub-fund's TER and/or Ongoing Charge will include a synthetic element reflecting these underlying funds' TERs and all share classes of the sub-fund will incur such additional costs.

When investing into other CIS managed by a Janus Henderson Group plc company, there will be no double charging of management fees.

Notes to the Financial Statements (continued)

As at 31 December 2023

6. Fees and operational expenses (continued)

Directors' fees

Those Directors who are not employees of Janus Henderson Group plc and its affiliates may each receive an annual fee out of the assets of each sub-fund, which shall be approved by the shareholders. The Directors fees due and paid to the Directors were USD 40,207 (June 2023: USD 78,145).

Initial charge

The Principal Distributor is entitled to receive an initial charge which, unless otherwise notified, will not exceed 5% of the total amount invested by an investor (which equals a maximum of 5.26% of the NAV of the shares).

Further details can be found in the section 'Fees, Charges and Expenses' of the prospectus.

Formation costs

The total costs of establishing the Emerging Markets Debt Hard Currency Fund were approximately USD 28,483 and were paid out of the proceeds of the initial issue of shares in the fund. These costs and expenses are being amortised on a straight line basis over a period of five years from the date on which the fund commenced operations. The Directors may, in their absolute discretion, shorten the period over which such fees and expenses are amortised. The amortised formation costs charged in the period were USD 2,832 (June 2023: USD 3,013).

7. Taxation

Under Luxembourg tax law, there are no Luxembourg income, withholding or capital gains taxes payable by the Company. The Company will, however, be subject to the tax on Luxembourg undertakings for collective investment (Taxe d'abonnement), calculated and payable quarterly, on the aggregate NAV of each sub-fund at the end of each quarter being 0.01% per annum on share classes E, G, GU, I, IU, B, C, M and Z and 0.05% per annum on all other share classes. No such tax is due on the portion of the Company's assets invested in other Luxembourg undertakings for collective investment. The benefit of the 0.01% tax is available to share classes E, G, GU, I, IU, B, C, M and Z on the basis of the Luxembourg legal, regulatory and tax provisions as these are known to the Company at the Balance sheet date and at the time of admission of subsequent Investors. However such assessment is, for the past and for the future, subject to such interpretations on the status of an institutional investor by any competent authorities as will exist from time to time. Any reclassification made by an authority as to the status of an investor may submit the entire share classes E, G, GU, I, IU, B, C M and Z to a tax of 0.05%.

No stamp duty or other tax is payable in Luxembourg on the issue of shares in the Company.

Capital gains, dividends and interest on securities issued in other countries may be subject to withholding and capital gains taxes imposed by such countries.

India operates a taxation regime for short-term and long-term capital gains. As a result of this, the Asian Dividend Income Fund and the Asian Growth Fund recorded an accrual for Indian capital gains tax payable on Indian securities.

8. Share class details

The Company offers 5 sub-classes. These sub-classes of shares are abbreviated in the Financial Statements as A1, A2, A3, A4, A5, etc. Classes C, M, N, Q, S and Z offer only accumulation shares. Class B and Class R Distribution shares are only available on the Pan European Mid and Large Cap Fund. The fee structure is described in Note 6.

Sub-class 1 shares - This share class distributes substantially all of the investment income for the relevant accounting period after the deduction of fees, charges and expenses. Distributions will not include realised and unrealised capital gains.

Sub-class 2 shares - This share class does not distribute gross income, net realised and unrealised capital gains but instead accumulates it, thereby increasing the capital value of the share class.

Sub-class 3 shares - This share class distributes substantially all of the investment income for the relevant accounting period before the deduction of fees, charges and expenses. To allow more investment income to be distributed, fees, charges and expenses may be deducted from capital and may also include realised and unrealised capital gains.

Sub-class 4 shares - This share class distributes substantially all of the investment income over the relevant accounting period and potentially a portion of capital before the deduction of fees, charges and expenses. To allow more investment income to be distributed, fees, charges and expense may be deducted from capital and will also include realised and unrealised capital gains and may include original capital invested.

Sub-class 5 shares - This share class distributes substantially all of the investment income over the relevant accounting period and potentially a portion of capital before the deduction of fees, charges and expenses. To allow more investment income to be distributed, fees, charges and expense may be deducted from capital and will also include realised and unrealised capital gains and may include original capital invested.

Notes to the Financial Statements (continued)

As at 31 December 2023

8. Share class details (continued)

Distribution share classes may differ in terms of their distribution frequency. Distribution share classes may distribute monthly, quarterly, semi-annually or annually determined at the launch of the relevant share class. Where a monthly, quarterly or semi-annual is available, it will be expressed with the suffix 'm', 'q' or 's', respectively.

All shares of the Company are fully paid shares of no par value and at any time are equal to the total net assets of the sub-funds. Regardless of its NAV per share, each share is entitled to one vote at all meetings of the shareholders.

Shareholders may switch all or part of their shareholdings from one or more of the sub-funds into the same share class of one or more of the other sub-funds on any dealing day.

Switches into share class HB are restricted to certain investors who subscribe within a certain period of the launch date of the relevant sub-fund. The share class will be offered for a restricted time only. Any investors who have subscribed to this share class can continue investing in this share class even after the initial subscription period has passed. In addition, switches into share classes H and HB are restricted to certain countries, through specific Authorised Distributors which, according to their regulatory requirements or based on individual fee arrangements with their clients, do not keep trail commission, rebates or retrocessions.

Switches into share classes E, G, GU, I, IU, B, C, M and Z are only permitted if the investor switching into them is an institutional investor within the meaning of Article 174 of the law.

Switches into share classes G and GU are restricted to investors with a minimum total investment in funds of the Company of €1,000,000,000 (or the equivalent in another currency) at the time of the initial investment.

Switches from or into a BRL hedged share class are not permitted.

Share classes B and R are closed to investments from new investors.

An up to date list of the share classes available for the sub-funds can be obtained from the website https://www.janushenderson.com/en-gb/investor/documents/?document_title=share+class or from the registered office of the Company.

Hedged share classes

The sub-funds may offer hedged share classes in order to mitigate the currency risk between the base currency of the sub-fund and the currency of the hedged share class, with the exception of BRL hedged share class. Where a hedged share class is available it will be expressed with the pre-fix 'H' immediately before the currency denomination and described for instance as Class A HEUR, Class A HGBP, Class A HUSD, Class A HAUD, Class A HSEK, Class A HCHF etc. The Company's Investment Manager will employ financial instruments, such as foreign exchange forward contracts, as a hedge.

The other characteristics of the hedged share class (e.g. dividend policy, minimum investment, management fee etc) remain the same as those above but their cost is higher due to the cost of the currency hedging.

9. Net asset value

The NAV per share of each sub-fund will be expressed in the base currency of the sub-fund, calculated by the administrator on each business day in Luxembourg at each valuation point and on other days as approved by the Board.

The NAV for each share class of each sub-fund is calculated by determining the value of the assets of the relevant sub-fund applicable to that share class, including accrued income, and deducting all liabilities (including all fees and charges) of that share class, and dividing the resultant sum by the total number of shares of that class in the relevant sub-fund in issue or allotted at that time, (the resulting amount being rounded to the nearest two decimal places) to give the NAV per share of each share class of the sub-fund. The NAV per share of each share class within each sub-fund may, at the discretion of the Directors, be rounded up or down to the nearest ten-thousandth of a EUR, USD, GBP, SGD or CHF in the case of each share class denominated in EUR, USD, GBP, SGD or CHF respectively and may be rounded up or down to the nearest hundredth of a JPY in the case of each share class denominated in JPY. Any other currency share class that becomes available will be rounded up or down using similar principles as the above mentioned currencies (at the discretion of the Directors).

Further details on rules that apply in valuing the total assets can be found in the current prospectus.

If the Company had calculated the NAV's solely with a view to publication, the market prices used to value the net assets would have been the closing prices on 31 December 2023. However, these NAVs would not have been significantly different from those shown in the financial statements. The following sub-funds reported a difference in NAV of greater than 0.50% between closing prices as at 31 December and NAV valuation point on 29 December (official for all funds except Japan Opportunities Fund, Asia-Pacific Property Income Fund and Japanese Smaller Companies Fund, where 29 December NAV was indicative).

Notes to the Financial Statements (continued)

As at 31 December 2023

9. Net asset value (continued)

Sub-fund	Currency	% difference (in % of NAV)
Biotechnology Fund	USD	(0.61%)
Global Smaller Companies Fund	USD	(0.56%)
Global Technology Leaders Fund	USD	(0.59%)
Sustainable Future Technologies Fund	USD	(0.56%)

10. Equalisation

The Company will maintain equalisation accounts in relation to the shares with a view to ensuring that the levels of distribution payable to investors in the shares are not affected by the issue and redemption of, or the switch from or into, shares of those sub-funds during an accounting period. The price at which shares are bought by an investor will therefore be deemed to include an equalisation payment (which will be credited to the relevant equalisation account) calculated by reference to the accrued income of the share class, net of fees, charges and expenses where applicable. The first distribution which an investor receives in respect of such shares following the purchases may include a repayment of capital.

11. Dividend distributions

Dividend reinvestment

The net income of the assets of the sub-fund attributable to the (sub-class 2) share class will not be distributed to shareholders but will be reflected in the NAV per share of the (sub-class 2) share class concerned. Dividend reinvestments are made at the 30 June year end.

Dividends will be declared in relation to the distribution policy of the share class. Dividends will normally be paid out in share class currency.

Dividend paid

During the period from 1 July 2023 to 31 December 2023 dividends were declared and were paid on the following sub-funds:

Sub-fund	Share class	Accounting date	Pay Date	Rate per share in class currency	Shares	Ccy	Amount paid in class currency

13. Securities lending activities

The Company has entered into securities lending agreements for a number of equity and bond sub-funds. In return for making securities available for loan throughout the period, the sub-funds that have participated in the program received revenue which is reflected in the Financial Statements of each participating sub-fund under the 'Other income' caption. The Company has appointed J.P. Morgan SE, as agent for the securities lending program. As remuneration for this agency role, J.P. Morgan SE receives a maximum of 8% of the variable fees from the associated program. All securities are fully collateralised.

Notes to the Financial Statements (continued)

As at 31 December 2023

* Pan European Equity Fund merged into the Pan European Mid and Large Cap Fund on 7 December 2023.

Notes to the Financial Statements (continued)

As at 31 December 2023

14. Transactions with connected persons

During the period under review, the following transactions were entered into by the sub-funds with the following connected persons of the Company:

(1) The Management Company – Note 6 documents the management fees relevant to each sub-fund. The total amounts charged to the sub-fund by the Management Company, during the period in respect of these fees were USD 53,134,721 (June 2023: USD 106,404,501).

(2) Investment Manager - Note 6 documents the percentages of performance fees relevant to each sub-fund. The total amounts charged to the sub-funds by the Investment Manager, Janus Henderson Investors UK Limited (JHIUKL), during the period in respect of these fees were USD 3,075,104 (June 2023: USD 1,813,773).

(3) A shareholder servicing fee is payable to the Principal Distributors from the assets of each sub-fund at the rate of 0.50% per annum for share classes A, F and X and 0.30% per annum for share classes H and SB of the Regional and Specialist Funds and 0.25% per annum for the Bond Funds of the sub-fund's average total net assets.

The total amount charged to the sub-funds by the Principal Distributors during the period in respect of these fees was USD 12,396,396 (June 2023: USD 24,449,294).

(4) A Distribution fee on share class X at the annual rate of 0.60% per annum for the Regional and Specialist Funds and 0.35% per annum for the Bond Funds of the relevant sub-fund's average total net assets. The total amount paid by the Company to the Principal Distributor during the period in respect of these fees was USD 434,287 (June 2023: USD 994,561).

These transactions have been entered into in the ordinary course of business and on normal commercial terms, negotiated at arm's length and in the best interests of the shareholders.

15. Soft commission

The Investment Manager and where relevant, Sub-Investment Managers, use investment research, both internally generated and externally sourced, to inform their decision making.

The Investment Manager, and where relevant Sub-Investment Managers, pay for investment research from their own resources.

For the period ending 31 December 2023 there were no soft commission arrangements on those sub-funds registered with the Hong Kong SFC, as detailed within the Appendix.

16. Withholding tax reclaims

Fokus claims have been filed in respect of WHT applied on Belgian, Danish, Finnish, German and Italian dividends for the years 2003 to 2022. Claims received have been reflected in the sub-funds when they are received. Total outstanding reclaims are shown below. The likely outcome of these reclaims cannot be assessed at the current point in time and consequently no amounts in respect of these reclaims have been included in these financial statements. The legal costs of pursuing these WHT reclaims will be borne by the sub-funds.

Notes to the Financial Statements (continued)

As at 31 December 2023

16. Withholding tax reclaims (continued)

Should all of the claims be successful, the effect on each of the affected sub-funds (expressed in percentage of Net Assets as at 31 December 2023) would be as follows:

Sub-fund	Total (EUR)	% Weighting of Total Net Assets
Euroland Fund	5,117,967	0.56%
Pan European Mid and Large Cap Fund	411,672	0.16%
Global Property Equities Fund	147,076	0.01%
Global Smaller Companies Fund	1,223	0.01%
Global Technology Leaders Fund	401,827	0.01%
Pan European Absolute Return Fund	2,471,403	1.09%
Pan European Property Equities Fund	645,155	0.13%
Pan European Smaller Companies Fund	3,465,415	0.48%
Responsible Resources Fund	13,342	0.08%
Sub-funds closed		
Global Equity Income Fund ¹	11,180	0.14%
Pan European Dividend Income Fund ²	10,705	0.26%
Pan European Equity Dividend Fund ³	200,232	4.58%
Pan European Equity Fund ⁴	14,132,151	6.60%
Industries of the Future Fund ⁵	3,602	0.13%
World Select Fund ⁶	10,235	0.35%

¹ Global Equity Income Fund is closed. The total net assets used in the weighting percentage is at 23 November 2021.

² Pan European Dividend Income Fund is closed. The total net assets used in the weighting percentage is at 15 October 2020.

³ Pan European Equity Dividend Fund is closed. The total assets used in the weighting percentage is as at 29 June 2012.

⁴ Pan European Equity Fund is closed. The total net assets used in the weighting percentage is as at 7 December 2023.

⁵ Industries of the Future Fund is closed. The total net assets used in the weighting percentage is as at 31 January 2012.

⁶ World Select Fund is closed. The total net assets used in the weighting percentage is as at 31 March 2017.

17. Purchases and sales of securities

Details of purchases and sales transacted at a security level for each sub-fund during the period under review, are available upon request from either the registered or representatives' offices of the Company.

The above transaction costs include costs directly linked to the acquisition or sale of investments, to the extent that such costs are shown separately on transaction confirmations.

* Pan European Equity Fund merged into the Pan European Mid and Large Cap Fund on 7 December 2023.

** Global Multi-Asset Fund closed on 21 November 2023.

20. Contingent assets, liabilities and commitments

The outstanding commitments as at 31 December 2023 are as follows:

Contingent assets

Sub-fund	Amount in Sub-fund Currency
Biotechnology Fund	USD
Clementia Pharmaceuticals (CVR)	34,680
Total contingent assets	34,680

The Clementia Pharmaceuticals (CVR) is a contingent value right which is dependent on the achievement by the end of 2024 of FDA approval of a new drug application made by Clementia Pharmaceuticals.

21. Unfunded private placement commitments

The Company invests in a number of private placement investments where there are unfunded future commitments at the period end date. These future commitments arise through the tranche structure of the investment process for such securities and are dependent on future events that have not occurred at the period end date. These typically relate to future financial or commercial targets set in the investment agreement with the investee entity and it is not practicable to assign any probability of achieving these in the financial statement disclosures. When the triggers are met, there is a binding commitment to fund the additional purchase, at which point an investment purchase transaction is recognised. Due to the nature of private placements, the free negotiability of these assets is restricted.

There were no unfunded private placement commitments at the current period end.

22. Subsequent events

There were no material subsequent events which require disclosure within these financial statements.

Appendix - additional information

As at 31 December 2023

Securities financing transactions

The sub-funds engage in securities financing transactions (SFTs) (as defined in Article 3 of Regulation (EU) 2015/2365, SFTs include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation (EU) 2015/2365, the sub-funds' involvement in and exposures related to securities lending for the six months ended 31 December 2023 are detailed below.

Global data

The table lists the amount of securities on loan as a proportion of total lendable assets and the sub-funds' AUM as at 31 December 2023:

Sub-fund	Market value of securities on loan (in Sub-fund Currency)	% of lendable assets	% of AUM
Euro Corporate Bond Fund	2,614,821	0.18	0.17
Euro High Yield Bond Fund	15,117,936	5.06	4.83

Aggregate transaction data

Eligible collateral types for stock lending and borrowing transactions are approved by the Investment Manager and may consist of (i) cash, (ii) securities issued or guaranteed by a Member State of the OECD or by their local authorities or supranational institutions and organisations with regional, EU and world-wide scope or by Hong Kong or Singapore, generally subject to a minimum long term credit rating of at least A- by one or more major rating agency or (iii) equities. Collateral should be highly liquid and traded on a regulated market. Collateral is subject to a haircut on a sliding scale based on the combination of the underlying instrument being lent versus the asset being received as collateral. The value of collateral required will range from 102% to 110% of the value of the stock on loan.

For the purposes of Hong Kong SFC Appendix E, the quality of any bond collateral held is deemed to be Investment Grade and subject to a minimum credit rating quality rating of a A-.

Appendix - additional information (continued)

As at 31 December 2023

Risk policies

The Management Company employs a risk management process that identifies the risks to which the individual sub-funds and the Company taken as a whole are or might be exposed and how such risks are assessed, monitored and managed, ensuring compliance with relevant regulation. This enables it to monitor and measure at any time the risk of the portfolio positions and their contribution to the overall risk profile of the relevant sub-fund, thereby ensuring that the global exposure of the underlying assets, including derivative instruments, shall not exceed the total net value of the relevant sub-fund. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the CSSF, the Management Company reports to the CSSF on a regular basis on the risk management process on behalf of the Company.

Method

The global exposure of a sub-fund is calculated by using either the commitment approach or Value-at-Risk (VaR) approach by reference to its risk profile. The commitment approach means that financial derivative instruments are converted into the market value of the equivalent position in the underlying asset(s). VaR is a mathematical-statistical concept and is commonly used as a standard measure of risk in the financial sector. The VaR approach is used, in general, for sub-funds using derivative instruments or techniques within their investment strategies to generate additional leverage or market risk exposure.

Sub-funds using the VaR approach

For such sub-funds, the maximum potential loss that a sub-fund could suffer in normal market conditions within a given time horizon and a certain degree of confidence is estimated. In these calculations all positions in the relevant portfolio are taken into consideration including those undertaken for efficient portfolio management purposes. For the purpose of calculating global exposure by VaR either a relative VaR approach or absolute VaR approach can be used; the selection of relative or absolute VaR methodology is determined by the availability of a reference portfolio appropriate for a sub-fund in meeting its investment objective.

VaR model

VaR has been calculated using a Monte Carlo simulation approach.

Parameters

The following parameters are applied as a minimum: a one-tailed 99% confidence interval, a holding period equivalent to one month (20 business days), effective observation period (history) of risk factors of at least 1 year (250 business days), quarterly data set updates and daily calculation.

Limits

For sub-funds which have a suitable reference portfolio, the regulatory limit is that the VaR of the total portfolio's positions shall not be greater than twice the VaR of the portfolio's reference portfolio.

For those sub-funds which are unable or for which it is not appropriate to determine a reference portfolio (e.g. absolute return type funds) an absolute VaR is calculated on all of the portfolio's positions. Absolute monthly VaR on such sub-funds is not to exceed a regulatory maximum threshold of 20%.

Appendix - additional information (continued)

As at 31 December 2023

VaR Results - for the period ended 31 December 2023

The VaR method, limits and utilisation of those limits for the period from 1 July 2023 to 31 December 2023 are summarised in the table below:

Sub-fund	Global Exposure Calculation basis	Reference Portfolio	Actual VaR in period			VaR Limit	Utilisation of VaR Limit		
			Minimum	Maximum	Average		Minimum	Maximum	Average
Euro Corporate Bond Fund	Relative VaR	iBoxx Euro Corporates Index	100%	108%	105%	200%	50%	54%	53%
Euro High Yield Bond Fund	Relative VaR	ICE BofA European Currency Non-Financial High Yield Constrained Index (100% Hedged)	88%	107%	98%	200%	44%	53%	49%
Global High Yield Bond Fund	Relative VaR	ICE BofA Global High Yield Constrained Index (100% Hedged)	104%	123%	113%	200%	52%	61%	56%
Strategic Bond Fund	Absolute VaR	n/a	6%	8%	6%	20%	28%	37%	32%
Total Return Bond Fund	Absolute VaR	n/a	3%	5%	4%	20%	17%	23%	19%
Pan European Absolute Return Fund	Absolute VaR	n/a	2%	10%	6%	20%	12%	52%	31%

Leverage

For those sub-funds measuring and monitoring global exposure using the VaR approach, the level of leverage arising from the use of derivative instruments is disclosed in the table below as a percentage of each sub-fund's total NAV. The calculation is based on the sum of notional exposures of financial derivative instruments in the investment portfolio including those held for risk reduction purposes.

Please note this level of leverage is explicitly not an investment limit for the relevant sub-fund and will vary over time under differing market conditions to ensure that the relevant sub-fund meets its investment objective.

Leverage - for the period ended 31 December 2023

Sub-fund	Leverage		
	Minimum	Maximum	Average
Euro Corporate Bond Fund	15%	33%	22%
Euro High Yield Bond Fund	17%	67%	29%
Global High Yield Bond Fund	37%	107%	57%
Strategic Bond Fund	114%	216%	167%
Total Return Bond Fund	94%	291%	151%
Pan European Absolute Return Fund	109%	264%	164%

Sub-funds using the commitment approach

The global exposure for those sub-funds not specified in the table above has been determined according to the commitment approach during the reporting period from 1 July 2023 to 31 December 2023. For such sub-funds, each sub-fund's total commitment to derivatives is limited to 100% of the relevant sub-fund's total NAV, being quantified as the sum as an absolute value of the individual commitments, after consideration of the possible effects of appropriate netting and hedging arrangements.

Eligibility for French 'Plan d'Epargne en Actions' (PEA)

A PEA is a French equity savings plan intended to encourage French tax resident individuals to invest in European equities. PEA eligible sub-funds must invest on a permanent basis at least 75% of their assets in PEA eligible securities issued by companies (i) established in a Member State of the EU or in Iceland, Liechtenstein or Norway and (ii) subject to corporate income tax, or an equivalent tax.

Appendix - additional information (continued)

As at 31 December 2023

Eligibility for French 'Plan d'Epargne en Actions' (PEA) (continued)

Throughout the period from 1 July 2023 to 31 December 2023, the sub-funds listed below invested more than 75% of their total net assets in PEA eligible securities. As at the date of this report, the sub-funds had the following percentage of their total net assets invested in eligible PEA securities:

Sub-fund	Proportion of PEA eligible securities as at 31 December 2023
Euroland Fund	96.47%
Pan European Mid and Large Cap Fund	80.23%

Additional information for Hong Kong investors

The additional information in this section is for sub-funds which are authorised by the Hong Kong SFC As at 31 December 2023 to meet the disclosure requirements in Hong Kong.

Note: SFC authorisation is not a recommendation or endorsement of a product, nor does it guarantee the commercial merits of a product or its performance. It does not mean the product is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.

As at 31 December 2023 the following sub-funds are not authorised in Hong Kong:

Bond Funds

Emerging Markets Debt Hard Currency Fund
Euro Corporate Bond Fund
Euro High Yield Bond Fund
Global High Yield Bond Fund
Strategic Bond Fund
Total Return Bond Fund

Regional Funds

Euroland Fund
Pan European Equity Fund*
Pan European Mid and Large Cap Fund

Specialist Funds

Emerging Markets Innovation Fund
Global Multi-Asset Fund**
Global Smaller Companies Fund
Pan European Absolute Return Fund
Responsible Resources Fund
US Sustainable Equity Fund

* Pan European Equity Fund merged into the Pan European Mid and Large Cap Fund on 7 December 2023.

** Global Multi-Asset Fund closed on 21 November 2023.

Collateral

As at 31 December 2023, no collateral was held in respect to derivative positions for funds authorised in Hong Kong.

Sustainable Finance Disclosure Regulation (SFDR) and EU Taxonomy Regulation (unaudited) For the period ended 31 December 2023

The following table sets out the sub-fund classifications under the EU Sustainable Finance Disclosure Regulation ('SFDR') (Regulation (EU) 2019/2088), and any changes made to these within the reporting period.

Sub-fund Name	SFDR Classification	SFDR and Taxonomy Regulation disclosures
Asian Dividend Income Fund Asian Growth Fund Japan Opportunities Fund Biotechnology Fund China Opportunities Fund Global Multi-Asset Fund* Global Smaller Companies Fund Japanese Smaller Companies Fund	Article 6	<p>How sustainability risks are part of the investment process</p> <p>The investments underlying the sub-funds do not take into account the EU criteria for environmentally sustainable economic activities, although the Management Company and the Investment Manager have agreed a decision making process that will apply to investment decisions relating to the sub-funds as further detailed in the prospectus.</p> <p>The likely impacts of sustainability risks on the returns of the sub-fund</p> <p>While the analysis of ESG factors is an integral component across the Investment Manager's investment capabilities and one of a number of inputs to the selection of investments and portfolio construction, the investment process of the Investment Manager is primarily designed to maximise long-term risk-adjusted returns for investors. Therefore, in managing these sub-funds, the Investment Manager does not maximise portfolio alignment with sustainability risks as a separate goal in its own right nor does it precisely attribute the impact of ESG factors on returns for the sub-funds.</p>
Emerging Markets Debt Hard Currency Fund Euro Corporate Bond Fund Euro High Yield Bond Fund Global High Yield Bond Fund Strategic Bond Fund Total Return Bond Fund Euroland Fund Pan European Equity Fund** Pan European Mid and Large Cap Fund Asia-Pacific Property Income Fund Emerging Markets Innovation Fund Global Property Equities Fund Global Technology Leaders Fund Pan European Absolute Return Fund Pan European Property Equities Fund Pan European Smaller Companies Fund Responsible Resources Fund	Article 8	In accordance with the Sustainable Finance Disclosure Regulation, these sub-funds are classified as Article 8 and promote environmental and social characteristics.
Global Sustainable Equity Fund Sustainable Future Technologies Fund US Sustainable Equity Fund	Article 9	In accordance with the Sustainable Finance Disclosure Regulation, these sub-funds are classified as Article 9 and have a sustainable investment objective.

* Global Multi-Asset Fund closed on 21 November 2023.

** Pan European Equity Fund merged into the Pan European Mid and Large Cap Fund on 7 December 2023.

General information

Janus Henderson Horizon Fund is an open-ended investment company incorporated in Luxembourg as a SICAV on 30 May 1985 and is a recognised collective investment scheme for the purposes of Section 76 of the United Kingdom Financial Services Act 1986. Potential investors in the United Kingdom are advised that the protections afforded by the United Kingdom regulatory system will not apply to an investment in the Company and that compensation will not be available under the Financial Services Compensation Scheme.

The Company provides a simple and cost effective way of investing in the world equity and bond markets and through its twenty eight sub-funds, provides investors with access to twenty two equity sub-funds and six bond sub-funds.

Applications for shares may be made on any business day in Luxembourg to the Registrar and Transfer Agent between 09:00 and 18:00 (local time), or to the Principal Distributor in London between 09:00 and 17:00 (local time). Applications should be made on the application form circulated with the prospectus or by fax, telephone or in writing and may be made in any major currency. If you are sending applications by fax, you should also subsequently send the original form by post. Applications are accepted by telephone only from existing investors who have previously been issued with a Personal Service Number.

For full information, including a copy of the prospectus and the Key Information Document (KID), please write to the Registrar and Transfer Agent or Distributor at the addresses shown on page 2. Alternatively, visit the Janus Henderson website: www.janushenderson.com.

Janus Henderson

INVESTORS

Past performance does not predict future returns. The value of an investment and the income from it can fall as well as rise significantly. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. Please refer to the prospectus of the UCITS and to the KIID before making any final investment decisions on the Janus Henderson Horizon Fund. For sustainability related aspects please access www.janushenderson.com.
