SUB-FUND SUITABILITY

WHO IS THE SUB-FUND SUITABLE FOR?

The ILP Sub-Fund is only suitable for investors who seek long-term capital growth through investment in Global Emerging Equity markets. It may not be suitable for investors who wish to withdraw their capital from the Sub-Fund within a short or medium timeframe.

It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a Fund may not be denominated in the currency of that Fund, so unit prices may fall purely on account of exchange rate fluctuations.

Please note that Friends Provident International Limited ("FPIL") investment products are intended for medium to long term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

Additional Information

-For details of surrender charges please refer to the 'Fees and Charges' section in the relevant Product Summary.

-Please refer to Appendix 6 Investor Profile of the underlying Fund's Singapore Prospectus for further information on the suitability of the Sub-Fund.

Market and Credit Risks
Market Risks

-The Fund is exposed to various general trends and tendencies in the economic and political situation as well as securities markets and investment sentiment, which are partially attributable to irrational factors. Such factors could lead to substantial and longer-lasting drops in prices affecting the entire market.

Foreign Exchange Risks

-The underlying assets of the Fund may be denominated in currencies other than the currency of the share class you have invested into. The value of your investment may rise or fall in line with movements in the relevant exchange rates.

Liquidity Risks
Liquidity Risks

-The Fund may be adversely affected by a decrease in market liquidity for the securities in which it invests which may impair the Fund's ability to execute transactions. In such circumstances, some of the Fund's securities may become illiquid which may mean the Fund may experience difficulties in selling securities at a fair price within a timely manner.

Product-Specific Risks
Financial Derivative Instrument Risks

-The Fund may have exposure to derivatives for investment purposes or for Efficient Portfolio Management. Given the Leverage effect embedded in derivatives, such investments may result in higher volatility or a significant loss in the Fund's assets within a short period of time.

Chinese Market Risks

-Investing in Emerging Markets such as the PRC subjects the Sub-Fund to a higher level of market risk than investments in a developed country. This is due to, among other things, greater market volatility, lower trading volume, political and economic instability, settlement risk, greater risk of market shut down and more governmental limitations on foreign investment than those typically found in developed markets.

Stock Connect Risks

-Investments through the Stock Connect are subject to additional risks, namely, quota limitations, suspension risk, operational risk, restrictions on selling imposed by front-end monitoring, recalling of eligible stocks, clearing and settlement risks and regulatory risk.
