Vanguard Japan Government Bond Index Fund

Sub-managed by Vanguard Investments Australia Ltd.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg Japan Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of Japanese yen-denominated treasury and Japan government-related securities with maturities greater than 1 year.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- Inflation and policymakers' efforts to rein it in stood centre stage for the financial markets during much of the six months ended 30 June 2023.
- Early in the period, labour markets, consumer spending, economic growth and corporate profits held up well overall and inflation readings in many developed markets continued to decline from recent multidecade highs. Central banks including the US Federal Reserve, the European Central Bank and the Bank of England continued raising interest rates – but through less aggressive hikes than in some policy meetings in 2022.
- Later, volatility picked up amid slow progress on the inflation front, banking sector turmoil in the US and Europe and concerns that the US government might default on its debt.
- By the close of the period, resilient economic data made the odds of a global recession seem less likely in the near term, although the chance of further central bank rate cuts persisted.
- Although central bank action in developed markets generally pushed short-term bond yields higher, longer-dated bond yields moved less. For example, the bellwether 10-year US Treasury yield declined slightly, slipping from 3.87% to 3.84% for the six months.
- The Bank of Japan remained an exception, sticking to its ultra-loose monetary policy even as inflation reached decades-high levels and economic growth picked up steam. The bank held short-term interest rates at –0.1% and kept its yield curve control policy for 10-year bonds at 0.5 percentage point above or below a target rate of zero.
- In this environment, the fund's benchmark index returned 3.79% for the six months.
- The longest-maturity issues saw the steepest increases. Bonds with maturities of 30 years or more on average increased by more than 10%. By sector, central government bonds, which make up more than 90% of the portfolio, outperformed agency and local government bonds.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at http://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Vanguard SRI Euro Investment Grade Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg EUR Non-Government Float Adjusted Bond Index, a market-weighted index of euro-denominated investment-grade fixed income securities excluding euro zone treasury and euro zone government-related securities, with maturities greater than 1 year.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- Inflation and policymakers' efforts to rein it in stood centre stage for the financial markets during much of the six months ended 30 June 2023.
- Early in the period, labour markets, consumer spending, economic growth and corporate profits held up well overall and inflation readings in many developed markets continued to decline from recent multidecade highs. Central banks including the US Federal Reserve, the European Central Bank and the Bank of England continued raising interest rates – but through less aggressive hikes than in some policy meetings in 2022.
- Later, volatility picked up amid slow progress on the inflation front, banking sector turmoil in the US and Europe and concerns that the US government might default on its debt.
- By the close of the period, resilient economic data made the odds of a global recession seem less likely in the near term, although the chance of further central bank rate cuts persisted.
- Although central bank action in developed markets generally pushed short-term bond yields higher, longer-dated bond yields moved less. For example, the bellwether 10-year US Treasury yield declined slightly, slipping from 3.87% to 3.84% for the six months.
- In this environment, the fund's benchmark index returned 1.92% for the six months.
- Corporate bonds, which accounted for more than half the index, held up a little better than the index as a whole. Within corporates, each sector – utilities, industrials and financial institutions – outperformed the benchmark as a whole. Both securitised and noncorporate debt did worse than the index.
- Among the larger constituents, France and supranationals posted positive returns but still underperformed the benchmark as a whole; Germany and the United States each outperformed the benchmark as a whole.
- By credit quality, bonds on the lowest rung of the investment-grade ladder held up the best. And by maturity, returns were a mixed bag.

Benchmark returns in the commentary above are in euros.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at http://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Vanguard U.K. Government Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg U.K. Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of pound sterling-denominated UK treasury and government-related securities with maturities greater than 1 year.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- Inflation and policymakers' efforts to rein it in stood centre stage for the financial markets during much of the six months ended 30 June 2023.
- Early in the period, labour markets, consumer spending, economic growth and corporate profits held up well overall and inflation readings in many developed markets continued to decline from recent multidecade highs. Central banks including the US Federal Reserve, the European Central Bank and the Bank of England continued raising interest rates – but through less aggressive hikes than in some policy meetings in 2022.
- Later, volatility picked up amid slow progress on the inflation front, banking sector turmoil in the US and Europe and concerns that the US government might default on its debt.
- By the close of the period, resilient economic data made the odds of a global recession seem less likely in the near term, although the chance of further central bank rate cuts persisted.
- Although central bank action in developed markets generally pushed short-term bond yields higher, longer-dated bond yields moved less. For example, the bellwether 10-year US Treasury yield declined slightly, slipping from 3.87% to 3.84% for the six months.
- In this environment, the fund's benchmark index returned –4.10%.
- Longer-duration bonds saw steeper declines than those of shorter duration, and lower credit quality did better than higher credit quality during the six months.

Benchmark returns in the commentary above are in British pounds.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at http://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Vanguard U.K. Investment Grade Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg GBP Non-Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of pound sterling-denominated, investment-grade fixed income securities, excluding government and government-related securities, with maturities greater than 1 year.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- Inflation and policymakers' efforts to rein it in stood centre stage for the financial markets during much of the six months ended 30 June 2023.
- Early in the period, labour markets, consumer spending, economic growth and corporate profits held up well overall and inflation readings in many developed markets continued to decline from recent multidecade highs. Central banks including the US Federal Reserve, the European Central Bank and the Bank of England continued raising interest rates – but through less aggressive hikes than in some policy meetings in 2022.
- Later, volatility picked up amid slow progress on the inflation front, banking sector turmoil in the US and Europe and concerns that the US government might default on its debt.
- By the close of the period, resilient economic data made the odds of a global recession seem less likely in the near term, although the chance of further central bank rate cuts persisted.
- Although central bank action in developed markets generally pushed short-term bond yields higher, longer-dated bond yields moved less. For example, the bellwether 10-year US Treasury yield declined slightly, slipping from 3.87% to 3.84% for the six months.
- In this environment, the fund's benchmark index returned –1.08% for the six months ended 30 June 2023.
- Within the benchmark index, lower-quality bonds fared better than bonds of higher credit quality. By maturity, declines were lowest in bonds with the shortest maturities and highest for bonds with the longest maturities. By sector, securitised bonds had only marginal declines, while both corporate and noncorporate bonds saw declines steeper than –1%.

Benchmark returns in the commentary above are in British pounds.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at http://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Vanguard U.K. Short-Term Investment Grade Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg GBP Non-Government 1–5 Year 200MM Float Adjusted Bond Index, a market-weighted index of pound sterling-denominated, investment-grade bonds, excluding government bonds, with maturities between 1 and 5 years.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- Inflation and policymakers' efforts to rein it in stood centre stage for the financial markets during much of the six months ended 30 June 2023.
- Early in the period, labour markets, consumer spending, economic growth and corporate profits held up well overall and inflation readings in many developed markets continued to decline from recent multidecade highs. Central banks including the US Federal Reserve, the European Central Bank and the Bank of England continued raising interest rates – but through less aggressive hikes than in some policy meetings in 2022.
- Later, volatility picked up amid slow progress on the inflation front, banking sector turmoil in the US and Europe and concerns that the US government might default on its debt.
- By the close of the period, resilient economic data made the odds of a global recession seem less likely in the near term, although the chance of further central bank rate cuts persisted.
- Although central bank action in developed markets generally pushed short-term bond yields higher, longer-dated bond yields moved less. For example, the bellwether 10-year US Treasury yield declined slightly, slipping from 3.87% to 3.84% for the six months.
- In this environment, the fund's benchmark index returned –0.65% for the six months ended 30 June 2023.
- Shorter-duration bonds held up better than longer-duration bonds, which helped the fund relative to those investing in longer bonds. Within the benchmark index, lower credit quality bonds fared better than those with higher credit ratings. By sector, securitised bonds held up better than corporate bonds, which in turn did better than noncorporate bonds.

Benchmark returns in the commentary above are in British pounds.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at http://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Vanguard U.S. Government Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg U.S. Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of US dollar-denominated US Treasury and US government-related securities with maturities greater than 1 year.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- Inflation and policymakers' efforts to rein it in stood centre stage for the financial markets during much of the six months ended 30 June 2023.
- Early in the period, labour markets, consumer spending, economic growth and corporate profits held up well overall, and inflation readings in many developed markets continued to decline from recent multidecade highs. Central banks including the US Federal Reserve, the European Central Bank and the Bank of England continued raising interest rates – but through less aggressive hikes than in some policy meetings in 2022.
- Later, volatility picked up amid slow progress on the inflation front, banking sector turmoil in the US and Europe and concerns that the US government might default on its debt.
- By the close of the period, resilient economic data made the odds of a global recession seem less likely in the near term, although the chance of central bank rate cuts persisted.
- Although central bank action in developed markets generally pushed short-term bond yields higher, longer-dated bond yields moved less. For example, the bellwether 10-year US Treasury yield declined slightly, slipping from 3.87% to 3.84%.
- Bonds worldwide, as measured by the Bloomberg Global Aggregate Bond Index, returned 1.43% unhedged in US dollars for the six months.
- In this environment, the fund's benchmark index returned 1.59% for the six months.
- Longer maturities generally fared better than shorter maturities. Agency bonds, which make up only a small portion of the index, had slightly higher returns than Treasuries.

Benchmark returns in the commentary above are in US dollars.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at http://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Vanguard U.S. Investment Grade Credit Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg Global Aggregate USD Credit Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of US dollar-denominated, investment-grade fixed income securities, excluding US Treasury, US government-related and securitised securities, with maturities greater than 1 year.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- Inflation and policymakers' efforts to rein it in stood centre stage for the financial markets during much of the six months ended 30 June 2023.
- Early in the period, labour markets, consumer spending, economic growth and corporate profits held up well overall, and inflation readings in many developed markets continued to decline from recent multidecade highs. Central banks including the US Federal Reserve, the European Central Bank and the Bank of England continued raising interest rates – but through less aggressive hikes than in some policy meetings in 2022.
- Later, volatility picked up amid slow progress on the inflation front, banking sector turmoil in the US and Europe and concerns that the US government might default on its debt.
- By the close of the period, resilient economic data made the odds of a global recession seem less likely in the near term, although the chance of central bank rate cuts persisted.
- Although central bank action in developed markets generally pushed short-term bond yields higher, longer-dated bond yields moved less. For example, the bellwether 10-year US Treasury yield declined slightly, slipping from 3.87% to 3.84%.
- Bonds worldwide, as measured by the Bloomberg Global Aggregate Bond Index, returned 1.43% unhedged in US dollars for the six months.
- In this environment, the fund's benchmark index returned 2.99% for the six months.
- Longer maturities generally fared better than shorter maturities. Bonds at the lower end of the investment-grade credit spectrum did slightly better than those with higher credit ratings. By broad sectors, corporate bonds and noncorporate bonds were roughly on par in performance.

Benchmark returns in the commentary above are in US dollars.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at http://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

1 Since-inception returns: Institutional Plus EUR Acc, 19 December 2013; Institutional Plus EUR Hedged Acc, 24 September 2015; GBP Hedged Acc, 31 January 2014; Institutional Plus GBP Heged Acc and Institutional Plus GBP Hedged Dist, 8 September 2016; Institutional Plus USD Acc, 6 December 2013; Institutional Plus USD Dist, 24 September 2015.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Vanguard U.S. Treasury Inflation-Protected Securities Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg U.S. Government Inflation-Linked 1–10 Year Index, a market-weighted index designed to measure the performance of US Treasury Inflation-Protected Securities ("TIPS") with maturities between 1 and 10 years.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- Inflation and policymakers' efforts to rein it in stood centre stage for the financial markets during much of the six months ended 30 June 2023.
- Early in the period, labour markets, consumer spending, economic growth and corporate profits held up well overall, and inflation readings in many developed markets continued to decline from recent multidecade highs. Central banks including the US Federal Reserve, the European Central Bank and the Bank of England continued raising interest rates – but through less aggressive hikes than in some policy meetings in 2022.
- Later, volatility picked up amid slow progress on the inflation front, banking sector turmoil in the US and Europe and concerns that the US government might default on its debt.
- By the close of the period, resilient economic data made the odds of a global recession seem less likely in the near term, although the chance of central bank rate cuts persisted.
- Although central bank action in developed markets generally pushed short-term bond yields higher, longer-dated bond yields moved less. For example, the bellwether 10-year US Treasury yield declined slightly, slipping from 3.87% to 3.84%.
- Bonds worldwide, as measured by the Bloomberg Global Aggregate Bond Index, returned 1.43% unhedged in US dollars for the six months.
- In this environment, the fund's benchmark index returned 1.51% for the six months.
- Negative returns in recent months were more than offset by higher returns earlier in the half year. Broadly, lower-credit-quality and shorter-duration bonds had better total returns for the period than their higher-quality and longer-duration equivalents.

Benchmark returns in the commentary above are in US dollars.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at http://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

2. **Basis of Presentation.** The financial statements are prepared in accordance with accounting standards generally accepted in Ireland, including Financial Reporting Standard ("FRS") 104, the Financial Reporting Standard applicable in the UK and the Republic of Ireland, the UCITS Regulations, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "CBI UCITS Regulations") and the Listing Rules of the Euronext Dublin Exchange. Accounting standards generally accepted in Ireland in preparing financial statements which present a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council (the "FRC").

To more appropriately reflect the Company's business as an investment fund, the Company has determined that the headings and sub-headings of the financial statements require adaptation from the requirements in the Companies Act 2014 and certain wordings and format of the financial statements have been adapted from those contained in FRS 102 – Section 3.

A Cash Flow Statement has not been presented due to the exemption contained in FRS 102, Section 7.1A.

The information required by FRS 102 to be included in a statement of comprehensive income is contained in the Statement of Operations of each Fund and the Company.

The financial statements have been prepared on a going concern basis, subject to the historical cost convention, as modified by the revaluation of financial assets and liabilities at fair value through profit or loss ("FVTPL").

3. **Significant Accounting Policies**.

The unaudited financial statements should be read in conjunction with the relevant Fund's annual audited financial statements for the year ended 31 December 2022. There have been no changes to the significant accounting policies adopted by the Funds since the last audited period, and the accounting policies have been consistently applied to all periods presented, unless otherwise stated.

4. **Risk Management Policies**.

The Funds' activities, investments in financial instruments and the markets it invests in create a direct exposure to a variety of risks such as market risk (including price risk, interest rate risk and currency risk), liquidity risk and credit risk. The Funds may also invest in financial derivative instruments which may expose the Funds to a higher degree of risks, particularly, financial derivative instruments contracts can be highly volatile, and a relatively small market movement may have a potentially larger impact.

Significant market disruptions, such as those caused by pandemics, natural or environmental disasters, war (e.g., Russia's invasion of Ukraine), acts of terrorism or other events, can adversely affect local and global markets and normal market operations. Any such disruptions could have an adverse impact on the value of the Funds' investments and Funds' performance.

The Manager seeks to minimise potential adverse effects of risk on the Funds' performance by employing professional, experienced portfolio advisors; by daily monitoring of the Funds' positions and market events; by diversifying the investment portfolio within the constraints of the investment objectives; and by periodically using derivatives to economically hedge certain risk exposures.

Each Fund's financial risk management objectives and policies continue to be substantially consistent with the previous Annual Audited Financial Statements for the financial year ended 31 December 2022.

5. **Taxation**. Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares, or appropriation or cancellation of shares of a shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer. Any tax arising on a chargeable event is a liability of the shareholders, albeit it is paid by the Company (although if the Company fails to deduct the correct amount of tax it becomes ultimately a liability of the Company).

No Irish tax will arise on the Company in respect of chargeable events in respect of:

(a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or the Company has been authorised by the Irish Income to make gross payments in the absence of appropriate declarations; and

(b) certain exempted Irish tax resident shareholders who have provided the necessary signed statutory declarations.

Dividends, interest and capital gains received on investments may be subject to withholding or other taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable. Foreign withholding taxes on dividends and interest are recognised when such taxes are not recoverable and are included in Taxation. Funds may also be subject to tax on the realised and unrealised portion of their capital gains.

The Funds have filed tax reclaims for previously withheld taxes on dividends earned in certain European Union countries. These filings are subject to various administrative and judicial proceedings within these countries. Such tax reclaims recognised during the period, if any, are included in Taxation. No other amounts for these tax reclaims are reflected in the financial statements due to the uncertainty as to the ultimate resolution of proceedings, the likelihood of receipt of these reclaims and the potential timing of payment.

Below is an analysis of the tax charge for the period ended 30 June 2023 and 30 June 2022:

6. Distribution Policy. The Directors intend to distribute all, or substantially all, of the net income (interest and dividends, less expenses) to distributing share class holders. Should expenses exceed income, no distribution is made. Dividend distributions are payable to shareholders of record on the date on which the dividend is declared. The Directors do not intend to declare dividends on accumulating shares.

The following table presents the payment frequency with respect to distributing share classes. If a dividend has not been declared, income and gains of such Fund will be reflected in the net asset value per share.

1 The Fund launched during the year. See Note 1.

7. Net Asset Value Per Share. The net asset value per share of each share class is calculated by dividing the total net assets of each share class by the number of shares in issue.

8. Share Capital. The Company has variable share capital consisting of 500,000,030,000 authorised shares divided into 30,000 subscriber shares and 500,000,000,000 redeemable participating shares (no par value).

The Directors may issue shares of any class and create new classes of shares on such terms as the Directors may from time to time determine in relation to any Fund and in accordance with the requirements of the Central Bank. Shares may be divided into different classes to accommodate different subscription, redemption or fee arrangements, dividend provisions or charges.

Subscriber Shares. There are two Subscriber Shares in issue, which are held by nominees for the Investment Manager. Subscriber Shares do not entitle the holders thereof to any dividend and on a winding-up entitle the holder to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The Subscriber Shares do not form part of the Shareholders' funds and are not included in the net asset value of the Company.

Redeemable Participating Shares. Members who are individuals may attend and vote at general meetings in person or by proxy. Members who are corporations may attend and vote at general meetings by appointing a representative or proxy. Subject to any special terms as to voting upon which any shares may be issued or may for the time being be held, at any general meeting on a show of hands every Shareholder who (being an individual) is present in person or (being a corporation) is present by duly authorised representative shall have one vote. On a poll every such holder presents as aforesaid or by proxy shall have one vote for every share held. If the Company shall be wound up, then the payment to the holders of the redeemable participating shares of each class of a sum in the currency in which that class is designated as nearly as possible equal to the Net Assets Attributable to Holders of Redeemable Participating Shares respectively as at the date of commencement. In the event that there are insufficient assets available in the relevant Fund to enable such payment, the assets of the Company not comprised within any of the Funds to the assets remaining in the Funds for the other classes of Shares after payment to the holders of the Shares of the class to which they relate of the amounts to which they are respectively entitled under this paragraph prorata to the total value of such assets remaining within each such Fund.

9. **Credit Facility**. The Funds and certain other funds managed by the Manager or its affiliates participate in an annually renewable US$4.3 billion (2022: US$4.4 billion) committed credit facility. Each participating Fund is individually liable for its borrowings under the credit facility. Borrowings may be utilised for temporary or emergency purposes and are subject to the participating fund's regulatory and contractual borrowing restrictions. Participating Funds are allocated an annual commitment fee of 0.10% of the undrawn facility amount as well as certain administrative fees. Any fees allocated to the Funds are paid by the Manager. Interest and direct borrowing costs associated with draws on the credit facility are charged to the Funds and recorded in the Statement of Operations.

Any borrowings under this facility denominated in euros bear interest at the Euro Interbank Offered Rate plus an applicable margin, while borrowings under this facility in denominations other than euros bear interest at a rate equal to the higher of the one-month London Interbank Offered Rate (or an acceptable alternate rate, if necessary), federal funds effective rate or overnight bank funding rate plus an agreed-upon spread.

The Funds did not have any borrowings outstanding as at 30 June 2023 or at any time during the period that ended (31 December 2022: none).

10. **Efficient Portfolio Management**. Investment techniques and financial derivative instruments (FDIs) may be employed for efficient portfolio management purposes, including hedging against market movements, currency exchange or interest rate risks. Any investment technique or use of FDIs must be one which is reasonably believed by the Investment Manager to be economically appropriate in that it is realised in a cost-effective way. Realised and unrealised gains or losses arising from financial derivative instrument transactions are accounted for through the Statement of Operations as Net Gain/(Loss) on Investment Instruments.

Securities lending is also used for efficient portfolio management. The securities lending agent is Brown Brothers Harriman & Co. All operational costs in support of the lending programme are borne by the lending agent and paid directly out of any lending agent fees. Securities lending income is net of any lending agent fees paid.

Securities on loan continue to be recognised by the Funds as financial assets because they substantially retain the risks and rewards of ownership. Similarly, security collateral received from the borrower is not recognised by the Funds as an asset because they do not have rights to sell or re-pledge the collateral, unless in the event of default. Collateral accepted by the Funds is limited to high quality sovereign debt (US Treasuries, UK Gilts, etc.).

Securities on loan by the Funds and the value of collateral held in respect of the securities were:

11. Collateral. The Funds pledge and receive non-cash collateral against financial derivative instrument transactions and TBAs. Such collateral cannot be sold, re-invested or re-pledged. As a result, pledged collateral remains an asset of the Fund and is included in the Statement of Investments. Equally, securities received as collateral are not considered assets of the Fund and will not appear in the Statement of Investments. Under these collateral agreements, upon a counterparty default (including bankruptcy), the Funds may terminate all derivatives or TBA transactions with that counterparty, determine the net amount owed by either party and sell or retain any collateral held up to the net amount owed to the Funds, with an obligation to return excess collateral to the counterparty.

In certain cases, the Funds may be required to maintain cash collateral in margin accounts or pledge cash with certain counterparties. Cash pledged for is segregated on the Statement of Assets and Liabilities and presented separately as "Cash Collateral". Margin Cash Due to/from Broker, including cash collateral pledged, for futures contracts and other centrally cleared derivatives is segregated on the Statement of Assets and Liabilities. Additionally, the Funds may receive cash collateral, which is segregated from the Funds' cash, and is subject to restrictions. The Funds do not earn any interest from the cash collateral received nor does it have any right for re-investment, therefore any cash collateral received is not recorded as part of the Funds' assets.

In addition, the Funds receive other non-cash collateral in relation to securities lending transactions which is separately disclosed in Note 10.

Counterparties to financial derivative transactions where collateral was required to be exchanged included Bank of America N.A., Barclays Bank plc, BNP Paribas, Goldman Sachs International, HSBC, JPMorgan Chase Bank, Morgan Stanley, Royal Bank of Canada, Standard Chartered Bank, State Street Bank, Toronto Dominion Bank and UBS AG.

As of 30 June 2023 and 31 December 2022, the collateral pledged or received by the Funds for financial derivative instrument transactions and TBAs was:

12. Related and Connected Parties Transactions.

Parties are related if one can control or exercise significant influence over the other in making financial or operational decisions or is a member of a group which provides key management personnel services. The Company's directors and Manager are considered related parties. The Investment Manager or affiliates of the Manager, as well as any sub-investment manager or their delegate, and associated or group company of the Manager, are considered connected parties.

Manager. Vanguard Group (Ireland) Limited is the Funds' Manager and acts as a principal in respect of all transactions of shares in the Funds. For its services, the Manager receives a fixed single fee per share class (the "Management Fees") calculated on a daily basis and paid monthly. Out of the fees received, the Manager pays for any sub-advisers, as well as the costs of administration including audit, depositary, legal, registration and regulatory fees associated with the Funds. As a result, the Manager anticipates that the ongoing charges figure ("OCF") of each share class will closely track the Management Fees. In the event that the costs and expenses of any Fund exceed the OCF, the Manager will be responsible for discharging any excess out of its own assets. The Manager, in its sole discretion, may voluntarily waive all or part of its fee, and any such waiver could be discontinued at any time and without notice.

Any amounts due from or to the Manager at the end of the year are disclosed in the Statement of Assets and Liabilities. Amounts earned by the Manager in respect to fees for the period are disclosed in the Statement of Operations.

The Annual Management Fees for each share class for the period ended 30 June 2023 and 30 June 2022:

15. **Contingent Liabilities**. There were no contingent liabilities as at 30 June 2023 and 31 December 2022.

16. **Segregated Liabilities**. Each Fund is treated as bearing its own liabilities.

17. Fair Value Hierarchy. Financial instruments are measured at fair value using a three-level hierarchy. Instruments are categorised in their entirety based on the lowest level input that is significant to the fair value measurement. Assessing the significance and observability of a particular input requires significant judgement specific to an asset or liability. Inputs are considered to be observable when they are readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Level 1—Quoted prices in active markets for identical securities.

Level 2—Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3—Significant unobservable inputs (including the Fund's own assumptions used to determine the fair value of investments).

The following tables provide an analysis within the fair value hierarchy of financial assets and liabilities, measured at fair value at 30 June 2023 and 31 December 2022:

18. Material Changes to the Prospectus.

On 5 April 2023, the prospectus was updated to change the definition of dealing day to add more clarity around days which may amount to being designated as a "Fund Holiday", to update the share class table to include share class launches, to update Board details to reflect recent Director appointments and resignations, to update reference to the Irish listing agent following the acquisition of Davy by IQEQ, to update existing wording in relation to UCITS KIIDs to include references to PRIIPs KIDs (as appropriate), to update the list of eligible securities and derivatives markets to reflect historic name changes, mergers and acquisitions and closures and to update to the wording in the supplement for Vanguard ESG Global Corporate Bond Index Fund in

respect of a recent index methodology update applied by MSCI where relevant ESG data is not available in order to assess a particular issuer.

On 12 April 2023, the prospectus was updated primarily to reflect additional disclosure requirements in accordance with the Sustainable Finance Disclosure Regulation and the Taxonomy Regulation to confirm that each fund classified as Article 8 does not invest in fossil gas and/or nuclear energy related activities, to amend the Asset Allocation disclosure to confirm that it is expected that at least 90% of fund classified as Article 8 is aligned to environmental and/or social characteristics, to include a Principal Adverse Impact ("PAI") for ESG equity funds to confirm that the "involvement in controversies as defined by UNGC and OECD" PAI is considered in the current investment strategy for these funds and to amend the Legal Entity Identifiers ("LEI") to reflect the LEI of each Article 8 fund.

On 1 August 2023, the prospectus was updated to reflect that subscription requests (including requests to switch to another class in a different Fund) may be made directly to the Administrator only by investors defined as "Professional Clients" and "Eligible Counterparties" under MiFID II and that all other investors may engage with the Administrator through an intermediary, to make certain passage of time updates to the Taxation section, to update the Directors' Fees disclosure to remove references to maximum amounts and to clarify that the Directors' fees are paid by the Manager as opposed to out of the assets of the relevant funds and to update the share class table to include recent share class launches.
