	Market and Credit Risks	· · · ·
General Market risk: The Fund is exposed to various general trends and tendencies in		
the economic and political situation as well as securities markets and investment		

International	Prepared on 26/04/2024
sentiment, which are partially attributable to irrational factors. Such factors could lead to substantial and longer-lasting drops in prices affecting the entire market.	
Currency risk: The Fund may hold assets or have a share class denominated in foreign currencies other than the base currency of the Fund, and is exposed to a currency risk that if these foreign currency positions have not been hedged or if there is any change in the relevant exchange control regulations, the net asset value of the Fund or Class may be affected unfavourably.	
Country and Region risk in Asia: The Fund's investments focus on developing Asian countries (excluding Japan, Hong Kong and Singapore) may increase the concentration risk. The Fund is susceptible to the adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event or development in and risks of this region	
Emerging Markets risk: The Fund invests in emerging markets which are subject to greater liquidity risk, currency risk, general market risk, settlement risk and custodial risk. The Fund is additionally subject to legal, taxation and regulatory risks.	
Liquidity Risks	1
Liquidity risks: Investments in securities in certain developing markets may be subject to higher volatility and lower liquidity compared to more developed markets. Even relatively small orders of illiquid securities can lead to significant price changes. If an asset is illiquid, there is the risk that the asset cannot be sold or can only be sold at a significant discount to the purchase price, or, conversely, its purchase price may increase significantly.	
•Redemptions in the Fund may be suspended under certain circumstances highlighted in paragraphs 9.3 and 12 of the Singapore Prospectus; this may in turn affect the ILP Sub-Fund.	
Product-Specific Risks	
Company-Specific risk: The value of the Fund's assets may drop significantly and for an extended period of time if company-specific factors deteriorate.	
Derivatives risk: (i) The derivatives may be misvalued or may have varying valuations; (ii) the use of derivatives may not completely hedge the risk intended to be hedged; (iii) derivative may become difficult to sell. In such cases, the Fund may not be able to liquidate a position at an appropriate time or price; (iv) there is also creditworthiness risk (i.e. counterparty might default or unable to completely fulfil its obligations); (v) given the leverage effect embedded in derivatives, even a small investment in derivative could have a substantial, even negative, effect on the performance of the Fund.	
China Investment risk: There are numerous and varied risks associated with an investment in the Equity Markets of the PRC, such as the risks of investing in securities under the FII regime, withholding tax imposed by the PRC tax authorities, and the risks of trading in RMB. As the Fund may invest in the Equity Markets of the PRC, it could also be exposed to risks associated with investing in China A-Shares and utilising Stock Connect programmes.	
-The net asset value of the Fund may likely have a high volatility due to the investment policies or portfolio management techniques employed in respect of the Fund.	
FEES AND CHARGES	
WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT? Charges are deducted by both FPIL and the underlying investment managers at each valuation point before calculating the unit price, as set out below.	-Refer to the section on 'Fees and Charges' in the relevant Product Summary.
FPIL charges (payable directly by you) -You will need to pay an ILP Sub-Fund administration charge of 1.2%. -There is currently no charge for switching funds although switching to a fund which differs from your plan currency may involve a cost associated with currency exchange.	-Refer to the 'Charges' section of your Policy Conditions for further

APPENDIX : GLOSSARY OF TERMS

China A-Shares

Shares issued by companies listed on the Shanghai or Shenzhen stock exchange and denominated in RMB.

Collective Investment Scheme

An arrangement that enables a number of investors to 'pool' their assets and have these professionally managed by an independent manager.

Efficient Portfolio Management (EPM)

EPM is a set of standards for prudent management of investment funds. The standards call for economically appropriate transactions that reduce risk, reduce cost or generate additional capital or income. For example, a

Prepared on 26/04/2024

currency overlay strategy using derivative instruments could be used to reduce volatility in asset returns resulting from currency fluctuations or be used to take advantage of these fluctuations to gain extra return.

Emerging Markets

Typically includes markets within countries that have an underdeveloped or developing infrastructure with significant potential for economic growth and increased capital market participation for foreign investors. These countries generally possess some of the following characteristics; recent economic liberalisation, debt ratings below investment grade, recent liberalisation of the political system and non-membership of the Organisation of Economic Cooperation and Development.

Equity

Ownership positions in companies that can be traded in public markets. Often produce current income which may be paid in the form of Dividends. In the event of the company going bankrupt Equity holders' claims are subordinate to the claims of preferred stockholders and bondholders.

Expense Ratio

The Expense ratio provides customers with an indication of the overall costs of investing in a particular fund.

The expense ratio as calculated in accordance with the Investment Management Association of Singapore's guidelines on the disclosure of expense ratios. Different methods of calculation of Expense Ratio can be used, including Total Expense Ratio (TER) and Ongoing Charges Figure (OCF) but these are broadly the same.

FII

Means a qualified foreign institutional investor under the laws and regulations governing the establishment and operation of the qualified foreign institutional investors regime in the PRC and the RMB qualified foreign institutional investor program, as may be promulgated and/or amended from time to time.

Hedge / Hedging

Any transaction with the objective of limiting exposure to risk such as changes in exchange rates or prices.

Ongoing Charges Figure (OCF)

A type of expense ratio. The ongoing charges figure is based on expenses for the previous year and is a ratio of the total ongoing charges to the fund's average net asset value over its last reporting period. This figure may vary from year to year. The charges you pay are used to pay the costs of the underlying ILP Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

For more information about charges, please consult the Prospectus for the underlying Fund of the ILP Sub-Fund invested in, available from www.fpinternational.sg/phs

Details of the calculation methodology can be found in full at https://www.esma.europa.eu/sites/default/files/library/2015/11/10_674.pdf

RMB

Means the Chinese Renminbi, the official currency of the PRC and, unless the context otherwise requires, the term "RMB" refers to offshore Chinese Renminbi ("**CNH**") traded offshore in Hong Kong or markets outside the PRC and not to onshore Chinese Renminbi ("**CNY**").

Stock Connect:

Means the program which aims to achieve mutual stock market access between PRC and Hong Kong.
