SUB-FUND SUITABILITY

WHO IS THE SUB-FUND SUITABLE FOR?

The ILP Sub-Fund is only suitable for investors who want their investment to fully contribute to a sustainable objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. This Sub-Fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years.

It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a Fund may not be denominated in the currency of that Fund, so unit prices may fall purely on account of exchange rate fluctuations.

Please note that Friends Provident International Limited ('FPIL') investment products are intended for medium to long term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

Please refer to the Fund's section in 'Appendix I - Information Per Sub-Fund' of the underlying Fund's Prospectus for further information on the suitability of the Sub-Fund.

In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.</p> <p>-The Fund is actively managed. The majority of stocks selected will be components of the benchmark, but stocks outside the benchmark may be selected too. Market and Credit Risks
Foreign Exchange Risks

-The underlying assets of the Fund may be denominated in currencies other than the currency of the share class you have invested into. The value of your investment may rise or fall in line with movements in the relevant exchange rates.

Liquidity Risks
Liquidity Risks

-The Fund may be adversely affected by a decrease in market liquidity for the securities in which it invests which may impair the Fund's ability to execute transactions. In such circumstances, some of the Fund's securities may become illiquid which may mean the Fund may experience difficulties in selling securities at a fair price within a timely manner.

Product-Specific Risks
Financial Derivative Instruments Risks

-The use of Financial Derivative Instruments may give rise to Leverage, liquidity, counterparty and valuation risks at times. Given the Leverage effect embedded in derivatives, such investments may result in higher Volatility or a significant loss in the Fund's assets within a short period of time.

Stock Connect Risks

-The Fund may invest and have direct access to certain eligible China A-Shares via the Shanghai-Hong Kong Stock Connect programme, and, as such, may be subject to additional risks. This programme is novel in nature and the relevant regulations are untested and subject to change. There is no certainty as to how they will be applied.

Emerging Market Risks

-Emerging markets are less established and more prone to political events than developed markets, such as government intervention, remittance of Funds or quota restrictions, unorthodox custody practices, unproven trading programs and uncertain legal rights. This can mean both higher Volatility and a greater risk of loss to the Fund than when investing in more developed markets.
