| Manager | Franklin Templeton International Services S.à r.l. | Custodian | HSBC Plc |
| Capital Guaranteed | No | Dealing Frequency | Every UK Business Day |
| Name of Guarantor | N/A | Expense Ratio for the underlying fund | 1.41% (as at 03/03/21) |

SUB-FUND SUITABILITY

WHO IS THE SUB-FUND SUITABLE FOR?

The ILP Sub-Fund is only suitable for investors who seek to maximise total investment return consisting of a combination of interest income, capital appreciation and currency gains; and plan to hold their investment for the medium to long term. The principal may be at risk.

Please note the ILP Sub-Fund does not distribute income and where applicable will re-invest any income received from the underlying fund.

It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a fund may not be denominated in the currency of that fund, so unit prices may fall purely on account of exchange rate fluctuations.

Please note that Friends Provident International Limited (FPIL) investment products are intended for medium to long term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

Additional Information

-For details of surrender charges please refer to the 'Fees and Charges' section in the relevant Product Summary.

-Please refer to the 'Fund Information, Objectives and Investment Policies' section of the underlying fund's Luxembourg Prospectus for further information on the suitability of the Sub-Fund.

KEY FEATURES OF THE SUB-FUND

WHAT ARE YOU INVESTING IN?

You are investing in an ILP Sub-Fund that invests in the Franklin Templeton Investment Funds –Templeton Global Bond Fund* ("the Fund" or "underlying fund"), apart from a proportionately small amount which may be held as a cash balance to optimise dealing efficiencies in the underlying fund. We endeavour to maintain a cash balance limit of up to 0.75%.

*This is an open-ended collective investment scheme (referred to as an "undertaking for collective investment in transferable securities" or UCITS) constituted in Luxembourg that aims to provide you with a combination of interest income, capital appreciation and currency gains.

-Please refer to the 'Investment Objective, Focus and Approach of the Funds' section of the underlying fund's Singapore Prospectus for further information on the features of the Fund.

¹ For ILP sub-fund that feeds 100% into an underlying CIS fund, some information provided below could be similar to the underlying CIS fund. In this instance this ILP sub-fund will be at minimum feed 99.25% into the underlying CIS fund.

| Investment Strategy | |
|--|---|
| <p>-The Fund's principal investment objective is to maximise, consistent with prudent investment management, total investment return consisting of a combination of interest income, capital appreciation and currency gains.</p> <p>-The Fund seeks to achieve its objective by investing principally in a portfolio of fixed or floating-rate debt securities (including non-investment grade securities) and debt obligations issued by government or government related issuers worldwide. The Fund may also, in accordance with the investment restrictions, invest in debt securities (including non-investment grade securities) of corporate issuers. The Fund may also purchase debt obligations issued by supranational entities organised or supported by several national governments, such as the International Bank for Reconstruction and Development or the European Investment Bank. The Fund can invest less than 30% of its net assets in Mainland China through the Bond Connect or directly (also referred to as CIBM direct).</p> <p>The Fund employs a proprietary Environmental, Social and Governance (ESG) proprietary rating methodology to assess each country that issues sovereign bonds that are existing or potential investments for the Fund. The Investment Manager's methodology captures not only a country's current ESG score based on a variety of subcategories but more importantly, any expected improvement or deterioration in the country's ESG practices. The Investment Manager believes that this two-pronged test best represents the investment worthiness of a country and also promotes ESG by investing in countries that are expected to improve from an ESG perspective.</p> | <p>-Please refer to the 'Fund Information, Objectives and Investment Policies' section of the underlying fund's Luxembourg Prospectus and the 'Investment Objective, Focus and Approach of the Funds' section of the underlying fund's Singapore Prospectus for further information on the investment strategy of the Fund.</p> |
| Parties Involved | |
| <p>WHO ARE YOU INVESTING WITH?</p> <p>Investment Company of the underlying fund: Franklin Templeton Investment Funds</p> <p>Investment Manager of the underlying fund: Franklin Advisers, Inc.</p> <p>Management Company of the underlying fund: Franklin Templeton International Services S.à r.l.</p> <p>Depository of the underlying fund: J.P. Morgan Bank Luxembourg S.A.</p> <p>Singapore representative of the underlying fund: Templeton Asset Management Ltd.</p> | <p>-Please refer to the 'Management and Administration' section of the underlying fund's Singapore Prospectus for further information on the roles and responsibilities of these entities and what happens if they become insolvent.</p> |
| KEY RISKS | |
| <p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>-The value of an investment is not guaranteed and can go up and down depending on performance. You could get back less than you have paid in. At times, the ILP Sub-Fund may, subject to the Appointed Actuary's agreement and provisions allowed for in the Policy Conditions, need to change the way its price is calculated, to ensure that those moving into and out of the ILP Sub-Fund are treated fairly. This can have a negative effect on the ILP Sub-Fund's price and performance.</p> <p>-Fund managers have the ability, in exceptional circumstances, to suspend trading in their funds for as long as necessary. When this occurs we will need to delay the 'cashing in' or switching of units in the relevant fund. You may not be able to access your money during this period.</p> <p>These risk factors may cause you to lose some or all of your investment:</p> | <p><u>Additional Information</u></p> <p>-Please refer to the 'Valuations and Pricing' section of your Policy Conditions for further information.</p> <p>-Please refer to the 'Risk Factors' section of the underlying fund's Singapore Prospectus, also the 'Risk Considerations' and the 'Fund Information, Objectives and Investment Policies' sections of the underlying fund's Luxembourg Prospectus for further information on the risks of the Fund.</p> <p>-Please refer to the 'Risks'</p> |

| | |
|---|--|
| | section of the relevant Product Summary for further information. |
| Market and Credit Risks | |
| <p>You are exposed to economic, political and regulatory risks -Such risks are prevalent in developed as well as emerging markets, both of which the Fund may invest in, but these risks may be especially variable in emerging markets.</p> <p>Your investments are subject to interest rate risk -Movements in interest rates may negatively affect the value of the Fund's investments in debt securities. Debt securities with longer-term maturities tend to be more sensitive to interest rate changes than shorter-term securities.</p> <p>You are exposed to credit risks of issuers -If an issuer fails to make principal and interest payments when due, the value of your investments in such issuers will be adversely affected. This Fund invests principally in government securities where there is generally less risk of default than in the case of corporate securities.</p> <p>-The Fund may invest in low-rated, unrated or non-investment grade debt securities or instruments. Such investments may fluctuate significantly, more so than investment grade securities, and there is a greater likelihood that the issuer may default, subjecting your investment to losses.</p> <p>Your investments are subject to currency movement risks -Securities held by the Fund may be denominated in currencies different from its base currency. The Fund may seek to hedge currency exposures or take a currency position for investment purposes, exposing your investment to losses if currencies move against these positions.</p> | |
| Liquidity Risks | |
| <p>You are exposed to liquidity risks -The Fund may not be able to easily sell its securities during an economic event or due to deterioration in the creditworthiness of issuers in which it invests.</p> <p>-Shares of the Fund may be redeemed on any Dealing Day. However, during a period when trading on relevant exchanges or the over-the-counter market is substantially restricted or when market conditions make it impracticable to dispose of or value any of the Fund's investments, redemption of the Shares may be suspended.</p> <p>-Redemption of Shares in the underlying fund may be deferred when more than 10% of the value of the Fund's Shares are redeemed or exchanged on any one Dealing Day. This may in turn delay redemption of units in the ILP Sub-Fund.</p> | |
| Product-Specific Risks | |
| <p>You are exposed to derivative risk -The Fund may invest in derivatives which may be purchased on regulated markets or over-the-counter and may have less liquidity than conventional assets, exposing the Fund to higher risks and potential losses.</p> <p>-The Fund may invest in structured products and derivatives such as credit-linked securities, credit default swaps, total return swaps, interest rate, index or foreign exchange swaps, futures, forwards, and options, all of which are subject to significant liquidity and counterparty risks.</p> <p>-Use of derivatives may result in negative exposure to a specified yield curve or duration range or to a currency or credit, resulting in potential losses if the expected shift in the yield curve or changes in interest rates, currencies or credit spreads does not occur.</p> | |
| FEES AND CHARGES | |
| WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT? | -For full details of the charges that may apply |

Charges are deducted by both FPIL and the underlying investment managers at each valuation point before calculating the unit price, as set out below.

FPIL charges (payable directly by you)

- You will need to pay an ILP Sub-Fund administration charge of 1.2%.
- There is currently no charge for switching funds although switching to a fund which differs from your plan currency may involve a cost associated with currency exchange. However, we reserve the right to charge for switches under certain conditions.
- Any sales and/or redemption charges will be determined by the terms of your Policy Conditions.

Underlying investment managers' charges (these charges are as at 03/03/21 and are payable by the ILP Sub-Fund from invested proceeds)

| | |
|--------------------------------|-------|
| Annual Management Charge (AMC) | 0.75% |
| Additional Expenses | 0.66% |
| Expense Ratio* | 1.41% |
| Performance Fee | Nil |

*Please note that with effect from 02 July 2015, the Total Expense Ratio (TER) has been replaced by the Ongoing Charges Figure ("OCF"), which is quoted above as Expense Ratio.

please refer to the 'Fees and Charges' section in the relevant Product Summary.
-Please refer to the 'Charges' section of your Policy Conditions for further information.

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

Every UK Business Day
Latest fund prices can be obtained from <http://www.fpinternational.sg/fund-centre/>

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

-There is a Cooling off period of 14 days from when you receive your Policy Documents. If you decide to exit the policy during this time you should complete the cancellation form and send this back to the address provided, together with the original Policy Documents. We will refund any monies paid, less any shortfall (if any) which may result if the value of your investment falls by the time you tell us of your wish to cancel. If you elect to exit your policy after the Cooling off period has expired, penalties may be applied.

-If you no longer wish to invest in this FPIL ILP Sub-fund you have selected, you may switch all or part of your holdings into alternative fund(s) by sending us a completed Fund Transfer Request form, signed. Switching from one fund to another is done on a bid to bid basis, without charge (although we do reserve the right to charge). If you are switching between currencies, the relevant exchange rates will be applied and shown on your switch confirmation.

The sale proceeds that you will receive will be the realisation price multiplied by the number of units sold, less any charges. An example (assuming a redemption charge of 4%) is as follows*:

| | | | |
|-----------------------------------|-----------------------------|---|-----------------------------------|
| <u>Realisation price</u> | <u>Number of units sold</u> | = | <u>Gross Realisation Proceeds</u> |
| S\$0.93 | X 100,000 | | S\$93,000 |
| <u>Gross Realisation Proceeds</u> | <u>Realisation Fee</u> | = | <u>Net Realisation Proceeds</u> |
| S\$93,000 | - S\$3,720 | | S\$89,280 |

Additional Information

-Please refer to the 'Valuations and Pricing' section of your Policy Conditions and 'Appendix D - Determination of the Net Asset Value of Shares - Swing Pricing Adjustment' section of the underlying fund's Luxembourg Prospectus for further information.

*For full details of the charges that may apply please refer to the 'Fees and Charges' section in the relevant Product Summary.

APPENDIX : GLOSSARY OF TERMS**Credit Rating**

A rating used to measure the quality of a bond, in particular the bond issuer's ability to meet its debt obligations. The highest rating is usually AAA, and the lowest is D. Investment grade bonds are those that are rated BBB above or equivalent and sub-investment grade bonds are those rated below BBB or equivalent.

Debt Obligation

This is a general term for bonds, mortgages, and other kinds of loans.

Debt Security

A debt investment, with which the investor loans money to an entity (company or government) that borrows the funds for a defined period of time at a specified interest rate. The indebted entity issues investors a certificate, or bond, that states the interest rate (coupon rate) that will be paid and when the loaned funds are to be returned (maturity date).

Derivatives

Also known as Financial Derivative Instruments (FDI). Financial contracts whose value is tied to an underlying asset. Derivatives include futures and options.

Efficient Portfolio Management (EPM)

EPM is a set of standards for prudent management of investment funds. The standards call for economically appropriate transactions that reduce risk, reduce cost or generate additional capital or income. For example, a currency overlay strategy using derivative instruments could be used to reduce volatility in asset returns resulting from currency fluctuations or be used to take advantage of these fluctuations to gain extra return.

Expense Ratio

The expense ratio provides customers with an indication of the overall costs of investing in a particular fund.

The expense ratio as calculated in accordance with the Investment Management Association of Singapore's guidelines on the disclosure of expense ratios. Different methods of calculation of expense ratio can be used, including Total Expense Ratio (TER) and Ongoing Charges Figure (OCF) but these are broadly the same.

Forward

A contract between two parties to buy or sell an asset at a specified future date at a price agreed today.

Future

A financial contract obligating the buyer to purchase an asset (or the seller to sell an asset), such as a physical commodity or a financial instrument, at a predetermined future date and price.

Hedge / Hedging

Any transaction with the objective of limiting exposure to risk such as changes in exchange rates or prices.

Investment Grade

A rating that indicates that a municipal or corporate bond has a relatively low risk of default.

Ongoing Charges Figure (OCF)

A type of expense ratio. The ongoing charges figure is based on expenses for the previous year and is a ratio of the total ongoing charges to the fund's average net asset value over its last reporting period. This figure may vary from year to year. The charges you pay are used to pay the costs of the underlying ILP sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

For more information about charges, please consult the Prospectus for the underlying fund of the ILP sub-fund invested in,

available from <http://www.fpinternational.sg/fund-centre/product-highlight-sheets.jsp>.

Details of the calculation methodology can be found in full at http://www.esma.europa.eu/system/files/10_674.pdf.

Open-ended Collective Investment Scheme

An open ended arrangement that enables a number of investors to 'pool' their assets and have these professionally managed by an independent manager.

Option

A privilege sold by one party to another that offers the buyer the right, but not the obligation, to buy (call) or sell (put) a security at an agreed-upon price during a certain period of time or on a specific date.

Rated Securities

Debt instruments that have been rated on their credit quality by a credit rating agency.

Specified Investment Product (SIP)

SIP is a class of investment products defined by the Monetary Authority of Singapore (MAS). Generally, (although not in all instances), financial advisers have to carry out more due diligence, including customer knowledge assessment, when advising about a SIP.

Structured Products

Investment instruments specially created to meet specific needs that cannot be met from standardised financial instruments of which the structured product is based upon. Examples of Structured Products are Mortgage Backed Securities, Asset Backed Securities and Structured Notes.

Swap

The exchange of one security for another to change the maturity (bonds), quality of issues (stocks or bonds), or because investment objectives have changed.

Total Return Swap

A swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loans, or bonds. This is owned by the party receiving the set rate payment.

Total return swaps allow the party receiving the total return to gain exposure and benefit from a reference asset without actually having to own it. These swaps are popular with hedge funds because they get the benefit of a large exposure with a minimal cash outlay.

Undertakings for Collective Investment in Transferable Securities (UCITs)

A type of collective investment (or fund) Undertakings for Collective Investment in Transferable Securities (UCITS) allow financial institutions to operate freely throughout the European Union on the basis of a single authorisation from one member state.

Yield Curve

A graph plotting the relationship between the interest rate and the time to maturity of a debt instrument. Yield curves are usually upward sloping the longer the maturity, the higher the yield as longer maturities typically entail greater risk for the investor.
