Chairman

Peter Thomas Schwicht

Chair and Independent Non-Executive Director. A member of the Board since June 2012.

Mr Schwicht obtained a Business Economics degree from the University of Mannheim in Germany after having studied business, tax and accounting in Hamburg, Norway and the USA and was an employee of JPMorgan Asset Management from 1987 until October 2014. Prior to his retirement Mr Schwicht was the Chief Executive of Investment Management - EMEA, JPMorgan Asset Management. He had previously held positions as the Head of the Continental Europe Institutional business and the Investment Management Country Head for Institutional and Retail business in Germany where he first developed the business and then went on to expand this throughout Continental Europe. Mr Schwicht is currently a Director of several JPMorgan managed Luxembourg-domiciled investment funds.

Directors

Jacques Elvinger

Non-Executive Director. A member of the Board since January 2009.

Mr Elvinger became a member of the Luxembourg Bar in 1984 and has been a partner of the Luxembourg law firm Elvinger Hoss Prussen since 1987. Mr Elvinger practices general corporate and banking law and specialises in the field of investment and pension funds. He is a member of the High Committee for the Development of the Financial Sector instituted by the Luxembourg Government. He is also a member of the Advisory Committees to the Luxembourg Commission for the Supervision of the Financial Sector in the area of investment funds. Mr Elvinger currently holds a number of board mandates with Luxembourg investment funds including several JPMorgan managed Luxembourg-domiciled investment funds.

Massimo Greco

Executive Director. A member of the Board since November 2015.

Mr Greco, Managing Director, is Vice Chair of JPMorgan Asset Management EMEA, based in Milan. He took on his current responsibilities in April 2023, having previously been responsible for JPMorgan Asset Management's Global Funds business in Europe. Mr Greco has been a JPMorgan employee since 1992, initially with the Investment Banking unit, moving to Asset Management in 1998. Mr Greco holds a degree in Economics from the University of Turin and an MBA (Major in Finance) from the Anderson Graduate School of Management at UCLA. Mr Greco is a Member of the Board of JPMorgan Asset Management (Europe) S.à r.l. as well as other Luxembourg domiciled SICAVs and is the Vice-President of the European Fund and Asset Management Association (EFAMA).

John Li How Cheong

Independent Non-Executive Director. A member of the Board since June 2012.

Mr Li is a fellow of the Institute of Chartered Accountants in England & Wales. Mr Li moved to Luxembourg in 1987 and has since been working in the financial sector. Mr Li was a Partner at KPMG Luxembourg for more than 20 years during which he was Managing Partner for 8 years before taking on the role of Chairman of the Supervisory Board for 3 years. Mr Li was also a member of the Global Investment Management Practice of KPMG. During these years Mr Li's experience included auditing and advising clients such as banks, investment funds, insurance companies from Europe, US, Japan and Asia offering Mr Li an extensive experience in dealing with international companies. Mr Li is a board member of the Institut Luxembourgeois des Administrateurs. Mr Li currently holds a number of board mandates with financial institutions including several JPMorgan managed Luxembourg-domiciled investment funds.

Marion Mulvey

Non-Executive Director. A member of the Board since April 2021.

Ms Mulvey acted as Co-CAO and Head of Asset Management Operations in EMEA for J.P. Morgan Asset Management from January 2014 through to January 2023, with additional responsibility for Regulatory Transaction reporting and Fee Billing. Ms Mulvey joined J.P. Morgan in 2014 from Citigroup, where her last role was as Product Head for the Alternatives Fund Administration business in EMEA. She spent 13 years with that business in total and also held a number of senior operational roles including Head of Fund Accounting in EMEA. Previously, Ms Mulvey worked at Salomon Smith Barney for 3 years, managing the European Equity Product Control team. She trained as a Chartered Accountant holding roles both in private practice and as an Audit Manager in the financial services audit department at KPMG. Ms Mulvey is a Fellow of the Institute of Chartered Accountants in Ireland. She is also a Chartered Director. Ms Mulvey is currently a Director of several JPMorgan managed Luxembourg-domiciled funds.

Martin Porter

Independent Non-Executive Director. A member of the Board since April 2019.

Mr Porter joined Robert Fleming Asset Management in 1984 and ran equity portfolios in both London and Japan. During his tenure in Japan, he became a holding board director of Jardine Fleming, responsible for the Japanese business. Returning to the UK in 2000, he took up the role of Chief Investment Officer, Equity and Balanced of Fleming Asset Management, before becoming Global Head of Equities of J.P. Morgan Asset Management, a position he held from 2003 to 2016 when he retired. Mr Porter is currently a Director of several JPMorgan managed Luxembourg-domiciled investment funds.

Daniel Watkins

Executive Director. A member of the Board since December 2014.

Mr Watkins is the Chief Executive Officer of Asia Pacific, J.P. Morgan Asset Management. He is responsible for overseeing the Asset Management Asia Pacific business, which operates in seven locations and includes more than 1,400 employees. Mr Watkins is a member of the Asset Management Operating Committee and the firm-wide Asia Pacific Management team. Mr Watkins has been an employee since 1997. Prior to taking his current role in 2019, he was Deputy CEO of JPMorgan Asset Management Europe and Global Head of AM Client Services and Business Platform. Mr Watkins has also held a number of positions at JPMorgan namely Head of Europe COO and Global IM Operations, Head of the European Operations Team, Head of the European Transfer Agency, Head of Luxembourg Operations, manager of European Transfer Agency and London Investment Operations and manager of the Flemings Investment Operations Teams. Mr Watkins obtained a BA in Politics from the University of York and is a qualified Financial Advisor. Mr Watkins is currently a Director of several JPMorgan managed Luxembourg and Irish domiciled investment funds and also several Asia Pacific legal entities.

The Board of Directors (the "Board") is pleased to present the Audited Annual Report of JPMorgan Liquidity Funds (the "Fund") for the year ended 30 November 2023, and considers that taken as a whole they are fair and balanced and provide the information necessary for Shareholders to assess the Fund's position and performance.

Structure of the Fund

The Fund is a variable capital open-ended investment company, organised as a "Société Anonyme", under the laws of the Grand Duchy of Luxembourg. The Board has appointed JPMorgan Asset Management (Europe) S.à r.l. (JPMAME) as Management Company of the Fund. The Fund is organised as an "umbrella" with a number of Sub-Funds each of which has its own investment objective, policies and restrictions.

The objective of the Fund is to place the money available to it in transferable securities and other permitted assets of any kind, in accordance with the Fund's Prospectus, with the purpose of spreading investment risks and affording Shareholders the results of the management of their portfolios.

The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities (UCITS) under the EC Directive 2009/65/EC of 13 July 2009 and is subject to the Luxembourg law of 17 December 2010, as amended, on undertakings for collective investment. The Fund may therefore be offered for sale in European Union Member States, subject to notification in countries other than the Grand Duchy of Luxembourg. In addition, applications to register the Fund and its Sub-Funds may be made in other countries.

The Fund currently has 9 Sub-Funds. All of the Sub-Funds and Share Classes are registered for offer and distribution in the Grand Duchy of Luxembourg and a number of the Sub-Funds and Share Classes are registered for distribution in the following jurisdictions: Austria, Belgium, Bulgaria, Chile, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Jersey, Latvia, Lithuania, Malta, The Netherlands, Norway, Peru, Poland, Portugal, Romania, Singapore, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom. During the year Bulgaria, Croatia, Czech Republic, Estonia, Latvia, Malta, Poland, Romania, Slovakia and Slovenia were added as countries of registration and there were no de-registrations.

Role and Responsibility of the Board

The responsibility of the Board is governed exclusively by Luxembourg law. With respect to the annual accounts of the Fund, the duties of the Directors are governed by the law of 10 December 2010 on, inter alia, the accounting and annual accounts of undertakings for collective investment and by the law of 17 December 2010, as amended, relating to undertakings for collective investment.

A management agreement between the Fund and JPMorgan Asset Management (Europe) S.à r.l. sets out the matters over which the Management Company has authority under Chapter 15 of the Law of 17 December 2010. This includes management of the Fund's assets and the provision of administration, registration, domiciliation agent and marketing services. All other matters are reserved for approval by the Board and a schedule setting out such matters for clarity is in place between the Board and the Management Company. The matters reserved for the Board include determination of each Sub-Fund's investment objective and policies, investment restrictions and powers, amendments to the Prospectus, reviewing and approving key investment and financial data, including the annual accounts, as well as the appointment of, and review of the services provided by, the Management Company, Auditor and Depositary.

Prior to each Board meeting the Directors receive detailed and timely information allowing them to be prepared for the items under discussion during the meeting. For each quarterly meeting the Board requests, and receives, reports from, amongst others, the Management Company, the investment managers, risk management as well as proposals for changes to existing Sub-Funds or proposals to launch new ones as appropriate. Senior representatives of each of these functions attend Board meetings by invitation to enable the Directors to question the reports presented to them.

The Directors take decisions in the interests of the Fund and its Shareholders as a whole and refrain from taking part in any deliberation or decision which creates a conflict of interest between their personal interests and those of the Fund and its Shareholders. The subject of conflicts of interest is documented in the Prospectus and the Management Company's policy on conflicts of interest is available for inspection on the website:

<https://am.jpmorgan.com/content/dam/jpm-am-aem/emea/lu/en/communications/lux-communication/conflicts-of-interest-ce-en.pdf>

The Board can take independent professional advice if necessary and at the Fund's expense.

Board Composition

The Board is chaired by Mr. Schwicht and consists of three Independent Non-Executive Directors, two Non-Executive Directors and two Executive Directors.

The Board defines an Executive Director as someone who is employed by JPMorgan Chase & Co or any of its affiliates, a Non-Executive Director as someone who has a business, family or other relationship with the Fund or JPMorgan Chase & Co or any of its affiliates, and an Independent Non-Executive Director as someone who is free of any business, family or other relationship with the Fund or JPMorgan Chase & Co or any of its affiliates. All Board meetings require a majority of Non-Executive Directors to be in attendance.

In appointing a Director the Board takes into account the relative mix and composition of the Board, which as a whole has a breadth of investment knowledge, financial skills, as well as legal and other experience relevant to the Fund's business.

The Board does not limit the number of years of Directors' service and it does take into account the nature and requirements of the fund industry and of the Fund's business when making recommendation to Shareholders that Directors be elected. The terms of each Director's appointment are set out in a contract for services and these are available at the Fund's registered office for inspection.

Ms Susanne van Dootingham resigned as a Director of the Fund with effect from the close of business on 17 April 2023.

Induction and Training

All new Directors will receive an induction incorporating relevant information regarding the Fund and their duties and responsibilities as a Director. In addition, the Board takes active steps to keep up to date with developments relevant to the Fund and have ensured that a formal training programme is in place.

Board Evaluation

The Board carries out a biennial review of its performance.

Board Remuneration

The Board believes that the remuneration of its members should reflect the responsibilities and experience of the Board as a whole and be fair and appropriate given the size, complexity and investment objectives of the Fund. The remuneration is reviewed on an annual basis. The Chair is paid EUR 87,000 and the other Directors EUR 68,000 per annum. All Executive Directors have agreed to waive their remuneration. No element of the remuneration paid by the Fund to the Directors is performance related.

Board Meetings and Committees

The Board meets quarterly but if necessary additional meetings will be arranged. Given the scope and nature of the business of the Fund, the Board does not currently consider it necessary to have a formal Audit Committee, but established a Remuneration Committee in December 2022. The AML Committee was disbanded on 31 December 2022. In addition, where there are specific matters that need further consideration, a Sub-Committee of the Board could be formed for the specific purpose. Such circumstances could be where the Board requests some amendments to the Prospectus and where it is not appropriate to wait till the next quarterly Board meeting for this to be approved. These Sub-Committee meetings are usually formed of a minimum of two Directors.

There were nine Board meetings held during the year. Four of these were quarterly Board meetings where, amongst other matters, the agenda included those items highlighted under the section above called 'Role and Responsibility of the Board' and five were ad hoc Board meetings. There was also one Remuneration Committee meeting. In addition to the Board meeting where the Auditors present the report on the audit of the Fund accounts, the Non-Executive Directors also meet with them annually without the Executive Directors being in attendance.

Internal Control

Investment management and all administrative services are provided by the Management Company and custody of assets is provided by J.P. Morgan SE - Luxembourg Branch. The Board's system of internal control therefore mainly comprises monitoring the services provided by the Management Company and the Depositary, including the operational and compliance controls established by them to meet the Fund's obligations to Shareholders as set out in the Prospectus, Articles of Incorporation as well as all relevant regulations. The Management Company formally reports to the Board on a quarterly basis on the various activities it is responsible for and in addition shall inform the Board without delay of any material administrative or accounting matters.

Corporate Governance and ALFI Code of Conduct

The Board is responsible for ensuring that a high level of corporate governance is met and considers that the Fund has complied with the best practices in the Luxembourg funds industry.

In particular the Board has adopted the ALFI Code of Conduct (the "Code") which sets out principles of good governance. These principles are set out below:

1. The Board should adopt clear and transparent standards of corporate governance;
2. The Board should have good professional standing and appropriate experience and use best efforts to ensure that it is collectively competent to fulfil its responsibilities;
3. The Board should act fairly and independently in the best interests of the investors;
4. The Board should act with due care and diligence in the performance of its duties;
5. The Board should ensure compliance with all applicable laws and regulations and with the Fund's constitutional documents;
6. The Board should ensure that investors are properly informed, are fairly and equitably treated, and receive the benefits and services to which they are entitled;
7. The Board should ensure that an effective risk management process and appropriate internal controls are in place;
8. The Board should identify and manage fairly and effectively, to the best of its ability, any actual, potential or apparent conflict of interest and ensure appropriate disclosure;
9. The Board should ensure that Shareholder rights are exercised in a considered way and in the best interests of the Fund;
10. The Board should ensure that the remuneration of the Board members is reasonable and fair and adequately disclosed;
11. The Board should integrate as appropriate sustainability standards and objectives including environmental, social and governance (ESG) criteria in its business model and operations.

The Board considers that the Fund has been in compliance with the principles of the Code in all material aspects throughout the financial year ended 30 November 2023. The Board undertakes an annual review of ongoing compliance with the principles of the Code.

Proxy Voting Policy

The Board delegates responsibility for proxy voting to the Management Company. The Management Company manages the voting rights of the shares entrusted in a prudent and diligent manner, based exclusively on the reasonable judgement of what will best serve the financial interests of clients. So far as is practicable, the Management Company will vote at all of the meetings called by companies in which they are invested.

A copy of the global proxy voting guidelines is available from the Fund's registered office upon request or on the website:

<https://am.jpmorgan.com/content/dam/jpm-am-aem/global/en/institutional/communications/lux-communication/corporate-governance-principles-and-voting-guidelines.pdf>

Environmental Social Governance ("ESG")

In accordance with Article 11(1) of Regulation (EU) 2019/2088, for financial products promoting environmental or social characteristics and objectives, details of these are shown in Appendix 10.

Directors and Officers Indemnity Insurance

The Fund's Articles of Incorporation indemnify the Directors against expenses reasonably incurred in connection with any claim against them arising in the course of their duties or responsibilities as long as they have not acted fraudulently or dishonestly. To protect Shareholders against any such claim, the Board has taken out Directors and Officers Indemnity Insurance which indemnifies the Directors against certain liabilities arising in the course of their duties and responsibilities but does not cover against any fraudulent or dishonest actions on their part.

Auditor

PricewaterhouseCoopers, Société coopérative, has been the Fund's Auditor since December 1994. The provision of audit services was last put to competitive tender in 2016. The Board reviewed the services of PwC in 2023 and decided that, subject to any other influencing factor, they should continue to be proposed to the Shareholders to be appointed as Auditor.

Annual General Meetings

The next Annual General Meeting of the Fund will be held on 26 April 2024 at the Registered Office of the Fund to consider matters relating to the year ending on 30 November 2023. At this meeting Shareholders will be requested to consider the usual matters at such meetings including:

1. The adoption of the Financial Statements and approval of the allocation of the results;
2. The approval of Directors' fees;
3. The election of certain Directors;
4. The election of the Auditor; and
5. The discharge of Directors duties.

No special business is being proposed by the Board.

Discharge of Directors

One of the resolutions in the AGM is, as required under Luxembourg Law, for Shareholders to vote on the discharge the directors of their duties for the fiscal year in question. This discharge is only valid where the annual accounts contain no omission or false information concealing the real financial situation of the Fund.

Privacy Policy

The Management Company complies with a privacy policy that has been issued by J.P. Morgan Asset Management which can be accessed at www.jpmorgan.com/emea-privacy-policy. This policy was updated during the year to comply with the General Data Protection Regulation.

Significant Events

Please refer to Notes 16 and 17 for details of the significant events during the year and after the year end.

The Board of Directors
Luxembourg, 19 March 2024

Below is an overview of the markets in which our Liquidity Funds invest and our strategy over the last 12 months

The United States

The Federal Reserve continued to increase interest rates by 50 basis points in December 2022, with inflation remaining elevated. At each of its first four meetings of 2023, the Fed raised rates by 25bps, taking the upper bound range of the Fed Funds rate to 5.5% by July.

The failure of two regional banks toward the end of the first quarter of 2023, led to a sharp repricing of market expectations around the future path for interest rates, but investor concerns proved relatively short-lived, with the economy and labour market proving resilient through 2023.

Inflation moderated substantially throughout 2023, falling to around 3% by the summer, and the Fed kept rates on hold from July to the end of November.

JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund

The weighted average maturity increased over the year from about 15 days in December 2022 to about 30 days for much of the period between February and August, before increasing toward 50 days by the end of November 2023. Weekly liquid assets ranged between 40% and 60% of the sub-fund.

JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund

The weighted average maturity started December 2022 at about 15 days and increased to about 60 days by February 2023, before remaining in a range between 60 and 80 days between February and September and then moving up to a range between 80 and 100 days between September and the end of the November. Weekly liquid assets were elevated at the start of the year before falling to about 30% of the sub-fund for most of the second half of the year.

JPMorgan Liquidity Funds - USD Treasury CNAV Fund

The weighted average maturity was low, beneath 10 days until July when it started to increase and reached 35 days by the end of November 2023. Weekly liquid assets were elevated for most of the year before starting to decline in August toward 50% by the end of November.

Europe

Eurozone inflation was at 10.1% in November 2022. This led the European Central Bank to raise its deposit rate to 2% from 1.5% in December 2022. At the time, the ECB stated that interest rates would have to rise significantly higher to bring inflation back to target. The ECB followed, by raising the deposit rate by another 50 bps to 2.5% at their February 2023 meeting.

Between January and March 2023, the Eurozone composite PMI business sentiment survey improved and inflation remained elevated but was declining. At its March meeting, the ECB delivered another 50 bps increase, raising the deposit rate to 3%. The central bank noted that inflation was projected to remain higher for longer. From April through November, inflation declined meaningfully, though it remained above the ECB's target and the composite PMI business survey indicated slowing economic growth. Against this backdrop, the ECB slowed the pace of its rate increases to 25 bps at its May, June, July and September meetings and the deposit rate reached 4% at the central bank's September meeting.

With the growth outlook weak in the latter half of the year and inflation falling to 4.3% in September and then 2.9% in October, the ECB kept interest rates on hold for the rest of the year.

JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund

The weighted average maturity was between 10 and 30 days from the end of November 2022 until July 2023 and then increased from 30 to about 40 days between July and November 2023. The portfolio remained highly liquid with weekly liquid assets in a range between 40% and 60% while daily liquid assets spent most of the period between 30% and 50%.

JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund

The weighted average maturity started the period between 25 and 45 days and then increased in January to trade in a range from about 60 to 100 days over the rest of the period. The portfolio remained liquid with weekly liquid assets above 30% throughout the period.

The United Kingdom

The Bank of England raised interest rates by 50 bps at both its December 2022 and February 2023 meetings amid an inflation rate above 10%. At both its March and May meetings, the BOE slowed the pace of rate increases to 25 bps. By May, the BOE had raised rates to 4.5%.

By the June meeting, the BOE was concerned enough about the persistence of price pressures emanating from a tight labour market and continued resilience in demand that its members voted to increase rates by 50bps to 5%. Heading into the second half of the year, the composite PMI business survey started to show more signs of weakness. Against this backdrop, the BOE raised rates to 5.25% in August.

With the business surveys remaining subdued from August through October, the BOE maintained interest rates at 5.25% in both its September and November meetings.

JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund

The weighted average maturity varied in a range between about 15 and 40 days with a gradual increase from about 20 to 40 days between July and November 2023. The strategy was highly liquid with weekly liquid assets remaining above 40% and daily liquid assets above 35% throughout the period.

JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund

The weighted average maturity increased over the period from a low of about 20 days in early January to a peak of about 100 days in September and ending November 2023 at about 80 days. The strategy remained liquid with more than 30% in weekly liquid assets during the period.

Singapore

Economic growth recovered in 2023, helped by solid domestic demand, robust construction and a recovery in manufacturing. Inflation continued to trend downward from a September 2022 high of 7.5% to below 4% in November 2023. The unemployment rate declined for most of the period before rising moderately, but remaining close to cycle lows. The Monetary Authority of Singapore left monetary policy unchanged at its April and October 2023 meetings but retained a hawkish bias with the Nominal Effective Exchange Rate sloping upwards, while the width and center-point remaining unchanged.

JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund

The weighted average maturity moved within a range of 15 to 40 days, moving toward the upper end of that range at the end of November 2023. Liquidity remained high, with daily liquid assets around 40% for most of the year and weekly liquid assets above 60% for most of the year.

JPMorgan Liquidity Funds

Investment Managers' Report (continued)

Australia

Economic growth moderated during 2023, as the impact of higher interest rates and cost of living pressures weighed on business and consumer sentiment. Nevertheless, economic growth was more resilient than expected by the Reserve Bank of Australia coming in just above 2% throughout the period as commodity exports remained elevated and the housing market recovered on strong demand due to high levels of immigration. Quarterly inflation declined to 5.4% in the third quarter of 2023 from a peak of 7.8% in the fourth quarter of 2022 but remained above the RBA's target. Meanwhile, the labour market remained strong and unemployment was below 4% throughout the year. In response, the RBA increased rates to 4.35% in November 2023.

JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund

The weighted average maturity ranged between 20 and 40 days ending November 2023 at the upper end of that range. The sub-fund's liquidity remained high with weekly liquid assets above 50% for most of the year.

The Investment Managers
Luxembourg, 19 March 2024

Audit report

To the Shareholders of
JPMorgan Liquidity Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of JPMorgan Liquidity Funds (the “Fund”) and of each of its sub-funds as at 30 November 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the Combined Statement of Net Assets as at 30 November 2023;
- the Combined Statement of Operations and Changes in Net Assets for the year then ended;
- the Schedule of Investments as at 30 November 2023; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu*

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

1. Organisation

JPMorgan Liquidity Funds (the “Fund” or the “SICAV”) is an investment company incorporated on 9 December 1986 under the name J.P. Morgan Dollar Reserve Fund. On 24 October 1994, the name of the SICAV was changed to J.P. Morgan Luxembourg Funds and was restructured as an umbrella fund with multiple Sub-Funds. Its name was changed to JPMorgan Fleming Liquidity Funds on 31 August 2001 and to JPMorgan Liquidity Funds on 24 November 2005.

It is organised under Part I of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment, as amended, as a Société Anonyme qualifying as a Société d’Investissement à Capital Variable (SICAV). As at 30 November 2023, it comprises of 9 Sub-Funds each relating to a separate investment portfolio consisting of Money Market instruments, cash and other instruments. As from 3 December 2018, the Fund was authorised as a money market fund under Regulation (EU) 2017/1131 (the “Regulation”) of the European Parliament and of the Council of 14 June 2017 on Money Market Funds (“MMF”).

On 25 May 2005, JPMorgan Asset Management (Europe) S.à r.l. was appointed by the SICAV to act as Management Company. From 1 July 2011, JPMorgan Asset Management (Europe) S.à r.l. is acting as a Chapter 15 Management Company under the amended Luxembourg Law of 17 December 2010, as amended, and complies with UCITS regulations.

The SICAV is registered with the Registre de Commerce et des Sociétés of Luxembourg, under number B 25 148.

Each Sub-Fund may contain A, B, C, D, E, G, R, S, W, X, Agency, Capital, Institutional, Morgan, Premier and Reserves Share Classes. The JPMorgan Liquidity Fund - EUR Liquidity LVNAV Fund only may also contain the TO acc. Share Class. These Share Classes may differ in the minimum subscription amount, minimum holding amount and/or eligibility requirements, reference currency, the fees and expenses and the dividend policy applicable to them.

2. Significant Accounting Policies

The Financial Statements are prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investment under the going concern basis of accounting.

a) Investment Valuation

All investments under a Constant NAV (CNAV) Sub-Fund are valued using the amortised cost method in accordance with Articles 31 and 32 of the Money Market Fund (MMF) Regulation for Public Debt CNAV MMF and Low Volatility NAV Sub-Fund (LVNAV) MMF and rounded to the nearest percentage point or its equivalent. Under this method, the cost of investments is adjusted to income for the amortisation of premiums and accretion of discounts over the life of the investments.

Under a LVNAV Sub-Fund, all investments maturing within 75 days or less are valued using the amortised cost method whilst investments maturing for more than 75 days are valued using the mark-to-market or mark-to-model.

Where amortised cost pricing is used, the following rules apply:

- The instrument level Mark-to-Market (MTM) valuation should not deviate from the amortised cost valuation by more than 10 Bps. Where this is exceeded, that instrument must be priced using mark-to-market or mark-to-model for the purposes of the dealing NAV, while the remaining assets in the portfolio may continue to be priced at amortised cost, and investors continue to deal at a 2 decimal point NAV.

- The portfolio level MTM valuation should not deviate from the dealing NAV by more than 20 Bps. Where this threshold is exceeded, the following subscriptions and redemptions will be processed with a NAV calculated using mark-to-market or mark-to-model and issued with 4 decimal point NAV. Where the amortised cost basis does not reflect a prudent approach to the valuation of a security, the latest available price prevailing on the valuation date is used.

Under a Variable NAV Sub-Fund (VNAV), all investments are valued at Mark-to-Market. Where the value of the assets of the Sub-Funds cannot be calculated following the Mark-to-Market, their value shall be determined conservatively by using Mark-to-Model.

The Net Asset Value per Share of each Class is determined on each day which is a Valuation Day for that Sub-Fund. A “Valuation Day” is a Business Day other than, in relation to a Sub-Fund’s investments, a day on which any exchange or market on which a substantial portion of the relevant Sub-Fund’s investments is traded, is closed or while dealings on any such exchange or market are restricted or suspended. In derogation of the above, when dealings on any such exchange or market are restricted or suspended, the Management Company may, in consideration of prevailing market conditions or other relevant factors, determine that such a Business Day shall be a Valuation Day.

In respect of Sub-Funds, the reference currency of which is:

- the AUD, a Valuation Day is every day other than a Saturday or Sunday on which banks are open for general banking business in Sydney and any additional day determined by the Management Company;

- the EUR, a Valuation Day is every day other than a Saturday or Sunday with the exception of any day designated as a TARGET closing day by the European Central Bank and any additional day determined by the Management Company;

- the GBP, a Valuation Day is every day the Bank of England and the London Stock Exchange are open and any additional day determined by the Management Company;

- the SGD, a Valuation Day is every day the Monetary Authority of Singapore is open and any additional day determined by the Management Company;

- the USD, a Valuation Day is every day the Federal Reserve Bank of New York and the New York Stock Exchange are open and any additional day determined by the Management Company.

Requests for issue, redemption, transfer and conversion of Shares of any Class are accepted by the SICAV in Luxembourg on any Valuation Day of the relevant Sub-Fund. A list of expected non-valuation days for each Sub-Fund is available from the Transfer Agent on request.

b) Realised and Unrealised Gains and Losses on Investments

Investment transactions are accounted for on the trade date (the date the order to buy or sell is executed).

Realised gains and losses on sales of investments are calculated on the average book cost. The associated foreign exchange movement between the date of purchase and date of sale of investments is included in realised gains and losses on investments. Unrealised gains and losses on holdings of investments are calculated on the total book cost and include the associated unrealised gains and losses on foreign exchange.

Each of the Investment Managers may, at their discretion, purchase and sell securities through dealers who provide research, statistical and other information to the Investment Managers as the case may be. Such supplemental information received from a dealer is in addition to the services required to be performed by the Investment Managers under the relevant Investment Management Agreement and the expenses which the Investment Managers incur while providing advisory services to the SICAV will not necessarily be reduced as a result of the receipt of such information. In addition, the Investment Managers may enter into transactions or arrangements with other members of JPMorgan Chase & Co.

c) Income Recognition

Interest income is accrued daily and includes the amortisation of premiums and accretion of discounts, where applicable. Bank Interest income is recognised on an accrual basis. Negative income can arise where negative interest rates exist arising from market conditions and/or where there is negative net interest on reverse repurchase agreements as disclosed in note 2f).

JPMorgan Liquidity Funds

Notes to the Financial Statements (continued)

As at 30 November 2023

d) Conversion of Foreign Currencies

The books and records of each Sub-Fund are denominated in the base currency of the corresponding Sub-Fund. Amounts denominated in other currencies are translated into the base currency on the following basis: (i) investment valuations and other assets and liabilities initially expressed in other currencies are converted each valuation day into the base currency using currency exchange rates prevailing on each such valuation day; (ii) purchases and sales of foreign investments, income and expenses are converted into the base currency using currency exchange rates prevailing on the respective dates of such transactions.

If any, net realised and unrealised gains or losses on foreign exchange represent: (i) foreign exchange gains and losses from the sale and holding of foreign currencies and foreign cash equivalent; (ii) gains and losses between trade date and settlement date on securities transactions and forward currency exchange contracts; (iii) gains and losses arising from the difference between amounts of interest recorded and the amounts actually received; and (iv) gains and losses arising from the foreign exchange difference between the amounts of expenses accrued and the amounts actually paid. The resulting gains and losses on translation, if any, would be included in "Net realised gain/(loss) on currency exchange" or in the "Net change in unrealised appreciation/(depreciation) on currency exchange" in the Combined Statement of Operations and Changes in Net Assets.

e) Forward Currency Exchange Contracts

Unrealised gains or losses on outstanding forward currency exchange contracts are valued on the basis of currency exchange rates prevailing at the relevant valuation date. The changes in such amounts are included in the Combined Statement of Operations and Changes in Net Assets under "Net change in unrealised appreciation/(depreciation) on Forward currency exchange contracts". When a contract is closed, the Realised Gain/(Loss) is recorded under "Net realised gain/(loss) on Forward currency exchange contracts" in the Combined Statement of Operations and Changes in Net Assets. Unrealised gains or losses are recorded under "Unrealised gain/(loss) on forward currency exchange contracts" in the Combined Statement of Net Assets.

f) Reverse Repurchase Agreements

Financial techniques and instruments (such as reverse repurchase agreements) may be used by any Sub-Fund for the purpose of generating additional capital or income or for reducing cost or risk, to the maximum extent allowed by and within the limits set forth in (i) article 11 of the Grand-Ducal regulation of 8 February 2008 relating to certain definitions of the Luxembourg Law, (ii) CSSF Circular 08/356 relating to the rules applicable to undertakings for collective investments when they use certain techniques and instruments relating to transferable securities and money market instruments ("CSSF Circular 08/356"), (iii) CSSF circular 14/592 relating to the ESMA Guidelines on ETFs and other UCITS issues and (iv) any other applicable laws, regulations, circulars or CSSF positions.

In respect of Reverse Repurchase Transactions, collateral management fees may apply to the services relating to tri-party service arrangements entered into between the Fund, the counterparties and the collateral manager which are required to ensure optimal transfer of collateral between the Fund and its counterparties. The collateral management fees and other administrative charges (if any) as well as related transaction fees charged by the fund's Depository are part of the Operating and Administrative Expenses of each Share Class. Currently, the Fund has appointed Euroclear Bank, The Bank of New York Mellon, State Street Bank and Trust Company and JPMorgan Chase Bank, N.A as collateral managers. JPMorgan Chase Bank, N.A is an affiliate of the Management Company. The securities are marked-to-market daily and interest received on Reverse Repurchase Agreements is recorded in the "interest income from investments, net of withholding taxes" of the Combined Statement of Operation and Changes in Net Assets. The interest received on reverse repurchase agreements is accounted for on a cash basis.

Sub-Fund	Net Interest
JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund	AUD 11,588,157
JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund	EUR 123,706,685
JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund	EUR 5,888,557
JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund	SGD 9,355,258
JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund	GBP 162,015,606
JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund	GBP 1,866,661
JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund	USD 443,177,701
JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund	USD 649,975
JPMorgan Liquidity Funds - USD Treasury CNAV Fund	USD 1,982,314,135

g) Fund collection accounts

To efficiently manage the operational flow of subscriptions and redemptions in and out of the Sub-Funds, the SICAV operates collection accounts in EUR, USD, GBP, SGD and AUD, held at the Depository, in the name of JPMorgan Liquidity Funds. These collection accounts facilitate the daily transit of subscription and redemption proceeds, as well as dividend payments, between the Sub-Funds and Shareholders. The balance of these accounts, if any, are not recognised in the calculation of the NAV of the respective Sub-Funds.

In case of early settlement of subscriptions, investors will be unsecured creditors until the Shares are issued and investors will not benefit from any Shareholder rights in the meantime. Late settlement of subscriptions in Shares may result in interest claims and, until such time the payment for the Shares is received from the investor, the Shares are pledged for the benefit of the Sub-Fund. Failure to make settlement with good value may result in the Shares being cancelled through redemption of the Shares at the cost of the investor at any point in time after the Settlement Date.

For the purpose of establishing these Financial Statements, all positive balances and material overdrawn balances in these collection accounts, if any, have been included in the Combined Statement of Net Assets of the respective Sub-Funds.

3. Reference Currency and Exchange Rates

The reference currency of the SICAV as reflected in the combined statements is USD. The principal exchange rates applied as at 30 November 2023 for the purpose of establishing the combined values of the fund in the Statement of Net Assets and Statement of Operations and Changes in Net Assets were as follows:

1 USD =	1.5173 AUD;
1 USD =	0.9167 EUR;
1 USD =	0.7920 GBP;
1 USD =	1.3370 SGD.

JPMorgan Liquidity Funds

Notes to the Financial Statements (continued)

As at 30 November 2023

4. Fees and Expenses

a) Charging Structures

Investment in the SICAV is generally offered via different charging structures, as represented by the A (acc.), B (acc.), C (acc.), D (acc.), E (acc.), G (acc.), R (acc.), S (acc.), W (acc.), X (acc.), Capital (acc.), Institutional (acc.), Morgan (acc.), C (dist.), E (dist.), G (dist.), R (dist.), W (dist.), X (dist.), Agency (dist.), Capital (dist.), Institutional (dist.), Morgan (dist.), Premier (dist.), Reserves (dist.), and, specific to the JPMorgan Liquidity Funds – EUR Liquidity LVNAV Fund only, the G (TO acc.), Premier (TO acc.), Institutional (TO acc.), Agency (TO acc.), Morgan (TO acc.), Reserves (TO acc.), Capital (TO acc.), C (TO acc.), E (TO acc.), R (TO acc.) and W (TO acc.) Share Classes.

The X Share Classes are designed to accommodate an alternative charging structure whereby a fee for the management of the Sub-Fund is administratively levied and collected by the Management Company or the appropriate JPMorgan Chase & Co. entity directly from the Shareholder.

Any exceptions to the charging structures detailed above are noted in the Prospectus. The actual fees and expenses charged to each Share Class are detailed in Appendix 1 to this report.

b) Management Fees

The SICAV pays to the Management Company a management fee calculated as a percentage of the average daily net assets of each Sub-Fund or Share Class under its management (“Management Fees”). The Management Fees are accrued daily and payable monthly in arrears at a maximum rate as specified in the relevant section of the Prospectus. The Management Company may, at its absolute discretion and from time to time (which in certain circumstance may be daily) decide to vary such rate between the maximum and 0.0%. During the accounting year, the Management Company has reduced the Management Fees for the following Sub-Funds:

JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund
JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund
JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund
JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund
JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund
JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund
JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund
JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund
JPMorgan Liquidity Funds - USD Treasury CNAV Fund

Charges for the management of the Sub-Funds in respect of the X Share Classes of the Sub-Funds are administratively levied and collected by the Management Company or the appropriate JPMorgan Chase & Co. entity directly from the Shareholder.

Subject to the investment restrictions described in the Prospectus, Sub-Funds may invest in other Money Market Funds managed by the Management Company, the Investment Managers or any other member of JPMorgan Chase & Co. In accordance with the Prospectus, no double charging of fees will occur. The avoidance of a double-charge of the Annual Management Fee on assets invested in such Money Market Funds is achieved by either: a) excluding the assets from the net assets on which Annual Management Fees are calculated; or b) investing in these Money Market Funds via Share Classes that do not accrue an Annual Management Fee or other equivalent fees payable to the relevant Investment Manager’s group; or c) the Annual Management Fee being netted off by a rebate to the Fund or Sub-Fund of the Annual Management Fee (or equivalent) charged to the underlying Undertakings; or d) charging only the difference between the Annual Management Fee of the Fund or Sub-Fund as set out in “Appendix III - Sub-Fund Details” of the Prospectus and the Annual Management Fee (or equivalent) charged to the underlying Money Market Funds.

The Management Company may from time to time and at its sole discretion, pay all or part of the fees and charges it receives as a commission, retrocession, rebate or discount to some or all investors, financial intermediaries or Distributors on the basis of (but not limited to) the size, nature, timing or commitment of their investment.

c) Operating and Administrative Expenses

The SICAV bears all the ordinary operating and administrative expenses at the rates set out in the Prospectus to meet all fixed and variable costs, charges, fees and other expenses incurred in the operation and administration of the SICAV from time to time.

The Operating and Administrative Expenses are calculated as a percentage of the average daily net assets of each Sub-Fund or Share Class. They are accrued daily and payable monthly in arrears at a maximum rate as specified in the relevant section of the Prospectus.

The Operating and Administrative Expenses cover:

i) Expenses directly contracted by the SICAV (“Direct Expenses”), including but not limited to the depositary fees, auditing fees and expenses, the Luxembourg tax d’abonnement, Directors’ fees (no fees will be paid to Directors who are also directors or employees of JPMorgan Chase & Co.) and reasonable out-of-pocket expenses incurred by the Directors.

ii) A “Fund Servicing Fee” paid to the Management Company which will be the remaining amount of the Operating and Administrative Expenses after deduction of the expenses detailed under section i) above. The Management Company then bears all expenses incurred in the day to day operation and administration of the SICAV, including but not limited to formation expenses such as organisation and registration costs; accounting expenses covering fund accounting and administrative services; transfer agency expenses covering registrar and transfer agency services; the Administrative Agent and Domiciliary Agent services; the fees and reasonable out-of-pocket expenses of the paying agents and representatives; legal fees and expenses; ongoing registration, listing and quotation fees, including translation expenses; the cost of publication of the Share prices and postage, telephone, facsimile transmission and other electronic means of communication; and the costs and expenses of preparing, printing and distributing the Prospectus, Key Information Documents or any offering document, financial reports and other documents made available to Shareholders.

Operating and Administrative Expenses do not include Transaction Fees and Extraordinary Expenses.

JPMorgan Liquidity Funds

Notes to the Financial Statements (continued)

As at 30 November 2023

At its discretion, the Management Company may on a temporary basis meet the Direct Expenses on a Sub-Fund's behalf and/or waive all or part of the Fund Servicing Fee. During the accounting year, the Management Company has temporarily met the Direct Expenses on a Sub-Fund's behalf and/or waived all or part of the Fund Servicing Fee for the following Sub-Funds:

JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund
JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund
JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund
JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund
JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund
JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund
JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund
JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund
JPMorgan Liquidity Funds - USD Treasury CNAV Fund

The SICAV's formation expenses and the expenses relating to the creation of new Sub-Funds may be capitalised and amortised over a period not exceeding five years, as permitted by Luxembourg law.

Operating and Administrative Expenses are accrued daily according to the applicable charging structure of each Class.

In the case of all Share Classes, except Classes X (acc.), X (dist.) and X (TO acc.), the Operating and Administrative Expenses are set at a fixed rate specified in the relevant section of the Prospectus and as set out in Appendix 1 of this report. The Management Company bears the portion of the actual Operating and Administrative Expenses which exceed the specified fixed rates. This is separately disclosed as a "Fee Waiver" in the Combined Statement of Net Assets and the Combined Statement of Operations and Changes in Net Assets. Conversely, the Management Company is entitled to retain any amount by which the fixed rate of Operating and Administrative Expenses exceeds the actual expenses incurred by such Class.

The Operating and Administrative Expenses borne by the X (acc.), X (dist.) and X (TO acc.) Share Classes of all Sub-Funds will be the lower of the actual expenses allocated to such Share Classes and the maximum rate as specified in the relevant section of the Prospectus. The Management Company will bear the portion of any such Operating and Administrative Expenses which exceed the maximum rate specified. This is separately disclosed as a "Fee Waiver" in the Combined Statement of Net Assets and the Combined Statement of Operations and Changes in Net Assets. If the Operating and Administrative Expenses allocated to X (acc.) and X (dist.) Share Classes are below the maximum rate specified, the fees will be reduced by the amount of the shortfall.

5. Dividend Policy

a) Accumulating Share Classes with the suffix (acc.)

No dividends will be paid by the accumulating Share Classes of any Sub-Fund. All net investment income is reinvested.

b) Distributing Share Classes with the suffix (dist.)

Any dividend distributions will be automatically reinvested in additional Shares of the same Class, or at the election of a Shareholder, credited to a separate account.

All or substantially all of the net investment income (if any) attributable to the open distributing Share Classes of each Sub-Fund will be declared daily as a dividend and distributed monthly. The net investment income attributable to such Shares may not match exactly the net investment income arising on the investments of any Sub-Fund on any day.

The distributing Shares of each Sub-Fund begin earning dividends on the Valuation Day on which they were issued. If all of an investor's distributing Shares within a Sub-Fund are redeemed during a month, accrued but unpaid dividends are payable with the redemption proceeds. Distributing Shares do not earn dividends on the Valuation Day on which their redemption is accepted.

6. Taxation

The SICAV is not subject to taxation in Luxembourg on its income, profits or gains. The SICAV is not subject to net wealth tax in Luxembourg. The only tax to which the SICAV in Luxembourg is subject is the subscription tax ("taxe d'abonnement") based on the net asset value attributed to each Share Class at the end of the relevant quarter, calculated and paid quarterly. A reduced tax rate of 0.01% per annum of the net assets will be applicable to Share Classes which are only sold to and held by Institutional Investors. The 0.01% rate described above, as appropriate, is not applicable for the portion of the assets of the SICAV invested in other Luxembourg collective investment undertakings which are themselves already subject to the tax d'abonnement.

All Share Classes of JPMorgan Liquidity Funds, except the JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund, JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund and JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund, benefit from the reduced Taxe d'Abonnement rate of 0.01% except for Share Classes G (dist.), X (dist.), Agency, Capital, Institutional, Morgan, Premier and Reserves which benefit from an exemption of Taxe d'abonnement having complied with the requirements of article 175 b) of the Luxembourg Law. All Share Classes of JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund, JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund and JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund have a Taxe d'Abonnement rate of 0.01%.

No stamp duty, capital duty or other tax is payable in Luxembourg upon the issue of the Shares of the SICAV. No tax is payable on realised or unrealised capital appreciation of the assets of the SICAV in the Grand Duchy of Luxembourg. Although the SICAV's realised capital gains, whether short or long-term, are not expected to become taxable in another country, the Shareholders must be aware and recognise that such a possibility is not totally excluded. The regular income of the SICAV from some of its securities, as well as interest earned on cash deposits in certain countries, may be subject to withholding taxes at varying rates, which normally cannot be recovered.

7. Statement of Changes in Investments

A list, specifying for each investment within each Sub-Fund the total purchases and sales which occurred during the financial year, may be obtained free of charge upon request at the registered office of the SICAV. Additional information for investments within each Sub-Fund's portfolio is available to Shareholders at the registered office of the SICAV.

8. Collateral received with respect to Financial Techniques and Instruments

Assets received from counterparties in reverse repurchase agreements constitute collateral.

The SICAV will only enter into transactions with counterparties which the Management Company believes to be creditworthy. Approved counterparties will typically have a public rating of A- or above. Counterparties will comply with prudential rules considered by the CSSF as equivalent to EU prudential rules. The counterparty does not have discretion over the composition or management of a Sub-Fund's portfolio. Counterparty approval is not required in relation to any investment decision made by a Sub-Fund.

Collateral may be offset against gross counterparty exposure provided it meets a range of standards, including those for liquidity, valuation, issuer credit quality, correlation and diversification. In offsetting collateral its value is reduced by a percentage (a "haircut") which provides, inter alia, for short term fluctuations in the value of the exposure and of the collateral. Collateral levels are maintained to ensure that net counterparty exposure does not exceed the

JPMorgan Liquidity Funds

Notes to the Financial Statements (continued)

As at 30 November 2023

limits per counterparty as set out in the relevant section of the Prospectus. If any, collateral is received in the form of securities and cash. Non-cash collateral received is not sold, reinvested or pledged.

Collateral received with respect to Reverse Repurchase Agreements is shown in Appendix 7.

9. Transactions with Connected Parties

All transactions with connected parties were carried out on an arm's length basis.

The Management Company, Registrar and Transfer Agent, Domiciliary Agent and Global Distributor, Investment Managers, Depositary, Corporate, Administrative and Listing Agent and other related Agents of the SICAV are considered as connected parties as they are affiliated entities of JPMorgan Chase & Co. In addition Elvinger Hoss Prussen (of which Mr Jacques Elvinger who is on the Board of the Directors of the SICAV, is a partner) has been compensated USD 68,807 for the year for legal services to the SICAV.

10. Cross Investments

As at 30 November 2023 there are no cross-investments between Sub-Funds.

11. Information for German Registered Shareholders

A list, specifying for each investment within each Sub-Fund the total purchases and sales which occurred during the financial year, may be obtained free of charge upon request at the registered office of the SICAV and at the office of the German paying and information agent, J.P. Morgan AG, Taunustor 1, D-60310 Frankfurt am Main, Germany. Additional information to investments within each Sub-Fund's portfolio is available to Shareholders at the registered office of the SICAV and at the office of the German paying and information agent.

12. Information for Investors in Switzerland

Representative in Switzerland: JPMorgan Asset Management (Switzerland) LLC, Dreikönigstrasse 37, 8002 Zürich.

Paying Agent in Switzerland: J.P. Morgan (Suisse) SA, Rue du Rhône 35, 1204 Geneva.

The Prospectus, the Key Information Documents, the articles of incorporation, the annual and semi-annual financial report as well as a list of the purchases and sales which the SICAV has undertaken during the financial year may be obtained free of charge from the representative.

13. Stable Net Asset Value Risk

For Public Debt CNAV Funds, the SICAV seeks to maintain a stable Net Asset Value per Share for distributing Shares, however maintenance of a stable Net Asset Value is not guaranteed.

For LVNAV Funds, subscriptions and redemptions of Shares of LVNAV MMFs are carried out at a price that is equal to the Constant NAV of the relevant Class, provided that the Constant NAV of the relevant Sub-Fund does not deviate by more than 20 basis points from the Variable NAV of that same Sub-Fund. In the event the deviation exceeds 20 basis points from the Variable NAV of that same Sub-Fund, the following subscriptions and redemptions will be undertaken at a price that is equal to the Variable NAV of the relevant Class. In addition, in relation to the relevant (dist) Shares, if net investment income is negative, the subscription and redemption price may not remain stable and the negative net investment income may be accrued and reflected in the Net Asset Value Per Share.

For VNAV Funds, the SICAV does not seek to maintain a stable Net Asset Value per Share for distributing Shares.

14. Directors' Fees

The only remuneration paid to Directors is an annual fee including AML Committee Fee. This is waived by Mr Dan Watkins and Mr Massimo Greco. The Directors' fees for the year amounted to USD 407,079 of which USD 94,908 was due to the Chairman. The AML Committee Directors' fee for the year amounted to USD 1,575 of which USD 945 was due to the AML Committee Chairman. The AML Committee was discontinued at the end of 2022.

15. Transaction Costs

For the year ended 30 November 2023, the SICAV incurred transaction costs which have been defined as brokerage fees relating to purchase or sale of transferable securities, money market instruments or other eligible assets. The SICAV also incurred transaction costs charged by the custodian agent and relating to purchase and sale of transferable securities as follows:

Sub-Fund	Base Currency	Depositary Transaction Costs (in Base Currency)
JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund	AUD	3,894
JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund	EUR	-
JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund	EUR	3,768
JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund	SGD	5,301
JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund	GBP	202,526
JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund	GBP	24,080
JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund	USD	222,261
JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund	USD	40,542
JPMorgan Liquidity Funds - USD Treasury CNAV Fund	USD	93,312

For fixed income securities, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

JPMorgan Liquidity Funds

Notes to the Financial Statements (continued)

As at 30 November 2023

16. Significant Events during the year

a) Sustainable Finance Disclosure Regulation (SFDR) change

With effect from 9 June 2023, the prospectus of JPMorgan Liquidity Funds has been updated to reflect that the following Sub-Funds have been re-categorised from Article 6 to Article 8 under SFDR:

JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund;
JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund;
JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund;
JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund;
JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund;
JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund.

The Sub-Funds have been classified as “ESG Promote” and each Sub-Fund Description for the above Sub-Funds has been updated to reflect this categorisation and the following binding criteria:

- At least 51% of assets are invested in companies/issuers with positive environmental and/or social characteristics that follow good governance practices;
- Specific values and norms based exclusions.

These updates clarify how the Sub-Funds are currently being managed and do not affect their risk profile.

With effect from 1 August 2023, the prospectus of JPMorgan Liquidity Funds has been updated to reflect that the following Sub-Funds have been re-categorised from Article 6 to Article 8 under SFDR:

JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund;
JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund.

The Sub-Funds have been classified as “ESG Promote” and each Sub-Fund Description for the above Sub-Funds has been updated to reflect this categorisation and the following binding criteria:

- At least 51% of assets are invested in companies/issuers with positive environmental and/or social characteristics that follow good governance practices;
- Specific values and norms based exclusions.

These updates clarify how the Sub-Funds are currently being managed and do not affect their risk profile.

b) Share Class name change

With effect from 3 July 2023, the “(flex dist.)” Share Classes in the JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund were renamed (TO acc.). The Share Classes continue to behave as accumulation share classes, with settlement on the day of trade (same day settlement).

17. Significant Events after the year-end

There have been no significant events following the year end.

(2) The Share Class was renamed from JPM EUR Liquidity LVNAV X (flex dist.) to JPM EUR Liquidity LVNAV X (TO acc.) on 3 July 2023.

* Share Class inactive as at the end of the year.

[^] Share Class reactivated during the year.

+ Expense ratios are calculated in accordance with the guidelines dated 16 May 2008 (as amended 20 April 2015) issued by the Swiss Funds & Asset Management Association (SFAMA). On 25 September 2020, SFAMA and the Asset Management Platform (AMP) Switzerland merged to form the Asset Management association Switzerland (AMAS). The Total Expense Ratio ("TER") represents the total operating costs as a percentage of the Fund's average daily net assets. The total operating cost comprises investment management fees, custodian/depository fees, tax d'abonnement and other expenses, as summarised in the Combined Statement of Operations and Changes in Net Assets. Overdraft interest and Performance Fees are excluded from the calculation.

The capped expense ratios and total expense ratios for some Share Classes may have changed over the previous two years. All details concerning these changes have been disclosed in previous years' Financial Statements. All TER figures are annualised. These figures include Fee Waivers on Management Fees or Operating and Administrative expenses, where applicable to not exceed the maximum rate as per the Prospectus.

++ At its discretion, the Management Company may waive all or part of the Fund Servicing Fee, where applicable.

JPMorgan Liquidity Funds

Appendix - Unaudited Additional Disclosures (continued)

2. Summary of Investment Objectives of the Sub-Funds

The Sub-Funds seek to achieve a return in the Reference Currency in line with prevailing money market rates whilst aiming to preserve capital consistent with such rates and to maintain a high degree of liquidity.

3. Performance and Volatility†

Performance

Returns for periods greater than one year are annualised. SICAV performance includes reinvestment of income and is net of all expenses.

Past performance is no indication of current or future performance.

The performance data does not take into account the commissions and costs incurred on the issue and redemption of units.

Volatility

The standard deviation (D) of the price is calculated on a daily basis throughout each SICAV's financial year.

The details below relate to the year from 1 December 2022 to 30 November 2023.

If D is equal to or less than 0.1 then volatility was Low.

If D is greater than 0.1 but less than or equal to 1.0 then volatility was Medium.

If D is greater than 1.0 but less than or equal to 2.4 then volatility was High.

If D is greater than 2.4 then volatility was Very High.

4. Interest Rate Received/(Charged) on Bank Accounts

Basis for Bank Interest Rates

The rates are based on the JPMorgan Chase Treasury rates and consequently may change on a daily basis. The bank interest amount is posted to each of the SICAV's bank accounts on a monthly basis on the third business day of the subsequent month based on the bank balances from the prior month.

5. Portfolio Turnover Ratio

The Portfolio Turnover Ratio is an indicator of the relevance of the additional costs incurred by a fund when buying and selling investments according to its investment policy. The Portfolio Turnover Ratio is calculated as outlined below:

$$\frac{(\text{Total securities' purchases and sales} - \text{total subscriptions and redemptions of Sub-Fund shares})}{\text{Average net Sub-Fund assets in Sub-Fund currency}}$$

The Portfolio Turnover Ratio is expressed as a percentage. Due to the fact that underlying investments have short term maturity and that they are replaced only at maturity, no portfolio turnover statistics are calculated for the SICAV.

6. Calculation Method of the Risk Exposure

The methodology for all of JPMorgan Liquidity Funds Sub-Funds used in order to calculate the global exposure is the commitment approach in accordance with the CSSF Circular 11/512.

8. Securities Financing Transactions

The SICAV engages in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions) through its exposure on reverse repurchase agreements during the year. In accordance with Article 13 of the Regulation, information on reverse repurchase agreements are detailed below.

Collaterals received or granted with respect to Securities Financing Transactions are disclosed on a trade date basis of accounting.

Global Data

Amount of assets engaged in reverse repurchase agreements

The amount of assets engaged in reverse repurchase agreements, including their proportion to the Sub-Funds' assets under management, are disclosed in the Schedule of Investments.

Concentration Data

Ten largest collateral issuers

The following table lists the ten largest issuers by value of non-cash collaterals received by the Sub-Funds across reverse repurchase agreements as at the reporting date:

Aggregate transaction data

Type and quality of collateral

Collaterals received by the Sub-Funds with respect to reverse repurchase agreements as at the reporting date are in the form of debt securities, primarily consisting of sovereign bonds. Quality of these collaterals are detailed below:

Sub-Fund	Sub-Fund Currency	Collateral Value (in Sub-Fund Currency)			Total
		Investment Grade	Below Investment Grade	Non-Rated*	
JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund	AUD	498,933,249	-	-	498,933,249
JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund	EUR	7,090,928,476	-	-	7,090,928,476
JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund	EUR	209,105,514	-	-	209,105,514
JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund	SGD	406,784,957	-	-	406,784,957
JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund	GBP	5,017,431,464	-	-	5,017,431,464
JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund	GBP	26,703,955	-	-	26,703,955
JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund	USD	18,360,000,190	-	-	18,360,000,190
JPMorgan Liquidity Funds - USD Treasury CNAV Fund	USD	13,557,817,952	-	-	13,557,817,952

Quality of collateral has been interpreted as pertaining to bond instruments, which have been assessed and reported in accordance with whether they are considered investment grade, below investment grade or not-rated. Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency.

*Non-Rated collateral comprises government-sponsored US Mortgage Backed Securities. In accordance with Prospectus provisions, these are deemed to be of comparable credit quality to Investment Grade collateral holdings.

Collateral granted

As at the reporting date, there was no collateral granted with respect to reverse repurchase agreements.

Return and cost

All returns from reverse repurchase agreements will accrue to the Sub-Funds and are not subject to any returns sharing arrangements with the Investment Manager or any other third parties. Returns from reverse repurchase agreements are disclosed in note 2f) to the Financial Statements.

9. UCITS Remuneration Disclosures

JPMorgan Asset Management (Europe) S.à r.l. (the “**Management Company**”) is the authorised manager of JPMorgan Liquidity Funds (the “**Company**”) and is part of the J.P. Morgan Chase & Co. group of companies. In this section, the terms “**J.P. Morgan**” or “**Firm**” refer to that group, and each of the entities in that group globally, unless otherwise specified.

This section of the annual report has been prepared in accordance with the Undertakings for Collective Investment in Transferable Securities (the “**UCITS Directive**”) and the ‘Guidelines on sound remuneration policies’ issued by the European Securities and Markets Authority under the UCITS Directive. The information in this section is in respect of the most recent complete remuneration period (“**Performance Year**”) as at the reporting date.

Remuneration Policy

A summary of the Remuneration Policy applying to the Management Company (the “**Remuneration Policy**”) can be found at <https://am.jpmorgan.com/lu/en/asset-management/adv/funds/policies/> (the “**Remuneration Policy Statement**”). This Remuneration Policy Statement includes details of how remuneration and benefits are calculated, including the financial and non-financial criteria used to evaluate performance, the responsibilities and composition of the Firm’s Compensation and Management Development Committee, and the measures adopted to avoid or manage conflicts of interest. A copy of this policy can be requested free of charge from the Management Company.

The Remuneration Policy applies to all employees of the Management Company, including individuals whose professional activities may have a material impact on the risk profile of the Management Company or the UCITS Funds it manages (“**UCITS Identified Staff**”). The UCITS Identified Staff include members of the Board of the Management Company (the “**Board**”), senior management, the heads of relevant Control Functions, and holders of other key functions. Individuals are notified of their identification and the implications of this status on at least an annual basis.

The Board reviews and adopts the Remuneration Policy on an annual basis, and oversees its implementation, including the classification of UCITS Identified Staff. The Board last reviewed and adopted the Remuneration Policy that applied to the 2023 Performance Year in June 2023 with no material changes and was satisfied with its implementation.

Quantitative Disclosures

The table below provides an overview of the aggregate total remuneration paid to staff of the Management Company in respect of the 2023 Performance Year and the number of beneficiaries.

Due to the Firm’s structure, the information needed to provide a further breakdown of remuneration attributable to the Company is not readily available and would not be relevant or reliable. However, for context, the Management Company manages 45 Alternative Investment Funds (with 50 Sub-Funds) and 6 UCITS (with 179 Sub-Funds) as at 31 December 2023, with a combined AUM as at that date of USD 16,602m and USD 466,699m respectively.

	Fixed remuneration	Variable remuneration	Total remuneration	Number of beneficiaries
All staff (USD ‘000s)	54,109	27,380	81,489	364

No performance fee was paid to any employees by JPMorgan Liquidity Funds in the year.

The aggregate total remuneration paid to UCITS Identified Staff in respect of the 2023 Performance Year was USD 157,186k, of which USD 7,138k relates to Senior Management and USD 150,048k relates to other UCITS Identified Staff⁽¹⁾.

⁽¹⁾ The Identified Staff disclosures includes employees of companies to which portfolio management has been formally delegated, in line with the latest ESMA guidance.

10. Sustainable Finance Disclosure

The Sub-Fund below was categorised as Article 6 in respect of the Sustainable Finance Disclosure Regulation:

JPMorgan Liquidity Funds - USD Treasury CNAV Fund

As at the year-end the investments underlying the financial products did not take into account the EU criteria for environmentally sustainable economic activities.

The Sub-Funds below were categorised as Article 8 in respect of the Sustainable Finance Disclosure Regulation. Detailed disclosures are available from the next page onwards.

Sub-Fund Name	Page
JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund	78
JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund	85
JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund	94
JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund	103
JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund	112
JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund	121
JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund	128
JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund	137

Product name: **JPMorgan Liquidity Funds - AUD Liquidity LVNAV Fund**

Legal entity identifier: **549300V1RMCHNHQVR274**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
Yes	No
<input type="checkbox"/> It made sustainable investments with an environmental objective: %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: %	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics. This commitment was met throughout the reference period (9 June 2023 - 30 November 2023). At the end of the reference period, the Sub-Fund held 94.55% of investments with positive environmental and/or social characteristics.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and/or social characteristics and those that meet the thresholds for being considered as sustainable investments.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour

relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded issuers that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant issuers for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and/or social characteristics policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time. This Sub-Fund was uplifted to Article 8 on 9 June 2023 so this periodic report does not represent a full calendar year.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the investment universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 94.55% of investments with positive environmental and/or social characteristics.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not Applicable. The Sub-Fund did not commit to investing any proportion of assets specifically in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable. The Sub-Fund did not commit to investing any proportion of assets specifically in sustainable investments.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not Applicable. The Sub-Fund did not commit to investing any proportion of assets specifically in sustainable investments.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not Applicable. The Sub-Fund did not commit to investing any proportion of assets specifically in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the “Do No Significant Harm” screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee issuers based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
09/06/2023 - 30/11/2023

Largest Investments	Sector	% Assets	Country
BNP PARIBAS SA	Finance	17.66	FRANCE
STANDARD CHARTERED PLC	Finance	10.93	UNITED KINGDOM
NATIONAL AUSTRALIA BANK LI	Finance	8.59	AUSTRALIA
ROYAL BANK OF CANADA	Finance	7.65	CANADA
HSBC HOLDINGS PLC.	Finance	4.94	UNITED KINGDOM
ING GROEP N V	Finance	4.10	NETHERLANDS

What was the proportion of sustainability-related investments?

Asset allocation

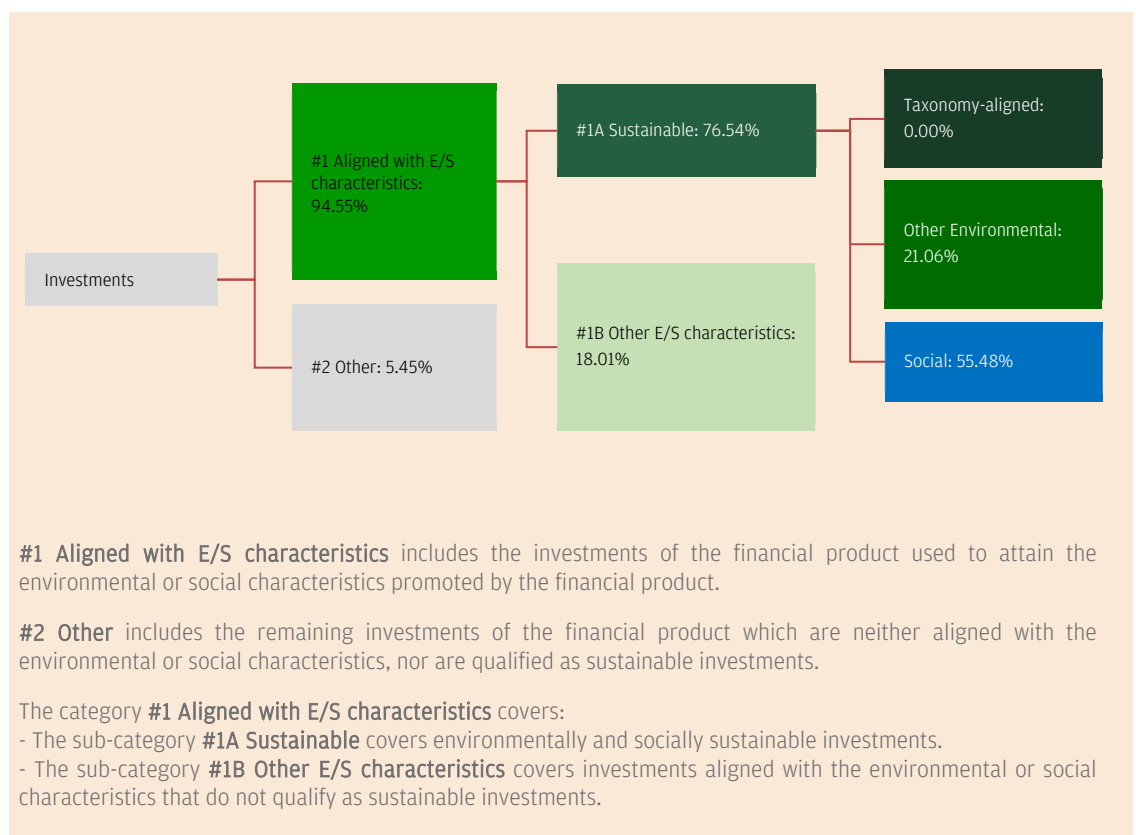

describes the share of investments in specific assets.

● *What was the asset allocation?*

At the end of the reference period, the Sub-Fund allocated 94.55% of its assets to issuers that exhibited positive environmental and/or social characteristics. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Sub-Fund as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

● *In which economic sectors were the investments made?*

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Sector	Sub-sector	% Assets
Finance	ABCP	1.25
Finance	Banking	92.55
Industrial	Consumer Cyclical	2.13
Non-US Govt Related Credit	Foreign Agencies	2.67

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?²

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.

- **capital expenditure** (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.

- **operational expenditure** (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 96% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund’s framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.43%, at the end of the reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 21.06% of assets at the end of the reference period.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 55.48% of assets at the end of the reference period.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 5.45% of assets in “other” investments were comprised of issuers that did not meet the criteria described in response to above question entitled, “How did the sustainability indicators perform?” to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) were not included in the % of assets included in the asset allocation diagram above, including under “other”. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including “other” investments were subject to the following ESG Minimum Safeguards/principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in securities with positive environmental and/or social characteristics.
- Values and norms-based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund**

Legal entity identifier: **549300EY7SB6LVY5QG87**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.15% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: %	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (9 June 2023 - 30 November 2023). At the end of the reference period, the Sub-Fund held 77.45% of investments with positive environmental and/or social characteristics and 31.15% of sustainable investments.

In addition, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process which considers an issuer’s gender breakdown, diversity programmes, ethnicity score and equal pay score. The inputs related directly to EE&D. It was required to invest 51% of its assets in such securities. At the end of the reference period, the Sub-Fund held 78.30% of assets scoring above the pre-defined EE&D threshold.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. Through its inclusion criteria, the Sub-Fund promoted environmental characteristics such as

effective management of toxic emissions and waste as well as good environmental record. It also promoted social characteristics which may have included effective sustainability disclosures, positive scores on labour relations and management of safety issues. In addition to this, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process as mentioned above.

Through its exclusion criteria, the Sub-Fund promoted certain norms and values such as support for the protection of internationally proclaimed human rights and reducing toxic emissions, by fully excluding issuers that are involved in particular activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and/or social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and/or social characteristics, sustainable investments policy and EE&D thresholds throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time. This Sub-Fund was uplifted to Article 8 on 9 June 2023 so this periodic report does not represent a full calendar year.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the investment universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 77.45% of investments with positive environmental and/or social characteristics and 31.15% of sustainable investments.

To be included in the 51% of good EE&D assets, an issuer must have an EE&D rating applied by the Investment Manager based on the relevant inputs and score in the top 80% relative to the universe of such rated assets. At the end of the reference period, the Sub-Fund held 78.30% of good EE&D assets.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the issuer is considered a sustainable investment; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the Sub-Fund's investment universe based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the investment universe on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 31.15% of its assets were sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 – 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement seeking to influence best practice and it uses certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment.

The data needed to take the indicators into account, where available, may have been obtained from investee issuers themselves and/or supplied by third-party service providers (including proxy data). Data inputs that were self-reported by issuers or supplied by third-party providers may have been based on data sets and assumptions that were insufficient, of poor quality or contain biased information. The Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions.

These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations.

The Investment Manager also applied a purpose built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applies the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators currently used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Sub-Fund's investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

anti-corruption and anti-bribery matters.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact, controversial weapons and country level social violations from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee companies based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
09/06/2023 - 30/11/2023

Largest Investments	Sector	% Assets	Country
NATWEST GROUP PLC	Finance	8.85	UNITED KINGDOM
THE GOLDMAN SACHS GROUP, I	Finance	5.02	UNITED STATES
CREDIT AGRICOLE GROUP	Finance	4.67	FRANCE
THE BANK OF NOVA SCOTIA	Finance	4.35	CANADA

SVENSKA HANDELSBANKEN AB	Finance	2.71	SWEDEN

What was the proportion of sustainability-related investments?

Asset allocation

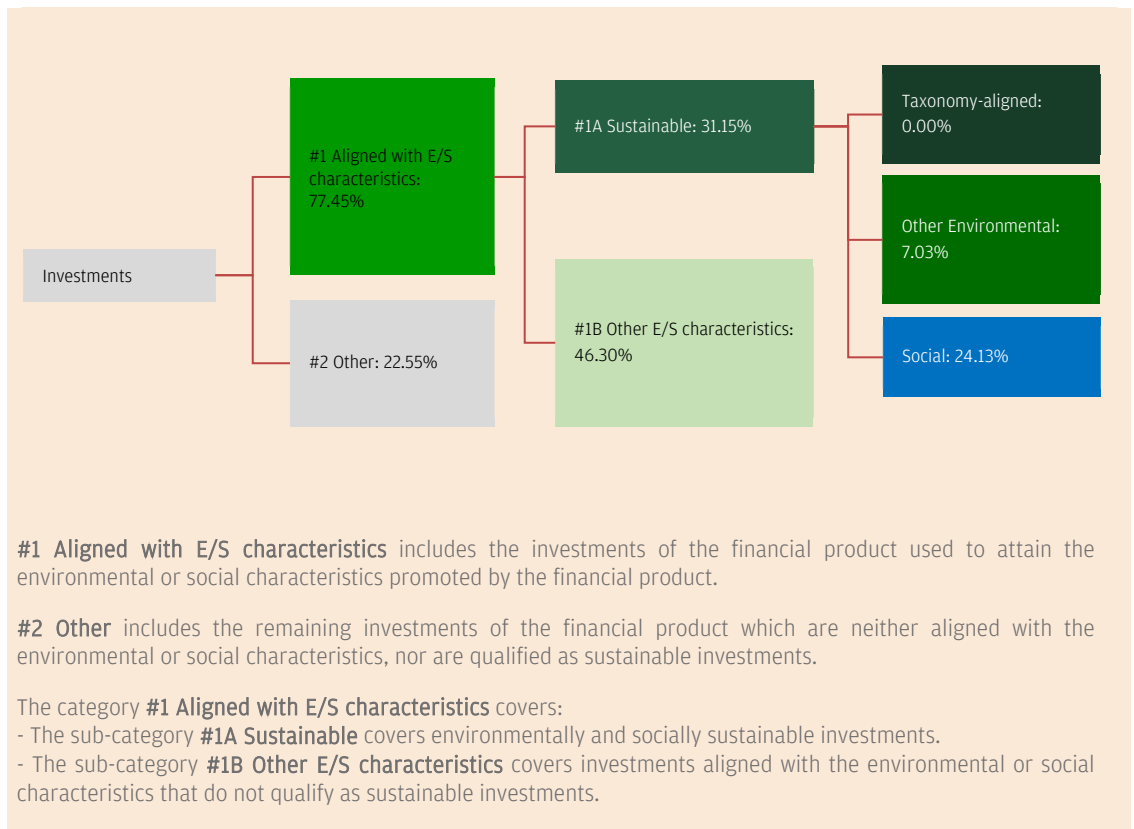

describes the share of investments in specific assets.

● *What was the asset allocation?*

At the end of the reference period, the Sub-Fund allocated 77.45% of its assets to issuers that exhibited positive environmental and/or social characteristics and 31.15% of assets to sustainable investments. The % allocation of good EE&D rated assets at the end of the reference period is set out in the response to the question “How did the sustainability indicators perform?” The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Sub-Fund as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

● *In which economic sectors were the investments made?*

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Sector	Sub-sector	% Assets

Utilities	Electric	0.40

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?*

Yes

In fossil gas

In nuclear energy

No

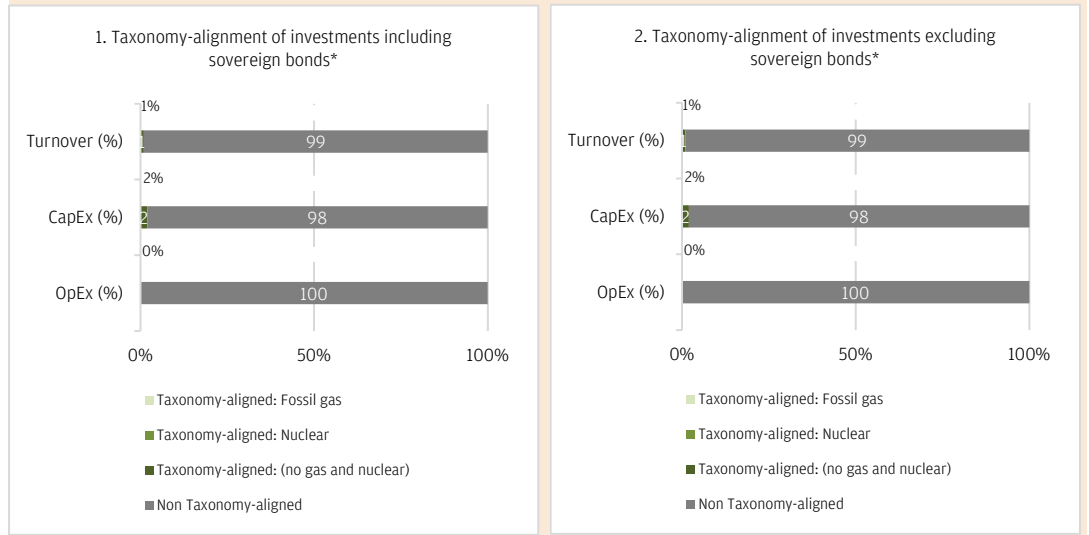

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.

- **capital expenditure** (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.

- **operational expenditure** (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.29%, at the end of the reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 7.03% of assets at the end of the reference period.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 24.13% of assets at the end of the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 22.55% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards/principle:

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and/or social characteristics and 51% of EE&D rated assets in good EE&D issuers.
- The values and norms based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **JPMorgan Liquidity Funds - EUR Standard Money Market VNAV Fund**

Legal entity identifier: **5493003UE5TIZ70I5C71**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.40% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: %	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (9 June 2023 - 30 November 2023). At the end of the reference period, the Sub-Fund held 79.46% of investments with positive environmental and/or social characteristics and 56.40% of sustainable investments.

In addition, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process which considers an issuer’s gender breakdown, diversity programmes, ethnicity score and equal pay score. The inputs related directly to EE&D. It was required to invest 51% of its assets in such securities. At the end of the reference period, the Sub-Fund held 79.00% of assets scoring above the pre-defined EE&D threshold.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. Through its inclusion criteria, the Sub-Fund promoted environmental characteristics such as

effective management of toxic emissions and waste as well as good environmental record. It also promoted social characteristics which may have included effective sustainability disclosures, positive scores on labour relations and management of safety issues. In addition to this, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process as mentioned above.

Through its exclusion criteria, the Sub-Fund promoted certain norms and values such as support for the protection of internationally proclaimed human rights and reducing toxic emissions, by fully excluding issuers that are involved in particular activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and/or social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and/or social characteristics, sustainable investments policy and EE&D thresholds throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time. This Sub-Fund was uplifted to Article 8 on 9 June 2023 so this periodic report does not represent a full calendar year.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the investment universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 79.46% of investments with positive environmental and/or social characteristics and 56.40% of sustainable investments.

To be included in the 51% of good EE&D assets, an issuer must have an EE&D rating applied by the Investment Manager based on the relevant inputs and score in the top 80% relative to the universe of such rated assets. At the end of the reference period, the Sub-Fund held 79.00% of good EE&D assets.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the issuer is considered a sustainable investment; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the Sub-Fund's investment universe based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the investment universe on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 56.40% of its assets were sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 – 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement seeking to influence best practice and it uses certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment.

The data needed to take the indicators into account, where available, may have been obtained from investee issuers themselves and/or supplied by third-party service providers (including proxy data). Data inputs that were self-reported by issuers or supplied by third-party providers may have been based on data sets and assumptions that were insufficient, of poor quality or contain biased information. The Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions.

These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations.

The Investment Manager also applied a purpose built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applies the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators currently used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Sub-Fund's investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

anti-corruption and anti-bribery matters.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact, controversial weapons and country level social violations from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee companies based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
09/06/2023 - 30/11/2023

Largest Investments	Sector	% Assets	Country
CREDIT AGRICOLE GROUP	Finance	7.48	FRANCE
BNP PARIBAS SA	Finance	7.09	FRANCE
LA POSTE	Non-US Govt Related Credit	6.53	FRANCE

THE BANK OF NOVA SCOTIA	Finance	1.42	CANADA

What was the proportion of sustainability-related investments?

Asset allocation

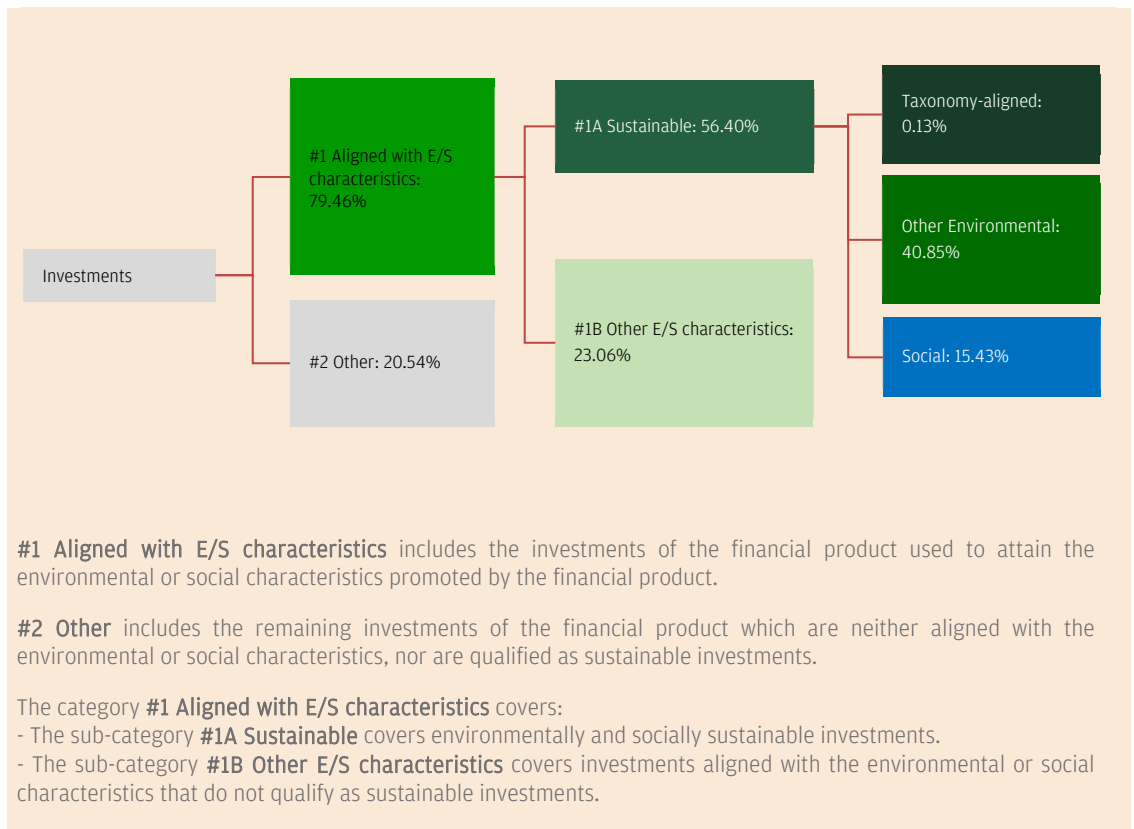

describes the share of investments in specific assets.

● *What was the asset allocation?*

At the end of the reference period, the Sub-Fund allocated 79.46% of its assets to issuers that exhibited positive environmental and/or social characteristics and 56.40% of assets to sustainable investments. The % allocation of good EE&D rated assets at the end of the reference period is set out in the response to the question “How did the sustainability indicators perform?” The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Sub-Fund as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

● *In which economic sectors were the investments made?*

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Sector	Sub-sector	% Assets
ABS	ABS - Auto	2.61
Finance	ABCP	10.53

Finance	Banking	63.12
Finance	Financial Other	3.57
Finance	Finance Companies	1.06
Finance	Insurance	0.81
Finance	REITs	0.47
Industrial	Capital Goods	2.39
Industrial	Consumer Cyclical	3.92
Industrial	Consumer Noncyclical	3.21
Industrial	Technology	0.50
Non-US Govt Related Credit	Foreign Agencies	6.55
Utilities	Electric	1.25

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?*

Yes

In fossil gas

In nuclear energy

No

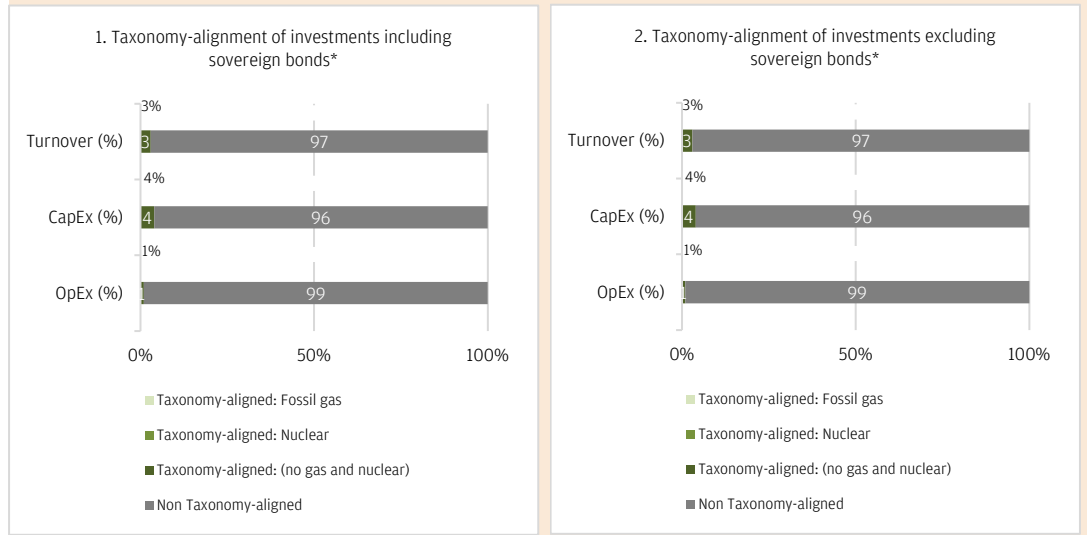

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.

- **capital expenditure** (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.

- **operational expenditure** (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.57%, at the end of the reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 40.85% of assets at the end of the reference period.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 15.43% of assets at the end of the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 20.54% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards/principle:

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and/or social characteristics and 51% of EE&D rated assets in good EE&D issuers.
- The values and norms based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **JPMorgan Liquidity Funds - GBP Liquidity LVNAV Fund**

Legal entity identifier: **549300HF81MI7WQXYJ64**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41.92% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (9 June 2023 - 30 November 2023). At the end of the reference period, the Sub-Fund held 90.50% of investments with positive environmental and/or social characteristics and 41.92% of sustainable investments.

In addition, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process which considers an issuer's gender breakdown, diversity programmes, ethnicity score and equal pay score. The inputs related directly to EE&D. It was required to invest 51% of its assets in such securities. At the end of the reference period, the Sub-Fund held 73.73% of assets scoring above the pre-defined EE&D threshold.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. Through its inclusion criteria, the Sub-Fund promoted environmental characteristics such as

effective management of toxic emissions and waste as well as good environmental record. It also promoted social characteristics which may have included effective sustainability disclosures, positive scores on labour relations and management of safety issues. In addition to this, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process as mentioned above.

Through its exclusion criteria, the Sub-Fund promoted certain norms and values such as support for the protection of internationally proclaimed human rights and reducing toxic emissions, by fully excluding issuers that are involved in particular activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and/or social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and/or social characteristics, sustainable investments policy and EE&D thresholds throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time. This Sub-Fund was uplifted to Article 8 on 9 June 2023 so this periodic report does not represent a full calendar year.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the investment universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 90.50% of investments with positive environmental and/or social characteristics and 41.92% of sustainable investments.

To be included in the 51% of good EE&D assets, an issuer must have an EE&D rating applied by the Investment Manager based on the relevant inputs and score in the top 80% relative to the universe of such rated assets. At the end of the reference period, the Sub-Fund held 73.73% of good EE&D assets.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the issuer is considered a sustainable investment; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the Sub-Fund's investment universe based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the investment universe on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 41.92% of its assets were sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 – 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement seeking to influence best practice and it uses certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment.

The data needed to take the indicators into account, where available, may have been obtained from investee issuers themselves and/or supplied by third-party service providers (including proxy data). Data inputs that were self-reported by issuers or supplied by third-party providers may have been based on data sets and assumptions that were insufficient, of poor quality or contain biased information. The Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions.

These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations.

The Investment Manager also applied a purpose built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applies the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators currently used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Sub-Fund's investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

anti-corruption and anti-bribery matters.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact, controversial weapons and country level social violations from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee companies based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
09/06/2023 - 30/11/2023

Largest Investments	Sector	% Assets	Country
THE TORONTO-DOMINION BANK	Finance	8.07	CANADA
COMMONWEALTH BANK OF AUSTR	Finance	7.90	AUSTRALIA
THE BANK OF NOVA SCOTIA	Finance	7.50	CANADA
MITSUBISHI UFJ FINANCIAL G	Finance	5.26	JAPAN
CREDIT AGRICOLE GROUP	Finance	4.50	FRANCE
DBS GROUP HOLDINGS LTD	Finance	4.05	SINGAPORE
MIZUHO FINANCIAL GROUP, IN	Finance	3.96	JAPAN
BANK OF MONTREAL	Finance	3.63	CANADA
BANCO SANTANDER S.A.	Finance	3.54	SPAIN
GROUPE BPCE	Finance	3.52	FRANCE

What was the proportion of sustainability-related investments?

Asset allocation

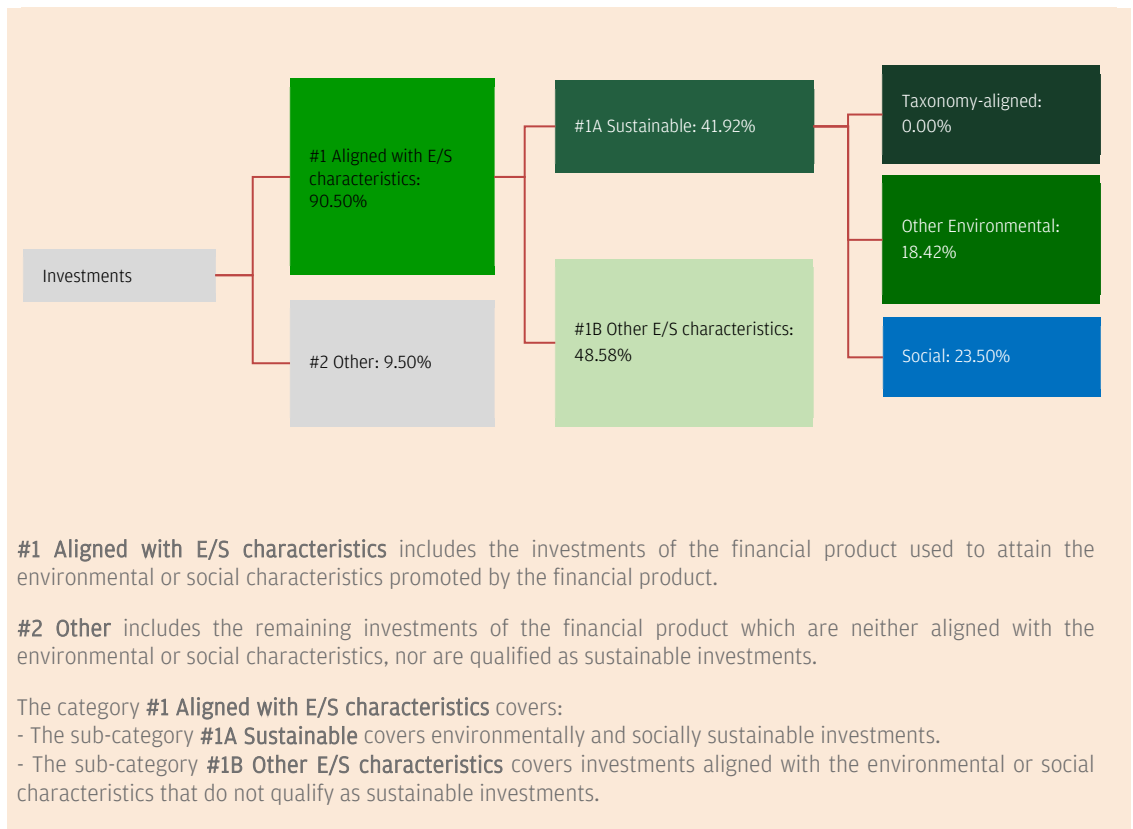

describes the share of investments in specific assets.

● *What was the asset allocation?*

At the end of the reference period, the Sub-Fund allocated 90.50% of its assets to issuers that exhibited positive environmental and/or social characteristics and 41.92% of assets to sustainable investments. The % allocation of good EE&D rated assets at the end of the reference period is set out in the response to the question “How did the sustainability indicators perform?” The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Sub-Fund as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

● *In which economic sectors were the investments made?*

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Sector	Sub-sector	% Assets
Finance	ABCP	10.03
Finance	Banking	74.01

Finance	Financial Other	6.06
Finance	Finance Companies	1.14
Finance	Insurance	0.95
Industrial	Consumer Cyclical	1.29
Non-US Govt Related Credit	Foreign Local Govt	1.02
Non-US Govt Related Credit	Foreign Agencies	2.96
Non-US Govt Related Credit	Sovereign	0.66

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.

- **capital expenditure** (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.

- **operational expenditure** (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 98% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.26%, at the end of the reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 18.42% of assets at the end of the reference period.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 23.50% of assets at the end of the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 9.50% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards/principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and/or social characteristics and 51% of EE&D rated assets in good EE&D issuers.
- The values and norms based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub-Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **JPMorgan Liquidity Funds - GBP Standard Money Market VNAV Fund**

Legal entity identifier: **549300YK6CG8PWFIG283**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.18% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: %	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (31 August 2023 - 30 November 2023). At the end of the reference period, the Sub-Fund held 84.66% of investments with positive environmental and/or social characteristics and 56.18% of sustainable investments.

In addition, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process which considers an issuer’s gender breakdown, diversity programmes, ethnicity score and equal pay score. The inputs related directly to EE&D. It was required to invest 51% of its assets in such securities. At the end of the reference period, the Sub-Fund held 82.61% of assets scoring above the pre-defined EE&D threshold.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. Through its inclusion criteria, the Sub-Fund promoted environmental characteristics such as

effective management of toxic emissions and waste as well as good environmental record. It also promoted social characteristics which may have included effective sustainability disclosures, positive scores on labour relations and management of safety issues. In addition to this, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process as mentioned above.

Through its exclusion criteria, the Sub-Fund promoted certain norms and values such as support for the protection of internationally proclaimed human rights and reducing toxic emissions, by fully excluding issuers that are involved in particular activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and/or social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and/or social characteristics, sustainable investments policy and EE&D thresholds throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time. This Sub-Fund was uplifted to Article 8 on 31 August 2023 so this periodic report does not represent a full calendar year.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the investment universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 84.66% of investments with positive environmental and/or social characteristics and 56.18% of sustainable investments.

To be included in the 51% of good EE&D assets, an issuer must have an EE&D rating applied by the Investment Manager based on the relevant inputs and score in the top 80% relative to the universe of such rated assets. At the end of the reference period, the Sub-Fund held 82.61% of good EE&D assets.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the issuer is considered a sustainable investment; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the Sub-Fund's investment universe based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the investment universe on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 56.18% of its assets were sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 – 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement seeking to influence best practice and it uses certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment.

The data needed to take the indicators into account, where available, may have been obtained from investee issuers themselves and/or supplied by third-party service providers (including proxy data). Data inputs that were self-reported by issuers or supplied by third-party providers may have been based on data sets and assumptions that were insufficient, of poor quality or contain biased information. The Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions.

These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations.

The Investment Manager also applied a purpose built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applies the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators currently used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Sub-Fund's investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

anti-corruption and anti-bribery matters.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact, controversial weapons and country level social violations from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee companies based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 30/11/2023

Largest Investments	Sector	% Assets	Country
GROUPE BPCE	Finance	7.73	FRANCE

What was the proportion of sustainability-related investments?

Asset allocation

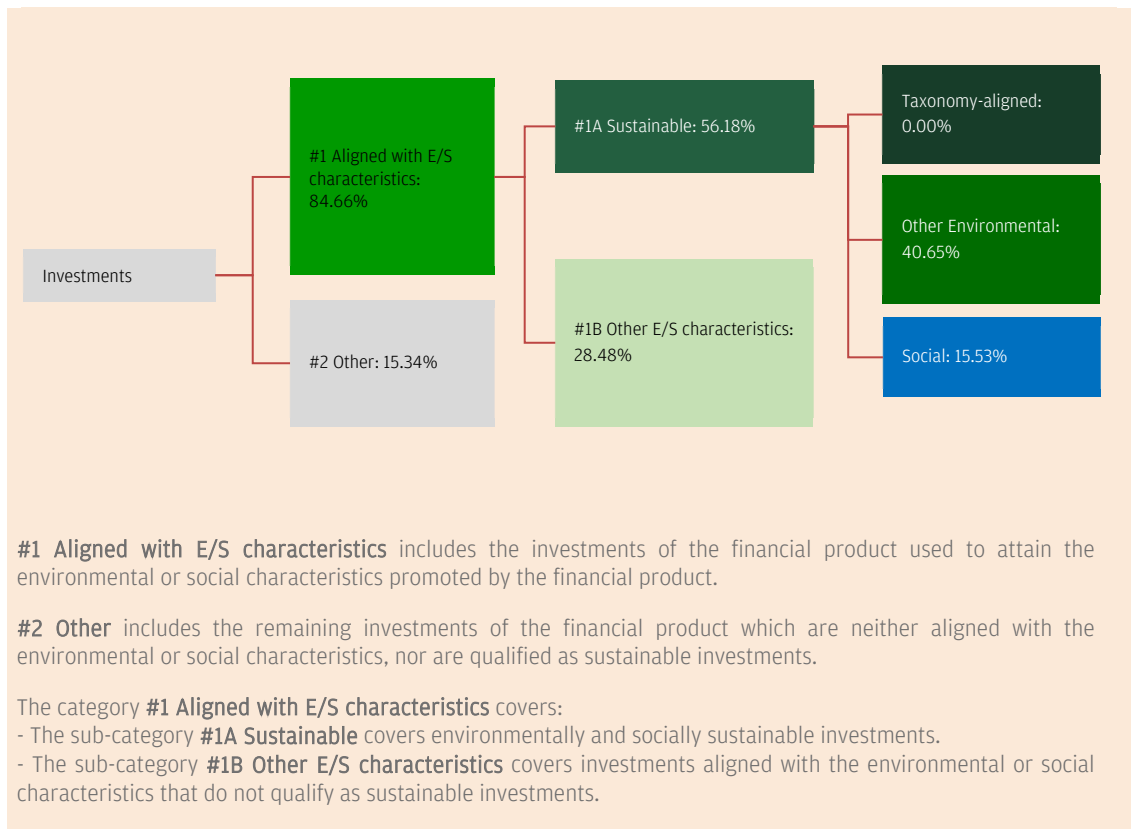

describes the share of investments in specific assets.

● *What was the asset allocation?*

At the end of the reference period, the Sub-Fund allocated 84.66% of its assets to issuers that exhibited positive environmental and/or social characteristics and 56.18% of assets to sustainable investments. The % allocation of good EE&D rated assets at the end of the reference period is set out in the response to the question “How did the sustainability indicators perform?” The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Sub-Fund as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

● *In which economic sectors were the investments made?*

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Sector	Sub-sector	% Assets
ABS	ABS - Auto	0.70
Finance	ABCP	4.87

Finance	Banking	84.66
Finance	Financial Other	1.04
Finance	Finance Companies	0.69
Finance	Insurance	0.97
Industrial	Consumer Cyclical	0.74
Non-US Govt Related Credit	Foreign Agencies	5.10
Utilities	Electric	1.24

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

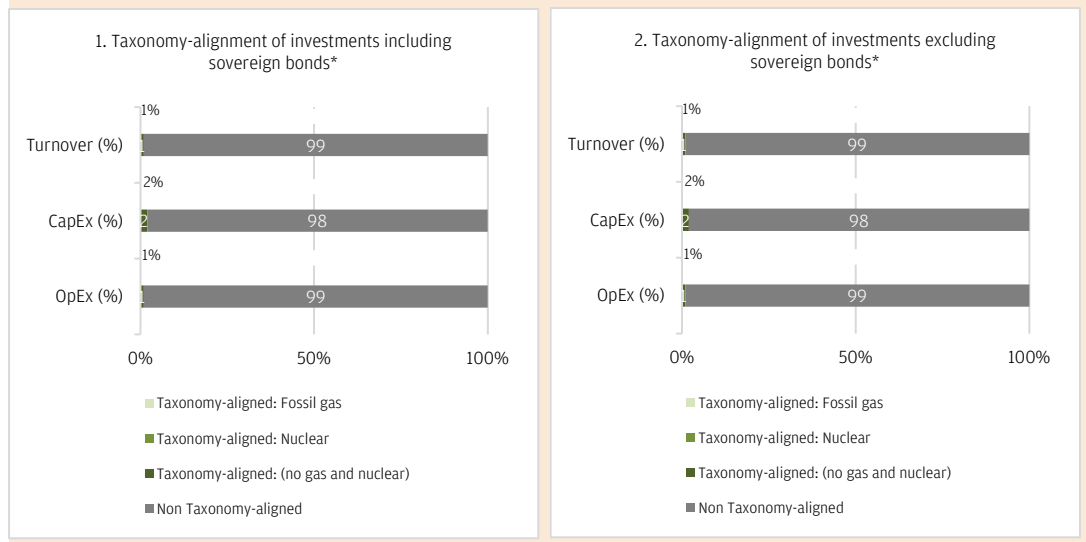

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- **capital expenditure** (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- **operational expenditure** (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 99% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.50%, at the end of the reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 40.65% of assets at the end of the reference period.

● **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 15.53% of assets at the end of the reference period.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 15.34% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards/principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and/or social characteristics and 51% of EE&D rated assets in good EE&D issuers.
- The values and norms based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub-Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **JPMorgan Liquidity Funds - SGD Liquidity LVNAV Fund**

Legal entity identifier: **549300C3SDVYMN32PE34**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.28% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: %	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics. This commitment was met throughout the reference period (9 June 2023 - 30 November 2023). At the end of the reference period, the Sub-Fund held 98.53% of investments with positive environmental and/or social characteristics.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and/or social characteristics and those that meet the thresholds for being considered as sustainable investments.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour

relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded issuers that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant issuers for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and/or social characteristics policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time. This Sub-Fund was uplifted to Article 8 on 9 June 2023 so this periodic report does not represent a full calendar year.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the investment universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 98.53% of investments with positive environmental and/or social characteristics.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not Applicable. The Sub-Fund did not commit to investing any proportion of assets specifically in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable. The Sub-Fund did not commit to investing any proportion of assets specifically in sustainable investments.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not Applicable. The Sub-Fund did not commit to investing any proportion of assets specifically in sustainable investments.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not Applicable. The Sub-Fund did not commit to investing any proportion of assets specifically in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the “Do No Significant Harm” screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee issuers based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
09/06/2023 - 30/11/2023

Largest Investments	Sector	% Assets	Country
REPUBLIC OF SINGAPORE	EM Local	47.17	SINGAPORE
NATIONAL AUSTRALIA BANK LI	Finance	10.43	AUSTRALIA

What was the proportion of sustainability-related investments?

Asset allocation

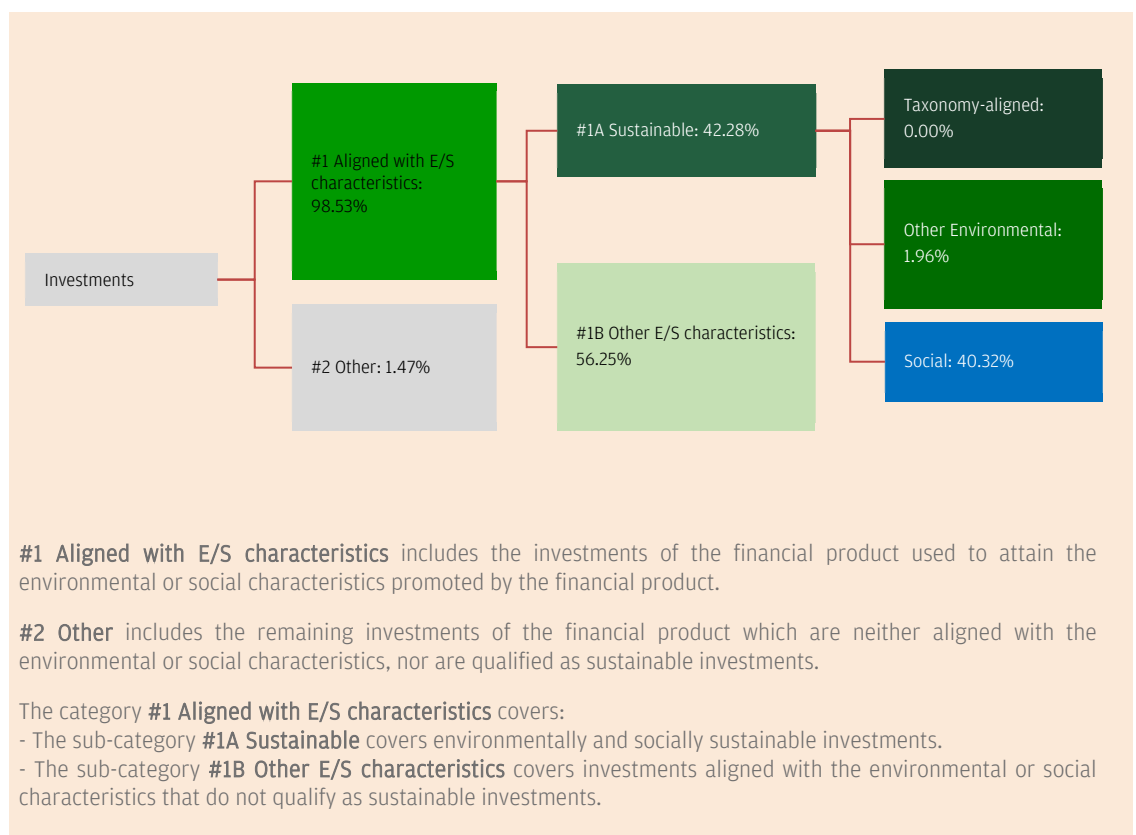

describes the share of investments in specific assets.

● *What was the asset allocation?*

At the end of the reference period, the Sub-Fund allocated 98.53% of its assets to issuers that exhibited positive environmental and/or social characteristics. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Sub-Fund as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

● *In which economic sectors were the investments made?*

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?²

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.

- **capital expenditure** (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.

- **operational expenditure** (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 45% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.00%, at the end of the reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 1.96% of assets at the end of the reference period.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 40.32% of assets at the end of the reference period.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 1.47% of assets in “other” investments were comprised of issuers that did not meet the criteria described in response to above question entitled, “How did the sustainability indicators perform?” to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) were not included in the % of assets included in the asset allocation diagram above, including under “other”. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including “other” investments were subject to the following ESG Minimum Safeguards/principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in securities with positive environmental and/or social characteristics.
- Values and norms-based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **JPMorgan Liquidity Funds - USD Liquidity LVNAV Fund**

Legal entity identifier: **5493000WEWVINPJ47802**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53.36% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: %	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (9 June 2023 - 30 November 2023). At the end of the reference period, the Sub-Fund held 95.44% of investments with positive environmental and/or social characteristics and 53.36% of sustainable investments.

In addition, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process which considers an issuer’s gender breakdown, diversity programmes, ethnicity score and equal pay score. The inputs related directly to EE&D. It was required to invest 51% of its assets in such securities. At the end of the reference period, the Sub-Fund held 82.06% of assets scoring above the pre-defined EE&D threshold.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. Through its inclusion criteria, the Sub-Fund promoted environmental characteristics such as

effective management of toxic emissions and waste as well as good environmental record. It also promoted social characteristics which may have included effective sustainability disclosures, positive scores on labour relations and management of safety issues. In addition to this, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process as mentioned above.

Through its exclusion criteria, the Sub-Fund promoted certain norms and values such as support for the protection of internationally proclaimed human rights and reducing toxic emissions, by fully excluding issuers that are involved in particular activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and/or social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and/or social characteristics, sustainable investments policy and EE&D thresholds throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time. This Sub-Fund was uplifted to Article 8 on 9 June 2023 so this periodic report does not represent a full calendar year.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the investment universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 95.44% of investments with positive environmental and/or social characteristics and 53.36% of sustainable investments.

To be included in the 51% of good EE&D assets, an issuer must have an EE&D rating applied by the Investment Manager based on the relevant inputs and score in the top 80% relative to the universe of such rated assets. At the end of the reference period, the Sub-Fund held 82.06% of good EE&D assets.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the issuer is considered a sustainable investment; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the Sub-Fund's investment universe based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the investment universe on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 53.36% of its assets were sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 – 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement seeking to influence best practice and it uses certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment.

The data needed to take the indicators into account, where available, may have been obtained from investee issuers themselves and/or supplied by third-party service providers (including proxy data). Data inputs that were self-reported by issuers or supplied by third-party providers may have been based on data sets and assumptions that were insufficient, of poor quality or contain biased information. The Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions.

These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations.

The Investment Manager also applied a purpose built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applies the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators currently used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Sub-Fund's investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

anti-corruption and anti-bribery matters.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact, controversial weapons and country level social violations from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee companies based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
09/06/2023 - 30/11/2023

Largest Investments	Sector	% Assets	Country
MIZUHO FINANCIAL GROUP, IN	Finance	4.80	JAPAN

What was the proportion of sustainability-related investments?

Asset allocation

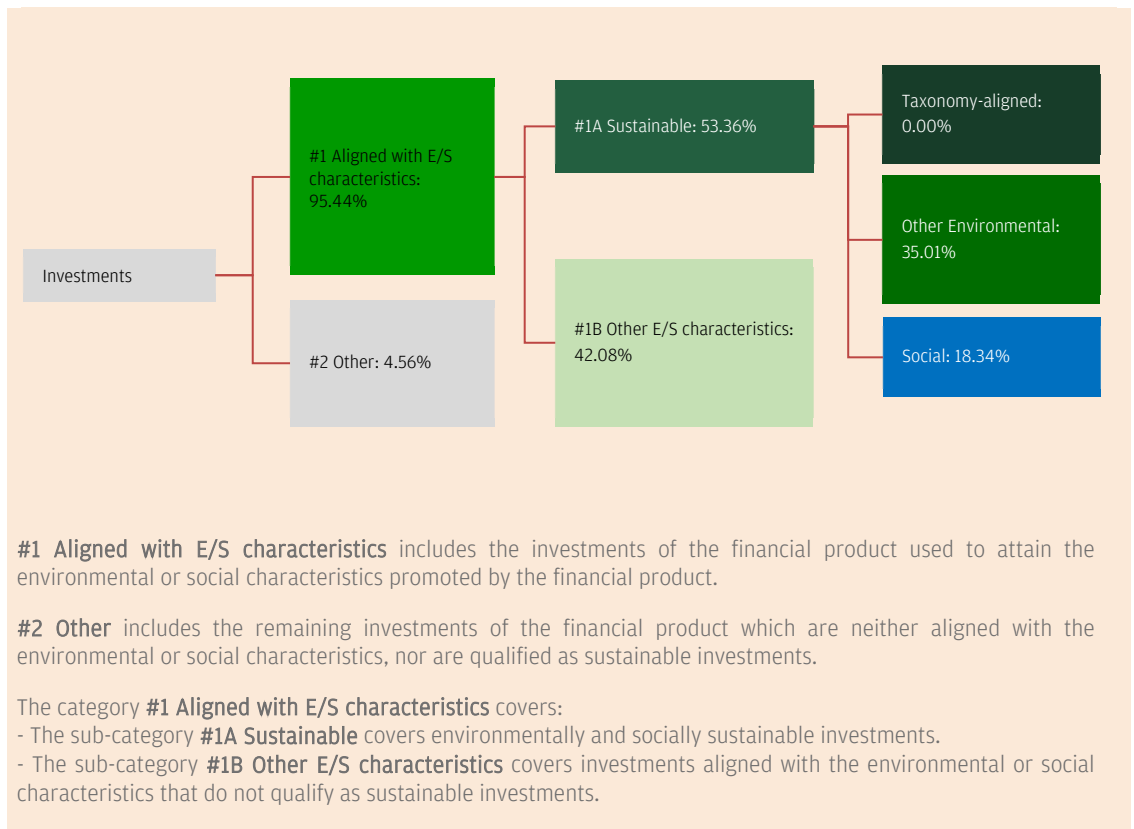

describes the share of investments in specific assets.

● *What was the asset allocation?*

At the end of the reference period, the Sub-Fund allocated 95.44% of its assets to issuers that exhibited positive environmental and/or social characteristics and 53.36% of assets to sustainable investments. The % allocation of good EE&D rated assets at the end of the reference period is set out in the response to the question “How did the sustainability indicators perform?” The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Sub-Fund as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

● *In which economic sectors were the investments made?*

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Sector	Sub-sector	% Assets
Finance	ABCP	1.52
Finance	Banking	66.42

Finance	Brokerage	0.28
Finance	Financial Other	0.35
Finance	Finance Companies	0.25
Industrial	Consumer Cyclical	0.30
Non-US Govt Related Credit	Foreign Local Govt	2.87
Non-US Govt Related Credit	Foreign Agencies	7.53
Non-US Govt Related Credit	Sovereign	4.70
Non-US Govt Related Credit	Supranational	0.47
US Treasury	US Treasury Bonds/Bills	0.99

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?*

Yes

In fossil gas

In nuclear energy

No

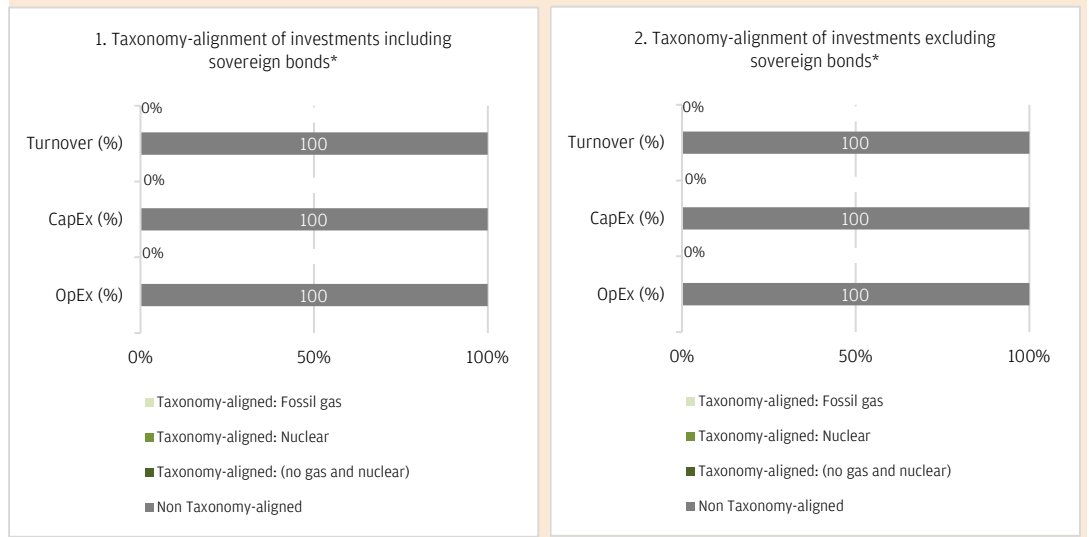

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.

- **capital expenditure** (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.

- **operational expenditure** (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 99% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.06%, at the end of the reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35.01% of assets at the end of the reference period.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 18.34% of assets at the end of the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 4.56% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards/principle:

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and/or social characteristics and 51% of EE&D rated assets in good EE&D issuers.
- The values and norms based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **JPMorgan Liquidity Funds - USD Standard Money Market VNAV Fund**

Legal entity identifier: **549300E1J38ZQ8WN9Z20**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.48% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: %	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (31 August 2023 - 30 November 2023). At the end of the reference period, the Sub-Fund held 86.85% of investments with positive environmental and/or social characteristics and 61.48% of sustainable investments.

In addition, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process which considers an issuer’s gender breakdown, diversity programmes, ethnicity score and equal pay score. The inputs related directly to EE&D. It was required to invest 51% of its assets in such securities. At the end of the reference period, the Sub-Fund held 79.20% of assets scoring above the pre-defined EE&D threshold.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. Through its inclusion criteria, the Sub-Fund promoted environmental characteristics such as

effective management of toxic emissions and waste as well as good environmental record. It also promoted social characteristics which may have included effective sustainability disclosures, positive scores on labour relations and management of safety issues. In addition to this, the Sub-Fund incorporated a bespoke set of Employee Engagement and Diversity (EE&D) data inputs into the investment process as mentioned above.

Through its exclusion criteria, the Sub-Fund promoted certain norms and values such as support for the protection of internationally proclaimed human rights and reducing toxic emissions, by fully excluding issuers that are involved in particular activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and/or social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and/or social characteristics, sustainable investments policy and EE&D thresholds throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time. This Sub-Fund was uplifted to Article 8 on 31 August 2023 so this periodic report does not represent a full calendar year.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the investment universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 86.85% of investments with positive environmental and/or social characteristics and 61.48% of sustainable investments.

To be included in the 51% of good EE&D assets, an issuer must have an EE&D rating applied by the Investment Manager based on the relevant inputs and score in the top 80% relative to the universe of such rated assets. At the end of the reference period, the Sub-Fund held 79.20% of good EE&D assets.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the issuer is considered a sustainable investment; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the Sub-Fund's investment universe based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the investment universe on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 61.48% of its assets were sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 – 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement seeking to influence best practice and it uses certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment.

The data needed to take the indicators into account, where available, may have been obtained from investee issuers themselves and/or supplied by third-party service providers (including proxy data). Data inputs that were self-reported by issuers or supplied by third-party providers may have been based on data sets and assumptions that were insufficient, of poor quality or contain biased information. The Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions.

These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations.

The Investment Manager also applied a purpose built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applies the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators currently used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Sub-Fund's investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

anti-corruption and anti-bribery matters.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact, controversial weapons and country level social violations from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the “Do No Significant Harm” screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee companies based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

31/08/2023 - 30/11/2023

Largest Investments	Sector	% Assets	Country
MIZUHO FINANCIAL GROUP, IN	Finance	2.25	JAPAN
THE BANK OF NOVA SCOTIA	Finance	2.23	CANADA

SKANDINAVISKA ENSKILDA BAN	Finance	1.53	SWEDEN
MITSUBISHI UFJ FINANCIAL G	Finance	1.50	JAPAN

What was the proportion of sustainability-related investments?

Asset allocation

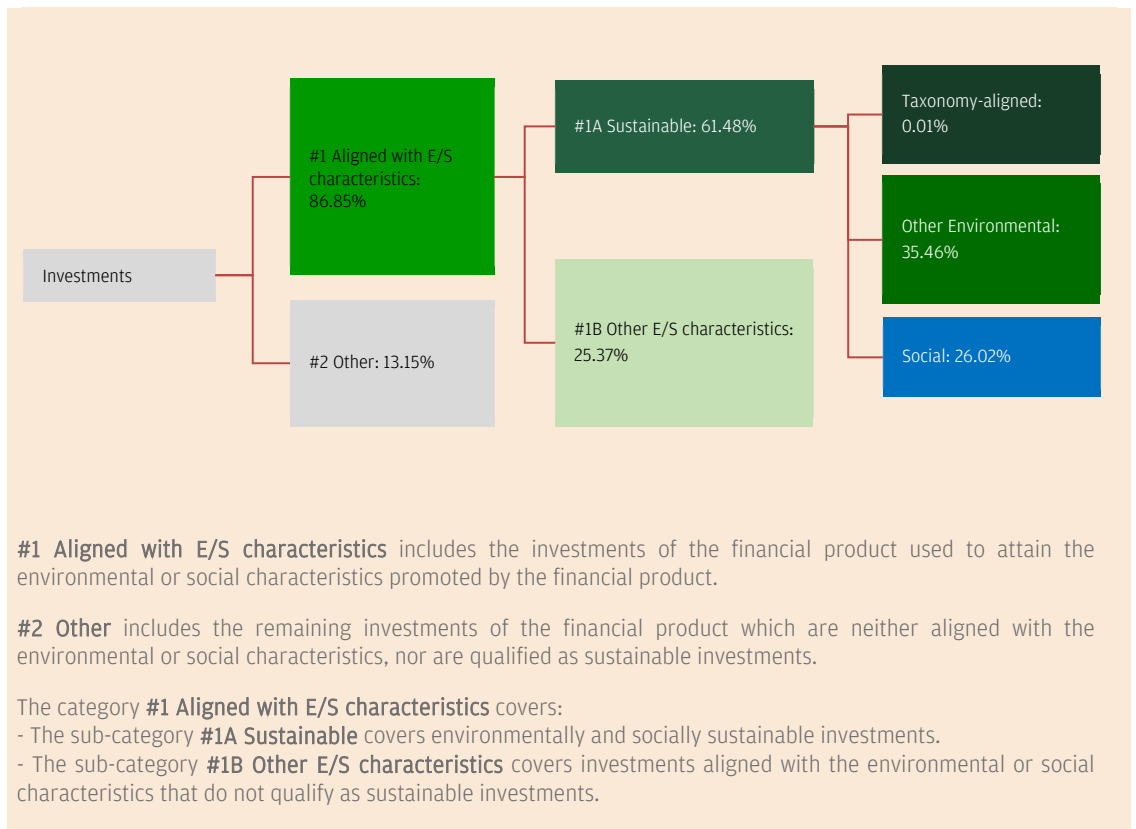

describes the share of investments in specific assets.

● *What was the asset allocation?*

At the end of the reference period, the Sub-Fund allocated 86.85% of its assets to issuers that exhibited positive environmental and/or social characteristics and 61.48% of assets to sustainable investments. The % allocation of good EE&D rated assets at the end of the reference period is set out in the response to the question “How did the sustainability indicators perform?” The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Sub-Fund as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

● *In which economic sectors were the investments made?*

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary liquid assets (for managing cash subscriptions and redemptions as well as current and exceptional payments) are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Sector	Sub-sector	% Assets
Finance	ABCP	1.09
Finance	Banking	51.70

Finance	Brokerage	0.22
Finance	Financial Other	1.37
Finance	Finance Companies	1.15
Finance	Insurance	4.81
Finance	REITs	2.54
Industrial	Basic Industry	2.86
Industrial	Capital Goods	1.95
Industrial	Communications	3.00
Industrial	Consumer Cyclical	9.85
Industrial	Energy	1.26
Industrial	Consumer Noncyclical	6.37
Industrial	Technology	2.78
Industrial	Transportation	0.86
Non-US Govt Related Credit	Foreign Local Govt	0.04
Non-US Govt Related Credit	Foreign Agencies	0.36
Utilities	Electric	7.45
Utilities	Natural Gas	0.35

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

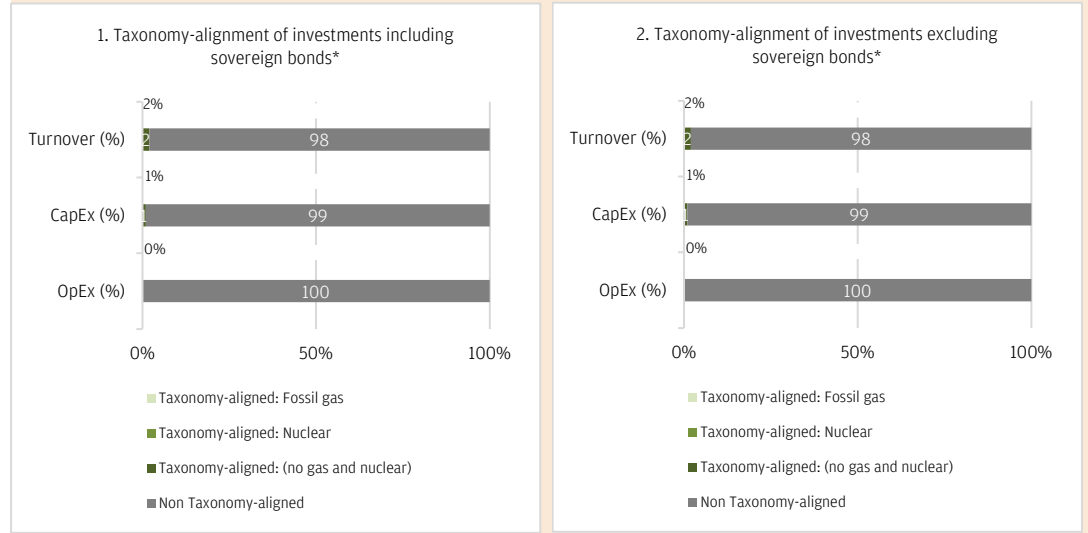

- **turnover** reflects the "greenness" of investee company today.

- **capital expenditure** (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.

- **operational expenditure** (Opex)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

reflects the green operational activities of investee companies.

This graph represents 100% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.01% and the calculated share of Enabling activities represents 0.44%, at the end of the reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35.46% of assets at the end of the reference period.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 26.02% of assets at the end of the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 13.15% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards/principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and/or social characteristics and 51% of EE&D rated assets in good EE&D issuers.
- The values and norms based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Sub-Fund on www.jpmorganassetmanagement.lu for further information by searching for your particular Sub-Fund and accessing the ESG Information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub-Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
